Corrected typo where the appellate Jaime Hood Hopkins was left out.

Your Honor,

Please see attached files for our response to the petition for Supersedeas.

Please see through the veil of perjury which is frivolously being used to build a wall around a child we raised for the first seven and a half years of her life. Our Grandchild has been poisoned and lied to out of fear of exposure by the appellate living a past life of injection opiate abuse. We have shared nothing with the minor child about any of the litigation, nor talked about her at all, however; she on the other hand, the appellate, Jaime Hood Hopkins, has shared everything and has told her from day one the courts have ordered (we) not be around her when it was never a fact until the unjust restraining order. That is why her fight continues, to attempt to have (for once), factual evidence to keep us away.

Please do not allow this shameful act and look at the proof we have submitted in black and white to discount all areas of the affidavit in this filing and the previous filing.

Respectfully,
Greg and Amy Hopkins
