Please see attached and above as I believe should be direct and clear evidence to this court of the attempts to make payment to adhere to conditions of the appeal Bond not only by the first but before the first numerous attempt so not only was there no willful violation of the bond which was used by judge cobal to issue the rent but I believe this is directed evidence to the opposite of that that the apartment complex didn't want the money and did everything in their power not to get it and I believe that the court should rule and that there was no violation of the bond conditions I should either reset the bond or send it to another judge or to the original judge that set the initial field on back in September at the magistrate level judge Michael Scott says he's aware of this whole case. There was never anything never any warning never anything not only would you be taking my place we should be taking my life I will lose everything that I own and I've done nothing wrong and I believe I've provided clear and concise evidence that the new writ should be thrown out in an emergency injunction just as you did before... I promise this court and it provided clear evidence that no I did I not violate the bond conditions but I got no trial no nothing and I believe the law also allows for people under the Ada especially homebound crippled people more than 24 hours anyway.. Please my life is in your hands I'm sorry that I'm scared I trust this court will do what it did before
Please I'm at the mercy of this court
Sincerely
Kevin j Smith
