Doctor Medlock - Direct examination  
by Mr. Crane

1 that?

2 A I do not think so.

3 Q All right. Let me ask you a question.

4 Doctor Medlock, we have placed in the record OB-GYN  
5 records of VICTIM, [redacted] and I will show you a record here  
6 which is dated January 2<sup>nd</sup>, '02, and I understand that's  
7 not your record. That record was made by Doctor Franks, who  
8 we have learned is no longer employed there.

9 Do you see down on the left-hand side of that page  
10 where it says, according to the records, that the hymen was  
11 in tact?

12 A Yes, sir.

13 Q Okay. Can you tell us what that means, sir?

14 A Well, the hymen is a, is a membrane that remains in  
15 tact until a person becomes sexually active and somehow  
16 perforates. It's a delicate membrane. It's easily, in most  
17 cases, it's easily perforated and torn.

18 Q All right. How long have you been practicing medicine,  
19 sir?

20 A Since '59.

21 Q All right. Almost 50 years?

22 A Almost.

23 Q Okay. Are you indicating then that if a individual is  
24 sexually active or has engaged in sexual activity the hymen  
25 will not be in tact?
