RE: Goldie Grier Reeves v. Dr. Rogers c. Reeves
Appellate Case No. 2013-002082

Dear Ms Kitchings:

I got a bit out of the groove this summer while Ms. Monica Cassidy had distress from her accident in the northwest. I did not have the same relationship with Elizabeth Clark. I apologize for any setbacks, I may have had. I did send Ms. Monica a part of my Lupus for good cause extension papers last week. It dealt primarily with symptoms in general, in general. I believe it is particularly important to explain how I was and am physically and mentally affected personally while I was and am handling my professional research at the Greenville Library.

While I was in the hospital or in radiation treatments and the follow-up surgery and chemo treatment from November 15, 2001 through January 12, 2012 I pulled together some information about Lupus as the allergist. I visited felt some other problem was taking place in my body. My workers and my adult had gotten very sick while they were there with the mold, but he felt I had some major problem taking place in my body besides the mold. I mentioned I had a disease called ACTD (atypical Connective Tissue disease). It is a unique and very special facet of Lupus. He suggested I research it more and I called the lupus office in Washington, D.C., they suggested I contact the North Carolina president and the local Lupus support group. She knew what A.C.T.D. was and how it makes you sick. Her name is Ruth. She explained to me how ill Fluorescent lighting made her feel.

I was able to secure a few DSS info and hospital records without a writ of mandamus. These were stored apart from the family court documents. Lupus is called "mystery disease" and that's true for me too as I have spent a great amount of time solving this mystery.

The files mentioned while in the hospital I had mouth sores or mouth ulcers. I was treated "with Magic mouth wash" and had no relief. None of my twenty physicians knew what the sores were caused from. They try to kill germs, but lupus is a condition not a regular infection. I had also seen Dr. Amir Ahga at some point I believe on February 6th 2006, there was a snow storm.

i weighed 206 pound, I am 5'2" but that was because Mold, a living organism produces waste products called toxins and gas. That's why men with huge round bellies, who drink beer get so sick. The body acts as a fermenting system. Prostate treatment is a measure of how much mold is in their prostate glands. An Italian oncologist and surgeon believes in his best selling book of 2012 "cancer is a fungus. He shows big white hunks of masses that are indeed fungal looking. He wants to treat them with Baking soda an alkaline ingredient and the disolve and shrink. I think he has important findings. I drank alot of alkaline water and ate alkaline fresh vegetables and am a five year cancer survivor. He was a certified Rheumatologist.. *and cancer surgeon*

He said Lupus can take years to be uncovered as it has a multitude of symptoms.

While I was doing my pro se research I suffered from many of them I have arthritic pain in my hands and back and legs and feet. So that i could hardly walk, sit at length or wlk. I was in such pain and I couldnt concentrate, I was depressed and confused trying to study the citations, Lupus problems have been well-recognized but not well defined. Neuropsychiatric symptoms of some type could be attributed to Lupus, an ancient disease., When folks have kidney disease with lupus they can die.. Ahga found the Lupus anti gen in my blood as did the New York Doctor. His appointments are \$400.00 a visit and Insurance companies do not like autoimmune diseases. I take very little medicine, just calcium and vitamins and baby aspirin a delicate anti inflammatory. if all these problems were seen by the same doctor I could have a \$50,000 pay out from Dow Corning, but they weren't. If I die the benefit is Rogers Reeves. He doesn't like me but I don't care. I want him to help our children that has been my entire purpose in life. To give my kids roots and wings. He was not a perfect husband but he has tried to be a good dad. Except he fell through the cracks with Mr. Jones, the errant builder. Jones was and is known to be a conman overcharged Rogers eleven thousand Dollars.. I did the necessary curing letter but Rogers had no follow up. Jones didn't work for me. and won't help do anything. He had a \$38,000 Judgement and just wanted Rogers' money. he had no clue what to do at my home. Nether one of them.

Sincerely Goldie Reves,

Goldie Reves

keeping the faith

Enclosures

and letter in mail to Mr. Chasteen. *gr*

Please see that the appeals court reads these is papers. I appreciate your help.

PS. Additional citing about lupus and disability
Provided. McCutcheon v. Pacific Mutual Life Ins

Owens v. Sovereign Camp "what it is total disability."
needs to affect occupation.

I am an architectural designer and cannot draft in quarter inch scale any longer or express my ideas in writing., but I have no disability insurance.
