Additional note Ms Jeffords. The SLED investigative File is the smoking gun which is why state criminally suppressed it even though it was specifically asked for before the trial commenced. The coroner's notes are in that file that will give clear Indication that the child died of hypoglycemia, insulin shock which is supported by her medical records that illustrate that her blood sugar levels were at 17dm/ml. If your blood sugar levels drop to 50 it can kill you. Hers was at 17. Your investigator will find that the coroner's notes are in staunch conflict with what was presented by the supposed autopsy. FYI.

Hello Ms Jeffords & Associates. This document is being sent to The South Carolina Court of Appeals to give them notice of our intent to consult with your firm in hopes that you will take over the two cases involved cases 2025-001856 and 2025-001507 Jorge Rodriguez.

Good Lord Willing efforts to contact your office will be attempted tomorrow. Thank you in advance for your kind consideration regarding these matters.
