On September 18 2025 I received documents that the court deny the dismissal by the respondents but didn't received these documents until today. Which stated again that I'll receive there brief and destination of matter within 30 days. Which the court didn't no anything about the pursuant to rule 267 (SCACR). The document I'm forwarding was not attached to the email concerning any further documents that should submit. It clear to me that the respondents are doing everything to continue to violate my rights under the law due process and court is violating the court process and clear in my opinion that they are being paid or manipulated by the defendants to sweep that case under the rug but as I've said wcc and the attorneys who now is clear to me shows that the liability policy that I was cover under the time of my accident and unfair justice I received is unconstitutional and now this court is playing the same racist and bias tactics. Here is the undocumented document I received.
