This email concerns the mistreatment by our judicial system. My name is Benjamin Moses and I've been fighting first the kangaroo/scwcc court for 3 years now over a case that should have never started on the base brought by my opinion contract attorney. And all four hearing I was involved in was base on stupidity and greed. But judge my bias, and bigotry. The case that I'm now have appeal to sc Carolina court of appeals I'm still experiencing bias and favoritism. This case is about a something that's unconstitutional doesn't have a statute of law. I was badly injured on my job in May of 2022 and hired and law firm which turned out to be a mistake. Which I was also mistreated and lie to (joye law firm) I file this claim with the scwcc in May of 2023 hoping to get justice but only received injustice. The company was employed by at that time was Evan delivery and they convince these contract attorney that I was and Independent contractor truck driver at the time of my accident but under the federal law it illegal to classify a person as Independent contractor. And that's the argument from stopping payment of the policy I offered through the company. But during my appearances in the court my fifth and fourteen amendment rights was violated right to a Fair hearing and a right to due process in which I didn't receive and I'm stating my ordeal and opinion. Of what I see as still Jim Crow law be implementing the sc judicial system. The base of the contract attorney is that a contract was the document that gave me the power to be and Independent contractor /truck driver. Which they are undermining the (fmcsa) by endorse through sc court system. But as I want to state of how I felt during these hearing is my opinion see pic because the way I was treated was dehumanizing and was done intentionally. By the court and there hired help the attorney and I write this email I'm going to continue to email usasc civil rights, fmcsa and all that can email includes the Governor attorney general. etc so see picture I'm submitting of my opinion of way I felt while be in present the person in the picture. All five commissioners and the attorney. And again this case was about a policy I paid for offered by the company but the are deny me the benefit. Benjamin Moses
