Columbia, SC 29211

Re: Kincannon v. Griffith, Appellate Case No. 2022-001749
Appellant's Motion for Extension re Computer Failure

Ms. Kitchings:

My Reply Brief in the above matter was due November 1, 2023. I was unable to comply with the deadline because of a computer failure and submitted by postal mail a handwritten motion for extension to November 6, 2023. I would respectfully request the extension be to **November 8, 2023** rather than November 6, 2023, as I was unable to obtain a new computer until yesterday evening due to financial reasons. (I had also intended to file a motion to strike certain material in Respondent's Initial Brief due to being outside the record below, which I would also file by November 8, 2023 should the Court allow.)

I am also enclosing pictures of the screen of my old computer confirming the computer failure, which I would respectfully request the Court accept as a supplement to my motion and consider when deciding whether to grant my motion. I was unable to send them until now due to the lack of a computer.

Please let me know if you have any questions.

With kindest regards, I remain,

Very truly yours,

s/J. Todd Kincannon

A problem has been detected and windows has been shut down to prevent damage to your computer.

If this is the first time you've seen this stop error screen, restart your computer. If this screen appears again, follow these steps:

Check to make sure any new hardware or software is properly installed. If this is a new installation, ask your hardware or software manufacturer for any windows updates you might need.

If problems continue, disable or remove any newly installed hardware or software. Disable BIOS memory options such as caching or shadowing. If you need to use Safe Mode to remove or disable components, restart your computer, press F8 to select Advanced Startup options, and then select Safe Mode.

Technical information:

*** STOP: 0xDEADDEAD (0x00000000F00004B, 0x000000000023002C, 0x0000000012A60000, 0x0000000000000000)

Collecting data for crash dump ...
Initializing disk for crash dump ...
Beginning dump of physical memory.
Dumping physical memory to disk: 100

Alert! The AC power adapter wattage and type cannot be determined. The battery may not charge. The system will adjust the performance to match the power available.

Strike the F3 key (before the F1 or F2 key) if you do not want to see power warning messages again.

To continue press F1 key

To change setup option press F2 key

To run onboard diagnostics press F5 key
