The After Effects of Covid-19: A Plea for Help

Introduction

The Covid-19 pandemic has wreaked havoc on the lives of millions of people around the world. As we slowly emerge from the grips of this devastating virus, many individuals, myself included, continue to suffer from lingering health issues. In this petition, I seek justice and relief for the physical and mental ailments I am experiencing as a result of Covid-19. Additionally, I implore the court to address the systemic deficiencies within the healthcare system of the South Carolina Department of Corrections (SCDC), which have had dire consequences for numerous inmates.

Breathing Difficulties and Skin Problems

One of the most distressing after-effects I have encountered is difficulty breathing through my nose. Even long after recovering from Covid-19, I find myself struggling to take in air properly. This persistent issue hampers my daily activities and quality of life. Furthermore, my skin has undergone changes, becoming more sensitive and prone to irritation. These symptoms have caused immense discomfort and distress, affecting my overall well-being.

Cardiac Issues and Physical Pain

In addition to respiratory and dermatological challenges, I have noticed an increased heart rate at irregular intervals. This rapid beating causes anxiety and further exacerbates my already compromised physical state. Moreover, I have been suffering from persistent pain in my tailbone, likely resulting from prolonged periods spent on steel beds or benches. This pain is debilitating and affects my ability to perform simple tasks.

Seeking Justice and Relief

In light of the aforementioned health issues, I humbly request the court's attention to my plight. I implore the court to invoke Rule 35, which permits a physical and mental examination by a qualified medical professional. Such an examination would provide valuable insight into the extent of my health concerns and aid in determining an appropriate course of action for treatment and relief.

SCDC's Healthcare System and Lack of Resources

It is not only my personal suffering that I wish to address, but also the systemic failures within SCDC's healthcare system. The compactly of air in cells, improper flushing of toilets, and inadequate cleaning chemicals in rooms and dormitories have contributed to an environment that compromises the health and safety of inmates. Furthermore, the lack of a toilet brush for seventeen years is a gross negligence that should not be tolerated.

Inadequate Nutrition and Inspection

The provision of nutritionally deficient meals and inadequate kitchen trays, as well as poor inspection practices, are additional concerns that must be addressed. Proper nutrition is crucial for maintaining overall health, especially during these trying times. The inspection of

facilities, including cameras monitoring Covid-19 protocols, is crucial for identifying and rectifying potential risks to the well-being of inmates.

The Devastating Consequences

The absence of necessary resources within SCDC has resulted in the tragic loss of many lives and has inflicted immeasurable pain and suffering on countless individuals and their families. The lack of a comprehensive Covid-19 Statute has left nearly one hundred inmates dead, which is a clear breach of contract on the part of SCDC. It is imperative that justice is served for these preventable tragedies.

A Call for Action

In light of the overwhelming evidence presented, I beseech the court to take immediate action. I implore the court to interpret the 1.2 billion dollars within my petition as a means to fulfill God's purpose in rectifying these injustices. Moreover, I urge the court to release all inmates within SCDC due to the blatant breach of contract that has resulted in death, suffering, and irreparable damage to families. The time for change is now.

Conclusion

Covid-19 has left a lasting impact on my physical and mental health, as well as on the systemic deficiencies within SCDC's healthcare system. With this petition, I seek justice, relief, and a brighter future for all those affected by the negligence and failures of SCDC. It is my fervent hope that the court will heed my plea and take swift action to rectify these grave injustices. Together, we can ensure a better tomorrow for all.
