I wanted to follow up on the documents that I have filed and received stamped copies of filings back on that are not yet uploaded to the public index. Inclusive of the etter to the court regarding the opposing council's ex-parte communications, along with the correction to the statement of deficiency, and the response to the opposing council's motion to the dismiss.

Can you please advise as to why none of these items have been uploaded to the public index?

Best Regards,
Roberta Moore

It has come to the attention of the Appellant that the Respondent has communicated to the Lead Clerk Administrator, as well as, to the Honorable Judge Gibbons of the Circuit Court on multiple occasions without informing the Appellant and in doing so, requested and stated that she acquired signatures on new documents that directly affect the Judges order. Please see attached request for filing.
