Also a miss information of importance this "statue of law" that's is and unwritten law that respondants fail submit to court which as I pointed out is the allegation that a contract was there argument that I'm and independent contract /truck driver and under the federal evidence act the respondants did produce this evidence and or the "hierarchy law" that supersedes conflicting state law as the SC wcc have asserted in there ruling in three order documented and sign by them which also shows misconduct and unconstitutional. Benjamin Moses
