Reading Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 681-831

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 87-237

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 465-615

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 339-489

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 537-687

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range: 375-525

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

General Science Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Reading Goals Performance - Spring 2013

There were no test events found for the selected term, Spring 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 537-687

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Fall 2013

Literary Texts	Low
Informational Texts	Low
Building Vocabulary	Low

Lexile® Range: 411-561

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Fall 2013

There were no test events found for the selected term, Fall 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Fall 2013

There were no test events found for the selected term, Fall 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: BR

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 267-417

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. Literary Texts	High
Informational Texts	High
Building Vocabulary	High

Lexile® Range: 699-849

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 213-363

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 303-453

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 735-885

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Concepts and Processes Goals Performance - Fall 2012

Hypothesize / Ques / Design	Low
Design Sci Investigations	LoAvg

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 195-345

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: BR

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Building Vocabulary	Low

Lexile® Range: 393-543

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 735-885

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range: 861-1011

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 159-309

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 681-831

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

General Science Goals Performance - Fall 2013

There were no test events found for the selected term, Fall 2013

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 698-849

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 951-1101

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Reading Goals Performance - Fall 2013

Literary Texts	Low
Informational Texts	Low
Building Vocabulary	Low

Lexile® Range: 447-597

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

Lexile® Range: 1005-1155

Explanatory Notes:

Season/Year
The season (F=fall, S=spring, W=winter, U=summer) and the year the test was administered.

Student Score Range
The middle number is the RIT score your child received. The numbers on either side of the RIT score define the score range. If retested, your child would score within this range most of the time.

District Average RIT
The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

The average score for all students in the school district in the grade who were tested at the same time as your child.

Norm Group Avg.
The average score observed for students in the most recent NWEA RIT Scale Norms study, who were in the same grade and tested in the same portion of the instructional year (e.g., fall or spring).

Student Growth
Presents the growth in RITs your child made from the previous fall to the spring of the year in which growth is reported.

Typical Growth
The average growth of students in the most recent NWEA RIT Scale Norms study who were in the same grade and began the growth comparison period at a similar achievement level.

Student %ile Range
The number in the middle is your child's percentile rank - the percentage of students in the most recent NWEA RIT Scale Norms study that had a RIT score less than or equal to your child's score. The numbers on either side of the percentile rank define the percentile range. If retested, your child's percentile rank would be within this range most of the time.

Goal Performance
Each goal area included in the test is listed along with a descriptive adjective of your child's score. The possible descriptors are Low (<21 percentile), LoAvg (21-40 percentile), Avg (41-60 percentile), HiAvg (61-80 percentile), and High (>80 percentile).

Lexile® Range
The difficulty range of text that can be understood by the student 75% of the time. Lexile® is a trademark of MetaMetrics, Inc., and is registered in the United States and abroad.

SUMMARY OF SPECIAL EDUCATION DATA FOR LAKE CITY COLLEGE PREPARATORY ACADEMY

As of the date of the Board's revocation recommendation (3/3/14) LCCPA had:

- **42 of 44 IEPs that were noncompliant**
- **8 overdue reevaluations**
- **42 of 44 students who had not had progress reports given as mandated by their IEPs**

Compliant IEPs by review dates:

- As of 12/18/12 there were 0 IEPs that were compliant; 38 IEPs were noncompliant.
- As of 4/22/13 there were 0 IEPs that were compliant; 43 IEPs were noncompliant.
- As of 4/11/14 there were 15 IEPs that were compliant; 31 IEPs were noncompliant.

24 IEPs initially identified as being noncompliant on 12/8/12 still have noncompliant IEPs 1 years, 4 months later.

Annual Reviews held on time by year:

- 2010-11 had 22 ARs held on time; 1 not on time
- 2011-12 had 22 ARs held on time; 3 not on time
- 2012-13 had 9 ARs held on time; 34 not on time
- As of 5/6/14, 2013-14 had 22 held on time; 16 are overdue

Reevaluation determinations not conducted on time by year:

- 2010-11 had 5 reevaluations not held on time
- 2011-12 had 3 reevaluations not held on time
- 2012-13 had 5 reevaluations not held on time
- 2013-14 had 8 reevaluations not held on time

Progress Reports for 2013-14

- 2 students had progress reports issued according to their IEPs (every 9 weeks from the date of initiation)
- 42 students have not had progress reports issued according to their IEPs
