

The South Carolina Court of Appeals

Attia Elbadawy, Appellant,

v.

Dorchester County and D.R. Horton, Inc., Respondents.

Appellate Case No. 2026-001187

ORDER

On May 22, 2026, Appellants filed a notice of appeal from two circuit court orders—one that denied Appellant's motion for a temporary injunction and one that explained a certified copy of the order denying the temporary injunction had been filed and mailed to Appellants. The order explained Respondent D.R. Horton had not been properly served and that issues raised in the motion were on appeal at the time of the hearing, thus, the circuit court lacked jurisdiction to consider the motion. On June 16, 2026, Appellants filed a motion to stay and preserve the status quo pending appeal.¹ Respondent did not file a return. On July 15, 2026, this court denied Appellants' June 16, 2026 motion to stay.

Also on June 16, 2026, Appellants filed a second notice of appeal from two May 26, 2026 orders that again denied the motion for a temporary injunction—on the basis "the precise issues raised in this action have been raised in another action, ruled on, and are on appeal in another action"—and indicated a certified copy of the order denying the temporary injunction had been filed and mailed to Appellants.

On July 16, 2026, Appellants filed a motion to stay, explaining they had sought clarification, to no avail, from the circuit court regarding why two orders were issued denying the temporary injunction and arguing that while this court had ruled on the motion to stay as it related to the May 7, 2026 order, it had not ruled on the

¹ Appellants did not specify what order(s) it sought this court to stay.

stay as it related to the May 26, 2026 order and thus, Appellants were requesting a stay of the May 26, 2026 order.

After careful consideration, the July 16, 2026 motion to stay the May 26, 2026 order is denied.
