

Dear Court of Appeals,

I am reaching out to appeal some of the time I was sentenced. I did not go through a proper mental health evaluation and at the time of the crime I was not stable. As far as my medication situation before the incident I had no doctor or physician to prescribe me medication, nor did I have any form of insurance to pay for the medication itself. I was aware of my medical conditions but I was not being treated for them, I just recently been diagnosed with some other things that I should have been treated for a long time ago by a psych doctor. I feel that the judge erred in giving me a full mental health evaluation about my mental state, I only received a competence evaluation. I also feel I received too much time being locked up period. I understand the severity of my crime but I deserve another chance at life too, I have no criminal history whatsoever.
