All,

I have today signed a Form 4 order denying the motion to alter, amend, reconsider or otherwise change my career because I was so in error in filing my October 10th order. It should be sent downstairs shortly.

As to the suggestion I hear the motion to stay and compel arbitration because I am now familiar with the case, I decline. You may recall I stated at the earlier hearing that just because I rule on one motion in a case does not mean the case sticks with me. Any further motions should be heard by whoever is lucky enough to be holding CPNJ the day it comes up (apparently my poor brother Markley) until such time the case is designated complex by the chief administrative judge and assigned to a particular judge. To do otherwise creates a nightmare in the Clerk of Court's office.

Good luck to all,

Roger Young
