Case # 2222593 is and was a unconstitutional act that the respondent have fight me since I file this claim in may of 2023 and five commissioner didn't fulfill there fiduciary duties as officers of the court. Meaning this was not judge a "statue of law" but racist and bias opinions. What clear that they didn't consider that independent contractor/ truck driver is regulated and governed by a federal agency (fmcsa) federal motor carrier safety administration. Which as I pointed out in my court appearance and documents. Where is the statue of law stating a contract is a determining document that classify a federal regulated industry. And if this court disregard a statue of law that doesn't exist than its clear that this agency is also not conducting case based on the law. Again I'll state " what statue of law" that a contract is the only document that states he or she is and independent contractor truck driver. Which is a document that I'm requesting under the (FOIA) freedom of information act.but most important under requesting a from the other respondant named in this case SC wcc and fall under denial of due process (opportunity to heard in a meaningful manner which I'm referring to page 4 of full commission order. Why I'm stating this issue because I filled this seeking justice but have only received injustice my SC wcc and now procedural rules from this court. It's unclear that SC wcc didn't submit a clear reasoning document of for willfully depriving me constitutional fundamentals right to procedural due process. Benjamin Moses
