APPLICATION BY A FOREIGN CORPORATION
FOR A CERTIFICATE OF AUTHORITY
TO TRANSACT BUSINESS
IN THE STATE OF SOUTH CAROLINA

TYPE OR PRINT CLEARLY WITH BLACK INK

Pursuant to Section 33-15-103 of the 1976 South Carolina Code of Laws, as amended, the undersigned corporation hereby applies for authority to transact business in the State of South Carolina, and for that purpose, hereby submits the following statement:

1. The name of the corporation is (see Sections 33-4-101 and 33-15-106 and Section 33-19-500(b)(1) if the corporation is a professional corporation) LG Chem America, Inc.
2. It is incorporated as (check applicable item) ☒ a general business corporation, ☐ a professional corporation, under the laws of the state of Delaware
3. The date of its incorporation is 3/1/2009 and the period of its duration is perpetual
4. The address of the principal office of the corporation is 910 Sylvan Avenue in the city of Englewood Cliffs and the state of New Jersey
Street Address Zip Code
5. The address of the proposed registered office the state of South Carolina is
1703 Laurel Street in the city of Columbia in
Street Address Zip Code
South Carolina 29201
Zip Code
6. The name of the proposed registered agent in this state at such address is
Corporation Service Company
Print Name

I hereby consent to the appointment as registered agent of the corporation.

STATE OF SOUTH CAROLINA	)	IN THE COURT OF COMMON PLEAS
	)	
COUNTY OF FLORENCE	)	TWELFTH JUDICIAL CIRCUIT
	)	
RANEE MICHELLE MOORE,	)	CIVIL ACTION NO. 2018-CP-21-02884
	)	
Plaintiff,	)	
	)	
v.	)	ORDER DENYING LG CHEM,
	)	AMERICA, INC.'S, MOTION TO
	)	DISMISS
PLANET VAPOR, INC., LG CHEM,	)	
LTD., and LG CHEM AMERICA, INC.	)	

This matter came before the Court for a hearing on April 2, 2019, on Defendant LG Chem America, Inc.'s ("LGA") motion to dismiss for lack of personal jurisdiction. After reviewing the parties' submissions and hearing argument of counsel, the Court denies LGA's motion for the reasons stated below.

FACTS AND PROCEDURAL HISTORY

This is a product liability action involving an allegedly defective lithium ion battery used for an e-cigarette device. Plaintiff, a South Carolina citizen, alleges that on March 9, 2016, the battery, while in her pants pocket, exploded and burst into flames, causing severe burn injuries. The injuries occurred in Florence, South Carolina. Defendant Planet Vapor, Inc., is a retail store in Columbia, South Carolina, that sold the battery and e-cigarette device to Plaintiff. (Cmplt. ¶ 2). Defendant LGA, a Delaware corporation, and Defendant LG Chem, Ltd., ("LG"), a South Korean corporation, allegedly designed, manufactured, imported, and sold the battery. *Id.* at ¶¶ 3-6.

On October 31, 2018, Plaintiff filed this action in Florence County, South Carolina. The Complaint asserts causes of action for negligence, strict liability, and breach of warranty against all Defendants. As to LGA, Plaintiff alleges LGA has "continuing contacts with South Carolina by transacting substantial business in this state and manufacturing, distributing, and/or selling

goods with the reasonable expectation that they will be used in this state and which are in fact used in this state.” (Cmplt. ¶ 7).

On December 21, 2018, LGA filed a motion to dismiss for lack of personal jurisdiction, along with an affidavit of HyunSoo Kim, an LGA Compliance Manager. Mr. Kim states, *inter alia*, that LGA is incorporated in Delaware with its principal place of business in Georgia. (Aff. ¶3). It does not own or rent property in South Carolina. *Id.* at ¶ 5. In 2017, LGA generated 1.27% of its revenue in South Carolina. *Id.* at ¶ 7. Mr. Kim attests that LGA did not design, manufacture, import or sell a lithium-ion battery in South Carolina. *Id.* at ¶ 8.

On April 2, 2019, Plaintiff filed a memorandum in opposition to the motion to dismiss, along with a South Carolina Certificate of Authority for LGA and hundreds of import records for the Port of Charleston. On September 15, 2010, LGA obtained a Certificate of Authority from the South Carolina Secretary of State that authorizes it to transact business in South Carolina. (Exh. 2). LGA maintains a registered agent in Columbia, South Carolina. *Id.* The import records show that from December 2016 to February 2019, LGA received as consignee approximately 244 product shipments from LG to the Port of Charleston in South Carolina. (Exh. 3). LGA is a wholly-owned subsidiary of LG, and LGA’s business activities for LG are “sales and trading” of its products within the United States.¹

STANDARD

“The question of personal jurisdiction over a nonresident defendant is one which must be resolved upon the facts of each particular case. The decision of the trial court should be affirmed unless unsupported by the evidence or influenced by an error of law.” *Moosally v. W.W. Norton &*

¹ See LG Chem, Ltd. and Subsidiaries, *Consolidated Interim Financial Statements*, June 30, 2018 and 2017, http://www.lgchem.com/upload/file/audit-report/2018_2Q_ConFS_ENG.pdf at p. 10.

Co., 358 S.C. 320, 327, 594 S.E.2d 878, 882 (Ct. App. 2004) (internal citation omitted). When addressing a motion to dismiss for lack of personal jurisdiction, “‘Courts will take as true the allegations of the nonmoving party and resolve all factual disputes in its favor.’ This includes any factual disputes brought up by submitted affidavits.” *Brown v. Investment Mgmt. & Research*, 323 S.C. 395, 399, 475 S.E.2d 754, 756 (1996) (quoting 5A Charles A. Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1351 (Supp. 1995)).

ANALYSIS

Taking as true all allegations of Plaintiff and resolving all factual disputes in her favor, the Court finds there are sufficient minimum contacts between LGA and South Carolina to support exercising specific personal jurisdiction² over LGA.

“Specific jurisdiction over a cause of action arising from a defendant’s contacts with the state is granted pursuant to the long arm statute.” *Id.* at 491, 611 S.E.2d at 508 (citing S.C. Code Ann. § 36-2-803 (2003)). “South Carolina’s long-arm statute . . . has been construed to extend to the outer limits of the due process clause.” *Cockrell v. Hillerich & Bradsby Co.*, 363 S.C. 485, 491, 611 S.E.2d 505, 508 (2005). Therefore, “the sole question becomes whether the exercise of personal jurisdiction would violate due process.” *Id.*

“Due process requires that there exist minimum contacts between the defendant and the forum state such that maintenance of the suit does not offend traditional notions of fair play and substantial justice.” *Cockrell*, 363 S.C. at 491, 611 S.E.2d at 508. “[D]ue process mandates that the defendant possess sufficient minimum contacts with the forum state, so that he could reasonably anticipate being haled into court there.” *Id.* at 491-92, 611 S.E.2d at 508. This is the “‘stream of commerce’ theory” used by South Carolina courts. *State v. NV Sumatra Tobacco*

² Plaintiff did not dispute LGA’s argument as to general jurisdiction.

Trading, Co., 379 S.C. 81, 89, 89 n.5, 666 S.E.2d 218, 222, 222 n.5 (2008) (“declin[ing] to embrace the ‘stream of commerce plus’ theory”).³ “It is essential in each case that there be some act by which the defendant purposefully avails itself of the privilege of conducting activities within the forum state, thus invoking the benefits and protections of its laws.” *Moosally v. W.W. Norton & Co.*, 358 S.C. 320, 332, 594 S.E.2d 878, 884 (Ct. App. 2004).

“The court must also find that the exercise of jurisdiction is reasonable or fair.” *Cockrell*, 363 S.C. at 492, 611 S.E.2d at 508 (internal quotation marks omitted). “Under the fairness prong, the court must consider: (1) the duration of the activity of the nonresident within the state; (2) the character and circumstances of the commission of the nonresident’s acts; (3) the inconvenience resulting to the parties by conferring or refusing to confer jurisdiction over the nonresident; and (4) the State’s interest in exercising jurisdiction.” *Id.*

Initially, the Court finds Plaintiff proves personal jurisdiction based on the pretrial stage pleadings. “At the pretrial stage, the burden of proving personal jurisdiction over a nonresident is met by a prima facie showing of jurisdiction either in the complaint or in affidavits.” *Cockrell*, 363 S.C. at 491, 611 S.E.2d at 508. “There is no ‘other evidence’ requirement for personal jurisdiction where the complaint itself demonstrates jurisdiction.” *Mid-State Distribs. v. Century Imps.*, 310 S.C. 330, 332, 426 S.E.2d 777, 779 (1993). Plaintiff alleges in the Complaint that LGA has “continuing contacts with South Carolina by transacting substantial business in this state and manufacturing, distributing, and/or selling goods with the reasonable expectation that they will be used in this state and which are in fact used in this state.” (Cmplt. ¶ 7). This demonstrates specific personal jurisdiction under the long-arm statute and due process analysis by asserting sufficient

³ See also *Sheppard v. Mercedes-Benz USA, LLC*, C/A No. 2010-CP-38-1558 (Nov. 15, 2012), p. 7 (affirming South Carolina’s use of the stream of commerce theory pursuant to *Sumatra Tobacco*).

minimum contacts and the fairness and expectation of being haled into court in South Carolina under the stream of commerce theory.

Alternatively, the Court also finds that, based on the additional evidence submitted, Plaintiff demonstrates specific personal jurisdiction. LGA possesses sufficient minimum contacts with South Carolina so that it should reasonably anticipate being haled into court here.

Under South Carolina's long-arm statute,

A court may exercise personal jurisdiction over a person who acts directly or by an agent as to a cause of action arising from the person's: (1) transacting any business in this State; (2) contracting to supply services or things in the State; . . . (4) causing tortious injury or death in this State by an act or omission outside this State if he regularly does or solicits business, or engages in any other persistent course of conduct, or derives substantial revenue from goods used or consumed or services rendered in this State.

S.C. Code Ann. § 36-2-803(A). LGA has a presence in South Carolina in the form of being registered to transact business here, having a registered process agent here, continuously and regularly using a State port to conduct its business activities, and deriving revenue from South Carolina. Plaintiff points to LGA's Certificate of Authority to transact business as evidence that supports the exercise of personal jurisdiction. The Court agrees. Section 33-15-101 of the South Carolina Code lists 13 categories of activities that are **not** considered transacting business in South Carolina. S.C. Code Ann. § 33-15-101. LGA's decision to obtain a Certificate of Authority demonstrates that its activities in South Carolina are more substantial than those listed in § 33-15-101. Further, by obtaining a Certificate of Authority, LGA agreed at a minimum to the jurisdiction of the South Carolina Department of Revenue and our Courts to determine its South Carolina tax liability. S.C. Code Ann. § 33-15-105(d). Along with the evidence of LGA's activities and conduct discussed below, this satisfies the minimum contacts analysis.

Plaintiff submitted an exhibit showing approximately 244 product shipments from LG to LGA as consignee through the Port of Charleston, South Carolina, from December 2016 to

February 2019. This is ample evidence that LGA transacted business in South Carolina; contracted to supply things in South Carolina; and caused injury in South Carolina when it regularly does or solicits business, or engages in a persistent course of conduct, or derives substantial revenue from goods used or consumed in South Carolina. *See* S.C. Code Ann. § 36-5-803(A); *Moosally*, 358 S.C. at 336, 594 S.E.2d at 886 (“W.W. Norton’s continual practice of marketing and distributing books in South Carolina satisfies the power prong of the due process analysis.”); *Catalana v. Carnival Cruise Lines, Inc.*, 618 F. Supp. 18, 22 (D. Md. 1984) (“By using the port of Baltimore as a site for regularly scheduling cruises, Carnival has purposefully availed itself of the privilege of conducting activities within the forum State, thus invoking the benefits and protections of its laws.”). LGA participated in the economic markets of this state and derived revenue from this state. Therefore, the minimum contacts prong is satisfied.

LGA lists in its memorandum and in Mr. Kim’s affidavit various products it sells and distributes, but specifically omits lithium-ion batteries from the list. The Court rejects this assertion because another court already found that “LGCAI is responsible for marketing LGC petrochemicals, information and electronic materials, and **batteries** to customers in the United States.” *Celgard, LLC v. LG Chem, Ltd.*, 2015 U.S. Dist. LEXIS 66600, *74, 2015 WL 2412467 (W.D.N.C. May 21, 2015) (emphasis added). Therefore, it should come as no surprise to LGA that the subject battery ended up in South Carolina and injured a South Carolina citizen.

The exercise of personal jurisdiction is also reasonable and fair. First, LGA has conducted activities in South Carolina for a sufficient duration. It obtained a Certificate of Authority to transact business in South Carolina over eight years ago and the import records show its use of the Port for over three years. Second, the character and circumstances of the commission of LGA’s acts support exercising personal jurisdiction. It consistently and repeatedly uses the Port of

Charleston and receives products directly to South Carolina. Third, there is no inconvenience to the parties by conferring jurisdiction over LGA. It is a U.S. corporation with a Certificate of Authority and registered agent in South Carolina. Fourth, and finally, South Carolina has an interest in exercising jurisdiction over LGA. “South Carolina has an interest in providing redress for its citizens.” *Cribb v. Spatholt*, 382 S.C. 490, 504, 676 S.E.2d 714, 721 (Ct. App. 2009) (citing *Burger King Corp. v. Rudzewicz*, 471 U.S. 462, 473 (1985) (“A State generally has a ‘manifest interest’ in providing its residents with a convenient forum for redressing injuries inflicted by out-of-state actors.”)). The Court has specific personal jurisdiction over LGA.

CONCLUSION

For the reasons stated above, the Court denies Defendant LG Chem America, Inc.’s motion.

AND IT IS SO ORDERED.

April 14, 2021
N/A

This matter came before the Court on April 14, 2021 on Defendant LG Chem, LTD's ("LGC") Motion to Dismiss, filed February 23, 2021. Representing the Defendant was Rachel A. Hedley, Esq. and Elizabeth S. Moise, Esq. Representing the Plaintiff was Harris I. Yegelwel, Esq. and Dylan A. Bess, Esq. This Motion is disposed of without the necessity of a hearing pursuant to the Chief Justice's April 3, 2020 Order, As Amended March 4, 2021, Section (c)(4). This Motion is listed on the April 14, 2021 Beaufort County Motions Roster published March 24, 2021. The Defendant filed Memoranda in Support on March 12, 2021, March 15, 2021, and April 8, 2021. The Plaintiff filed Memoranda in Opposition on March 12, 2021 and March 16, 2021.

PROCEDURAL HISTORY

This is a products liability case, in which the Plaintiff alleges that he was injured when a lithium ion battery he purchased from Defendant Pirate's Cove Vapor Lounge exploded in his pocket, causing second and third-degree burns to Plaintiff's body. Amended Complaint at Paragraphs 24-26, 33. The Plaintiff alleges that the battery was manufactured by Defendant LGC.

of personal jurisdiction over a nonresident defendant is one which must be resolved upon the facts of each particular case. Cockrell v. Hillerich & Bradsby Co., 363 S.C. 485, 491, 611 S.E.2d 505, 508 (2005). “The decision of the trial court should be affirmed unless unsupported by the evidence or influenced by an error of law.” Moosally v. W.W. Norton & Co., 358 S.C. 320, 327, 594 S.E.2d 878, 882 (Ct. App. 2004) (internal citation omitted).

“A prima facie showing of personal jurisdiction can be made through factual allegations in the complaint or through affidavits that establish a basis for the court to assert jurisdiction over an out-of state- defendant.” Sullivan v. Hawker Beechcraft Corp., 397 S.C. 143, 151, 723 S.E.2d 835, 839 (Ct. App. 2012) (citing S. Plastics Co. v. S. Commerce Bank, 310 S.C. 256, 259, 423 S.E.2d 128, 130 (1992)). When addressing a motion to dismiss for lack of personal jurisdiction, “[c]ourts will take as true the allegations of the nonmoving party and resolve all factual disputes in its favor.’ This includes any factual disputes brought up by submitted affidavits.” Brown v. Investment Mgmt. & Research, 323 S.C. 395, 399, 475 S.E.2d 754, 756 (1996) (quoting 5A Charles A. Wright & Arthur R. Miller, Federal Practice and Procedure § 1351 (Supp. 1995)).

“The concept of jurisdiction refers to the authority of a court over a particular person (personal jurisdiction) or the authority of a court to entertain a particular action (subject matter jurisdiction), but the concept does not refer to the validity of the claim on which an action against a person is based.” Cribb v. Spatholt, 382 S.C. 490 497, 382 S.E.2d 714, 718 (Ct. App. 2009) (citing Boan v. Jacobs, 296 S.C. 419, 421, 373 S.E.2d 697, 698 (Ct.App.1988)). Personal jurisdiction is exercised as “general jurisdiction” or “specific jurisdiction.”² Id. (citing Coggeshall v. Reprod. Endocrine Assocs. of Charlotte, 376 S.C. 12, 16, 655 S.E.2d 476, 478 (2007)).

² The Plaintiff does not appear to allege that this Court can exercise general jurisdiction over the Defendant LGC, therefore, the Court will only consider whether the Court can exercise specific jurisdiction over the Defendant LGC.

A. Specific Personal Jurisdiction

Courts may have specific jurisdiction over a cause of action arising from a defendant's contacts with the state pursuant to the long-arm statute.³ State v. NV Sumatra Tobacco Trading Co., 379 S.C. 81, 88, 666 S.E.2d 218, 222 (2008). “Traditionally, our courts have conducted a two-step analysis to determine whether specific jurisdiction is proper by 1) determining if the long arm statute applies and 2) determining whether the nonresident's contacts in South Carolina are sufficient to satisfy due process requirements. However, a more recent trend compresses the analysis into a due process assessment only.” Cribb, 382 S.C. at 498-99, 676 S.E.2d at 718-19 (internal citations omitted); see also Cockrell, 363 S.C. at 491, 611 S.E.2d at 508 (“Because South Carolina treats its long-arm statute as coextensive with the due process clause, the sole question becomes whether the exercise of personal jurisdiction would violate due process.”).

Due process requires a defendant possess minimum contacts with the forum state such that maintenance of suit does not offend traditional notions of fair play and substantial justice. Coggeshall, 376 S.C. at 16, 655 S.E.2d at 478. “Further, the due process requirement mandates the defendant possess sufficient minimum contacts with the forum state such that he could reasonably

³ Under South Carolina’s long arm statute, a court may exercise personal jurisdiction over an individual acting directly or through an agent for causes of action arising from the individual's:

- (1) transacting any business in this State; (2) contracting to supply services or things in the State;
- (3) commission of a tortious act in whole or in part in this State; (4) causing tortious injury or death in this State by an act or omission outside this State if he regularly does or solicits business, or engages in any other persistent course of conduct, or derives substantial revenue from goods used or consumed or services rendered in this State; (5) having an interest in, using, or possessing real property in this State; (6) contracting to insure any person, property, or risk located within this State at the time of contracting; (7) entry into a contract to be performed in whole or in part by either party in this State; or (8) production, manufacture, or distribution of goods with the reasonable expectation that those goods are to be used or consumed in this State and are so used or consumed.

S.C. Code Ann. § 36–2–803.

anticipate being haled into court there.” Power Prods. & Servs. Co. v. Kozma, 379 S.C. 423, 431, 665 S.E.2d 660, 664 (Ct.App.2008).

Courts apply a two-pronged analysis when determining whether a defendant possesses minimum contacts with the forum state such that maintenance of suit does not offend traditional notions of fair play and substantial justice. Cribb, 382 S.C. at 498-99, 676 S.E.2d at 718-19 (citing Power Prods., 379 S.C. at 432, 665 S.E.2d at 665). “The court must (1) find that the defendant has the requisite minimum contacts with the forum, without which, the court does not have the ‘power’ to adjudicate the action and (2) find the exercise of jurisdiction is reasonable or fair.” Id. To support a finding of due process, both prongs must be satisfied. Id.

For the following reasons, the Court finds that the Plaintiff has satisfied both the power and fairness prongs to establish specific personal jurisdiction over Defendant LGC.

1. Power Prong

To satisfy the power prong, the court must find that a defendant directed its activities to residents of South Carolina and that the cause of action arises out of or relates to those activities. Moosally v. W.W. Norton & Co., Inc., 358 S.C. 320, 331–32, 594 S.E.2d 878, 884-85 (Ct. App. 2004). The Moosally court stated: “It is essential in each case that there be some act by which the defendant purposefully avails itself of the privilege of conducting activities within the forum state, thus invoking the benefits and protections of its laws. The ‘purposeful availment’ requirement ensures that a defendant will not be haled into a jurisdiction solely as a result of random, fortuitous, or attenuated contacts. Whether the constitutional requirement of minimum contacts has been met depends on the facts of each case.” Id.

The court must look to whether a defendant has sufficient minimum contacts in the forum and whether the claims at issue “arise out of,” are “connected with,” or “relate to” the defendant’s

activities in the forum – bearing in mind “reasonableness” and “other relevant factors.” See Burger King Corp. v. Rudzewicz, 471 U.S. 462, 472 (1985); World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 292 (1980); International Shoe Co. v. Washington, 326 U.S. 310, 319 (1945); see also Moosally, 594 S.E.2d 884.

As an initial matter, the allegations of the Plaintiffs’ Complaint are sufficient for the exercise of jurisdiction over Defendant LGC pursuant to the South Carolina Long Arm Statute. S.C. Code Ann. § 36-2-803 (8)(a) provides:

A Court may exercise jurisdiction over a person who acts directly or by an agent as to a cause of action arising from the person’s... production, manufacture, or distribution of goods with the reasonable expectation that the goods are to be used or consumed in this State and the goods are so consumed.

Further, a comprehensive review of the applicable case law from World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 100 S. Ct. 559, 62 L.E.2d 490 (1980) through the United States Supreme Court’s most recent decision in Bristol-Myers Squibb Co. v. Superior Court of California, 137 S. Ct. 1773 (2017), this Court is satisfied that the exercise of jurisdiction over Defendant LGC is consistent with due process. Defendant LGC’s minimum contacts with the State of South Carolina is premised on the “stream of commerce” theory.⁴ A plaintiff may establish a defendant’s sufficient minimum contacts with the forum to satisfy this prong of the analysis by showing the defendant placed goods into the stream of commerce with the expectation that the “‘regular...flow’ or ‘regular course’ of sales” could lead the product to the forum state. See J. McIntyre Machinery, Ltd. v. Nicastro, 564 U.S. 873, 888-889 (2011) (Breyer, J., concurring in judgment); see also Asahi

⁴ “[I]t is that the defendant’s conduct and connection with the forum state are such that he should reasonably anticipate being haled into court there. This theory of personal jurisdiction is known as the ‘stream of commerce’ theory.” State v. NV Sumatra Tobacco Trading, Co., 379 S.C. 81, 89, 666 S.E.2d 218, 222 (2008) (citing World-Wide Volkswagen Corp., 444 U.S. at 297, 100 S.Ct. 559).

Metal Ind. Co., Ltd. v. Superior Court of California, 480 U.S. 102, 117, 120-21 (Brennan, J. concurring in part and in the judgment).

The Plaintiff alleges that LGC “regularly conduct[s] business in South Carolina and [has] continuing contacts with South Carolina by transacting substantial business in this state and manufacturing, distributing, and/or selling goods with the reasonable expectation that they will be used in this state and which are in fact used in this state.” Amended Complaint at 2-3. The Plaintiff further alleges that LGC “markets, distributes, and sells LG branded 18650 batteries throughout the United States [and] in the state of South Carolina[,]” and “transacts [and] solicits business in the state of South Carolina.” Id. at Paragraphs 12-15. Moreover, the Plaintiff alleges that Defendant LG Chem America, Inc., a wholly-owned subsidiary of Defendant LGC, maintains a registered agent and has a certificate of authority to conduct business in South Carolina since September 15, 2010. See Affidavit of Harris Yegelwel, Ex. 2-6.

It is clear from the record that Defendant LGC markets and sells the subject batteries in the State of South Carolina.⁵ Therefore, it can reasonably be said that Defendant LGC distributed the subject batteries with the reasonable expectation that subject batteries would be used in the State of South Carolina. Moreover, the subject batteries were purchased and used by the Plaintiff in South Carolina, and allegedly caused injury to the Plaintiff in South Carolina. Therefore, the allegations of the Plaintiff’s Complaint are sufficient for this Court’s exercise of jurisdiction over Defendant LGC pursuant to S.C. Code § 36-2-803.

⁵ Plaintiff alleges that Defendant LGC has been importing its products, including the subject batteries, through the Port of Charleston and other ports within South Carolina since November 1, 2006. See Exhibit 4 to Affidavit of Harris Yegelwel, LGC US Customs Import Data. Moreover, the Plaintiff alleges that Defendant LG Chem America, Inc., a wholly-owned subsidiary of Defendant LGC, aided in importing 984 shipments of Defendant LGC’s products. Id.

Accordingly, the Court finds that the Plaintiff has met its burden in establishing that Defendant LGC maintains minimum contacts with the State of South Carolina so as to empower the Court to exercise personal jurisdiction over Defendant LGC.

1. Fairness Prong

Finally, under the fairness prong, the court must consider the following factors: (1) the duration of the defendant's activity in this State; (2) the character and circumstances of its acts; (3) the inconvenience to the parties; and (4) the State's interest in exercising jurisdiction. NV Sumatra Tobacco Trading, Co., 379 S.C. at 91, 666 S.E.2d at 223.

First, the Plaintiff alleges that Defendant LG Chem America, Inc., a wholly-owned subsidiary of Defendant LGC, maintains a registered agent and has a certificate of authority to conduct business in South Carolina since September 15, 2010. See Affidavit of Harris Yegelwel, Ex. 2-6. The Court finds that nearly eleven (11) years of business activity in South Carolina is sufficient time to put Defendant LGC on notice that it may be haled into court in South Carolina.

Second, the character and circumstances of Defendant LGC's acts, as discussed more fully, supra, evince that Defendant LGC has purposefully availed itself of the benefits of doing business in South Carolina. The Plaintiff alleges that Defendant LGC's product presence in South Carolina is pervasive, with approximately 40 shipments by Defendant LGC through Defendant LG Chem America, Inc., to customers in South Carolina, including shipments of the subject batteries.

Third, the Court cannot discern any inconvenience to Defendant LGC, as its wholly-owned subsidiary, LG Chem American, Inc. has a Certificate of Authority to transact business in South Carolina, and a registered agent in South Carolina. Moreover, any inconvenience to Defendant LGC is outweighed by South Carolina's interest in protecting its residents that have been potentially injured by out-of-state actors. Further, the alleged incident occurred in Beaufort

County, South Carolina, therefore conceivably the majority of witnesses to the alleged incident reside in Beaufort County, South Carolina.

Fourth, and finally, South Carolina has a manifest interest in exercising jurisdiction over Defendant LGC. “South Carolina has an interest in providing redress for its citizens.” Cribb v. Spatholt, 382 S.C. 490, 504, 676 S.E.2d 714, 721 (Ct. App. 2009) (citing Burger King, 471 U.S. at 473 (“A State generally has a ‘manifest interest’ in providing its residents with a convenient forum for redressing injuries inflicted by out-of-state actors.”))).

Accordingly, the Court finds that the Plaintiff has met his burden in proving that this Court’s exercise of personal jurisdiction over Defendant LGC is fair and does not offend traditional notions of fair play and substantial justice.

CONCLUSION

Therefore, having found that Defendant LGC has sufficient minimum contacts with the State of South Carolina, and having found that exercising personal jurisdiction over Defendant LGC does not defeat the fairness considerations of due process, the Court concludes that the Plaintiff has established specific personal jurisdiction over Defendant LGC. Accordingly, Defendant LGC’s Motion pursuant to Rule 12(b)(2), is heard and respectfully Denied.

**REPLY AFFIDAVIT OF HWI JAE LEE
IN FURTHER SUPPORT OF DEFENDANT LG CHEM, LTD.'S
MOTION TO DISMISS FOR LACK OF PERSONAL JURISDICTION**

Personally appeared before me, Hwi Jae Lee, who first being duly sworn, deposes and says as follows:

1. I am over the age of eighteen and am competent to testify to the matters contained in this Affidavit.

2. This Reply Affidavit is submitted in further support of LG Chem, Ltd.'s Motion to Dismiss for Lack of Personal Jurisdiction, and I have been authorized by LG Chem, Ltd. ("LG Chem") to execute this Affidavit for this purpose.

3. I have personal knowledge of the facts described in this Affidavit. If called upon as a witness, I could and would testify competently under oath as to all such facts based upon my personal knowledge and my review of applicable business records.

4. I was employed by LG Chem from 2015 until LG Chem spun-off its battery division to LG Energy Solution, Ltd. My area of responsibility while employed by LG Chem

from 2015 until November 30, 2020 included sales of battery packs and small application battery cells, including 18650 cylindrical lithium ion battery cells. After November 30, 2020, I became employed by LG Energy Solution, Ltd., and my area of job responsibility remained the same.

5. I have reviewed Plaintiff's Response in Opposition to LG Chem, Ltd.'s Motion to Dismiss for Lack of Personal Jurisdiction ("Plaintiff's Response") and the Affidavit of Chris Moore ("Moore Affidavit) and Exhibits 1-9 attached to the Moore Affidavit.

6. On Page 13, Plaintiff's Response incorrectly states that LG Chem has had a Certificate of Authority to do business in South Carolina "through a registered agent, LGCAI. . . ." LG Chem has never been registered to do business in South Carolina and does not have a registered agent in South Carolina. I have also reviewed Exhibit 5 to the Moore Affidavit, and can see that it is a Certificate of Authority issued to LG Chem America, Inc., not to LG Chem, Ltd.

7. LG Chem America, Inc. ("LGCAI") is a Delaware corporation with its principal place of business in Atlanta, Georgia. Before the November 30, 2020 spin-off of LG Chem's battery division, LGCAI was a wholly-owned subsidiary of LG Chem Michigan, Inc., which was in turn a wholly-owned subsidiary of LG Chem. As part of the spin-off transaction, LGCAI became a wholly-owned subsidiary of LG Chem. Before and after the spinoff, LGCAI had and has its own corporate officers who reside near its corporate headquarters in Atlanta, Georgia.

8. Before the spin-off transaction, LG Chem maintained a separate and independent corporate existence from LGCAI. LG Chem did not manage or control the day-to-day activities of LGCAI. LGCAI kept its own separate bank accounts and business records. LGCAI paid and managed its own employees. It is my understanding that LG Chem would maintain the same corporate separateness from LGCAI after the spin-off.

9. I have reviewed Exhibit 3 to the Moore Affidavit. On page 6 of Plaintiff's Response, he states that his Exhibit 3 shows "984 shipments through the Port of Charleston, with 818 of those shipments co-signed by LGCAI." I am unfamiliar with the format of this chart at Exhibit 3 and cannot verify the accuracy of the information contained therein. However, I have reviewed the chart and have not identified a single entry that appears to show a shipment of 18650 lithium ion battery cells to anyone in South Carolina. In fact, from my review of Exhibit 3, I do not see a single product shipment description that appears to identify any type of lithium ion battery product. The product descriptions that refer to "methyl acrylate", "ethyl hexyl acrylate", "resin ABS", "acrylic acid," and "synthetic rubber", for example, are not descriptions of lithium ion battery products. I am not aware of LGCAI ever consigning any shipment of any type of lithium ion battery products for delivery to anyone in South Carolina.

10. I have reviewed Exhibit 4 to the Moore Affidavit. On page 6 of Plaintiff's Response, he states that his Exhibit 4 shows "13 shipments of LG Chem lithium ion batteries went through the Port of Charleston and shipped out to businesses operating in South Carolina." I am unfamiliar with the format of this chart at Exhibit 4 and cannot verify the accuracy of the information contained therein. However, I have reviewed the chart and have not identified a single entry that appears to show a shipment of 18650 lithium ion battery cells to anyone in South Carolina. Instead, the chart appears to show: 3 shipments on December 21, 2021 to a company located in Raleigh, North Carolina; 1 shipment on April 4, 2021 to a company located in Ridgeville, South Carolina; and 9 shipments in 2019 to the same company located in Ridgeville, South Carolina. Based on my review of LG Chem's sales records and my knowledge regarding LG Chem's customers for its 18650 lithium ion battery cells, I can verify that LG Chem did not ship 18650 lithium ion battery cells to the companies listed on Plaintiff's Exhibit 4 on those dates.

I, Hwi Jae Lee, hereby declare under penalty of perjury that the foregoing statements made by me are true and correct.

FURTHER AFFIANT SAYETH NOT.

Executed this 11th day of January, 2022.

COURT OF COMMON PLEAS

C/A no. 2021-CP-1001663

DECLARATION

I, Nickie Bonenfant, declare as follows:

1. I am of legal age, laboring under no disabilities, and otherwise competent to confirm the validity of the U.S. Customs Data provided by ImportGenius. I have personal knowledge of each of the facts set forth in this Declaration and can testify competently thereto, except as to matters stated on information and belief, and as to such matters I believe them to be true.

2. My Title at ImportGenius is Chief Operating Officer.

3. ImportGenius, a privately held company, provides access to shipping databases from Customs agencies in the United States via www.importgenius.com, which is a subscription based, paid service.

4. The United States import data accessible via www.importgenius.com service is a compilation of data obtained directly from US Customs Bills of Lading.

5. This compilation of US Customs data is published on www.importgenius.com.

6. ImportGenius, having had over tens of thousands of subscribers who use/used and rely/relied on our unaltered compilation of US Customs data (consisting of both business and governmental agencies, the identities of which are a closely held trade secret and confidential), presently offers 3 different levels of structured plans as well as an Enterprise Pricing plan for faster integrations. Each of the subscription plans differs based on the specific features offered based on the needs of our users.

7. The compilation of US Customs data is generally used in the course of business by Importers, Suppliers, Logistics & Forwarders, Attorneys, Investors, and Government Agencies and is generally relied upon as accurate in the course of such businesses.

8. The compilation of US Customs data reflects real-time, accurate information on actual ocean freight shipments passing through all US ports.

9. As stated in the Glossary of terms on the ImportGenius website (www.importgenius.com), the information provided for import/export search results designated as the "Consignee" represents "[t]he company importing the shipment into the U.S." (ImportGenius Website, Customer Service, Glossary.)

10. As stated in the Glossary of terms on the ImportGenius website (www.importgenius.com), the information provided for import/export search results designated as the "Consignee Address" represents "[t]he address of the company importing the shipment into the U.S." (ImportGenius Website, Customer Service, Glossary.)

11. As stated in the Glossary of terms on the ImportGenius website (www.importgenius.com), the information provided for import/export search results designated as the "Shipper" represents "[t]he overseas company exporting the shipment to the U.S." (ImportGenius Website, Customer Service, Glossary.)

12. The data contained in Appendix A, Appendix B, Appendix C and Appendix D to this Declaration were purchased through one of our subscription-based and login-controlled services. Attached hereto as "Exhibit 1" is a true and correct screen-capture of

our login page. Attached hereto as “Exhibit 2” is a true and correct screen-capture of how our paid subscribers see our customs data, as a view-only webpage without the ability to control, alter or manipulate our database. ImportGenius is the only entity that can revise, alter, and/or update the compilation of US Customs data. There is zero access to the public to change, edit or manipulate the database information.

13. Our quality controls are so strict that if a customs bill of lading has a misspelled company name or address, we do not correct that information and compile it as is. In other words, the database information is exactly how the data was provided to us by the US Customs office.

14. The 1,547 import records identified in Appendix A show the search results from the ImportGenius database identifying shipments from LG Chem, LG Chem LTD or LG Chemicals arriving in a South Carolina port from November 1, 2006 to July 22, 2021.

15. The 115 import records identified in Appendix B show the search results from the ImportGenius database identifying all imports from LG Chem, LG Chem LTD or LG Chemicals to any Consignee with a South Carolina address from November 1, 2006 to July 22, 2021.

16. The 169 import records identified in Appendix C show the search results from the ImportGenius database identifying all imports from LG Chem, LG Chem LTD or LG Chemicals to any Notifying Party with a South Carolina address from November 1, 2006 to July 22, 2021.

17. The 320 import records identified in Appendix D show the search results from the ImportGenius database identifying all imports from LG Energy entities arriving in a South Carolina port from November 1, 2006 to July 22, 2021.

18. The 11 import records identified in Appendix E show the search results from the ImportGenius database identifying all imports from LG Energy entities to any Consignee with a South Carolina address from November 1, 2006 to July 22, 2021.

19. The 4 import records identified in Appendix F show the search results from

the ImportGenius database identifying all imports from LG Energy entities to any Notifying Party with a South Carolina address from November 1, 2006 to July 22, 2021.

20. Our database has been reported by The New York Times, suggesting ways the ImportGenius database could be used by economists and companies engaged in international trade. Attached hereto as “Exhibit 3” is a true and correct copy of The New York Times article.

21. Our database has been reported by About.com, explaining how investors can use the ImportGenius customs database to investigate the operating health of public companies. Attached hereto as “Exhibit 4” is a true and correct copy of this About.com article.

22. Our database has been reported by Forbes, explaining how we compiled a complete list of Apple’s ocean freight imports and were able to get a sneak peek at the iPhone 3G. Attached hereto as “Exhibit 5” is a true and correct copy of this Forbes article.

23. Wired Magazine reported that our database of U.S. customs records is bringing transparency to government data. Attached hereto as “Exhibit 6” is a true and correct copy of this Wired Magazine article.

24. Dan Farber, editor-in-chief of internet news pioneer CNET.com, reported on ImportGenius.com’s search tools for U.S. ocean freight import data related to Apple’s release of the iPhone 3. Attached hereto as “Exhibit 7” is a true and correct copy of this CNET.com article.

25. Fortune Magazine reported on ImportGenius’ competitive intelligence service, noting that our users get access to records on nearly every container that entered the United States from 2006 to the present. Attached hereto as “Exhibit 8” is a true and correct copy of this Fortune Magazine article.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

EXECUTED on ____10 August 2021____, at ____Mesa_____, Arizona.

Import Genius - A Great New Tool for Investors and Business Owners

How To Use Import Genius to Get a Leg Up on the Competition

By Joshua Kennon, About.com

See More About: [small business investing](#) [investing research](#)

Every once in awhile, we come across a tool that is extremely useful to serious investors. A few months ago, following some recommendations from highly respected people we trust, we were told to look into a relatively new firm called Import Genius. The company has developed an online database program that allows subscribers to search the import and export records for United States shipments. We signed up for a test account and within one business day, had access to the company's main product, which was as easy as entering a username and password on the site.

How Business Owners Can Use Import Genius

There are several applications for Import Genius, especially if you own your own business (for many readers, this represents the single largest investment they will ever have, perhaps even larger than their primary residence).

One good idea is to research the sources your wholesale distributors use to get their products. Within minutes, we were able to use the database to find the name of the manufacturing firms that provide goods to the wholesale distributor of luxury watchcases to one of our retail stores. This would, in effect, allow us to contact the manufacturer directly, place a large order overseas, and cut out the middleman, improving our gross margins from 50% to 85% - a massive boost in profitability that allows us to generate hundreds of thousands of dollars in additional income each year. In another case, we were able to see the Asian-based firm that produced the gift packaging boxes used by one of our luxury soap vendors.

How Investors Can Use Import Genius

One widely advertised benefit of Import Genius for investors is the use of import and export records to time stock purchases and sales based upon product launches. A few years ago, for instance, one could see huge shipments of new products coming out of Asia for Apple, Inc. in California. Long before the company had announced it was launching a new product - the iPhone - you could have seen that it was ordering large quantities of finished merchandise and having goods sent to the United States. That one bit of insight could have generated substantial profits for your trading portfolio, as well as paid for the Import Genius subscription fee.

According to Ryan Petersen at Import Genius, "We have a variety of users in the investment community, including several prominent equities analysts and a large number of asset managers. Our users in the financial community are looking for insights into the operations of publicly traded companies. We're able to provide them detailed information on the supply chain of these companies with near real-time speed. Instead of waiting for the quarterly report to determine the health of a company's product lines, they receive updates on an ongoing basis."

The iPhone Stakeout: Part I

Brian Caulfield

The COVID-19 crisis has blindsided governments and companies alike. Stay-at-home guidance and social distancing measures across the country have dramatically changed the way we interact, learn and conduct business. While massive change can be disruptive, mobile networks can help leaders, teams, organizations and communities move forward creatively during an uncertain time.

Getty

A New Normal

A lot has changed across the workforce: essential workers and those unable to work from home might still be commuting as usual, while others have experienced company layoffs or reductions in workload. For many modern workers—from office employees to educators—an unprecedented reality emerges as they adapt to work-from-home environments.

For those working from home, video conferencing is increasingly standard for meetings and collaboration. For employers, keeping teams connected, healthy and productive as they navigate challenges in their new workspaces is top of mind. Some organizations may even be balancing needs of remote staff and those still on site—making communication and teamwork even more crucial. And for educators, providing distance learning that is as seamless and immersive as possible for students is a priority. Easy access to user-friendly mobile technology at home is critical for students as they continue their education.

Innovative approaches and technologies can help us navigate this new normal while minimizing disruption to our lives and relationships, businesses and education. And mobile networks are part of the answer. In fact, mobile operators have noticed a big jump in usage trends since the start of lockdown. T-Mobile's President of Technology Neville Ray highlighted this in a recent [post](#): mobile hotspot usage was up 60%. Activity across collaboration tools, video gaming and food delivery apps significantly increased, while educational tools usage more than doubled.

Creative Thinking For Transition And Transformation

The increased use of hotspots to connect laptops and mobile activity of a variety of tools for communication, connection and learning show that mobile networks are playing a major role as we move forward with our lives or even pivot our approaches to work in creative ways. While traditional office workers may be able to duplicate the office environment at home, not every role translates to a remote setting. Some organizations are thinking on their feet to develop nimble strategies for maintaining important public services while minimizing risk to workers. This includes industries like logistics, shipping, trucking and courier services as well as restaurants and grocery stores. In these sectors, reliable mobile communications become even more important as communities work to stay afloat.

Here, we'll consider fresh ideas for how mobile networks can help power business continuity, as well as how the future potential of 5G-enabled remote work patterns and the opportunity to leverage tools like emerging AI and robotics can move us forward and accelerate

digital transformation in the not-so-distant future.

Opening Up Possibilities In Unexpected Industries

The industrial Internet of Things (IIoT) can offer examples of traditionally in-person jobs that can now be reimagined—with even more possibilities in a future 5G world. Who would've considered that process control engineers could work from an off-site location? But if they're equipped with a secure mobile device, a dashboard delivering sensor readings and the ability to adjust machine settings in real time, why not consider this a possibility in the future?

GE Digital [reports](#) that while remote automation software was already available, it was primarily used for managing operations while on site but outside of the control room. Today, we're seeing its use extended to allow staff to operate from home, while a skeleton staff might remain on site. The eventual [5G-enabled factory](#), currently in its proving stage, offers us a glimpse at an even more hands-off approach.

More broadly, the logistics and shipping industry becomes more crucial as essential supplies make their way to hospitals, grocery stores and homes across the country. In fact, the Digital Supply Chain Institute recently [highlighted](#) the need to speed up the industry's digital transformation to address the Covid-19 crisis. With much of the cargo connected and trackable via IoT, logistics managers can also potentially work remotely to help keep supply chains moving, helping to prevent dangerous shortages and potentially saving lives in the process. And, looking beyond the current crisis, as the sheer volume of IoT sensors grows, we may ultimately begin to rely on 5G networks as an essential pipeline for this data traffic.

Many restaurants and grocery stores are also devising ways to pivot, converting from point-of-presence businesses to pick-up or home-delivery models, for example. Some have addressed challenges with [new mobile applications](#) as they adapt. With the potential of reliable 5G connectivity, enhanced functionality could be added for curated product alerts; integration between smartphones, smart appliances, and stores; or possibly even drone deliveries customers can track online.

How Mobile Networks Can Minimize Disruption To Education

Continuity outside of business is crucial, too. As many schools and universities also grapple with the unfamiliar terrain of distance learning, mobile networks and connected devices are vital for students to advance their education. Many teachers, schools and even entire districts are leaning on partnerships through programs like T-Mobile's [EmpowerED](#), the [1Million Project Foundation](#) and other [examples](#) that help teachers and students stay connected and engaged via mobile devices. The [Gates Foundation](#) is supporting states and education leaders as they build online learning options for K-12 students. Both the [World Bank](#) and [UNESCO](#) have collated links to resources to help maintain continuity in education.

With a shift to virtual learning models that include video lectures, live feedback sessions, online classes and more, there are many ways educators could help ease the transition as they aim to replicate in-person learning, facilitate social interaction and motivate students. Reliable connectivity and access to mobile networks are key in making learning feel like it's happening in person and sustaining peer relationships.

Keeping Teams And Communities Together

Isolation and loneliness are legitimate concerns as we work and learn from home. In a recent [article](#), former U.S. Surgeon General Vivek Murthy says that social distancing could significantly contribute to loneliness and emphasizes the need to nurture our connections regularly.

For office-based jobs, remote teams can stay inspired and informed amid uncertainty and confusion with their mobile devices. A well-connected work environment can continue to provide stimulation and interaction at home, whether through a shared morning exercise routine or virtual happy hours with coworkers or friends.

We can continue to cultivate our relationships with social interactions via mobile, including video chats, exchanging photos and stories, streaming entertainment with friends from afar and more. Today, this kind of connection plays a vital role in boosting morale, maintaining friendships and keeping up with life outside of our homes.

A Potential Turning Point For Humanity

Once we're on the other side of the pandemic, it's not unreasonable to think that 2020 could be viewed as a turning point for technology driving meaningful interaction.

In business, could this mean that a remote framework could stick as part of the enterprise landscape? Coinciding as it does with the growing availability of 5G, the present crisis may inspire us to continue using connected mobility to innovate when life returns to a new normal. And both corporate and educational culture may be on the cusp of a paradigm shift—with less focus on physically being in a certain building together and more emphasis on implementing tech solutions that enable staff and students to do their best work, whether individually or as a team.

The connectivity and power provided by the future of 5G networks will be key, not only as we adapt to new ways of interacting, working and living, but also as we move forward. To meet the challenges of our time and progress beyond them, workers, students, companies, schools and communities have a rare opportunity to deconstruct traditional models and invent new paths to achieving goals.

To learn how organizations are using mobile connectivity to innovate in the face of adversity, visit www.t-mobile.com/business/trends-and-insights.

Wired-o-Nomics: Transparency as a Stimulus

Author: portfolio.comportfolio.com

With President Obama's signing of the "American Recovery and Reinvestment Act," better known as our national Hail Mary stimulus bill, billions will be ladled for infrastructure projects ranging from roads to mass transit to rural broadband.

But the law also contains a measure promoting a less-noted type of economic infrastructure: government data. In the name of transparency, all the Fed's stimulus-spending data will be posted at a new government site, Recovery.gov.

That step may be more than a minor victory for the democracy. It could be a stimulus in and of itself.

The reason, open government advocates argue, is that accessible government information—particularly databases released in machine-readable formats, like RSS, XML, and KML—spawn new business and grease the wheels of the economy. "The data is the infrastructure," in the words of Sean Gorman, the CEO of FortiusOne, a company that builds layered maps around open-source geographic information. For every spreadsheet squirreled away on a federal agency server, there are entrepreneurs like Gorman ready to turn a profit by reorganizing, parsing, and displaying it.

When President Obama campaigned on a promise of prying open government information coffers, of course, his goals were more civil than economic. Yet even a step as simple as making the contracting process more transparent at Recovery.gov could aid business, suggests David Robinson, associate director for the Center for Information Technology Policy at Princeton. "There are all sorts of accumulated bureaucratic barriers to competing for government contracts," he says. "The more transparent we make that shopping process, we not only give the government a better chance to get value for money, but we give more businesses the chance to profit."

The more obvious economic benefits, however, will come from innovations that pop up around freely available data itself. Robinson and three Princeton colleagues argue in a recent Yale Journal of Law and Technology article that the federal government should focus on making as much data available as RSS feeds and XML data dumps, in lieu of spending resources to display the data themselves. "Private actors," they write, "are better suited to deliver government information to citizens and can constantly create and reshape the tools individuals use to find and leverage public data."

And government data, often hidden behind pay walls or trapped in PDF files, is ripe to be freed. "It's not unlike the situation in 1996 when President Clinton began the process of ending the distortion of civilian GPS signals," says David Stephenson, a government transparency analyst and author of the forthcoming book *Democratizing Data*. GPS went from being a secretive military

technology to spawning a \$6 billion ecosystem of location-based companies.

Dozens of software and marketing firms, meanwhile, thrive entirely on slicing and interpreting U.S. Census data, released free in a format called Tiger. Google Earth and Microsoft Visual Earth both depend on government satellite data and private sources for their underlying maps, while real estate websites like Zillow and Trulia take advantage of housing and demographic feeds from state and local governments. More recently, Web 2.0 startups like CloudMade and Swivel have developed user-driven widgets to visualize and combine public data sets.

Other data-driven innovations are more serendipitous. The Arizona-based startup ImportGenius tracks

U.S. imports and exports by scouring bills of lading data, and then sells it to firms looking to keep an eye on the competitors. The company's most famous discovery to date, however, came when it uncovered evidence of the iPhone 3G's launch—before Apple announced it—hidden in customs data for containers from Shanghai.

In the long term, the clearest business case for breaking up government data monopolies is the hardest to quantify, in the efficiencies that arise as the information leaches through the economy. Whether it's EPA pollution statistics that help analysts assess manufacturers, or weather data that aids the agricultural sector, the more data that industries can layer into their decisions, the better decisions they'll make.

The SEC, for one, is currently moving toward mandating that all financial disclosures are made in XBRL, a language that allows for structured, digitized financial reporting. "I'm sure there will be middle-level players who create due analyses of that data, publish it, and charge for it," says David Robinson. "But more importantly, there will be companies that buy that data and then benefit from it."

In fact, Robinson argues, the unforeseeable nature of data-driven innovation is exactly the point. "It's a little bit like if we were sitting in the Soviet Union in the mid-'80s, and somebody said 'What if we had an open market? What kind of businesses would we see?'" he says.

"It's the nature of the benefits here that they are hard to predict."

Tracking the 3G iPhone by sea

Import Genius, a site that tracks shipments of goods entering the U.S., has some data that lends credibility to the release of Apple's 3G iPhone next month.

Dan Farber ▾ May 24, 2008 6:43 a.m. PT

Import Genius, a site that tracks shipments of goods via container ships entering the U.S., has some data that lends credibility to the release of Apple's 3G iPhone next month.

Apple Inc's most recent shipment of the new products, Bill of Lading # HLCUSHA0803FTFR8, arrived at the port of New York on the Vessel NYK Delphinus on May 17th. That shipment contained 504 cartons, weighing 7140 kg, of the vaguely described "electric computer."

Where Quanta sent all previous shipments to Apple—including 828 ocean containers of "desktop computers" since March—through a subsidiary, the new products were exported in Quanta's own name. The change may reflect heightened secrecy surrounding the new products.

Apple takes delivery of 188 mysterious ocean containers

BY PHILIP ELMER-DEWITT

May 24, 2008 10:46 AM EST

Here's an intriguing report from ImportGenius, a search engine that gathers "competitive intelligence" by monitoring U.S. Customs records of ocean containers entering American ports.

Searching for shipments to Apple, Inc. (AAPL), employees at the Scottsdale, Ariz., company reported on Friday that they've spotted a "major spike" since mid March in ocean containers marked with a mysterious new label: "electric computers"

"They have never before reported this product on their customs declarations," says ImportGenius managing director Ryan Peterson, who notes that there has been no corresponding falloff during this period of shipments labeled "desktop computers" or any of the other labels Apple usually uses.

"The fact that they are importing millions of units, combined with dwindling stocks of the first generation of iPhones," persuades Peterson that these "electric computers" are, in fact, the 3G iPhones Apple is expected to release in a matter of weeks.

He makes a strong case, citing records of a total of 188 ocean containers shipped to Apple from two trusted Asian suppliers, Hon Hai Precision Corp. and Quanta Computer.

For example, on March 19 Apple took delivery from Quanta of 20 containers of merchandise, described on the Bills of Lading as "electric computers."

““The initial shipments were followed,” according to ImportGenius.com, “on March 27, April 28, May 6 and May 17 with an additional 44 containers—each containing an estimated 40,000 units of the new phone. The sixteen containers imported by Apple Inc. itself—as opposed to the Quanta subsidiary—were delivered on March 19 and 27 to the Jonestown, Pa. facilities of Ingram Micro, Apple’s U.S. distribution partner.””

You can read the rest of the report [here](#). It's quite impressive in its specificity. It notes, for example, that "Bill of Lading # HLCUSHA0803FTFR8, arrived at the port of New York on the Vessel NYK Delphinus on May 17th." That shipment contained 504 cartons, weighing 7140 kg, of the vaguely described "electric computer."

"Knowledge is power," declares ImportGenius' [promotional material](#). "Whether you are looking to keep tabs on your competitors with Supply Spy, identify suppliers with ImportScan our easy to use online software makes it easy. You get access to records on nearly every container that entered the United States from 2006 to the present."
