S.C. SUPREME COURT

RE: State vs. Perry K. Strickland
Case No. 2013-001692
Writ of Certiorari

Dear Honorable Chief Justice Jean Toal:

This letter is in regards to a "Writ of Certiorari" that is coming up to be reviewed in my case State vs. Strickland Op.No.4714 dated back on July 11th, 2007 from Spartanburg County.

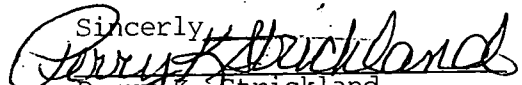

Just because I am not wealthy enough to hire a lawyer that is honest and loyal enough to do his Judicial Duty should not deprive me of the laws of this State. With all due respect of People of Authority, I would like to choose my words wisely in my situation about my case and the people involved. First of all, I can only request a paid attorney to act in a certain way in my defense. So its suppose to be against the law for a Defense Attorney to lie in open court to Judge Cole (Which is lying to a Public Official) about the reason he filed for a "Motion To Be Dismissed" as my defense attorney. Where he claimed I jumped bond and he could not find me. He lied out of revenge for a debt he felt was due him. You can not expect to be paid for services you deprived your client of after they requested a "Preliminary Hearing" to produce the evidence to support the arresting charge. Your Honor, I had to force my paid attorney to give me this evidence by disciplinary action after I was convicted that was hid from me and the Jury. It not only tells a whole different story than what I was convicted on. But it proves that I was the victim and not the Huckabee family that the law defended. Just because the law gives people Castle Rights to their Homes. The law should not let people abuse this law by giving them the right to lure people inside their homes to commit a premeditated criminal assault upon them as the Huckabee family done to me. (Article 16-11-440 section C). By letting me think I was coming their home on good terms to have a friendly neighborly visit; but instead I was being led into a violent ambush by the Huckabees'. It was difficult Your Honor to explain all these matters at my PCR Hearing that lasted only fifteen (15) minutes.

May I also remind you Attorney Mr. Reckenbeil also lied to Judge Hayes by saying he had explained and discussed [all] the evidence the State was going to use against me. Then, why did I have to obtain this evidence through disciplinary action?

Please do not take my word on this matter since I'm no one special. All I ask is that you make an honest decision based on the evidence that the Jury [never] got to hear and not the fabricated version that was heard to them by Mr. William Huckabee

eighteen (18) months later. That totally contradicts what he told the Police on the 14th and again on the 28th of November 2005. Here again, with all due respected intended it's suppose to be against the law to help a witness lie under oath and lie to the Jury as well which is "Witness Tampering and Obstruction of Justice." I amended my PCR with Obstruction of Justice and Fraud, upon the Court issues and gave my PCR attorney Mr. Kenneth Shabel a copy of this amendment. I also filed one with the Clerk of Courts Office in Spartanburg County that was ignored like usual. I also sent a copy of this confirmation to the Honorable Judge James Johnson, with the "Commission of Judicial Conduct" requesting for a Judicial Review be done in my behalf of the original evidence and not yet another fabricated trial like the first one to grieve both-parties-concerned.

I prayfully request that someone with an open mind and honest authority please read the comments made by the arresting officers concerning a Mr. Chris Huckabee past criminal record. Along with his fathers' original second and third statement he gave police on dates of November 14th and the 28th of the year 2005. Please read also Mr. Barry Lee Smith's statement that [proves] that Miss Jennifer Weathers instigated and gave the Huckabee family the excuse they were looking for to attack me; for no reason at all, Under Rule of a Direct Verdict. (SCRCP)(Section B). Im preserved the right to present evidence if a Direct Verdict is not granted. (Section C). Submission To a Jury is an automatic denial of a Direct Verdict. The factual evidence I'm asking of you to review is that my trial lawyer deprived me of and prejudiced my entire case with. Under the "Stand Your Ground Law" Article 16 (16-11-440 Section C) where as I was reacting lawfully trying to prevent a criminal assault being done upon me by two other persons violent behavior. Who were armed with knives against an unarmed man [me] acting in Self Defense; proves I have Committed No Crime! Nor did the keys have anything to do with why I was at the Huckabee Home! Like my trial lawyer told the Jury in his opening statements. No one gave him the right incriminate me by informing them I changed my mind but wanted my keys back. I just wondered how she could have lost them in that short period of time it took me to walk four trailers down from where we lived at, cause I had just given them to her. People take things the wrong way and jump to conclusions and get the wrong impressions. Now, I have to pay the consequences both mentally and physically for the rest of my life that I do not deserve. Thank you kindly for at least listening to my terrible situation that almost took my life and left me partially disabled.

Sincerely,

Perry K. Strickland
