1.	Hearing on September 12-13, 16-20, and 23-24.....	263
	Opening Statements	268
	Testimony of Robert Douglas White:	

Direct Examination by Mr. Thomas	334
Cross Examination by Mr. Long.....	435

VOLUME 2 OF 10

Redirect Examination by Mr. Thomas.....	530
Testimony of Adam Rudd:	
Direct Examination by Mr. Thomas	560
Cross Examination by Mr. Long.....	599
Redirect Examination by Mr. Thomas.....	659
Recross Examination by Mr. Long.	670
Redirect Examination by Mr. Thomas.....	673
Testimony of Robert Grace:	
Direct Examination by Mr. Thomas	675
Cross Examination by Mr. Long.....	738
Redirect Examination by Mr. Thomas.....	777
Testimony of William A. Collins, III, M.D.:	
Direct Examination by Mr. Cartin	787
Cross Examination by Mr. Mullins.....	824
Redirect Examination by Mr. Cartin.....	862
Testimony of Daniel J. Sullivan:	
Direct Examination by Mr. Thomas	871

VOLUME 3 OF 10

Cross Examination by Mr. Long.....	1052
Redirect Examination by Mr. Thomas.....	1159
Recross Examination by Mr. Long.	1192

Testimony of Beverly A. Brandt:

Direct Examination by Ms. Biggers.....1200

Cross Examination by Mr. Mullins.....1214

Cross Examination by Mr. Thomas. 1276

Recross Examination by Mr. Mullins 1360

Testimony of Richard R. Lewis:

Direct Examination by Mr. Long.....1365

Cross Examination by Mr. Thomas 1458

VOLUME 4 OF 10

Redirect Examination by Mr. Long. 1615

Recross Examination by Mr. Thomas.....1625

Testimony of Patricia A. "Sissy" Price:

Direct Examination by Mr. Mullins.....1626

Cross Examination by Mr. Cartin 1683

Redirect Examination by Mr. Mullins. 1730

Testimony of Patrick Michael Francke, M.D.:

Direct Examination by Mr. Mullins.....1737

Cross Examination by Mr. Cartin 1790

Redirect Examination by Mr. Mullins. 1835

Testimony of Rosa L. Maynor:

Direct Examination by Mr. Long.....1838

Cross Examination by Mr. Thomas 1859

Redirect Examination by Mr. Long. 1893

Testimony of Samuel H. Tolbert:

Direct Examination by Mr. Long.....	1899
-------------------------------------	------

VOLUME 5 OF 10

Cross Examination by Mr. Thomas	2074
Redirect Examination by Mr. Long.	2305
Testimony of Daniel J. Sullivan:	
Rebuttal Direct Examination by Mr. Thomas.....	2326
Rebuttal Cross Examination by Mr. Long	2401
Rebuttal Redirect Examination by Mr. Thomas.	2460
Rebuttal Recross Examination by Mr. Long.	2476
Closing Statements.....	2477

in Myrtle Beach, SC. I handle much of our CON work across the company and was referred to
you by our Chief Legal Officer, Norton Travis.

> The items I wish to discuss are as follows:

> (i) We recently applied to replace one of the linear accelerators in
Myrtle Beach but were denied. I believe we were denied for two reasons (i) confusion on the
type of linear accelerator we proposed and (ii) reasoning for replacing a relatively new unit
(2002 model year) vs the older unit (early 1990's model).

> (ii) Preparing and submitting a CON Application to expand our current
radiation therapy service at an alternate location within the service area (expand to a
fourth linear accelerator and a second site)

> (iii) Get your take on the attached email we received from a student at DHEC.
Probably coincidental, but came right after our request to replace the linear accelerator was
denied.

> Please let me know a good day/time to discuss these items this week. We need to move
forward quickly on items 1 and 2. I have a lot of information I can provide - all the
documents sent/received relating to item (i); I have begun to gather a lot of information in
anticipation of filing item (ii) (but there is a huge amount of work still to be done)

REQUEST FOR CAPITAL

FOR ROUTINE CAPITAL ITEMS

\$3M-\$5 Million

Facility Name: Grand Strand Regional Medical Center

Project Name: Request to Purchase Linear Accelerator and CT Simulator

Facility Contact – Name: Doug White

Number: (843) 692-1104

(Revised February 2007)

INTRODUCTION

The purpose of this document is to provide guidelines for completing a capital request for a routine capital item between \$3 million and \$5 million in cost. Thorough completion of this document along with the completed proforma should provide the majority of the information needed for a management decision on the project. However, any additional information or documentation you believe is necessary to further explain or justify the project should also be provided.

In order to have a complete business case, you should address the questions and provide the information requested in this document. In addition, you will need to complete a proforma. The proforma should be prepared using the Capital Asset Management (CAMS) Investment Model, which can be downloaded from the CAMS site on Atlas. To find the Model, log on to Atlas. Once in Atlas, go to "Operations Finance", then to the "Capital Asset Management" link.

The proforma should reflect a five-year projection of the incremental benefits (volumes and earnings) expected as a result of the investment. Each year of the proforma should reflect a full 12 months of operation. If your project includes multiple major components, you may want to provide separate proformas for each major component. ***General guidelines for completing a proforma are included at the end of this document (see Exhibit #1). Please review these guidelines prior to completing the proforma.***

If the project includes any major equipment items, such as a CT Scanner, MRI, etc., please provide a copy of the full vendor quote if available.

Project Justification

1. **Describe the primary justification and/or business need for this investment. If the project includes multiple major components, please provide a justification for each major component. The justification should cover (but not be limited to) the following:**
 - If the project is in response to a competitive threat, please provide details.
 - If the project will provide any additional capacity, describe in detail the need for those capacity increases.
 - If the project addresses aesthetic or patient flow issues, describe the current deficiencies and the problems they cause. Patients are delayed or transferred because service is only available 2 weeks.
 - If the project addresses any major equipment issues, discuss the problems currently experienced (i.e., technology, capacity, excessive downtime, etc.).
 - If the project involves a new service, discuss the rationale for the addition of this service. Also, discuss who the primary competitors are for this service.
 - Provide details of any major code or infrastructure issues addressed by the project.

Grand Strand Regional Medical Center (GSRMC) is located in a geographically growing area of the state. Regional growth consists of two primary factors: a strong tourist industry and the growth of permanent residents. Located in the heart of Myrtle Beach, South Carolina, GSRMC maintains a strong presence in the community with multiple access points throughout the area.

Beyond its existing trauma, heart, and neuroscience programs, GSRMC is well positioned for continued growth in the market. GSRMC is accredited by the Commission on Cancer (CoC) of the American College of Surgeons. By expanding on this accreditation through a radiation therapy program, the hospital believes that it will achieve the next step in becoming a comprehensive tertiary care provider.

South Carolina's Certificate of Need (CON) requirement is that the percent capacity be a minimum of 80% for a given region. Currently, according to Chapter IX of the 2010 South Carolina State Health Plan that reflects 2009 data, "Megavoltage Radiotherapy & Radiosurgery," the percent utilization within the radiotherapy service area in which GSRMC is located (Horry, Georgetown, Williamsburg Counties) is 80.5%. Of the four linear accelerators in the service area, three are located in Horry County, all of which are owned by 21st Century Oncology in Myrtle Beach. The fourth linear accelerator in the service area is housed in Georgetown Memorial Hospital in Georgetown County in the town of Georgetown.

Currently the hospital refers its cancer patients needing radiation therapy to 21st Century Oncology, located just miles away from the hospital on Oleander Drive. Approval of the linear accelerator project would enable medical oncologists to be able to provide their services to hospitalized patients more conveniently.

The linear accelerator project would require an additional space. The new equipment would be located in a building adjacent to the cardiac rehabilitation wing of the current hospital. The proposal is to construct a facility on campus of approximately 8,000 square feet.

Grand Strand's desire to offer full time radiation therapy services is largely driven by the surrounding competitive environment, and the hospital believes that failure to begin a radiation therapy services program would result in loss of market share to competitors on the northern, southern, and western ends. Three of Grand Strand's primary competitors in the region are filing CON applications for the linear

accelerator technology within their facilities in an effort to increase their current scope of hospital services. First, Georgetown Memorial Hospital is applying to move a radiation therapy unit from Georgetown to its sister facility, Waccamaw Medical Center, in Murrells Inlet. McLeod Medical Center is planning to move a radiation therapy unit from Florence to Seacoast Medical Center at Little River, part of that hospital's plans to create a comprehensive cancer center. Conway Medical Center is also applying to begin offering radiation therapy services on their hospital campus in Conway.

Costs	
Land	\$1,400,000
Building	\$5,763,000
Fixed Equipment	\$5,298,000
Movable Med Equipment – 10 yr	\$455,000
Initial Capital Expenditure Total	\$12,916,000

We received the "project budget" from Thomas Miller & Partners on May 18, 2011 and input those numbers directly into the CAMS document and Request for Capital document.

Estimated Timeline

- 1) 05/13/11 – Capital approval submitted to HCA South Atlantic Division Office for linear accelerator and CT simulator.
 - 2) 05/27/11 – CON application submitted to DHEC.
 - 3) 12/01/11 – CON approval from DHEC.
 - 4) 10/01/12 – Recruitment of physician (radiation oncologist).
 - 5) 11/01/12 – Completion of construction attached to Coastal Cancer Center medical office building on Rourke Street (adjacent to GSRMC campus).
2. *If the project addresses capacity issues that occur primarily during peak times during the year, please explain. Also, please provide a schedule of volumes which supports this assertion. The schedule should include volumes by month for at least the previous 12 months.*

No capacity issues currently exist at GSRMC. Approval of this project would increase outpatient volumes at GSRMC.

3. *If the justification for this project includes protection of existing EBITDA, please explain why this EBITDA is at risk if the investment is not made. If you consider this to be a significant risk, you may want to quantify the volumes and EBITDA you believe are at risk.*

Current and future EBITDA is at risk if the investment is not made in a linear accelerator because GSRMC's competitors on the northern, western, and southern flanks are filing CON applications and would erode related oncology product line market share. Approval of this project would allow GSRMC to increase oncology patients referred by medical oncologists within the hospital and would establish a radiation therapy service at GSRMC.

Description of the Proposed Project

1. **Describe any proposed new construction included in the project.** This should include the location, approximate square feet of new construction, and any unusual circumstances involved with the addition. Please discuss how the project cost estimates were derived and provide the source of those estimates.

An addition of a facility of approximately 8,000 square feet attached to Coastal Cancer Center medical office building on Rourke Street (adjacent to GSRMC campus) would be required as part of this project.

2. **Describe the scope of all renovations to existing areas.** This should include the location of the space to be renovated, approximate square feet involved, and extent of such renovations (i.e., major renovation such as tearing out and relocating walls or minor renovation such as replacing carpet or wallpaper). If not addressed in the question above, please discuss how the project cost estimates were derived and provide the source of those estimates.

The required space for a linear accelerator is approximately 8,000 square feet.

3. **Project alternatives considered.** What other alternatives to this project have been considered and why was this particular alternative chosen?

The alternative to building additional space and housing a hospital-owned linear accelerator is not to enter the radiation therapy services market. No available space currently exists in any GSRMC-owned buildings. Establishment of a radiation therapy program at GSRMC, opposed to any of the three primary competitors, is the best strategy to secure oncology/radiation therapy market share. GSRMC's goal is to win CON approval from the state versus allowing any of the three competitors who have also applied for the linear accelerator CON to win approval.

4. **Major equipment included in the project.** Please provide a detailed description of the major equipment included in the project (including type of equipment, brand, model, etc.). If replacing existing equipment, please provide the make, model (including software version, if applicable), and age of the existing equipment, as well as amount of downtime currently experienced.

A linear accelerator and a computerized tomography (CT) simulator are required for the project. See attached project budget from the HCA Development Team.

Note: If the project includes any major equipment items, such as a CT Scanner, MRI, etc., please attach a copy of the full vendor quote if you have one.

5. **Please discuss any code or infrastructure issues expected to be impacted by this project.**

There are no code or infrastructure issues.

6. **If a CON is needed for this project, please indicate whether or not the approval has been obtained.**

A CON application is required for this project and would be submitted before 06/01/11.

Volume Assumptions

1. *Explain the basis and rationale behind the incremental volume assumptions and how the projected incremental volumes will be achieved. For each type of incremental volume projected, describe how you arrived at the projections.*

Outpatient volumes based on the projected utilization data provided by Parker Poe, LLC, a consultant hired to analyze the radiation therapy market in Myrtle Beach.

Exhibit 14
GSRMC Radiotherapy Program
Projected Utilization

	2013	2014	2015
Projected Service Area Patients Requiring Radiotherapy			
Horry	1,008	1,043	1,081
Williamsburg	106	107	107
Georgetown	246	250	254
Projected GSRMC Radiotherapy Market Share			
Horry	15%	18%	20%
Williamsburg	1%	1%	1%
Georgetown	1%	1%	1%
GSRMC Projected Radiotherapy Patients - Horry County			
Horry	151	188	216
Williamsburg	1	1	1
Georgetown	2	2	3
Total Projected GSRMC Radiotherapy Patients - Service Area	154	191	220
Percent In-migration	5%	5%	5%
Total Projected GSRMC Radiotherapy Patients	162	201	232
Expected Treatments per Patient	21	21	21
GSRMC Projected Radiotherapy Treatments	3,234	4,011	4,620
GSRMC Capacity (Treatments)	5,000	5,000	5,000
GSRMC Utilization Rate	64.7%	80.2%	92.4%

According to the above data:

- 1) 1,008 Horry County patients require radiotherapy in 2013 (year 1 of pro forma).
 - 2) GSRMC's projected radiotherapy market share in year 1 for Horry County is 15%, 18% in year 2, and 20% in year 3. GSRMC's projected market share in years 1-3 for Williamsburg County is 1% and in years 1-3 for Georgetown County is 1%.
 - 3) Expected number of treatments per patient is 21.
 - 4) GSRMC projected radiotherapy treatments grow in year 2 at 24% (from 3,234 to 4,011) and in year 3 at 15% (from 4,011 to 4,620).
 - 5) 3,234 radiotherapy treatments year 1 / 21 treatments per patient = 154 patient cases for GSRMC in year 1 assuming Grand Strand captures exactly 15% of Horry County market share, 1% of Williamsburg County market share, and 1% of Georgetown County market share.
2. For each type of incremental volume expected with this project (both inpatient and outpatient volume), please provide the historical volumes for the three previous years and the projected volumes for the current year.

	Prior Year 3 (2008)	Prior Year 2 (2009)	Prior Year 1 (2010)	Current Year Estimate
Volume Type: OP Linear Accelerator Treatments	0	0	0	0
Volume Type: OP Diagnostic Tests associated with Lin/Acc	0	0	0	0
PET Scans associated with Lin/Acc	0	0	0	0

3. For each type of incremental volume included in the proforma (for both inpatient and outpatient volume), complete a table in the following format reflecting the total and incremental volumes projected:

	Base Year Volume (2012)	Year 1 Projection (2013)	Year 2 Projection (2014)	Year 3 Projection (2015)	Year 4 Projection (2016)	Year 5 Projection (2017)
Total OP Linear Accelerator Treatments	0	3234	4011	4620	4851	5094
Incremental	N/A	3234	777	609	231	243
Total OP Diagnostic Tests associated with Lin/Acc	0	462	573	660	693	728
Incremental	N/A	462	111	87	33	35
CT Scans associated with Lin/Acc	0	154	191	220	231	243
Incremental	N/A	154	37	29	11	12

4. **What are the critical success factors for achieving the incremental volume projections?** For example, do certain physicians have to be recruited, a certain percent of market share growth have to be achieved, etc.?

- a) State CON approval for linear accelerator.
- b) Secure commitment from Dr. Holt, medical oncologist, to build radiation therapy center attached to his existing Coastal Cancer Center building (includes land sale).
- c) Successful recruitment of two radiation oncologists.
- d) Horry County population growth in line with Parker Poe, LLC, consultant's 2011 analysis.

Financial Projections

Note: General guidelines for preparing financial assumptions are included in Exhibit #1 at the end of this document. Please review these guidelines prior to completing the pro forma.

1. **Please discuss the basis and rationale for the payer mix, gross revenue per statistic, and reimbursement assumptions used in the pro forma. In addition, please complete the following table (or provide Business Objects or other reports) with the following information for each volume type included in the pro forma:**

Payer mix utilization, gross revenue per stat, and net revenue per stat are based on an EBDITA Profit & Loss Statement report created by DSS. This report details Trident Medical Center's radiation therapy program for an 18-month period from January 2009 through August 2010.

2. **Please provide a brief explanation of the assumptions used for each of the following financial categories.** In cases where your rationale differs significantly from the guidelines provided in Exhibit #1, please provide an explanation and/or documentation to support your assumptions.

Outpatient Type 1 Procedure Assumptions (Linear Accelerator Treatments):

- 1) Outpatient year 1 volumes based on the projected utilization data provided by Parker Poe, LLC:
 - a. 1,008 Horry County patients require radiotherapy in 2013 (year 1).
 - b. GSRMC's projected radiotherapy market share in year 1 for Horry County is 15%, 18% in year 2, and 20% in year 3. GSRMC's projected market share in years 1-3 for Williamsburg County is 1% and in years 1-3 for Georgetown County is 1%.
 - c. Expected number of treatments per patient is 21.
 - d. GSRMC projected radiotherapy treatments grow in year 2 at 24% (from 3,234 to 4,011) and in year 3 at 15% (from 4,011 to 4,620).
 - e. 3,234 radiotherapy treatments year 1 / 21 treatments per patient = 154 patient cases for GSRMC in year 1 assuming Grand Strand captures exactly 15% of Horry County market share, 1% of Williamsburg County market share, and 1% of Georgetown County market share.

- 2) Assumed a 24% volume increase in year 2 and 15% in year three based on the projected utilization data provided by Parker Poe, LLC. Years 4 and 5 estimated to increase by 5% each year. Volumes estimated to increase 3% thereafter.
- 3) Payer Utilization (% of Admissions) is based on Trident's 2009-2010 P&L from DSS: Medicare 51.8%; Medicaid 6.1%; HMO/PPO 30.8%; Commercial 0.0%; Self-Pay/Charity 3.3%; Other 8.0%.
- 4) Gross Revenue and Net Revenue per Stat are based on Trident's 2009 P&L from DSS. Gross Revenue and Net Revenue were ramped up to account for the base year to be 2013. From Trident's P&L:
 - a. Medicare: \$305 (2009); \$324 (2013)
 - b. Medicaid: \$429 (2009); \$456 (2013)
 - c. HMO/PPO: \$1,417 (2009); \$1,503 (2013)
 - d. Self-Pay/Charity: \$42 (2009); \$45 (2013)
 - e. Other: \$308 (2009); \$326 (2013)

Outpatient Type 2 Admit Assumptions (Diagnostic Tests associated with Lin/Acc):

- 1) Volumes: Lab tests in year 1 calculated as follows: (154 projected GSRMC radiotherapy patients – service area in year 1) x (3 lab procedures per patient) = 462 OP diagnostic tests in year 1.

OP Diagnostic procedures consist of lab tests and will be considered "incremental." For a typical cancer patient requiring radiotherapy treatment of a linear accelerator, a conservative estimate of three basic diagnostic lab procedures is required for all cancer patients. New patients will be generated from primary care, family practice, and other physicians.

- 2) Payer Utilization (% of Admissions) is based on Trident's 2009-2010 P&L from DSS: Medicare 51.8%; Medicaid 6.1%; HMO/PPO 30.8%; Commercial 0.0%; Self-Pay/Charity 3.3%; Other 8.0%.
- 3) Gross Revenue and Net Revenue per Stat are based on Trident's 2009-2010 P&L from DSS: Gross Revenue and Net Revenue were ramped up to account for the base year to be 2013.

Outpatient Type 3 Admit Assumptions (CT Scans associated with Lin/Acc):

- 1) Outpatient Type 3, CT scans, will be required on 100% of patients who receive a linear accelerator treatment. For every newly diagnosed patient suspected of having cancer, one diagnostic CT per patient will be performed in the GSRMC outpatient setting. Related OP volume will grow as the number of cancer patients grows.

- 2) Payer Utilization (% of Admissions) is based on Trident's 2009-2010 P&L from DSS: Medicare 51.8%; Medicaid 6.1%; HMO/PPO 30.8%; Commercial 0.0%; Self-Pay/Charity 3.3%; Other 8.0%.
- 3) Gross Revenue and Net Revenue per Stat are based on Trident's 2009-2010 P&L from DSS. Gross Revenue and Net Revenue were ramped up to account for the base year to be 2013.

Operating Expenses:

Operating Expense assumptions include:

- FTEs – fixed: Assumed 6.0 FTEs in year 1, including:
 - Director - \$120,000
 - Dosimetrist - \$105,000
 - Nurse - \$62,400
 - Radiation Therapists (2) - \$70,000 each
 - Clerical - \$25,000

FTEs will grow from 6.0 in year 1 to 7.0 in year 2 to 8.0 in year 3 to 9.0 in year 4 to reflect normal staffing increases directly related to linear accelerator volume. Year 5 volume of 5,094 radiotherapy treatments represents a 58% increase from the year 1 volume estimate of 3,234 radiotherapy treatments. See attached staffing schedule.

- Salaries & Wages: FTEs wages/manhour: \$36.25 in year 1 (2013). Calculated by: sum of FTE salaries in year 1 (\$452,400) divided by (6.0 FTEs x 2,080 hours per year). Estimated growth at 3.0% each year.
- Benefits (as a percentage of salary): 26.1% for each year based on 2011 actual percentage.
- Supplies (as a percentage of gross revenue): Supplies have been set at 5.0% as a percentage of net revenue; based on discussions with Trident Medical Center leadership, supply costs for the linear accelerator program are relatively low compared to the rest of the hospital. Estimated growth 1.0% each year.
- Professional Fees: 0 professional fees. Trident pays no professional fees related to the linear accelerator program.
- Contract Services: Contract services as a percentage of net revenue in 2010 ran at 5.6%. However, the rate was reduced to 4.5% because two elements of the contract services were specifically identified on the "fixed" contract services line of the inputs section of the proforma (\$175,000 per year for coverage by a physicist and \$30,000 per year for housekeeping. 3.0% estimated growth each year).

- Repairs & Maintenance (as a percentage of net revenue): 1.8% for 2013 (equipment under warranty) and becomes 3.5% in year 2 to reflect that the equipment is coming out of warranty with a 1.0% estimated growth each year beyond year 2.
 - Rents & Leases (as a percentage of net revenue): fixed at \$12,000 in 2013 with 3.0% estimated growth each year.
 - Utilities (as a percentage of net revenue): [$\$2,563,697$ utility expense in 2010]/[285,600 square feet in hospital] = \$898/square feet = \$71,812 with 4.5% estimated growth each year.
 - Insurance (as a percentage of net revenue): 1.1% for 2013 with 3.0% estimated growth each year.
 - Bad Debts (as a percentage of net revenue): estimated at 3.0% of net revenue.
 - Non-Income Taxes: estimated at \$69,000 in year 1 with 1.0% estimated growth each year. Calculated as follows: [$\$939,614$ (2010 property tax) / $\$177,134,701$ (2010 PP&E)] x $\$12,916,000$ (project budget)
 - Other Operating Expenses: Year 1 (\$950,000) and Year 3 (\$475,000) expenses consist of: \$425,000 salary, \$25,000 sign-on, \$15,000 school loan, \$5,000 marketing, and \$5,000 other for two Radiation Oncologists in Year 1 and one Radiation Oncologist in Year 3. Arrived at by median radiation oncology income of \$518,000 from 2010 Physician Compensation and Production Survey. In addition, other expenses per year calculated at \$16,000 per year based on Trident P&L from DSS.
3. *Discuss the staffing assumptions used in the proforma (i.e., FTE's, manhours per stat, rates per hour, etc.).*
- FTE wages/manhour projected for 2013 at \$36.25; for subsequent years, increased the average hourly rate by 3.0% annually.
 - For employee benefits as percentage of salary used 26.1%.
4. *Will this project result in any operating efficiencies (staffing, supplies, utilities, etc.)? If so, discuss the rationale used and disclose the projected annual cost savings by category, which is included in the proforma.*

This investment will represent a new product line for Grand Strand Regional Medical Center.

The following may be used as guidelines for preparing financial assumptions. *These are general guidelines only and may not be applicable or appropriate for all projects.*

Miscellaneous Model Inputs:

- **Project Life** – Use the following lives to reflect the different types of projects:
 - Equipment Addition/Minor Service Expansion – 10 years
 - Major Renovation/Major Service Expansion – 20 years
 - Replacement/New Hospital – 40 years
- **Cash Flow Growth** – This should range between 0% and 3%. Use a percentage that approximates the average annual population growth in your service area, but not to exceed 3%.
- **Working Capital** – The following working capital items should be included in the Model: Days In A/R, Days In Inventory, and Days In A/P. Use the hospital's current actual days for each of these. In addition, an estimate of accrued expenses related to the project should be input in other current liabilities. These should include an estimate for accrued payroll, property taxes, and other miscellaneous expenses.
- **Cost of Capital** – Currently, 10% should be used as the cost of capital. However, this will change from time to time. You may need to override the default cost of capital included in the investment model.

Investment Amount – If you do not know the project cost (as provided by Corporate Design & Construction—in most cases, you will not have a project budget at this point), you will need to calculate an amount to include in the Model based on the incremental earnings expected from the project. First build your volume, revenue and expense assumptions, then calculate the average annual incremental EBITDA projected over the first five years of the project and divide this average amount by 20%. This will provide the total investment amount to include in the Model. This amount should then be split into the various asset categories as follows: Building – 50%; Fixed Equipment – 10%; Movable Equipment 10yr – 35%; and Movable Equipment 7yr – 5%. **Please note the actual investment amount will be based upon the project budget provided by D&C after your project is submitted for Corporate review. The proforma investment will be adjusted as needed at that time.**

Subsequent Capital Expenditures – In the *fifth year* of the projection, input subsequent capital expenditures as follows:

- Building – 1% of the initial building investment
- Fixed Equipment – 2% of the initial fixed equipment investment
- Major Equipment 10yr/7yr – 10% of the initial major/minor equipment investments.

Note: The latest version of the Investment Model includes a formula to automatically input these expenditure assumptions in year five of the investment. However, the formula can be overridden if necessary.

Other Assets – Generally, nothing is required in this category. However, if you have CON-related costs related to your project that can be capitalized (per APG 4), these costs should be estimated and included in the proforma as "other assets". These costs should be amortized over 15 years.

Volume – The proforma should include the **incremental** volume expected as a direct result of the investment. In theory, this is volume that likely would not or could not be realized without the project. Incremental volume is calculated as the amount of volume over and above the volume of an established base period. **Generally, the base period should be the year just prior to the project being completed and placed into service.** Total volumes should be projected forward based on the expected growth during the interim period (prior to the project being completed), and for five years after the project is completed. To calculate the incremental volume needed in the proforma, subtract the base period volume from the total projected volume for each of the first five years after project completion. Incremental volume **should not** be calculated as the year-to-year change in volume. The following example shows how incremental volume should be calculated:

Volume Type:	Current Year 2003	Interim 2004	Base Year 2005	Year 1 2006	Year 2 2007	Year 3 2008	Year 4 2009	Year 5 2010
Total O/P Surgeries	3,000	3,060	3,121	3,400	3,670	3,880	4,030	4,190
Incremental O/P Surgeries (1)	XX	XX	XX	279	549	759	909	1,069

- (1) Incremental volume is calculated as each year's total volume minus the base year volume, which is assumed to be 2005 in this example. In this example, the project is assumed to be completed and placed in service at the beginning of 2006.

Payer Mix / Gross Revenue / Reimbursement – Use the hospital's existing volume-based payer mix for the service and hold it constant over the projection period. Roll-forward current gross and net revenue per statistic during the interim period until the investment is operational. Apply a reasonable annual revenue increase percentage to the gross revenue projections. For reimbursement increases, assume the following:

- Medicare – Increase 1% / year
- Medicaid – Increase 1% / year
- Managed Care – Increase 3%-4% / year
- Other – Increase 3% / year

Operating Expenses:

- **Labor Costs** – Roll-forward the average hourly rate during the interim period until the project is operational. For subsequent years, increase the average hourly rate by 4.5% annually. As a staffing assumption, use 70% of the hospital's current FTEs/AOB (for the service impacted by the project) to estimate the incremental FTEs needed to support the project's volume.
- **Employee Benefits** – Use the hospital's current percentage of salaries.
- **Contract Labor** – Use the hospital's current percentage of salaries to estimate contract labor costs, if needed (this will have to be input as salaries).
- **Supplies** – Use the hospital's current supplies expense as a percent of net revenue unless the project is specific to a particular service that requires a lesser or greater supply cost component (e.g., cardiovascular surgery services).

- **Utilities** – Use the hospital's current average utility cost per square foot multiplied by the estimated new square feet to be added with the project. Inflate cost by 3% annually.
- **Malpractice Insurance** – Consider these costs to be variable and use the hospital's actual experience per adjusted admission if the project volume reflects the average volume mix of the hospital. If the project is service specific (e.g., obstetrics), then the malpractice insurance costs specific to that service line should be used. Inflate cost by 3% annually.
- **Non-Income Taxes** – Property taxes should be estimated based upon your estimated project costs multiplied by your local tax rate. Generally, only the cost of new land/new space should be considered (renovation costs of existing space should be excluded). All equipment cost included in the project (whether new additional equipment or replacement) should be considered. A schedule of real estate and personal property tax rates by facility can be found on the Capital Expenditures and Projects Web Site. In addition to property taxes, any other non-income taxes specific to your State or City should also be considered.
- **Repairs & Maintenance** – Use the hospital's current costs as a percent of book value of plant and equipment to estimate the R&M costs associated with the investment. An exception would be maintenance contract costs for any major new equipment (e.g., MRI, CT Scanner, etc.). These items are generally under warranty for the first year, so the expense should not begin until the second year. Inflate cost by 3% annually.
- **Contract Services and Professional Fees** – These costs are semi-variable and only incremental costs associated with the project should be factored into the analysis. Inflate costs by 3% annually.
- **Bad Debts** – Use your current bad debt percentage of gross revenue unless the project is specific to a particular service line that has historically experienced a lesser or higher percentage of bad debts.
- **Other Expenses** – Only incremental costs should be considered for this category. For example, the following should be considered: marketing related to the opening of a new project, physician recruitment costs associated with new doctors who will support the volumes in the new project, training costs for new employees, etc.

Non-Operating Revenue/Expenses – Generally, the proforma should not include any non-operating revenue or expenses. If you have items you believe should be included here, contact someone in Capital Asset Management for guidance.

Management Fees – The proforma **should not** include any HCA management fees.

**Grand Strand Regional Medical Center
Linear Accelerator Charge Master
Department # 764 Radiation Therapy**

GRAND STRAND REGIONAL MEDICAL CENTER

DEPARTMENT: Administration	POLICY DESCRIPTION: Transportation for Radiation Service,
NUMBER OF PAGES: 2	REPLACES POLICY DATED: 04/28/97
APPROVED: October 13, 2000	REVIEWED: May 2003
EFFECTIVE DATE: October 13, 2000	REFERENCE NUMBER: 500.33

SCOPE:

Hospital-Wide: This policy applies to Grand Strand Regional Medical Center (GSRMC) and its Affiliates.

PURPOSE:

To establish guidelines for the transportation and exchange of information necessary for the patient to receive radiation therapy at Carolina Regional Cancer Center (CRCC) as ordered by the requesting physician and to provide a method of filing and retrieving documentation for each patient related to radiation therapy.

POLICY:

- I. Radiation services will be provided to inpatients by CRCC upon a written order by the requesting physician. Transportation arrangements will be made by GSRMC. CRCC will receive pertinent information relevant to the patient prior to services rendered. Services shall include all procedures, planning, courses of treatment, consultation or other actions undertaken by CRCC with respect to treatment of GSRMC's inpatients.
- A. Services will be provided to only those patients meeting the following criteria:
 1. Patients requiring emergency services; and
 2. Patients already undergoing a course of radiation treatment that requires inpatient management services for related or unrelated medical conditions.
- B. Conditions requiring emergent services are:
 1. Spinal cord compression secondary to a malignant process;
 2. Intracranial malignancy causing acute neurological deterioration;
 3. Airway and/or vascular obstruction which is progressive and results in progressive symptomatology; and
 4. Severe pain secondary to a malignant process and incompletely controlled with aggressive medical management.
- C. Information will be entered on the Radiation Therapy Transportation Log for each patient receiving radiation therapy services at CRCC.

PROCEDURE:**I. Verification**

- A. Verify written order by requesting physician for patient to receive radiation therapy.

II. Criteria

- A. Ascertain that patients meet criteria as outlined in above-stated policy.

III. Notification

- A. Notify CRCC of order.
- B. Notify Patient Care Coordinator of need for transportation to CRCC. Assure that consent for transfer has been provided by GSRMC's Chief Executive Officer or his designee.

IV. Consent

- A. Obtain Transportation Consent.

V. Patient Information

- A. For initial visit to CRCC send:
 - 1. History & Physical Hospital chart
 - 2. All consult reports
 - 3. Consult request (specific to E & M desire by physician)
 - 4. All radiology films
 - 5. Any additional information requested
- B. For subsequent visits, send any additional information requested by CRCC.

VI. Documentation

- A. Complete pertinent information on the Radiation Transportation Log:
 - 1. Date and time of departure from GSRMC
 - 2. Patient Name
 - 3. Patient medical record number
 - 4. Time of return to GSRMC
 - 5. Initials of person completing log documentation
- B. Document in daily nurses' progress notes patient's condition at the time of departure and return from CRCC and any pertinent nursing observations.

Subject: linear accelerator

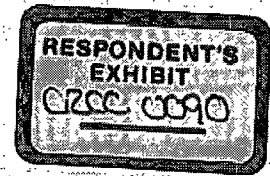

There is probably an opening for a new linear accelerator in the Horry, Williamsburg, Georgetown area. 21st Century currently holds their center and has employed the urologists. The medical oncology group that services this area is estranged from 21st C and has been contacted by McLeod in Florence to support the initiation of radiation therapy at Loris/Seacoast. It is imperative that we submit a CON of a linac immediately. We can then also oppose Georgetown's intent to move their accelerators to Waccamaw. Our CON should then create a dialogue with both 21st C and Loris/Seacoast. Employing the medical oncologists might be a part of this progression.

Thank you,
Jamie Thomas, President
HCA South Atlantic Division

NOTES ON THE CONTRIBUTORS

COGNATE REACTION MIXES

COGNATE REACTION MIXES ARE THOSE IN WHICH ALL THE REAGENTS AND REACTED MATERIALS PARTICIPATE IN A SUBSEQUENT REACTION. THE REACTION OF A MIXTURE OF 20% HYDROLYZABLE POLYMER AND 80% UNHYDROLYZABLE POLYMER WITH A REAGENT TO PRODUCE A 100% HYDROLYZABLE POLYMER IS AN EXAMPLE OF A COGNATE REACTION MIX.

1. REAGENTS ARE HYDROLYZABLE POLYMER, UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
2. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
3. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
4. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
5. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
6. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
7. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
8. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.
9. REAGENTS ARE 20% HYDROLYZABLE POLYMER, 80% UNHYDROLYZABLE POLYMER, AND A REAGENT. REACTION IS TO PRODUCE 100% HYDROLYZABLE POLYMER.

OK. Thanks.

I have several thoughts – 1.)Add on to the present building on the empty side.
2.)Add on to the present building in the middle of the back going backwards onto HCA property.
3.)Freestanding on the side.

Each one of these would require a different approach.

Doug,

Next steps will include Marc taking these drawings and coming up with some different options. We already know the basic size that will be required. What is important at this point is to get the plans to a point that they are ready for a CON. When we get into the actual detailed design (after CON approval) we can determine the exact location in relation to the physician's office as well as specific design/layout.

I heard from construction and we should have a conceptual price for this project early next week. Once Marc has everything ready for the CON development package, we will have all that we need from a planning perspective for the CON.

Let me know if you have any additional questions.

Oncology

Product Line Development

- **Linear Accelerator CON** – Plan to file the CON application by May 1, 2011
 - Georgetown has filed a CON application to relocate linear accelerator to Waccamaw
 - McLeod has filed a CON application to construct a new linear accelerator near Seacoast
 - Conway is also planning to file an application for Linear accelerator in Conway
 - 21st Century is applying for a CON application to relocate Murrells Inlet
- **Grand Strand Regional Location**
 - Place linear accelerator on campus on medical oncology group property
 - Have a covered walkway connecting the medical oncologists' offices to linear accelerator building
 - Buy/lease land and building from the medical oncologists if CON is obtained
- **Cost**
 - Land – 1 M
 - Construction including the vault & equipment – estimated at 12.5 M
 - Proforma estimates potential EBDITA at 539k year 1 and 2 M by year 2

The chemo infusion service should be minimal. Dr Holt does this in the building next door..

Here is the response from Marc regarding the size of the project. We will need to verify the other applications to see if we are comparing apples to apples as far as project scope.

To: Whinham Jason
Subject: RE: Grand Strand Freestanding Oncology - CON Budget

The short answer is that I think the size is driven up by the fact that we have radiation oncology and chemotherapy infusion. Do we know if the other applicants have both services in their centers?

The other factor may be that we have a penthouse on the roof for mechanical equipment. The others may be utilizing rooftop equipment.

Does that make sense? Just let me know if I need to dig deeper into it or propose options to shave building area.

Hope you are doing well.

Marc can you address the size question?

From: Rudd Adam
Sent: Thursday, May 19, 2011 3:30 PM
To: Bachman Brent; White Doug
Cc: Russell Clint; Whinham Jason
Subject: RE: Grand Strand Freestanding Oncology - CON Budget

Brent:

We are expecting an extended fight for this CON where construction cost will be a key point. Can we explain:

1. 1M - site prep
2. 700k - other cost
3. 400k - IT cost
4. Size of the building - -10,000 sq ft; the other CONs filed are in the 7000 to 9000 range

Obviously we are concerned about the overall cost - any ideas on reducing the number?

AR

Subject: Grand Strand Freestanding Oncology - CON Budget

Attached is the CON budget for the Freestanding E.D. - this includes the access drive addition.

Note that the budget does not include any land costs.

If you have any questions, please let me know.

Thanks

Here is the last quote a got from Varian in early 2010. This is for a nicely equipped Varian without the Trilogy Stereotactic package. I believe that is subject to a separate CON anyway. This is similar to the last one we bought at NFRMC Jamie.

From: Thomas Jamie - South Atlantic Div
Sent: Friday, June 17, 2011 10:43 AM
To: Rudd Adam; Grace Robert
Cc: VanPelt Rodney; Earnest William
Subject:

From the call with Will, we may be a million high on linear accelerator---around \$3m instead of \$4.2. we clearly need to start with one rad onc and add a second when daily volumes reach low 30s. Average treatments per patient is conservative at 25--21 would be ultra conservative. Is the Varian machine a Trilogy? Are they quoting equipment with stereotactic/radio-surgery capability? Not sure you need until down the road.

Thank you,
Jamie Thomas, President

Adam.Rudd@hcahealthcare.com
Subject: Lin Acc Follow-Up Items - After Call with Mike, Jerry, Jamie, and Rodney on 6/16/11

1. Determine why not place the lin acc at South Strand.
 - a. Talk to Clint Russell about SSMC question
 - b. Get Brent Bachman's take on the construction piece and ask about squeezing out IT budget
2. Lower the price of the lin acc per discussion with Varian
3. Send Mike a breakout of each equipment item associated with lin acc
4. Determine if can get an older/used CT scanner for treatment planning as opposed to a new one
5. Schedule a call with Will Earnest
6. After call with Will, review lin acc quote with Dr. Mun
7. Pro Forma Expense Adjustments:
 - a. Staffing: add EVS back to pro forma (not as contract services)
 - b. Physician Recruitment: change year 1 from 2 rad oncs to 1. In third year add the second rad onc.
8. Once all modifications are made, re-send all the documents. Send it to them in one master email with all documents and descriptions of each document

Conference Call with Mike Marks, Jerry Rooker, Jamie Thomas, Rodney VanPelt re: Linear Accelerator - 6/16/11

RG: GSRMC wants to be in a leadership role as a provider of oncology services; in line with our strategy. Dr. Holt upset with 21st Century Oncology (Carolinas Regional Cancer Center). Our volume derives from taking a look at outside consultant (Sullivan via Parker Poe) and taking 15% of market share new incremental volume in 2013 plus (given Doug/hospital relationship with Dr. Holt) adding 15% of existing volume.

MM: Property cost and location?

AR: Holt property was going to be \$1.4M

Redacted Strength in having it on main campus rather than by Dr. Holt's office. Current site is in a building on campus next to cardiac rehab and the ED. NOT at South Strand.

MM: \$10.5M strikes him as very high (even down from the initial \$12.9M). Building a lin acc. at \$4M plus the cost of associated items seems high. The machine at Trident minus the mapping and modules is closer to \$2.5M. Wants a breakout of each equipment item. The bells and whistles may not be necessary; has never heard of the med onc module with a lin acc purchase. Can take at least a million dollars off of the cost.

MM: Why is building cost so high? Are we building walls? What is the construction budget? Also, why so high on the CT scanner? Can get an older, cheaper CT to reduce the \$727 currently in the \$5M for the lin acc.

AR: no cheaper way of doing lin acc without building walls. Design and construction came out and looked at it, walked the hallways. Capital includes IT and development.

MM: Review with Dr. Mun. If not \$10M, we can get the cost down to at least \$6-\$9M range if we chop off options. Can drop price with Varian given that Eastern Group is purchasing several lin accs.

MM: how are we going to build volume/how many cases in the market place today?

RG: Defined number of new patients is 1,008. 26,461 treatments at 21 treatments per patient. Predicted a growth of volume of 3.0% annually with 20% growth over 5 year period. Adding about 1,000 procedures per year. 6,300 treatments in year 1 (300 patients).

JR: What's our market share %?

RG: 15% + 1% + 1%

MM: are we bunting or trying to hit the ball?

RG: also going to attack with another 15% to get 300 total procedures in 2013. 15% not too aggressive

MM: How much volume does Dr. Holt have?

RG/JT: 74% as the only medical oncologist in town

MM: Where does he send his patients in the market?

RG/JT: 21st

MM: Do we think that all referrals are coming from one group? Are we putting all our eggs into one basket?

JT: we don't control urology (we do gen surg and neuro). We did at one time put a bid in for \$30M for 21st which we lost by \$15M. In this dynamic, if we enter the market, a lot of discussion will follow because we provide so much risk to them, given that medical oncology controls 74% of referrals. This is one of MUSC's biggest markets

MM: as long as ROI calculations are in zone, should get a red or a green

AR: Need to file the letter by the 14th.

JT: Trident extremely successful at this.

JR: Volumes: OP type 2: did we pull this data from Trent? OP type 3: pulled from Trident: every single patient will get an OP CT.

JR: Rate: CT revenue per stat: wants an all in - net revenue per procedure. Strange that Medicaid and Medicare reimburse by same rate. (IP Medicaid and Medicare both on DRG).

JR: Rate: Lin acc: \$324 per treatment. Did payor mix come from Trident?

RVP: No drastic difference in payor mix between two hospitals. GSRMC Medicare 52%; Medicaid 10%; higher self pay than Trident. Trident Medicare 46%; Medicaid 16%; higher HMO/PPO than GSRMC

Expenses: FTEs follow proper progression. Assumes that this will be a 7a-6p operation. 6,300 treatments divided by 260 days = 24 treatments/day. Assumed no change staffing needed for uptick in lab tests. AHR changed to 3%. Took professional fees out. Contract services not allocated; will be a department of the hospital. Since a part of the hospital and not an MOB, why not have EVS do it? Physicist a contract service.

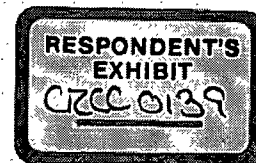

JT: Recruitment: change year 1 from 2 rad oncs to 1 to start program. Add the second rad onc in year 3. Jamie thinks that two can do all the volume. No need for three. North Florida Regional only added their second rad onc when they added Cyberknife.

JT: knock CT scanner out: treatment planning is basic; can find it somewhere at minimal cost.

JR: Chuck's questions: 1) why purchase the land? 2) what is our current relationship with Dr. Holt? (he owns MOB and land; we don't lease anything from him; we have no financial commitment with him); 3) why not SSMC? (our internal development team says construction would be more expensive) and why is it more expensive at SSMC? 4) What about land we are leasing to Coastal Carolina?

JT: Let Brent Bachman weigh in on this regarding codes, dynamics. Benefits of SSMC in Waccamaw market: if can do it at same cost, would it put us at a disadvantage versus our competitors? Key is that we want the CON.

JT: Regarding the capital piece, the complimentary aspects of the lin acc are driving up the cost. Should be able to reduce the CT by \$500K. Get new quote from Varian. We can get this project funded at \$7.5-8M. Ask Brent about squeezing out IT budget. Long road ahead on CON, long road on implementation. Schedule a call with Will Earnest (knows lin acc equipment). Shawn Vincent (cancer product line at HCA) is another contact.
