SC Court of Appeals

Third Circuit Public Defender's Office
141 North Main Street, Rm # 307
Sumter, SC 29150

To: Ashton Anderson Cross, Mitigation Investigator

Per the request made from your office regarding Legend Smith DOB 07/04/2022. Legend has a medical diagnosis (Born Premature, Hole in heart, Right Club Foot, Bilateral extremity, Lower extremity extra digits, Adenoid and Tonsil removal, Sickle Cell Anemia, Acid Reflux, Hypothyroidism, Acute Lymphoblastic Leukemia, Febrile Seizures, Lactose Intolerance, Vision concerns with prescribed glasses and Global Developmental Delays).

Per the medical diagnosis and the written Family Service Plan, although Legend has made progress over the last 3 ½ years as he has received an array of services, he is noted to be High Risk Infant/At Risk Child and continues to receive supports through the Sumter County DSN Board through Service Coordination and Family Training to help him learn.

Legend has gained some self-help skills but is still very dependent on his family, mainly the mother as caregiver. He does have regular contact with the great grandmother, but his mother is noted to be the Primary Caretaker for Legend daily. Legend is only 3yrs old and is very attached to his mother.

This information is given to best of my knowledge per the information in Legends Smith's Case File managed at The Sumter County DSN Board.
