REMITTITUR

Re: Stevens Aviation v. DynCorp - Appellate Case No. 2011-202686
Lower Court Case No. 2009CP2307229

Dear Clerk of Court:

The above referenced matter is hereby remitted to the lower court or tribunal. A copy of the judgment of this Court along with the earlier decision of the South Carolina Court of Appeals is enclosed.

Very truly yours,

CLERK

Stevens Aviation, Inc., Petitioner,

v.

DynCorp International LLC, and Science Applications
International Corporation, Defendants,

of whom DynCorp International LLC is, Respondent.

Appellate Case No. 2011-202686

ON WRIT OF CERTIORARI TO THE COURT OF APPEALS

Appeal from Greenville County
The Honorable R. Lawton McIntosh, Circuit Court Judge

Opinion No. 27369
Heard January 7, 2014 – Filed March 26, 2014

REVERSED IN PART AND AFFIRMED IN PART

Keith D. Munson and Michael J. Bogle, both of Womble
Carlyle Sandridge & Rice, LLP, of Greenville, for
Petitioner.

C. Mitchell Brown and Michael J. Anzelmo, both of
Columbia, and William S. Brown, V and Lane W. Davis,
both of Greenville, all of Nelson Mullins Riley &
Scarborough, LLP, for Respondent.

JUSTICE HEARN: This case concerns whether a subcontract for the maintenance of aircraft requires a contractor to turn to a subcontractor for all maintenance the contractor needs to fulfill a contract with the United States Army. The contractor, DynCorp, contends the contract does not create an exclusive relationship between the parties and it may send aircraft to other maintenance providers. The subcontractor, Stevens, contends the contract is a requirements contract under which DynCorp must send all aircraft requiring maintenance to Stevens.

Stevens moved for a partial summary judgment on the issue, the trial court granted the motion, and the court of appeals reversed and granted partial summary judgment to DynCorp. We reverse the court of appeals' decision in part and affirm in part, holding the contract is a requirements contract for certain aircraft.

FACTUAL/PROCEDURAL BACKGROUND

DynCorp is a large defense contractor who was interested in being awarded a contract from the United States Army to service the Army's fleet of C-12, RC-12, and UC-35 aircraft. In furtherance of the goal of securing the contract, DynCorp looked to Stevens as a potential subcontractor.

DynCorp and Stevens executed a "Teaming Agreement" which set forth how the parties would cooperate in attempting to procure the Army contract (the Prime Contract). The Teaming Agreement provides that should DynCorp be awarded the Prime Contract, it would award a subcontract to Stevens to perform certain work required under the Prime Contract and specifies in detail what work Stevens would perform.

A. THE SUBCONTRACT

The Army awarded the Prime Contract to DynCorp, and DynCorp and Stevens subsequently executed a subcontract (the Subcontract). The Subcontract begins with a preamble which provides in part:

WHEREAS, the parties entered into a Teaming Agreement . . . which identifies the roles and responsibilities of the parties as Prime and Subcontractor in a cooperative effort to perform the requirements of U.S. Army Contract DAH23-00-C-0226 ("Prime Contract");

WHEREAS, this Subcontract supersedes all prior written or oral agreements between the parties, excluding the Proprietary Data Exchange Agreement . . . and constitutes the entire agreement between the parties with respect to this Subcontract.

The body of the Subcontract begins with a definitional section which defines the term "Aircraft" as: "All Army RC/C-12 and UC-35 aircraft covered under the Prime Contract." The Subcontract has a "Statement of Requirements" which provides that:

- A. [Stevens], as a Subcontractor to DYNACORP, shall provide items consisting of management, parts and materials, repairs, skilled labor, facilities and engineering data for the maintenance and repair of the Government's fleet of C-12/RC-12 Aircraft and related support equipment under the Prime Contract as specifically set forth in Section B.
- B. [DynCorp] is not required to purchase from the Subcontractor any requirement in excess of the total funding identified under Section G under this Subcontract.

The Subcontract makes use of "CLINs"—"Contract Line Item Number[s]" which are carried over from the Prime Contract—to describe the work to be performed and defines eight CLINs as covered by the Subcontract. The Subcontract contains a Statement of Work defining the different CLINs in part as:

- B. C-12/RC-12 STRIP AND PAINT. [Stevens] shall provide all labor, services, facilities, equipment, and direct and indirect parts and materials required to strip and completely repaint aircraft (for other than ACI requirements), at the direction of [DynCorp]. . . .
- C. AIRCRAFT CONDITION INSPECTION (ACI). [Stevens] shall provide all labor, services, equipment, tools, facilities, tooling, lubricants, excluding engine oil, direct and indirect parts and material, fuel, and strip and repaint services required to perform all the requirements of [the Prime Contract's] Statement of Work. . . .
- D. OVER AND ABOVE MAINTENANCE. [Stevens] shall perform both Depot and Non-Depot Maintenance in accordance

with Sections 4.0 and 5.0 of the [Statement of Work], and shall provide parts and materials required for the same. . . .

- E. SITE ORGANIZATIONAL MAINTENANCE. As directed by [DynCorp], Stevens shall accomplish work, at [Stevens'] facility, that would normally be performed at the site by the site personnel.

The Subcontract provides a schedule of per-unit or per-hour prices for each of the CLINs.

Section G limits the parties' relationship based on the funding available from the Prime Contract. It provides that if funds from the Prime Contract are exhausted for any CLIN, Stevens has no obligation to continue to perform that CLIN and DynCorp is not liable for any performance Stevens engages in after the funding for a CLIN is exhausted.

The Subcontract provides that DynCorp may terminate the contract or seek other remedies upon the occurrence of any of several enumerated ways in which Stevens may default. Among those, Stevens may default by failing to faithfully perform its obligations for ten days after receipt of a cure notice, receiving three or more cure notices in one year, or suspending its operations.

The Subcontract contains an integration clause providing: "This Subcontract constitutes the entire understanding of the parties with respect to the subject matter hereof, and supersedes all prior representations and agreements, except for those specifically and expressly incorporated herein." Finally, the Subcontract provides that it is to be construed according to the "federal common law of government contracts."

B. THE PRESENT SUIT

The parties performed under the Subcontract for approximately nine years until Stevens believed that DynCorp was sending C-12 and RC-12 aircraft covered by the Subcontract to other aviation maintenance providers. Stevens brought suit against DynCorp alleging it breached the Subcontract by sending covered aircraft to other service providers. DynCorp moved for a judgment on the pleadings asserting the Subcontract does not create an exclusive relationship between DynCorp and Stevens and therefore Stevens' breach of contract claim fails as a matter of law. Stevens moved for a judgment on the pleadings or, in the

alternative, a partial grant of summary judgment finding the Subcontract creates an exclusive relationship.

The circuit court denied both motions for judgment on the pleadings, but granted Stevens' partial motion for summary judgment, holding the Subcontract "is a 'requirements contract' which obligates DynCorp to send to Stevens all C-12, RC-12, and UC-35 aircraft submitted to DynCorp under [the Prime Contract] for the purpose of allowing Stevens to perform the aviation maintenance services specified in that [Subcontract]." In support of that holding, the circuit court found the Subcontract is unambiguous, the Teaming Agreement is incorporated into the Subcontract, and the language of the Subcontract combined with the language of the Teaming Agreement unambiguously establishes that the Subcontract is a requirements contract.

DynCorp appealed asserting the circuit court erred in granting partial summary judgment before the completion of discovery, in granting partial summary judgment on grounds not before the court, in finding the Teaming Agreement was incorporated into the Subcontract, and in holding the Subcontract created an exclusive relationship between the parties. The court of appeals reversed the circuit court, first holding the Teaming Agreement is not incorporated into the Subcontract. *Stevens Aviation, Inc. v. DynCorp Intern. LLC*, 394 S.C. 300, 307–09, 715 S.E.2d 655, 659–60 (Ct. App. 2011). The court reasoned that the reference to the Teaming Agreement is in a "whereas" clause and such clauses are generally not considered contractual and not permitted to control express provisions of a contract. *Id.* at 308, 715 S.E.2d at 659. The court went on to find the contractual language establishes the parties did not intend to incorporate the Teaming Agreement because an incorporation provision contained in a "whereas" clause provides that the Subcontract supersedes any prior written agreements.

Having found the Teaming Agreement was not incorporated, the court considered the language of the Subcontract and concluded it does not establish an exclusive relationship between the parties and therefore is not an enforceable requirements contract. *Id.* at 309–11, 715 S.E.2d at 660–61. As an initial matter, the court found the Subcontract does not apply to UC-35 aircraft because it does not contain per-unit pricing for those planes. *Id.* at 309–10, 715 S.E.2d at 660. Addressing exclusivity generally, the court acknowledged some language in the Subcontract suggests exclusivity, but found other language established that no exclusive relationship exists. *Id.* at 311, 715 S.E.2d at 661. Specifically, the court quoted the language in the Subcontract's Statement of Work providing that Stevens is to perform strip and paint services "*at the direction of DynCorp*" and is to

perform other maintenance "*as directed* by DynCorp." *Id.* The court concluded the Subcontract is not an enforceable contract and therefore DynCorp is only obligated to pay Stevens for work already performed. *Id.* Finally, the court granted partial summary judgment to DynCorp. *Id.* at 312, 715 S.E.2d at 661. This Court granted certiorari to review the court of appeals' decision.

ISSUES PRESENTED

- I. Did the court of appeals err in holding the Subcontract is not an enforceable requirements contract for C-12 and RC-12 aircraft covered by the Prime Contract?
- II. Did the court of appeals err in holding the Subcontract is not an enforceable requirements contract for UC-35 aircraft covered by the Prime Contract?
- III. Did the court of appeals err in granting summary judgment to DynCorp when DynCorp never moved for summary judgment?

STANDARD OF REVIEW

While federal law governs the Subcontract, the South Carolina Rules of Civil Procedure and South Carolina Rules of Appellate Procedure govern the resolution of this dispute. Rule 56(c) of the South Carolina Rules of Civil Procedure provides that a trial court may grant a motion for summary judgment where "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." In determining whether a genuine issue of material fact exists, the evidence and inferences that can reasonably be drawn therefrom are to be viewed in the light most favorable to the nonmoving party. *Quail Hill, LLC v. Cnty. of Richland*, 387 S.C. 223, 235, 692 S.E.2d 499, 505 (2010). In reviewing a grant of summary judgment, an appellate court applies the same standard as the trial court. *Id.*

LAW/ANALYSIS

I. C-12 AND RC-12 AIRCRAFT

Stevens contends that regardless of whether the Subcontract incorporates the Teaming Agreement, it establishes an exclusive relationship between the parties and is an enforceable requirements contract. We agree as to the C-12 and RC-12 aircraft and conclude the court of appeals erred in holding to the contrary.

Under the federal common law, a services or supply contract must fit into one of three forms: a contract for a definite quantity, a contract for an indefinite quantity, or a requirements contract. *Ace-Federal Reporters, Inc. v. Barram*, 226 F.3d 1329, 1331 (Fed. Cir. 2000). As set forth in *Torncello v. United States*, 681 F.2d 756 (Ct. Cl. 1982), and quoted by subsequent federal decisions, these three forms of supply contracts are described as:

With contracts for a definite quantity, the promises and obligations flowing from each party to the other define both the minimum and maximum performances of each and furnish the consideration from each party that courts require for enforceability. With indefinite quantities contracts, however, the buyer's promise specifically is uncertain, and such a contract would fail for lack of consideration if it did not contain a minimum quantity term. Without an obligatory minimum quantity, the buyer would be allowed to order nothing, rendering its obligations illusory and, therefore, unenforceable. Requirements contracts also lack a promise from the buyer to order a specific amount, but consideration is furnished, nevertheless, by the buyer's promise to turn to the seller for all such requirements as do develop. Such contracts clearly are enforceable on that basis. The entitlement of the seller to all of the buyer's requirements is the key, for if the buyer were able to turn elsewhere for some of its needs, then the contract would not be distinguishable from an indefinite quantities contract with no stated minimum, unenforceable as we have stated.

Torncello, 681 F.2d at 761–62 (citations omitted).¹

¹ We reject DynCorp's assertion that in light of the United States Court of Appeals for the Federal Circuit's decision in *Coyle's Pest Control, Inc. v. Cuomo*, 154 F.3d 1302 (Fed. Cir. 1998), a fourth form of services or supply contract—a "purchase order pricing structure contract"—exists. DynCorp suggests the Subcontract is such a "purchase order pricing structure contract" whereby DynCorp contractually only must pay Stevens for services DynCorp orders and Stevens completes at their previously agreed upon pricing. *Coyle's* plainly did not approve such a contract. To the contrary, the *Coyle's* decision made clear the contract at issue there was not enforceable. *Coyle's*, 154 F.3d at 1304 (finding "no error in the Board's reasoning or conclusion" that "the contract is not enforceable for lack of consideration"). DynCorp misreads the language in *Coyle's* providing that the plaintiff was "entitled to payment only for services actually ordered by [the defendant] and provided by

"Contract interpretation begins with the plain language of the agreement." *Gould Inc. v. United States*, 935 F.2d 1271, 1274 (Fed. Cir. 1991). In determining which type of services or supply contract parties entered into, a court is to look "beyond the first page of the contract to determine what were the legal rights for which the parties bargained." *Crown Laundry & Dry Cleaners, Inc. v. United States*, 29 Fed. Cl. 506, 515 (1993). Courts are to "assume that the parties intended that a binding contract be formed," and "[t]hus, any choice of alternative interpretations, with one interpretation saving the contract and the other voiding it, should be resolved in favor of the interpretation that saves the contract." *Torncello*, 681 F.2d at 761, *see also Crown Laundry*, 29 Fed. Cl. at 515-16 ("[B]ecause it must be assumed that the parties intended to form a binding contract, the court should favor an interpretation that saves the contract instead of voiding it.").² Additionally, "an interpretation that gives meaning to all parts of the contract is preferable to one which renders provisions in the contract meaningless or superfluous." *Crown Laundry*, 29 Fed. Cl. at 515.

[the plaintiff]." *Id.* at 1306. Having found the contract unenforceable, that language clearly did not establish a new form of services or supply contracts, but rather merely acknowledged that the plaintiff could recover on equitable grounds for services ordered and performed.

² We also reject DynCorp's contention that the *Coyle's* decision overturned this rule of contract construction. In *Coyle's*, the court rejected "the notion that *Torncello* . . . requires [a court] to save an otherwise unenforceable indefinite quantity contract by interpreting it as an 'implied' requirements contract." *Coyle's*, 154 F.3d at 1304 (emphasis added). DynCorp urges this Court to read that holding as rejecting *Torncello's* instruction to favor an interpretation of an enforceable requirements contract where such an interpretation is possible. However, the *Coyle's* holding does not extend that far and only rejected the extreme reading of *Torncello* as requiring a court to interpret an otherwise unenforceable contract as a requirements contract. DynCorp fails to acknowledge that *Torncello* only instructs a court to favor an interpretation as a requirements contract, rather than as an unenforceable agreement, *only* when the contract is susceptible to interpretation as a requirements contract. *Torncello*, 681 F.2d at 761 (stating a court should favor an interpretation as a requirements contract only when that is a legitimate "choice of alternative interpretations"). The *Coyle's* court made this distinction clear, stating "the *Torncello* court implicitly rejected a rule of 'saving the contract' by interpreting it as a requirement contract when it is not so susceptible." *Coyle's*, 154 F.3d at 1305.

Here, the contractual language indicates an intent to establish an exclusive relationship between the parties. The Subcontract's Statement of Requirements provides that Stevens, as DynCorp's subcontractor, is to provide aircraft maintenance to "the Government's *fleet* of C-12/RC-12 Aircraft... under the Prime Contract." (emphasis added). The use of the word "fleet" indicates Stevens is to service *all* of the government's C-12 and RC-12 aircraft covered by the Prime Contract rather than just those aircraft DynCorp chooses to send to Stevens.

Additionally, the Statement of Requirements provides that DynCorp "is not required to purchase from the Subcontractor any requirement in excess of the total funding" under the Prime Contract. That language implies that DynCorp is required to purchase from Stevens all requirements within the total funding provided by the Prime Contract. If that was not the case, the provision would be superfluous because DynCorp could purchase only those services from Stevens it so chooses.

The Subcontract's Statement of Work also evidences an intent to create an exclusive relationship. Its description of the "strip and paint" work states that Stevens "shall provide *all*" services needed to "strip and completely repaint *aircraft*." (emphasis added). The Subcontract defines "Aircraft" as including "all" C-12 and RC-12 aircraft covered by the Prime Contract. Similarly, the Statement of Work's description of the "aircraft condition inspection" work states that Stevens "shall provide *all*" services needed to "perform *all* the requirements" of the Prime Contract's Statement of Work. The Statement of Work also states that Stevens "*shall perform* both Depot and Non-Depot Maintenance." Finally, the Subcontract sets forth a detailed list of per-unit pricing for each of the items of work Stevens is to perform. While these provisions do not explicitly state that the Subcontract creates an exclusive relationship between the parties, they utilize language consistent with and indicative of such a relationship.

Additionally, to interpret the Subcontract as not creating an exclusive relationship would render the Subcontract's termination provisions superfluous. The Subcontract's termination provisions permit DynCorp to terminate the Subcontract if Stevens fails to perform despite receipt of cure notices. If the Subcontract is not a requirements contract, the termination provision would be superfluous. DynCorp would not need to issue cure notices or formally terminate the contract. DynCorp could effectively unilaterally terminate the contract at any time by choosing to not send additional aircraft to Stevens.

The court of appeals erroneously discounted that contractual language and focused on the "at the direction of" language used in the Subcontract's Statement of Work for the "strip and paint" and "site organizational maintenance work." *Stevens Aviation*, 394 S.C. at 311, 715 S.E.2d at 661. Presumably, the court of appeals believed that language indicated Stevens was only to perform work on those aircraft that DynCorp directed it to perform work on, thus leaving open the possibility of DynCorp sending some aircraft to other maintenance providers. We find this contractual language does not support that conclusion. As we understand the Subcontract, C-12 and RC-12 aircraft would come to Stevens for an inspection. After Stevens performed the inspection, some of the inspected aircraft would need to be stripped and painted. Thus, the "at the direction of" language for the strip and paint work is best interpreted as meaning that DynCorp directs Stevens as to which aircraft need to be stripped and painted and how they are to be stripped and painted. The fact that DynCorp can tell Stevens which aircraft need this work is in no way inconsistent with Stevens performing all such "strip and paint work."

For the "site organizational maintenance" work, the Subcontract's description of that work is instructive:

Both Parties recognize that at times it will be beneficial for work that would have normally been performed at the site by the site personnel to be accomplished at [Stevens'] facility. [Stevens] is not authorized to proceed with such efforts without written authorization from DYNCORP. The procedures for request, provision of estimate, authorization, and performance of such efforts will be in accordance with Section H.12, "Over and Above Work."

In other words, "site organizational maintenance" is work that needs to be performed at a special location—Stevens' facilities. The fact that Stevens cannot transfer its work under the Subcontract to its facilities without DynCorp's prior authorization in no way conflicts with the premise that Stevens is to perform all such work required by DynCorp. In short, we interpret these provisions as meaning that Stevens is to perform *all* "strip and paint" work and *all* "site organizational maintenance" work, but is to do so subject to DynCorp's instructions.

Accordingly, we find the unambiguous language of the Subcontract, regardless of whether the Teaming Agreement is incorporated, establishes an exclusive relationship between the parties as to C-12 and RC-12 aircraft covered by the Prime Contract. Therefore, we hold the Subcontract is an enforceable

requirements contract as to those aircraft and reverse that portion of the court of appeals' decision.

II. UC-35 AIRCRAFT

Stevens also contends the court of appeals erred in holding the Subcontract does not create an exclusive relationship as to UC-35 aircraft covered by the Prime Contract. We disagree.

The Subcontract mentions the UC-35 aircraft in only one provision. The definitions section of the Subcontract defines "Aircraft" as "All Army RC/C-12 and UC-35 aircraft covered under the Prime Contract." However, the remainder of the Subcontract makes clear that it covers only RC-12 and C-12 aircraft by the use of provisions specific to those aircraft and the absence of any provisions related to the UC-35 aircraft. Specifically, the "Statement of Requirements" provides that Stevens "shall provide" services for "the Government's fleet of C-12/RC-12 Aircraft." The UC-35 is never mentioned in the Statement of Work nor in the descriptions of the CLINS covered by the Subcontract.³ Finally, the Subcontract does not contain a schedule of services and costs for the UC-35 aircraft, and "per-unit pricing . . . is an essential element in a requirements contract" *Ceredo Mortuary Chapel, Inc. v. United States*, 29 Fed. Cl. 346, 351 (1993). Accordingly, we conclude the Subcontract does not contain language establishing that Stevens is to perform *any* work on the UC-35 aircraft, much less language establishing that Stevens has an exclusive relationship with DynCorp as to the maintenance of the UC-35 aircraft under the Prime Contract. Therefore, we affirm the court of appeals' holding as to the UC-35 aircraft.

III. THE COURT OF APPEALS' GRANT OF SUMMARY JUDGMENT TO DYNCORP

Finally, we hold the court of appeals erred in granting summary judgment to DynCorp. While this Court has not yet addressed whether an appellate court may grant summary judgment to a party who did not move for that relief below, the rule in other jurisdictions is that an appellate court may do so only under limited circumstances. *See, e.g., Kassbaum v. Steppenwolf Prods., Inc.*, 236 F.3d 487, 494 (9th Cir. 2000) ("It is generally recognized that a court has the power sua sponte to grant summary judgment to a non-movant when there has been a motion but no

³ The Statement of Work does use the term "aircraft" in its description of the "strip and paint" work, but the heading for that work is "C-12/RC-12 STRIP AND PAINT."

cross-motion."); *In the Matter of Cont'l Airlines*, 981 F.2d 1450, 1458 (5th Cir. 1993) ("This court has the power to render summary judgment for a nonmoving party if we find that the moving party is not entitled to summary judgment and that no factual dispute exists and the nonmoving party is entitled to summary judgment as a matter of law."); *Johnson v. Earnhardt's Gilbert Dodge, Inc.*, 132 P.3d 825, 830–31 (Ariz. 2006) (acknowledging that an appellate court may grant summary judgment for a nonmoving party where the moving party had an opportunity to address the issue before the trial court and to show that a genuine issue of material fact exists).

We need not decide whether to adopt the rule from these other jurisdictions because the limited circumstances wherein an appellate court may grant summary judgment are not present here. Accordingly, we hold the court of appeals erred in granting summary judgment to DynCorp.

CONCLUSION

We hold the Subcontract is a requirements contract creating an exclusive relationship as to the C-12 and RC-12 aircraft, reverse the court of appeals' holding to the contrary, and reinstate the circuit court's grant of summary judgment as to this issue. We also affirm the court of appeals' holding that the Subcontract is not a requirements contract as to the UC-35 aircraft. Finally, we reverse the court of appeals' grant of summary judgment to DynCorp.

TOAL, C.J., PLEICONES, BEATTY and KITTREDGE, JJ., concur.

**THE STATE OF SOUTH CAROLINA
In The Court of Appeals**

Stevens Aviation, Inc., Respondent,

v.

DynCorp International LLC, and Science
Applications International Corporation,
Defendants,

of whom DynCorp International LLC is, Appellant.

Appeal from Greenville County
R. Lawton McIntosh, Circuit Court Judge

Opinion No. 4857
Heard June 22, 2011 – Filed July 27, 2011

REVERSED

C. Mitchell Brown, A. Mattison Bogan, and
Michael J. Anzelmo, all of Columbia; and William
S. Brown, Lane W. Davis, and Steven E.
Buckingham, all of Greenville, for Appellant.

Keith D. Munson and Catherine R. Atwood, both
of Greenville; and Linda L. Shapiro, Kathy A.
Wisniewski, and John W. Rogers, all of St. Louis,
MO, for Respondent.

THOMAS, J.: In this action, DynCorp International LLC (DynCorp) appeals a circuit court's grant of partial summary judgment to Stevens Aviation, Inc. (Stevens) on the interpretation of a contract between DynCorp and Stevens. DynCorp argues the circuit court erred in (1) granting partial summary judgment on grounds not before it; (2) incorporating a prior agreement between Stevens and DynCorp into a later agreement between them; (3) holding the later agreement was an enforceable requirements contract; and (4) ruling on these issues without permitting DynCorp to conduct further discovery. We reverse.

FACTS & PROCEDURAL HISTORY

Sometime before March 2000, the United States federal government issued a request for bids

on an aviation maintenance contract for C-12, RC-12, and UC-35 airplanes owned by the United States Army and Navy (the Prime Contract). The Prime Contract provides that the contractor shall conduct "strip and paint" services, "aircraft condition inspection" (ACI), "site organizational maintenance," and "over and above maintenance" of C-12s, RC-12s, and UC-35s.

On March 16, 2000, DynCorp and Stevens entered a "Teaming Agreement" that imposed certain duties on each party to coordinate a proposal to secure the Prime Contract, with DynCorp as the contractor and Stevens as the subcontractor. The Teaming Agreement also explicitly incorporated two attachments. First, it incorporated an attachment titled "Statement of Work," which provided that Stevens "shall be proposed to perform" ACIs, "strip and paint requirements," and "depot level maintenance for the C-12/RC-12 aircraft fleet" above DynCorp's capabilities. Second, it incorporated an attachment titled "Proprietary Data Provisions," which limited both parties' rights to disclose each other's proprietary business information.

DynCorp was subsequently awarded the Prime Contract, and on March 20, 2001, the parties entered a "Subcontract" that governs their relationship in performing the Prime Contract. Two provisions of the Subcontract's "Preamble" provide the following:

WHEREAS, the parties entered into a Teaming Agreement ("TA") executed on 16 March, 2000, which identifies the roles and responsibilities of the parties as Prime and Subcontractor in a cooperative effort to perform the requirements of U.S. Army Contract DAAH23-00-C-0226 ("Prime Contract");

WHEREAS, this Subcontract supersedes all prior written or oral agreements between the parties, excluding the Proprietary Data Exchange Agreement executed on March 16, 2000, and constitutes the entire agreement between the parties hereto with respect to this Subcontract;

.....

NOW THEREFORE, in consideration of the promises, mutual covenants and agreements contained herein, the parties hereto agree as follows:

Two pages later, the Subcontract defines "Aircraft" as "all Army RC/C-12 and UC-35 aircraft covered under the Prime Contract."

Section C of the Subcontract specifically addresses Stevens's duties regarding the work to be performed for DynCorp:

C.1 STATEMENT OF WORK/TECHNICAL

SPECIFICATION

A. The work shall be performed in accordance with the [Prime Contract's Statement of Work] (Contract DAAH23-00-C-0226; Attachment 1).

B. C-12/RC-12 STRIP AND PAINT. [Stevens] shall provide all labor, services, facilities, equipment, and direct and indirect parts and materials required to strip

and completely repaint aircraft (for other than ACI requirements), at the direction of DynCorp. Such work will be performed in accordance with the [Prime Contract's Statement of Work], Section 4 (4.1.3)

C. AIRCRAFT CONDITION INSPECTION (ACI). [Stevens] shall provide all labor, services, equipment, tools, facilities, tooling, lubricants, excluding engine oil, direct and indirect parts and material, fuel, and strip and repaint services required to perform all the requirements of Appendix P [the Prime Contract's] Statement of Work Items found defective beyond those addressed by Appendix P will be handled on an Over-and-Above basis.

D. OVER AND ABOVE MAINTANENCE. [Stevens] shall perform both Depot and Non-Depot Maintenance in accordance with Sections 4.0 AND 5.0 of the [Prime Contract's Statement of Work]. DynCorp will reimburse [Stevens] for the labor required for:

....

(3) Other over and above tasks, as directed by DynCorp.

....

E. SITE ORGANIZATIONAL MAINTENANCE. As directed by DynCorp, [Stevens] shall accomplish work, at [Stevens]'s facility, that would normally be performed at the site by the site personnel.

In August 2009, Stevens filed a complaint against DynCorp, alleging DynCorp breached the Subcontract by diverting C-12s, RC-12s, and UC-35s to other businesses for maintenance work covered by the Subcontract. After the parties filed numerous motions, the circuit court granted partial summary judgment to Stevens. The circuit court held the Subcontract incorporated the Teaming Agreement and constituted an enforceable requirements contract for specified maintenance of the C-12s, RC-12s, and UC-35s covered by the Prime Contract. This appeal followed.

ISSUES ON APPEAL

1. Did the circuit court err in granting partial summary judgment on grounds not before it?
2. Did the circuit court err in incorporating the Teaming Agreement into the Subcontract?
3. Did the circuit court err in finding the Subcontract created an enforceable requirements contract as a matter of law?
4. Did the circuit court err in granting partial summary judgment without permitting DynCorp to conduct discovery?

STANDARD OF REVIEW

When reviewing the grant of summary judgment, "this Court applies the same standard as that required for the circuit court under Rule 56(c), SCRCP. Summary judgment is proper where there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law." Wallace v. Day, 390 S.C. 69, 73, 700 S.E.2d 446, 448 (Ct. App. 2010) (per curiam) (citations and internal quotation marks omitted).

A contract or provisions within it are unambiguous if they are not "susceptible to more than one reasonable interpretation" [1] TEG-Paradigm Envtl., Inc. v. U.S., 465 F.3d 1329, 1338 (Fed. Cir. 2006). "When the contract's language is unambiguous it must be given its plain and ordinary meaning and the court may not look to extrinsic evidence to interpret its provisions." Id. (internal quotation marks omitted).

I. Grounds Not Before the Circuit Court

DynCorp asserts it lacked notice the circuit court would consider whether the Subcontract incorporated the Teaming Agreement. However, DynCorp did not make this argument in its Rule 59(e) motion or memorandum supporting that motion. Therefore, the issue is not preserved for our review. See In re Estate of Timmerman, 331 S.C. 455, 460, 502 S.E.2d 920, 922 (Ct. App. 1998) ("When a party receives an order that grants certain relief not previously contemplated or presented to the circuit court, the aggrieved party must move, pursuant to Rule 59(e), SCRCP, to alter or amend the judgment in order to preserve the issue for appeal.").

II. Incorporating the Teaming Agreement

DynCorp next argues the circuit court erred in incorporating the Teaming Agreement into the Subcontract. We agree.

To incorporate the terms of extrinsic material, a contract need not use "magic words." Northrop Grumman Info. Tech., Inc. v. United States, 535 F.3d 1339, 1346 (Fed. Cir. 2008) (internal quotation marks omitted). However, the contract "must explicitly, or at least precisely, identify the written material being incorporated and must clearly communicate that the purpose of the reference is to incorporate the referenced material into the contract (rather than merely to acknowledge that the referenced material is relevant to the contract, e.g., as background law or negotiating history)." Id. at 1345.

Here, the Subcontract identifies the Teaming Agreement with sufficient particularity to incorporate the entire document, but it does not sufficiently communicate an intention to incorporate the Teaming Agreement as a whole. The provision is contained in one of the preamble's "whereas" clauses, and generally, "whereas" clauses "are not considered 'contractual' and cannot be permitted to control the express provisions of the contract" KMS Fusion v. United States, 36 Fed. Cl. 68, 77 (1996). Read in its entirety, moreover, the Subcontract reveals that the parties did not intend to incorporate the Teaming Agreement as a whole. Although incorporation does not require magic language, the Subcontract incorporated other items by using language with such clarity that it is obvious the parties understood how to incorporate substantive provisions of the document into the Subcontract. First, the Subcontract explicitly provides that over fifty federal regulations were "hereby incorporated." Second, the integration clause in the Preamble immediately before the Teaming Agreement language provides that the Subcontract supersedes prior written agreements except for the "Proprietary Data Exchange Agreement executed by the parties on 16 March 2000." [2] See

TEG-Paradigm Envtl., 465 F.3d at 1339 ("One common way to incorporate extrinsic evidence is through an integration clause that expressly incorporates the extrinsic evidence.").

If the Subcontract does not incorporate the entire Teaming Agreement, Stevens claims the Subcontract's reference to the Teaming Agreement merely incorporates the Teaming Agreement's provisions that establish the "roles and responsibilities" of the parties. Yet this contention must fail because it would require this court to handpick which duties to incorporate without guidance from the Subcontract. The Subcontract's reference to the "roles and responsibilities of the parties" established by the Teaming Agreement is hardly precise enough to identify which roles and responsibilities the Subcontract incorporates. The Teaming Agreement establishes various duties, many of which would be inapposite to the parties' relationship once the Subcontract was created. For example, the Teaming Agreement imposes a duty on DynCorp to submit a proposal for the Prime Contract, a duty on DynCorp to award the Subcontract to Stevens, and a duty on Stevens to help DynCorp develop the proposal for the Prime Contract. Consequently, the Subcontract does not clearly show the Teaming Agreement was intended to be relevant for more than background law or negotiating history. The circuit court erred in finding the Teaming Agreement was incorporated into the Subcontract.

III. Requirements Contract

For various reasons, DynCorp contends the circuit court erred in holding the Subcontract was an enforceable requirements contract for maintenance of C-12s, RC-12s, and UC-35s. In the interest of clarity, DynCorp's arguments condense to two points of interest: the Subcontract does not (1) apply to UC-35s or (2) create an exclusive relationship between the parties for all of the services covered. We agree with both contentions.

a. Applicability to UC-35s

First, DynCorp maintains the Subcontract does not apply to UC-35s. We agree. The Subcontract does not include per-unit pricing for UC-35s, and therefore, it cannot be construed as an enforceable requirements contract for that aircraft. Ceredo Mortuary Chapel, Inc. v. United States, 29 Fed. Cl. 346, 351 (1993) ("[P]er-unit pricing . . . is an essential element in a requirements contract showing that the supplier is bound to perform regardless of the quantity of work." (internal quotation marks omitted)). Consequently, the circuit court erred in finding the Subcontract was an enforceable requirements contract as to UC-35s governed by the Prime Contract.

b. Exclusivity of the Contractual Relationship

Second, DynCorp insists the Subcontract does not create an exclusive relationship between the parties regarding all of the services it addresses.^[3] We agree.

To create an enforceable requirements contract under the applicable law, a contract need not include the word "exclusive" or minimum quantity terms; rather, the seller merely must have "the exclusive right and legal obligation to fill all of the buyer's needs for the goods or services described in the contract. . . . [A]n essential element of a requirements contract is the promise by the buyer to purchase the subject matter of the contract exclusively from the seller." Coyle's Pest Control, Inc. v. Cuomo, 154 F.3d 1302, 1305 (Fed. Cir. 1998) (alterations in original) (internal quotation marks

omitted). Terms that suggest exclusivity include language that the seller must "furnish all labor . . . and related services" to the buyer or the buyer must order services for "all its properties" from the seller. See id. at 1305. Even if a contract contains such language, however, the contract is not an exclusive requirements contract if the contract merely requires a party "to furnish all labor . . . and related services on assigned properties" Id. at 1305-06 (first emphasis omitted).

Here, the Subcontract includes language that at first glance suggests exclusivity. The Subcontract states Stevens "shall provide all . . . [ACI] required to perform Appendix P of the Prime Contract's Statement of Work." However, a thorough review of the provisions establishing the remaining maintenance obligations reveals that the Subcontract does not create "the exclusive right and legal obligation to fill all of [DynCorp's] needs for the . . . services described in the contract." Coyle's Pest Control, 154 F.3d at 1305 (internal quotation marks omitted). As to the strip and paint services, the Subcontract states that Stevens "shall provide all . . . services required to strip and completely repaint aircraft (for other than [ACI] requirements) at the direction of DynCorp." Similarly, the Subcontract provides Stevens would perform site organizational maintenance and over and above maintenance "as directed by DynCorp." Consequently, we reverse the circuit court's holding that the Subcontract is an enforceable requirements contract for C-12, RC-12, and UC-35 maintenance.[4] DynCorp must pay Stevens for the services under the Subcontract only to the extent that maintenance was performed. See id. at 1306 (holding that because a contract was "not enforceable as either a requirements contract or as an indefinite quantity contract[,] . . . Coyle [wa]s entitled to payment only for services actually ordered by HUD and provided by Coyle").

IV. Completion of Discovery

Lastly, DynCorp argues the circuit court erred in granting partial summary judgment because it considered extrinsic evidence introduced by Stevens without permitting DynCorp to conduct discovery to refute that evidence. Because the Teaming Agreement is not incorporated into the Subcontract, we agree the circuit court erroneously considered extrinsic evidence. Despite this mistake, however, we grant partial summary judgment without further discovery on the issues before us. Our holdings are a matter of law, and therefore, further discovery of extrinsic evidence to interpret the provisions relevant to this appeal is unnecessary. See TEG-Paradigm Envtl., 465 F.3d at 1338 ("When the contract's language is unambiguous it must be given its plain and ordinary meaning and the court may not look to extrinsic evidence to interpret its provisions." (internal quotation marks omitted)).

CONCLUSION

For the aforementioned reasons, the ruling of the circuit court is

REVERSED.

HUFF and WILLIAMS, JJ., concur.

[1] Both the Teaming Agreement and the Subcontract provide they are to be construed using the federal common law of government contracts and, if that law is not dispositive, the laws of Texas.

[2] In response to a question from the bench during oral argument, Stevens's answer suggested the Subcontract's mention of the "Proprietary Data Exchange Agreement executed on 16 March 2000" refers to a document titled "Proprietary Data Provisions," which is part of the Teaming Agreement and was executed on March 16, 2000. Thus, if the Teaming Agreement were incorporated in total, the incorporation of this proprietary business information agreement was unnecessary.

[3] DynCorp further emphasizes that the Subcontract fails to include certain language required by Federal Acquisition Regulations (FAR) to create an enforceable requirements contract. However, the FAR requiring that language does not apply to the Subcontract because it is a private contract. See 48 C.F.R. § 1.104 ("The FAR applies to all acquisitions as defined in Part 2 of the FAR, except where expressly excluded."); 48 C.F.R. § 2.101 ("Acquisition means the acquiring by contract with appropriated funds of supplies or services (including construction) by and for the use of the Federal Government through purchase or lease"). In addition, the Subcontract did not incorporate the FAR despite incorporating fifty other FARs. See Northrop Grumman Info. Tech., 535 F.3d at 1344 ("[T]his court has been reluctant to find that statutory or regulatory provisions are incorporated into a contract with the government unless the contract explicitly provides for their incorporation." (internal quotation marks omitted)).

[4] Although the ACI provision does not include "at the direction" language, Stevens fails to argue the nonexclusive provisions—the provisions addressing strip and paint, site organizational, and over and above maintenance—are divisible from the remaining portions of the Subcontract such that the Subcontract could create an exclusive relationship. Therefore, we may not consider that argument to enforce the Subcontract. See I'On LLC v. Town of Mount Pleasant, 338 S.C. 406, 420, 526 S.E.2d 716, 723 (2000) ("Of course, a respondent may abandon an additional sustaining ground . . . by failing to raise it in the appellate brief.").
