(foia) This email concern a hearing of the comical case I've fighting for more the 3 year. And what has came to my attention was a battle I couldn't win because the case is doesn't fall under any constitutional or statues of law but is prime example of Jim Crow laws where the courts gives court like the (swcc) / kangaroo Court and the contract attorney I'm fighting to take manipulate steal commit fraud, and prejury to take what belongs to people like myself. Which the sc supreme court open the door for anyone to conjure up a contract to be a attorney, commissioner and even and Independent contractor/truck driver. So it's very transparent. That the laws used in this case are (Jim Crow laws and not law from the US Constitution..
