My response to the information I received on August 28 2025 as it's my right to point out issues concerning this appeal. Which I haven't not received any notification of a dismissal from the court. But it's very clear that this court is showing favoritism. Because the notice I received in July stated that a brief and matter of destination would be documents I would be receiving but those 30 have passed. It's apparently that the bias and racism is in this agency also but I'm waiting patiently documenting all correspondence concerning this case. Here is a rule 260 that shows the court disregarding the rules that they choose not to follow. Benjamin Moses
