ADMITTED: January 26, 2004	D:01/26/2004
DISCHARGED:	T: 01/27/2004 8:32 AM /jls
PHYSICIAN: JAMES A OLEARY	SSN: [redacted]

DATE OF PROCEDURE: 01/26/2004.

PREOPERATIVE DIAGNOSIS(ES): Recurrent left knee medial meniscus tear.

POSTOPERATIVE DIAGNOSIS(ES):
1. Tear of anterior horn, left knee medial meniscus.
2. Left knee medial shelf plica.
3. Grade 2 chondrosis of the extension zone, medial femoral condyle.
4. Medial meniscal cyst.

PROCEDURE(S) PERFORMED:
1. Examination under anesthesia of left knee.
2. Left knee arthroscopy with partial medial meniscectomy.
3. Arthroscopic drainage of meniscal cyst.
4. Arthroscopic plica excision.
5. Chondroplasty of medial femoral condyle.

REC'D IN CODING
JAN 3 0 2004
R L

SURGEON: James A. O'Leary, MD.

ANESTHESIA: General endotracheal.

INDICATIONS FOR PROCEDURE: The patient is a 43-year-old male with a Worker's Compensation related injury to his left knee. The patient has had persistent pain and has undergone arthroscopy about a year ago. The patient has had persistent anteromedial sided knee pain which has been refractory to extensive nonoperative treatment including physical therapy, Cortisone injections, anti-inflammatory medicines and activity modification. An MRI demonstrated degenerative change in the medial meniscus with a meniscal cyst. The patient also had tenderness and pain over a medial plica. The risks, benefits and techniques of a repeat arthroscopy have been discussed with him. The risks include persistent pain, bleeding, nerve damage, blood clots, stiffness, and the need for additional surgery. He understands and wishes to proceed.

FINDINGS: Examination under anesthesia demonstrated a full range of motion with no evidence of ligamentous instability. The arthroscopic exam demonstrated some mild Grade 2 chondrosis in the extension zone of the medial femoral condyle. The patellofemoral compartment was remarkable for a recurrent plica and scar tissue formation in the region of the medial shelf plica. The anterior cruciate ligament and posterior cruciate ligament were intact and stable. There was a tear of the anterior horn of the medial meniscus, and a

cyst was drained from behind the posterior horn of the medial meniscus. The lateral meniscus and the remainder of the knee were normal.

DESCRIPTION OF THE PROCEDURE: After obtaining informed consent, the patient was taken to the Operating Room, and general anesthesia was administered. The patient was placed in the supine position, and a well-padded tourniquet was placed around the left thigh. The routine portal sites were injected under sterile conditions with 1% Lidocaine with epinephrine. The left leg was then examined with the aforementioned findings. The left lower extremity was then prepped with Prevail and draped as a sterile field.

Routine inferomedial and inferolateral portals were established through which the 30 degree arthroscope was introduced. Inspection of the knee began in the suprapatellar pouch. The pouch was found to be normal and free from any pathology. The patellofemoral compartment was then inspected, and the articular surfaces looked quite good. The region of the medial shelf plica had recurrent scar tissue in this area which was excised with the orbital shaver. There was no further impinging soft tissue on the medial femoral condyle. The articular surfaces on both the patella and the trochlear side looked good. The anterior cruciate ligament and posterior cruciate ligament were intact and stable. The medial compartment was then entered, and some scar tissue and a tear of the white zone of the anterior horn of the medial meniscus was noted. An orbital shaver was used to perform a partial medial meniscectomy with smoothing and stabilization of the remaining medial meniscus. A trocar needle was then introduced arthroscopically, and the cyst behind the posterior horn of the medial meniscus was located. Multiple puncture holes were placed into the cyst with visual drainage of the fluid back into the joint. The articular surface on the tibial side was normal, and the medial femoral condyle was found to have Grade 2 changes in the extension zone. The lateral compartment was then inspected, and the lateral meniscus appeared to be normal. The articular surfaces on the lateral side looked good. A gentle chondroplastic shaving was performed of the medial femoral condyle which smoothed and stabilized the remaining articular surface.

All instruments were removed, and the knee was allowed to drain. The portal sites were closed with interrupted nylon sutures, and the knee was injected with 0.25% Marcaine.

ESTIMATED BLOOD LOSS: Minimal.

COMPLICATIONS: None.

DRAINS: None.

FLUIDS: Please refer to anesthesia record.

DISPOSITION: A sterile compressive dressing was applied followed by a cold pack. The patient tolerated the procedure well, and there were no complications. He was taken to the Recovery Room in stable condition.

RE: RICKY KNEECE
ACCT: 252876

TO WHOM IT MAY CONCERN:

Mr. Kneece is a patient of mine who has had persistent problems with his left knee. His continued problems are a result of the same injury which resulted in his initial arthroscopy. He now requires a repeat arthroscopy due to persistent pain. I will be glad to answer any more specific questions should they arise.

Sincerely yours,

James A. O'Leary, M.D.

FOLLOW-UP OFFICE VISIT

NAME: KNEECE, RICKY
DATE: 01/06/2004

ACCOUNT: 252876
DOB: [redacted]

CLINICAL STATUS: Mr. Kneece returns today for evaluation of his left knee pain. He continues to have medial sided pain. He has pain with getting up and down. He is here for follow-up of his MRI.

PHYSICAL EXAMINATION: Demonstrates no evidence of effusion. He has a full range-of-motion and there is tenderness over the medial joint line.

RADIOGRAPHS: Review of a MRI demonstrates some signal change of the posterior horn of the medial meniscus with a small meniscal cyst just behind the posterior horn.

IMPRESSION: LEFT KNEE PAIN.

PLAN: At this point I have discussed the various treatment options with Mr. Kneece. We have tried everything and I think our only option is to perform a repeat arthroscopy with meniscal surgery and cyst drainage. I discussed the risks, benefits, and techniques of surgery with him and he will let us know how he would like to proceed.

NAME: KNEECE, RICKY
DATE: 12/04/2003

ACCOUNT: 252876
DOB: [redacted]

CLINICAL STATUS: Mr. Kneece returns today for evaluation of the left elbow and left knee. His elbow is doing better after the cortisone injection. His knee remains painful. Unfortunately, he has not undergone his MRI, which I ordered quite a while ago.

PHYSICAL EXAMINATION: Of the elbow demonstrates full range of motion. There is no swelling over the olecranon bursa and things look good.

Examination of the knee demonstrates no evidence of effusion with full range of motion. There is focal tenderness over the medial joint line.

DIAGNOSIS: 1. LEFT ELBOW PAIN.
2. LEFT KNEE PAIN.

DISPOSITION AND RECOMMENDATIONS: I'll try to reorder the MRI of the knee to rule out a medial meniscal tear. I will allow Mr. Kneece to continue to work at his regular job as he is presently doing. I'll see him back after the MRI of his knee.

NEW PATIENT ENCOUNTER

NAME: KNEECE, RICKY ACCOUNT #: 252876
DATE: 10/30/2003 DOB: [redacted]

CHIEF COMPLAINT: Left elbow pain.

HISTORY OF PRESENT ILLNESS: The patient is a 43-year-old, right-hand-dominant male with a known history of olecranon bursitis, who I have seen in the past for his knee, and has also seen Dr. Green for shoulder and elbow problems. He returns today complaining of primarily left elbow pain. He states that he was in an accident four years ago, and since then, he has had significant swelling and pain over the posterior aspect of his left elbow. He has pain when he is pressing on his elbow and he has some swelling. He denies any history of gout or recent trauma. He has had a Cortisone injection in the past by Dr. Green which helped temporarily.

PAST MEDICAL HISTORY:
Allergies: None
Medications: Vioxx
Surgeries: Hernia repair x 3, APPY, left shoulder, left knee Sx
Illnesses: Bronchitis, gout

SOCIAL HISTORY: Two children, does not live alone, on a regular diet, no tobacco use, occasional alcohol.

WORK HISTORY: Self-employed.

FAMILY HISTORY: Cancer, HTN.

FAMILY PHYSICIAN: Carl White, MD

REVIEW OF SYSTEMS: Positive for hay fever, headaches, loss of balance.

PHYSICAL EXAM: Physical examination demonstrates a 5'10", 212 lb male, NAD. The cervical spine and left shoulder have a full range-of-motion. Exam of the left elbow demonstrates some mild thickening of the olecranon bursa. There is no discrete fluid collection. There is no erythema or warmth. There is full motion of the elbow and there is no lateral or medial sided tenderness. There is no instability of the elbow. The remainder of the exam is normal.

RADIOGRAPHS: Radiographs obtained today demonstrate no evidence of significant osteophyte formation, degenerative change, fracture, or other abnormalities.

IMPRESSION: LEFT ELBOW OLECRANON BURSITIS.

PLAN: I have injected Depo-Medrol and Lidocaine into the olecranon bursa under sterile conditions. I will place the patient on some anti-inflammatory medicines and have him avoid direct contact of this region. I will see him back in 4 to 6 weeks for a recheck.

SECOND OPINION

NEW PATIENT ENCOUNTER

NAME: KNEECE, RICKY
DATE: 10/16/2003

ACCOUNT #: 252876
DOB: [redacted]

CHIEF COMPLAINT: Left knee pain

HISTORY OF PRESENT ILLNESS: The patient is a 43 year old male, seen at the request of Dr. Green for the evaluation of left knee pain. The patient is 10 months out from a left knee arthroscopy at which time he had a plica excision. He was overall doing well until a few months ago when he began having an increase in his pain. He continues to have pain over the medial aspect of the knee. He has pain with bending and squatting, and has occasional swelling. He has been able to work at his job. He has completed physical therapy. He has undergone at least one Cortizone injection following surgery without substantial relief.

PAST MEDICAL HISTORY:
Allergies: None
Current Medications: Vioxx
Surgical Procedures and Hospitalizations: Appendectomy, Left Shoulder Surgery and Left Knee Surgery
Past Medical Illnesses: Unremarkable

WORK HISTORY: The patient works for Delano R. Kneece and Son, Inc.

REVIEW OF SYSTEMS: is otherwise unremarkable.

PHYSICAL EXAMINATION: demonstrates a well nourished, well developed male in no distress. The alignment is neutral to 2 degrees of varus. The gait is normal. The left hip has a painless range of motion and straight leg raise is negative Examination of the left knee demonstrates no evidence of an effusion. Range of motion is from 0 to 130 degrees. The ACL, PCL, MCL and posterolateral corner are intact. The patellofemoral exam demonstrates glides to the second quadrant with a mildly tender plica noted. There is no facet tenderness or any apprehension. There is focal tenderness over the medial joint line and McMurray's test produces pain along the medial joint line. The calf compartments are soft and pulses are palpable.

RADIOGRAPHS: obtained today include a bilateral PA flexion view, which demonstrates a well preserved medial joint space with no significant degenerative changes, OCD lesions or other abnormality. There is no patella alta, and the Merchant view is normal.

IMPRESSION: LEFT KNEE PAIN

PLAN: Mr. Kneece is now ten months out from his knee arthroscopy. I have reviewed his pictures, which don't look particularly bad on the medial side. He may have a subtle medial meniscal tear that could have occurred over the last ten months. I have recommended an MRI to evaluate his medial meniscus. He certainly doesn't have any significant degenerative change in the medial compartment. He will likely require a repeat arthroscopy. I see no indicate for osteotomy or partial knee replacement. I will be glad to see him back after the MRI.

PATIENT: KNEECE, RICKY D	VISIT DATE: 06/17/2009
PATIENT #: 00001242130	D: 06/17/2009 6:19 PM
PHYSICIAN: CHRISTOPHER WICKER, MD	T: 06/18/2009 9:20 PM / cee
	DATE OF BIRTH:

CHIEF COMPLAINT: Here for establishment of office visit.

HISTORY OF THE PRESENT ILLNESS: Patient is a 49-year-old who presents for follow-up for 1st time visit with myself formally. We have seen each other in September 2008 for bronchitis/sinusitis episode. He does report that this is not uncommon for him to have bronchitis and sinusitis 2x a year, particularly in the spring and fall ever since his accident in 1999. He is treated chronically for hypertension with lisinopril alone and he is doing well with this. He has not had any lightheadedness or dizziness, chest pains or cough because of it. He is also maintained on Effexor and Trazodone by psychiatry due to the brain injury. His major concern is his energy levels. They continue to be very poor. He reports this has been a longstanding difficulty and was found to have central hypothyroidism in the past by Dr. White. He maintains on Synthroid replacement but continues to have difficulties with it. He also notices that he has some lower extremity edema in his ankles. By the end of the day when he gets home after working he feels like he can barely go. Previously his testosterone level has been in the low normal range.

PAST MEDICAL HISTORY: Traumatic brain injury with frontal lobe encephalomalacia on right hemisphere in 1999, obstructive sleep apnea maintained on CPAP, history of depression and nephrolithiasis in 2008, occasional gout particularly in the fall.

PAST SURGICAL HISTORY: Left shoulder surgery x2, left elbow surgery, left knee surgery x2, appendectomy, right inguinal hernia x2, left inguinal hernia repair.

HEALTH MAINTENANCE: Pneumovax in April 2000. Tetanus vaccine in 2004.

FAMILY HISTORY: Hyperlipidemia, hypertension, nephrolithiasis. Dad has history of bladder cancer.

SOCIAL HISTORY: Married. He has 2 children, 22 and 25 years old. Sons are over 6 feet tall. Denies any tobacco or alcohol use on a regular basis. Works in farming industry.

DRUG ALLERGIES: None known.

MEDICATIONS: Lisinopril 20 mg daily, Effexor XR 150 mg b.i.d., Trazodone 100 mg at h.s., Synthroid 50 mcg in the morning, CoQ10 daily, Mobic 15 mg daily p.r.n. for gout pain.

REVIEW OF SYSTEMS: As per HPI. Continues to have shoulder and ankle arthralgias. Ankle edema as noted above. Bronchitis last treated in March 2009 after going to Urgent Care. He does note that he gets clear rhinorrhea after eating or drinking anything since his accident in 1999 and has not improved any. He has noticed some increased weight gain particularly along his abdomen. Otherwise negative based upon 10-point ROS.

162

PHYSICAL EXAMINATION

VITAL SIGNS: Blood pressure 112/80, heart rate 79, O2 SAT 98% on room air, height 5 feet 10 inches, weight 232.8 pounds, up 4 pounds since February visit.
GENERAL: Resting, no apparent distress.
HEENT: Normocephalic, atraumatic. Pupils equal. Sclerae anicteric. No obvious rhinorrhea.
NECK: Supple. Full range of motion.
CARDIOVASCULAR: S1, S2. No murmurs, rubs or gallops. Bilateral lower extremities reveal 1+ pitting edema particularly in ankle area and along shins.
LUNGS: Clear to auscultation bilaterally. No wheezes, rales or rhonchi.
NEUROLOGIC: Alert, appropriate. Pleasant.
SKIN: Tanning.

ASSESSMENT/PLAN

1. CENTRAL HYPOTHYROIDISM. Check free T4 levels. Adjust medications based on results. Question is if this is the cause of fatigue he has been having and edema. If this is normal next step would be to have him perform 8:00 a.m. total and free testosterone level to see if this could be it as his total testosterone has been borderline normal in the past.
2. HYPERTENSION. He has excellent control on current dosing of lisinopril. Continue this.
3. TRAUMATIC BRAIN INJURY. Overall he is relatively stable from this. Continue to follow-up with Psychiatry.
4. GOUT. Use Mobic on p.r.n. basis. If he begins having to many flares we can consider preventative maintenance with allopurinol but for now will hold off on this. Otherwise return for physical with work up laboratories in approximately 6 months to monitor his labs. No other changes to plan for today.

Mrs. Roxanne Kneece

RE: Ricky D. Kneece

Dear Mrs. Kneece,

This letter is in response to our meeting with you and with your husband's attorney on 11/11/2008. As you are aware I had requested an MRI of Ricky's brain because of hormonal changes with hypothyroidism which seemed to be on the basis of pituitary dysfunction. MRI of his brain showed his pituitary to be without any masses, cysts, etc. He did, however, have a 32 x 32 x 43 mm area in the right frontal lobe which was compatible with an area of encephalomalacia that certainly seems to be related to his previous trauma in which he suffered a severe head injury in 1999 with a skull fracture and bleeding into his brain as well as having a subdural hematoma. Since that time he has been able to return to work on the farm. His hypothyroidism that he developed in my opinion is related to his head trauma. Untreated hypothyroidism would result in lethargy, weight gain, change in his voice, constipation and general lack of energy and desire. He is currently being treated for his hypothyroidism. It has come to my attention more so lately that he has had more emotional changes. He does see a psychiatrist for this. It is also my understanding that he is having more problems with forgetfulness as well as trouble controlling his emotions and episodes of anger. In my opinion these emotional changes and any problems regarding forgetfulness could certainly be related to his previous head trauma and frontal lobe damage.

Sincerely,

Carl A. White MD

To Whom It May Concern

RE: RICKY D. KNEECE

Mr. Kneece is a 47-year-old Caucasian male who had a severe head injury with skull fracture in November 1999 with bleeding into his brain and a subdural hematoma. He was treated by neurosurgery at Richland Memorial Hospital. He eventually recovered, but on his recent physical examination was found to have endocrine changes that had not been present before. He now is hypothyroid with secondary hypothyroidism related to pituitary insufficiency. The etiology of this is related to his previous brain injury. MRI of his brain shows his pituitary to be without any masses or cysts, etc. He does, however, have a 32 x 32 x 43 mm area in the right frontal lobe compatible with encephalomalacia. This seems to be related to his previous trauma. No other areas in the brain that show any significant abnormalities. The patient had a severe head injury in 1999 and is now hypothyroid related to this. He also is being evaluated at this time for possible obstructive sleep apnea. Mr. Kneece has hypertension and mildly elevated blood sugars. He also has headaches, which at times are incapacitating since his head injury. Hopefully, with starting medication for his thyroid insufficiency, additional medications for headaches and with control of his blood pressure and blood sugar, he will be able to continue to function normally.

In addition to brain loss in the right frontal area, he has emotional problems since his accident and sees a psychiatrist.

Sincerely,

Carl A White MD

OUTPATIENT FOLLOW-UP VISIT

PATIENT: Ricky Kneece
UNIT NO:
DATE: 12/02/02

IDENTIFICATION: Ricky Kneece is followed in my office with a history of traumatic brain injury that occurred in 1999, left medial condyle fracture, ongoing knee difficulties.

HISTORY OF PRESENT ILLNESS: Since his last visit on 10/4/02 Mr. Kneece has been doing well. He did try to wean down on the Depakote which he was taking two pills twice a day to two pills in the evening and one in morning, however, his headaches returned not to their previous level but have returned requiring him to take Extra Strength Excedrin at times. He has been using Vioxx daily and that does seem to help some with his knee pain but not completely and Zoloft 25 mgs. a day has stabilized the mood some and has not made him as sleepy as the Paxil seemed to do. He is not doing any aerobic reconditioning at this time. He is awaiting follow-up with Dr. Green for decision on arthroscopic knee repair and what sounded like patella scraping, etc. He is working on a regular basis. Overall seems to be doing better. He has completed his counselling with Rafe Ellisor. He has completed his therapy program. Does do some stretching exercises for his knee but no other specific exercise activities. He is eating well. Sleeping good at night. Bowel and bladder function is stable. Denies pain elsewhere.

EXAMINATION: Mr. Kneece looks well. He is awake, alert and oriented. Ambulated back to my office in no distress. Seemed to favor the left lower extremity a little bit more than the right. No obvious effusion, redness or warmth through the joints. Legs had no distal edema. Calf soft, non tender. Heart is a regular rate and rhythm. Lungs are clear. Functional motion and good strength through the upper extremities and lower extremities.

IMPRESSION: As above, traumatic brain injury, left medial condyle fracture.

RECOMMENDATIONS: I recommended to Mr. Kneece that he is approaching a point of maximum medical improvement, however, prior to getting there I think his knee does need to be addressed fully through Dr. Green and if he does in fact have arthroscopic repair then following this and appropriate recovery and rehabilitation he will be at a point of MMI. If in fact they decide together not to do any further surgery then he will be approaching that point a good deal sooner. I think he should continue on the Depakote two pills twice a day, continue Vioxx 25 mgs. a day and Zoloft 25 mgs. a day. I will see him back following his appointment and/or any intervention with Dr. Green. It is a pleasure seeing him back today.

PHYSICAL MEDICINE AND REHABILITATION
OUTPATIENT FOLLOW-UP VISIT

PATIENT: Ricky Kneece
DATE OF EVALUATION: 04/12/02

IDENTIFICATION: Ricky Kneece was seen in my office last on 03/08/02 for an outpatient follow-up visit and still having deficits from traumatic brain injury, headaches, intermittent neurologic symptoms, especially when changing posture and position, as well as left knee pain.

HISTORY OF PRESENT ILLNESS: Since our last visit, Mr. Kneece continues to follow with Rafe Ellisor, LMSW, from the Neuropsychology Department regarding counseling and his traumatic brain injury. He only sees Rafe when he comes to see me on a monthly basis at this point. Although Rafe would like to see him weekly, it is too difficult for Mr. Kneece to get here with his work schedule and this time of year.

Mr. Kneece was last seen here on 03/08/02 at which point he was started on some Depakote and weaned off the Neurontin. He has done exceptionally well with the Depakote although some of the hopes were to diminish the headache frequency and severity. Most of his other bothersome symptoms have improved including some nighttime biting the inside of his cheeks and teeth-gnashing as well as confusion when awakening. It has improved what he calls staggers in that when he now changes posture and gets up, he feels steady and stable from the get-go and not having any of these symptoms as well. Overall, his mood appears somewhat better as does his affect, and this was confirmed by his wife. He denies any side effects with this medicine taking it twice a day with food.

He still has a lot of knee discomfort that is unchanged. He has good days and bad days. He will limp some days and not others. He did see Dr. Green who follows his shoulder surgery from previous injury who commented that he would have evaluated his knee with MRI to see if there is anything else to fix or repair and not just going arthroscopically as was proposed to him with a 50% chance of improvement. With this in mind, Mr. Kneece and I agreed that this seems to be an appropriate approach. I would certainly like to see if there is anything there repairable or that needs further addressed as opposed to simply having to live with the current pain that he does.

PHYSICAL EXAM: I did reexamine Mr. Kneece. He has full motion through the neck, shoulders, elbows, wrists, and digits, hips, knees, and ankles. He has no focal weakness. He has some crepitus and popping on the left knee with flexion and extension. He has no effusion noted. No redness noted. Calves are soft and nontender. Gait pattern is fairly symmetric today.

IMPRESSION: Traumatic brain injury, left medial condyle fracture with ongoing pain.

194

PHYSICAL MEDICINE AND REHABILITATION OUTPATIENT FOLLOW-UP...PAGE 2

PATIENT: Ricky Kneece

RECOMMENDATIONS: I recommended to Mr. Kneece that he continue with the Depakote twice a day and continue with counseling with Rafe Ellisor, and he can be referred to Dr. Green to evaluate his knee. I discussed this with his case manager today who agreed with this proposal. I will see him back in four weeks.

PHYSICAL MEDICINE AND REHABILITATION
OUTPATIENT FOLLOW-UP VISIT

PATIENT: Ricky Neese
DATE OF EVALUATION: 03/08/02

IDENTIFICATION: Ricky Neese was in my office about a month ago with a history of skull fracture, traumatic brain injury, contusion and laceration of left knee. He presents back today for an outpatient follow-up visit.

Since our last visit, Mr. Neese did try the Neurontin but did not like the effects of this and stopped it. He was on Paxil for a little while. It apparently gave him some priapism and not in a good way. Therefore, he stopped that as well. He did not like that it made him simply sit around although he is not feeling depressed or in any particular bad mood. He was even less motivated than he had been before and was content to just simply sit around. He does have knee pain still that come and go and are relatively unchanged over the last several months but are bothersome to him and, at times, he has to limp on his leg. He is still trying to work his farm on a regular basis. He is having some difficulty, but he is maintaining.

He did get to finally meet with Rafe Ellisor, LMSW, and had a good visit and good rapport. This may be quite helpful to him for the support and counseling that Mr. Ellisor can offer with his experience in head injury.

Mr. Neese has no new problems. Bowel and bladder function are fine. He is eating fairly well.

PHYSICAL EXAM: Heart showed a regular rate and rhythm. Lungs are clear. Extremities are without edema. Left knee is sore to touch. Extremities distally are without increased edema. The tenderness was medially along the joint space line near the patella as well. His strength remains 4+ to 5/5. He still has episodes of what he calls staggers where he first gets up and does not feel adjusted. This settles if he just stands still. He still has some headaches on a regular daily basis, usually after lunch. His gait was normal today.

IMPRESSION: Traumatic brain injury. Left knee medial condyle fracture and ongoing pain.

RECOMMENDATIONS: It is recommended that we try something different for headaches, other than Neurontin which he was not tolerating well. I gave him a prescription for Depakote 250 mg twice a day. I also gave him a little bit of a sample of ketoprofen-lidocaine cream for his knee. We talked about knee injections and/or follow-up with orthopedist who recommended the possibility of arthroscopy in the future if the symptoms did not abate. They had apparently given him about a 50/50 chance of improvement with this.

he use to, does not enjoy his work like he use to. Is irritable at home. Does not do his hobbies like he use to and seems to have not had any fun lately.

He is a little frustrated with his ongoing knee pain, headaches and deficits from traumatic brain injury.

PAST MEDICAL HISTORY: Benign. He is not taking any medicines at this time. He has had left shoulder trouble in the past with dislocation and has recently had some shoulder surgery to help take care of this and is in therapy for this. This was not apparently related to the recent accident. Does not smoke. Drinks some occasional beer. Drinks a couple cups of coffee a day. On no special diet. Has not been sleeping well in the five to six hour night range since his injury.

PHYSICAL EXAMINATION: This is a very pleasant, cooperative, awake, alert 40 year old gentleman sitting up in a chair in no distress. His neck range of motion is within normal limits. Did not cause any particular symptoms of pain today with good slow steady movements. Upper extremities limited at the left shoulder for motion over his head because of recent surgery and ongoing therapy. He has good motion through the elbows, wrists and digits. Good fine motor coordination of the digits bilaterally. Good strength in the 4+ to 5 out of 5 range throughout although the shoulder not tested. The lower extremities also 4+ to 5 out of 5. Deep tendon reflexes symmetric and 2 out of 4. No distal edema through the extremities. Calf soft, non tender. No palpable cords. His heart was a regular rate and rhythm. His lungs were clear to auscultation. His knee did have some popping felt lateral to the patella on flexion and extension at about the same degree each time. No particular pain with that. No effusion. Mild tenderness in the medial aspect of the patella. Medial joint space line was non tender as was the lateral joint space line. Posterior to the knee was non tender as well. Negative patella apprehension. Negative increased ligament laxity medially or laterally.

IMPRESSION: Left knee pain, traumatic brain injury with skull fracture.

RECOMMENDATIONS: Recommended to Mr. Kneece that we need to address several issues. I think that one of our best bets would be starting him on a mood stabilizer or sorts that can help reduce anxiety and believe Paxil would be a good choice for him at 20 mgs. a day. In addition to help him sleep at night but also to help with his chronic headache pain Neurontin may be of benefit and will try 300 mgs. at night. Finally for an anti-inflammatory instead of him taking too much Aspirin, Bufferin, Tylenol or Aleve which he may be proned to do I would like him to start on Vioxx 25 mgs. a day so hopefully this will simplify medicines he is using for pain but help with inflammation. I also discussed with him some counselling and would like to set him up with Rafe Ellisor who deals a lot with traumatic brain injury and recovery patients for compensatory mechanisms, coping strategies for the depression and frustration involved with this and I believe this may be of benefit. I would like to see him back in three or four weeks to

PROGRESS NOTE

PATIENT: Kneece, Ricky

CHART: 37891

Mr. Kneece is the man who was very severely injured when he had a compression-type truck wheel blow apart and strike him in the head. He had injuries to the right frontal pole, diffuse cerebral edema was seen, he had subarachnoid hemorrhage across the tentorium, and a left tentorial subdural hematoma. He had a high right posterior frontal epidural and very thin bilateral convexity subdural hematomas. He had a left posterior frontal parasagittal contusion. Despite this very forceful injury he made a very good recovery and returned to his family business, which is an independent farm. Mr. and Mrs. Kneece are here today to discuss with me their ongoing struggle with the after affects of this head injury. I will dictate my notes of our discussion.

Mrs. Kneece was the major spokesman for the interview and she is the major spokesman for their family. She began by saying that the first year after the accident Mr. Kneece worked extremely hard and was unaware of his neurological deficits because of focusing on returning back to work. This second year he has not been able to ignore the changes in his life. She poses a question "we know what has been lost; how do we get it back?"

I asked both of them what was different about Mr. Kneece. Mrs. Kneece said that Mr. Kneece's personality has changed. He used to be very patient, very easy going, and laid back. Since the accident he is easily frustrated and easily angered. He has no patience with his teenage son just when because of their age patience would be at a premium. He has no patience with his job, he gets frustrated with things that happen at work, which are not major frustrations but just routine daily challenges.

Mr. Kneece still is bothered by headache and still requiring medicine to care for his headache. A specific complaint is that he suffers brief periods of unsteadiness with postural changes. For example when he goes from sitting to standing, or when he bends over, or even when he turns his head such as when one turns to look behind oneself before changing lanes in a car, he has a brief period of unsteadiness. This is readily treated by holding his head still and waiting just a moment but if he does not do that the unsteadiness does not dissipate on its own and progresses to nausea and almost beyond. He has taken Antivert but it is not helpful.

Mr. Kneece's memory is much worse. He writes notes to himself to cue him to remember to do chores. Sometimes when he leaves the farm he can not remember whether he performed a vital chore and has to go back and check on it. I said that all of us do this to a certain degree and they hastened to admit that

CC: Lenwood P Smith, Jr, MD

202

but that Mr. Knecce is troubled by this problem well beyond a routine degree. He forgets conversations, he forgets decisions which have been made, he repeats himself in conversation.

He was given a prescription for BuSpar but he did not tolerate it.

Mr. Kneece has lost interest in fishing and hunting. He struggles to find the will to go to work. He finds that it is difficult to invest himself in his farm and his family.

Mr. and Mrs. Kneece have failed multiple attempts to get affordable health insurance. This is an extreme problem for them. Mr. Kneece is employed as an independent farmer. His life long partner in this regard is his dad. His parents are now older, and are retired, and have been ceding to Mr. Kneece the responsibility of the farm however because of the after affects of his injury his parents do not have the same full trust that Mr. Kneece can be a shrewd businessman.

They have struggled with the Workman's Compensation system. They went to Workman's Compensation without council and found that being successful without council was difficult. They have subsequently asked Scott Elliott to be their council. The Worker's Compensation claim is with Mr. Kneece's uncle for whom he was working at the time of the accident. That gives them some additional worry about the possibility of suing a close family member. They are uncomfortable with the idea of suing at all but they do not want to fail to look after themselves and they feel guilty either way they go. Mr. Kneece has seen a psychiatrist. He was not happy with his first meeting with the psychiatrist. He feels he needs further assistance however Mr. Elliott thinks that Mr. Kneece still needs to see a psychiatrist.

Then Mr. Kneece added a few of his own thoughts. He is worried about this unsteadiness when he turns his head or bends over. He is worried for example about his safety as a driver on the highway. In fact Mrs. Kneece is doing most of the nonfarm higher speed driving. Mr. Kneece is also concerned about the residual headache which he experiences. His headache occurs almost every day. It is not severe enough that he needs to take something every time. The headache is bifrontal, it lasts 2-4 hours.

My recommendations for Mr. and Mrs. Kneece include that Mr. Kneece certainly has symptoms which are characteristic for the sort of injury that he has. I have no reason to think that a repeat scan would show an active process. I believe that these complaints which he has do not sound like they are coming from an ongoing process but sound like they are the result of the head injury which he has already had. offered them a scan but I told them that I think that it would be low yield and we had decided not to scan him for the time being.

I believe that Mr. Keence's problems are severe and will be permanent. I agree that their concerns are well founded. These concerns can be summarized by saying that Mr. Kneece may no longer be able to be the same competitive businessman that he would have been in the past and our society and culture has provided for those people to be compensated. I think that Mr. Kneece does need to be assisted by a attorney and I have told them that I think that some reopening of the Worker's Compensation case or some way of quantifying Mr. Kneece's disability and awarding him disability which will then serve as

CC: Lenwood P Smith, Jr, MD

203

part of the safety net for the farm and to pay their now much higher health costs is something that they are going to have endure.

I do not believe that Mr. Kneece has an ongoing neurosurgical issue and so I will not plan to see him on a regular basis but I am certainly available at any time should issues arise. Furthermore I am happy to participate within my role as it exists for a decision about the extent of his disability.

2-11-2000: Mr. Kneece is here for follow-up having had his truck wheel blow up and strike him in the head. He had a skull fracture. He had some post-concussive type symptoms. Mr. Kneece's headache is completely gone. He still gets some dizziness sometimes when he makes rapid changes from lying to standing or from sitting to standing. He has had the flu recently; other than that, his personality has nearly returned to baseline. He is eager to return to work and feels that he can be a careful user of the highway.

I have told Mr. Kneece, his wife and case manager that I believe he should go to HealthSouth for work-place testing. If after that testing he receives a satisfactory passing grade, then I think that he is cleared to return to work as far as I am concerned. I have urged him to be careful when he first goes back to work, reminding him that a bed-side evaluation in my office followed by a work-place simulation study at HealthSouth are both artificial studies and that the only real study is in the work place itself and that he should use appropriate caution and care in returning to work.

I will see Mr. Kneece on an as-needed basis.

CT BRAIN:

Comparison made to 1/5/00.

FINDINGS: Contiguous axial imaging through the brain was performed without IV contrast and demonstrates an area of hypodensity involving the right frontal lobe. The hypodensity is more apparent on today's examination and is probably secondary to slice selection and slight difference in window technique. Overall the area of hypodensity is probably the same size as before. There is no mass effect. There is no hemorrhage. The ventricles and sulci are within normal limits. The overlying orbital roof fracture on the right is again noted.

IMPRESSION: Continued hypodensity in the right frontal lobe, the hypodensity is becoming more obvious on today's exam. There is no mass effect. As before, this probably relates to post traumatic encephalomalacic changes. Orbital roof skull fracture on the right.

CT HEAD (WITHOUT CONTRAST):

Contiguous axial images are obtained through the head. We have no prior films for comparison. These show encephalomalacic change involving the right frontal lobe from previous contusion. There is no evidence of acute intracranial hemorrhage. An overlying linear defect or skull fracture extends vertically through the right frontal bone from the supraorbital ridge for approximately 4.5 cm. No other skull fractures are evident. Minimal abnormal soft tissue in the left sphenoid region suggests concurrent sinusitis.

IMPRESSION: No evidence of acute intracranial abnormality. Right frontal lobe encephalomalacia from previous trauma with overlying linear skull fracture. Likely sphenoid sinusitis.

12-29-99: Mr. Kneece is the gentleman who was attempting to repair a problem with his compression type truck wheel. Perhaps he had a flat tire. In any case, his compression type wheel exploded, and he was struck in the head and had a tremendous closed head injury. At first, I thought that he had a frontal sinus fracture, but his fracture went just lateral to the sinus; therefore, he did not require surgery, and he made a remarkable recovery and was discharged. He is here for follow-up.

Mr. Kneece continues to do remarkably well. On the negative side, he has positional dizziness and headache. This seems to give him trouble for several days at a time, and then he is symptom free for several days. Loud noises still bother him. Though his memory is fine, he is more irritable and impatient than he used to be. Given all of these complaints, it is important to add that despite the fact that he has on-going problems, he remains remarkably improved vs. his hospitalization and initially after discharge. I have given him my usual instructions about on-going headache and dizziness, meaning that he has not completely recovered and that he continues to need to restrict his activities until those symptoms are resolved. Nonetheless, I understand that Mr. Kneece has restarted many of his activities. While we were discussing this, Mr. and Mrs. Kneece expressed some frustration with some of the care and instructions that he has received, particularly instructions in terms of the activities that he should undertake.

On exam, Mr. Kneece has no papilledema. He has no pronator drift. He is awake and alert. He has normal speech.

IMPRESSION: My impression is that Mr. Kneece is doing well, particularly considering how severe his injuries were. I would like to see him in one month in follow-up. I would like for him to have a CT scan now and a CT scan in one month.

DATE OF CONSULTATION:

DATE OF CONSULTATION: 22 November 1999.

HISTORY OF PRESENT ILLNESS:
The patient is an approximately 40 year old Caucasian male, who was changing a tire on an 18 wheeler when the tire "exploded" and the rim hit him in the head. He was reported to be unresponsive initially at the scene. Upon arrival, he was reported to have a GCS of 13. CT scan of the head shows contusion right frontal, zygomatic and orbital fractures to be present. Subarachnoid hemorrhage was noted within the basal cisterns. There is a right frontal lobe contusion present. A thin 2-3 mm right frontal epidural hematoma, left parietal subdural hematoma. There is a small amount of falcine/tentorial hemorrhage present. We were asked to evaluate at the request of Dr. Bynoe with Trauma Surgery.

PHYSICAL EXAMINATION:
Awake, alert, confused with name, events and year. He moves all extremities on command. Pupils equal, round, reactive to light. Periorbital ecchymosis bilaterally, with edema, left greater than right. Laceration to the right frontal scalp. Speech clear.

ASSESSMENT AND PLAN: Closed head injury. Close monitoring. Will see and evaluate with Dr. Lenwood Smith, need facial trauma consultation.

CHIEF COMPLAINT: Left knee

HISTORY: Mr. Kneece is a 40 year old gentleman who comes in today for evaluation of the left knee. On 11-22-99, he was working with a large tire and changing it. The tire exploded and he sustained multiple injuries including head injuries and a contusion and laceration to the left knee. He was seen at Richland Memorial Hospital and cared for there by Dr. Frank Voss for a fracture of the left medial condyle, which was treated nonoperatively. He feels like he has improved, but he is still having problems with this. His primarily complaint is with standing for a long period of time or at the end of the day he has pain in the left knee. It is an achy type pain. It seems to be somewhat related to activities. He also has it sometimes at rest. The pain is over the medial aspect of the knee. No history of swelling constantly although he has had several episodes of effusions. No giving away or instability. He has gone through physical therapy and just wants to know if there is anything else that can be done for it.

PAST MED/SURG HISTORY: Positive for asthma. Surgeries include multiple hernia repairs and an appendectomy. Family history is negative.

REVIEW OF SYSTEMS: Negative.

ALLERGIES: None.

SOCIAL HISTORY: He owns a large farm. He denies any tobacco or alcohol use.

EXAMINATION: Examination of the left knee reveals a medial laceration obliquely over the medial distal femur. No effusion. Mild patellofemoral crepitus. Range of motion is 0-125 degrees of flexion. Further flexion to 135 degrees is mildly painful. He has a tight feeling. He is tender along the medial joint line and the medial femoral condyle. Nontender on the lateral joint line. No opening with varus/valgus stress. Negative anterior drawer. Negative Lachman's. Some pain with varus stress flexion. No real pain with valgus stress flexion. 2/3

RADIOGRAPHS: Radiographs reviewed from the hospital at the time of the injury shows that he has a small fracture of the medial portion of the medial femoral condyle. Otherwise negative. AP/Lateral and sunrise view today shows this to be healed completely. There are no significant abnormalities. Patellar tracking is central with slight lateral tilt. Otherwise negative.

Bradley P. Presnal, M.D.

IMPRESSION: CONTUSION, LEFT KNEE

PLAN: At this point I have told him that I cannot find anything mechanically wrong with the knee and I cannot recommend any specific treatment other than increasing activities as tolerated. I have told him that if he continues to have problems, he may be a candidate for arthroscopy for evaluation of possible chondroplasty for a patellar hangnail lesion or to evaluate the menisci. I have not recommended an MRI because I do not think this will change the treatment at this point based on his symptoms. I recommend that he increase his activities as the knee allows and use over the counter anti-inflammatories as needed. I have also told him that I think he will improve slightly over the next 6-9 months, but I do not think he will make any dramatic improvement and the chances of complete resolution of his symptoms is probably small. I will have him follow up on a prn basis based on his symptoms.

Dear Mr. Elliott

Please find enclosed copies of the dental records requested by your firm. As you are aware, Mr. Kneece has been a patient of this office since 1983, and we are most interested in his well being and full recovery from this injury.

Mr. Kneece presented to our office on December 8, 1999. He had been injured when a tire exploded knocking him unconscious. At the time of his visit he had three teeth that had sustained fractures. These teeth were his upper left cuspid, right central incisor, and his lower left second bicuspid. He returned to restore the incisal edge of the front tooth on January 10, 2000. Mr. Kneece was advised that any tooth that sustains an injury as severe as these teeth did, might find that further treatment would be necessary. He was examined by us again on June 8th, 2001 for a routine cleaning. At that time, he complained of sensitivity for the front tooth. It is my concern that this tooth is failing and may require a root canal treatment. If this proves true, than a core and crown would be needed. Although this has not been determined yet, if done, service would cost approximately $1470.00.

If I can assist further please contact our office.

Dear Mr. Elliott

Please find enclosed copies of the dental records requested by your firm. As you are aware, Mr. Kneece has been a patient of this office since 1983, and we are most interested in his well being and full recovery from this injury.

Mr. Kneece presented to our office on December 8, 1999. He had been injured when a tire exploded knocking him unconscious. At the time of his visit he had three teeth that had sustained fractures. These teeth were his upper left cuspid, right central incisor, and his lower left second bicuspid. He returned to restore the incisal edge of the front tooth on January 10, 2000. Mr. Kneece was advised that any tooth that sustains an injury as severe as these teeth did, might find that further treatment would be necessary. He was examined by us again on June 6th, 2001 for a routine cleaning. At that time, he complained of sensitivity for the front tooth. It is my concern that this tooth is failing and may require a root canal treatment. If this proves true, than a core and crown would be needed. Although this has not been determined yet, if done, service would cost approximately $1470.00.

If I can assist further please contact our office.

With regards,

Philip E. Smith, D.M.D.

509 EAST MAIN STREET • LEXINGTON, SOUTH CAROLINA 29072 • 803/359-9991

HISTORY: Mr. Kneece comes in today for continued follow up of his left knee injury due to a blast injury. His left knee has been doing quite well. He still gets some episodic stiffness and ache in it but he has been able to resume full activity.

PHYSICAL EXAMINATION: On examination, the left knee remains mildly tender over the medial femoral condyle where his fracture was. His range of motion on the right is 0 to 135 degrees, on the left 0 to 125 degrees. It is ligamentously stable. There is no ACL or PCL laxity nor do I detect significant crepitation. There is some clicking in his knee as I stress it in a valgus fashion.

RADIOGRAPHS: No new radiographs were obtained.

IMPRESSION/PLAN: I believe he has reached maximum medical improvement and can be released from my clinic. His rating although it would be none from the range of motion model is best estimated by the intercondylar fracture of the femur, page 85 in the Guides to the Evaluation of Permanent Impairment, 4th edition, suggesting that he had an undisplaced medial condyle fracture which is a 5% lower extremity, 2% whole person impairment. He mentions also he has had difficulties with his left shoulder which is not related to his Worker's Compensation claim with several episodes of dislocation. I told him should that require further attention that that could be addressed by Dr. John Walsh.

MARCH 8, 2000 RE: RICKY D. KNEECE #21858

HISTORY: Ricky Kneece comes in today for continued follow up of his left knee. He is remarkably improved. He has been doing his own physical therapy.

PHYSICAL EXAMINATION: He has no knee effusion. There is still some mild tenderness over the medial side of his knee. There is no ligamentous instability. I do not demonstrate medial joint line tenderness. His range of motion is improved with flexion to approximately 120 degrees but not 140 degrees.

PLAN: I told him I would see him again in three to four months' time for a recheck and a possible rating if that were necessary. At this point, he is released for return to work for full duty unrestricted.

219

HISTORY: Mr. Kneece comes in today for continued follow up of his left femoral condyle fracture. He had a frustrating interval where I did not get back in contact with him early enough. I apologized to him and labeled that all as my fault. His knee has continued to improve.

PHYSICAL EXAMINATION: His knee range of motion today is from 0 to 112 degrees. There is some tenderness over the medial femoral condyle. I do not detect clicking. There is some irregularity in the patellofemoral tracking and he has some visible left quadriceps atrophy.

PLAN: He has been unable to go to the physical therapist to get going on his quadriceps strengthening exercises. I have sent him for vigorous physical therapy to work on flexion and quadriceps strengthening. I will see him again in four weeks' time. He will continue with the Celebrex to minimize his effusion. We discussed whether he would be able to go back to work. He is not quite ready to go back to driving and he is unable to kneel. I am optimistic that this will improve.

JANUARY 7, 2000 RE: RICKY D. KNEECE #21858

HISTORY: I have reviewed Mr. Kneece's films. These demonstrate no displacement of his intraarticular fracture. He persists in having large effusions and is somewhat frustrated because I have not called him back. I have apologized and his frustration is appropriate. I have offered him the ability to have a second opinion or to transfer his care. We do not think that will be necessary at present.

PLAN: I have recommended that he continue with his anti-inflammatory agent, that he may progress to full weightbearing, that his physical therapy exercises be limited to a straight leg raise with a weight and that he work on regaining further range of motion as his flexion seems to be limited to 90 to 100 degrees. I plan to move up his visit to see him in two weeks. If he persists in having a large effusion, I think an MRI scan would be appropriate.

DECEMBER 27, 1999 RE: RICKY D. KNEECE #21858

HISTORY: Mr. Kneece comes in today for continued follow up of his left femoral condyle fracture due to a direct blow and tire explosion. He came in and was seen with a large effusion by Dr. Evan Ekman. Apparently, he had been full weightbearing without my consent. He was told to go back on crutches and placed on Celebrex and given a knee sleeve.

PHYSICAL EXAMINATION: He comes in today full weightbearing. His knee sleeve has diminished the effusion as has the Celebrex. He has a 1+ effusion. His knee range of motion is from 0 to 95 degrees of flexion. The knee joint is stable.

X-RAY INTERPRETATION: I ordered an AP and lateral radiograph of the left knee in the office today. These demonstrate no displacement of the nondisplaced fracture and early healing.

IMPRESSION: Left femoral condyle fracture.

PLAN: I think he is ready to begin some strengthening. I will give him a call once I have reviewed the radiographs.

DECEMBER 22, 1999 RE: RICKY D. KNEECE #21858

HISTORY: This is a patient of Dr. Voss' who was sent up from Dr. Reed's office. He has a history of a fracture of his medial femoral condyle and was last seen on December 1st. He comes in today because of concern regarding the swelling in his knee. He and his wife as well as Dr. Reed feel it is worsening.

OBJECTIVE: On physical examination, range of motion is 5 degrees short of full extension to 95 degrees in flexion. He has no joint line tenderness. His ligaments at this time appear to be stable; however, he does have a ton of guarding. He has a 1+ effusion but clearly some of the hemarthrosis has turned to frank clot.

IMPRESSION: Knee pain status post femoral condyle fracture.

PLAN: Ice, anti-inflammatory medications and a knee sleeve. I have placed him on Celebrex because of his history of ulcer disease. I have offered to them aspiration which they feel they would prefer to wait on. If his pain and symptoms persist, I would recommend an MRI.

HISTORY: Mr. Kneece comes in today for evaluation of his left knee injury. He was admitted to Palmetto Richland Memorial Hospital after an accident on 11-22-99 at 9:30 a.m. A tire exploded creating skull fractures, broken teeth and an injured knee. He was seen and evaluated in the Emergency Room where he underwent injection of dye into his knee to ensure that it did not communicate with the laceration by his knee. This was not the case. The left knee was noted to have a fracture of the medial femoral condyle which did not seem to displace into the joint.

PHYSICAL EXAMINATION: He comes in today and his knee immobilizer is removed. His incision is well healed. His sutures are removed. Knee range of motion is from 0 to 105 degrees. The knee is stable. There is tenderness along the medial femoral condyle. There is a 2+ effusion. The quadriceps seems to be clearly intact.

X-RAY INTERPRETATION: A radiograph today demonstrates more clearly the fracture that he has of the medial femoral condyle which does not seem to go into the joint.

PLAN: I have given him the okay to stay touchdown weightbearing and to work on maintaining his range of motion. I will see him again in four weeks' time at which point he should **undergo an AP and lateral of his left knee** to check that this is fully healed and then he can go back to full weightbearing and more aggressive activity. Overall, I do not anticipate that this injury will lead to degenerative arthritis based on the radiographs I have seen.

Progress Note
Roxanne Kneece 08/21/00

Roxanne advises that she attempted to have Ricky come to the appointment today or at least to accompany her; but he was unwilling to do so. She doe acknowledge that this season is the busiest for large scale farming operations, but she continues to hope that he will later be willing to take time to talk to someone. She describes several incidents recently in which he has been hostile, critical, and inappropriately demanding of her and their sons. I suggested that she identify a brief phrase or sentence which is reasonable and continue to repeat this statement to him in response to his irrational statements. She indicated that she is uncertain she will be able to remain in her marriage if he is unable/unwilling to control his behavior more consistently. I agreed with her that having Ricky present is the most desirable situation and she assured me she would invite him.

PSYCHOLOGICAL EVALUATION

NAME: Ricky D. Kneece

DATE OF EVALUATION: 07/03/00

SSN: [redacted]

DOB: [redacted]

EDUCATION: Twelfth grade

REFERRAL QUESTION: This client was referred by his insurance company for evaluation of psychological factors resulting from an accident he incurred in November 1999.

EVALUATION INSTRUMENTS:
MMPI-II
WRAT-III (Reading)
Bender Gestalt
Rorschach
Interview With Spouse
Clinical Interview

BACKGROUND INFORMATION AND BEHAVIORAL OBSERVATIONS:

Ricky Kneece is a 40-year-old married father of two adolescent sons who operates a very large family farming business. In November 1999, he suffered rather massive injuries when a tire he was inflating exploded in his face. Despite the severity of his injuries, he reports having recuperated from the physical problems and has returned full-time to his farming duties. However, he acknowledges having short-term memory impairment and also recognizes that he is experiencing a marked increase in his level of irritability. His wife, likewise, reports that her husband

227

was previously "laid back and easy going" and now is prone toward displaying verbal hostility toward herself and their sons when any unexpected or unpredicted inconvenience takes place. He also complains about a decrease in the patient attitude which he described as part of his natural habit previously.

Mr. Kneece denies any sleep disturbance, indicating that he sleeps "dead" for five to six hours at a time. He does perhaps acknowledge sleeping for longer intervals prior to his injury. He denies any problem with appetite disturbance. He does note that he seems to have less stamina than he did prior to the accident. While he does continue to complete all necessary duties, he indicates that he must "push" himself to do so. Mr. Kneece indicates he has no other health problems by history which have impacted his work ability. He notes that following his injury and during his recuperation he did have pneumonia and bronchitis.

Mr. Kneece indicates that following his high school graduation he assumed increasingly significant duties in the management of his family farming operation. This is the only work he has done. He indicates that he has few leisure activities except for occasional hunting and fishing. He does indicate that he attends church regularly. Mrs. Kneece relates that her husband consistently refuses to take time off to accompany her and the children on family vacations. She indicates that they were childhood friends and have known each other for many years. She notes that his work habits have not altered significantly throughout the time she has known him. She indicates that they have "swapped roles" since his accident. Prior to his accident, he was unconcerned about most minor problems and she was much more "perfectionistic." She now indicates that, compared to the alternative outcome of this accident she is simply grateful to have her family intact while her husband has become very irritable, argumentative, and demanding about even the most insignificant issues.

228

TEST RESULTS AND INTERPRETATION:

Administration of the WRAT-III Reading subtest yielded a Raw Score of 36, producing a grade level equivalent of fifth grade. Mr. Kneece was provided a copy of an intellectual screening test and requested to complete this. However, at the conclusion of testing he left without having completed this test. His verbal skills and reasoning ability seemed to indicate low average intelligence, however. Reproduction of two dimensional Bender Gestalt designs was completed accurately and carefully, apparently contraindicating any perceptual motor dysfunction or underlying neurological problems.

Objective personality assessment produced an invalid profile. Mr. Kneece obviously made a conscious effort to avoid disclosure of even minor shortcomings or psychological problems on his part. The resulting profile is therefore inappropriate for interpretation. While there is some question that he was unable to comprehend test items accurately enough to participate in this testing, it should be noted that the examiner frequently checked with him to ascertain that he was in fact capable of reading to the extent necessary to participate in this phase of testing.

Projective data describe a man who is experiencing a great deal of difficulty in coping with circumstances in his life at present. His resources for dealing effectively with situations which he perceives to be enormously stressful are limited. While Mr. Kneece's capacity for maintaining external controls over his stress level has been significantly reduced by virtue of the trauma of his accident, he now displays a very limited ability to avoid displaying angry outbursts and irritability. The level of emotional stress that Mr. Kneece is feeling currently has the real potential for interfering with his ability to perceive situations accurately.

229

SUMMARY AND RECOMMENDATIONS:

Evaluation and interview data describe an individual who is attempting to deny or repress negative or distressing thoughts. Objective data produced an invalid profile, due to his conscious effort to avoid disclosure. Projective data clearly define the level of stress he is experiencing and the overwhelming toll that his efforts to deny or repress are having upon him. It is strongly recommended that Mr. Kneece be provided the opportunity to participate in therapy which will allow him to learn better coping mechanisms. His wife would also benefit from strategies to assist her in supporting this effort on his behalf.

FINDINGS: Contiguous axial imaging through the brain was performed without I.V. contrast and demonstrates an area of hypodensity involving the right frontal lobe. The hypodensity is more apparent on today's examination and is probably secondary to slice selection and slight difference in window technique. Overall the area of hypodensity is probably the same size as before. There is no mass effect. There is no hemorrhage. The ventricles and sulci are within normal limits. The overlying orbital roof fracture on the right is again noted.

IMPRESSION: Continued hypodensity in the right frontal lobe, the hypodensity is becoming more obvious on today's exam. There is no mass effect. As before, this probably relates to post traumatic encephalomalacic changes. Orbital roof skull fracture on the right.

Contiguous axial images are obtained through the head. We have no prior films for comparison. These show encephalomalacic change involving the right frontal lobe from previous contusion. There is no evidence of acute intracranial hemorrhage. An overlying linear defect or skull fracture extends vertically through the right frontal bone from the supraorbital ridge for approximately 4.5 cm. No other skull fractures are evident. Minimal abnormal soft tissue in the left sphenoid region suggests concurrent sinusitis.

IMPRESSION: No evidence of acute intracranial abnormality. Right frontal lobe encephalomalacia from previous trauma with overlying linear skull fracture. Likely sphenoid sinusitis.

URGENT CARE

CC: Left hand pain.

S: This is a 50-year-old white male who presents to LMC-L with the complaint of left hand pain. He states that he fell shortly before arrival and when he did he struck his hand in the webb area between his thumb and 2nd digit. He states that it immediately started to swell and give him a great deal of discomfort especially in the thenar eminence and the dorsum of the hand at the base of the 2nd metacarpal. He denies any numbness or tingling. There is no laceration. No bruising, but there is a fair bit of swelling. ROS: Otherwise unremarkable with the exception of a problem recently with his 5th digit of that same left hand. He injured it several weeks ago and since that time he cannot fully extend the distal portion of his finger. SH: Married. Farmer. Rarely uses alcohol, not a drinker. PMH: Hypertension and hyperlipidemia, also hypothyroidism and a seizure disorder. PSH: Some orthopaedic surgery on his knee.

O: VITAL SIGNS: Listed on chart and within normal limits. Slightly hypertensive, but having a fair bit of pain and his recheck BP is much better. GENERAL: Well-developed, well-nourished, moderate distress secondary to his hand pain which he rates as moderately severe and a throbbing sensation. LEFT HAND: Swelling of the palm near the thenar eminence and also the dorsal surface of the hand overlying the 1st and 2nd metacarpals. A great deal of tenderness to palpation in the webb between the 2 fingers as well as at the proximal portion of the 2nd metacarpal. Good capillary filling, good tendon function in the hand with the exception of the flexor tendon at the DIP joint of the 5th finger which appears to be disrupted. DIAGNOSTIC STUDIES: X-ray obtained of left hand which revealed a fracture at the base of the 2nd metacarpal. Velcro wrist splint was placed on the left hand.

A:
1. Flexor tendon injury to left 5th finger.
2. Fracture of proximal 2nd metacarpal of left hand.

P: Follow-up with Midlands Orthopedics as he has seen them before. Rx Vicodin p.r.n. pain in addition to the wrist splint.

HPI: The patient is a right hand dominant 50-year-old male who presents with the main complaint of an acute injury involving the left hand . The injury occurred on 11/19/2010. His family owns a cotton business and he is a farmer. Apparently he became dizzy while working on one of the machines, lost his footing and fell injuring his left hand. He was seen at Lexington Medical Center urgent care in Lexington where he was x-rayed and diagnosed as having a fracture of the base of the index metacarpal left hand. 2 weeks prior to that he injured his little finger and sustained what sounds like a mallet finger deformity. He is in my office today for both injuries. I have operated on his wife in the past for carpal tunnel syndrome.

OFFICE NOTE

PATIENT: Ricky D. Kneece
DATE: 12/22/99
CHART #: 8600
DOB: [redacted]

This patient was seen at Richland Memorial Hospital 11/22/99 after a tire blew up in his face and he sustained a right orbital roof fracture.

The patient also lost consciousness. He also sustained a left knee injury. When seen initially, the patient had a fracture involving frontal bones and had a laceration to the interior scalp which was repaired by the Emergency Department physician or by one of the residents.

Initially, he had significant proptosis which is now resolved.

On physical examination, there is no more proptosis. There is good symmetry of bilateral orbits. There might be some residual fullness in the right upper eyelid. There is no evidence of vertical dystopia. The extraocular movements are within normal limits. The patient denies diplopia in the entire visual field.

There was one Vicryl suture coming to the surface of the scar and this was removed. There is no evidence of stitch abscess.

At this point, there is no need for surgical intervention on the orbital roof. I would like to see him only on a p.r.n. basis.

DATE OF CONSULTATION:

SERVICE: Plastic Surgery.

REASON FOR CONSULTATION: Rule out facial fracture.

HISTORY OF PRESENT ILLNESS: This is a 39-year-old male who is status post a tire explosion. The patient came in with a Glasgow Coma Score of 13 initially. We were asked by Trauma and Neurosurgery to evaluate this patient for facial fractures. Other injuries including subarachnoid hemorrhage and knee fracture.

PAST MEDICAL HISTORY: Gout.

PAST SURGICAL HISTORY: Hernia x 3 and appendectomy.

MEDICATIONS: No medications.

ALLERGIES: No known drug allergies.

SOCIAL HISTORY: He does not smoke. He does not drink. No history of intravenous drug abuse.

FAMILY HISTORY: Is negative.

PHYSICAL EXAMINATION: The patient is easily aroused, but rapidly falls asleep. He had some intravenous sedation given. He is wearing a cervical collar. The patient over the right forehead that has been sutured. There is no evidence of subgaleal fluid collection. There is swelling on the right forehead and scalp. The patient has bilateral periorbital ecchymosis. Pupils are symmetric and reactive. The patient is able to count fingers. Extraocular movements are within normal limits except for upward gaze on the right side. No step-off was felt on the orbital ridge or zygomatic arches. No step-off was felt in the upper or lateral buckle sulcus. Midface is stable and mandible is stable as well. There was tenderness to palpation to the nose. Intranasal exam showed no evidence of septal hematoma.

LABORATORY DATA: Hemoglobin of 18.1, PTT 24.7, urine analysis normal, PT 12.3, electrolytes within normal limits.

CT SCAN shows a comminuted right and supraorbital fracture, no involvement of the frontal sinus, small multiple contusions, andsubarachnoid hemorrhage. There was blood in the maxillary sinus, but no coronal view was performed and we do not have a good view of the orbital floor. There was blood in the ethmoid sinuses bilaterally. There is a nondisplaced nasal fracture.

IMPRESSION: Minimally displaced facial fractures, rule out right orbital floor, a formal coronal CT is ordered.

PLAN: We will re-evaluate this patient once the ordered studies are completed.

DATE OF INJURY/ONSET/SURGERY: DOI on 11/19/2010

HPI: The patient is a right hand dominant 50-year-old male who presents with the main complaint of an acute injury involving the left hand . The injury occurred on 11/19/2010. His family owns a cotton business and he is a farmer. Apparently he became dizzy while working on one of the machines, lost his footing and fell injuring his left hand. He was seen at Lexington Medical Center urgent care in Lexington where he was x-rayed and diagnosed as having a fracture of the base of the index metacarpal left hand. 2 weeks prior to that he injured his little finger and sustained what sounds like a mallet finger deformity. He is in my office today for both injuries. I have operated on his wife in the past for carpal tunnel syndrome.

RE: Ricky Kneece vs. Kneece Farms
WCC File No.: 9920867

Dear Mark:

Enclosed please find copies of prescriptions ordered by Dr. Roger W. Deal as a part of his treatment of Ricky Kneece. I am advised by the Kneeces that Dr. Deal has prescribed this medication over some period of time and that they have been paying for it themselves. Dr. Deal practices with Dr. Larry Bergmann whose treatment has been approved by your client, Legion Insurance Company/SCPCIGA. Accordingly, I would appreciate your client taking steps necessary to accept and pay for these prescriptions going forward.

In addition, you and I spoke recently concerning a resolution of this file. I would appreciate your advising me of your client's counter-offer to settle this file.

I look forward to hearing from you.

Sincerely,

Elliott & Elliott, P.A.

RE: Ricky Kneece vs. Kneece Farms
WCC No.: 9920867

Dear Stephen:

I appreciate the efforts of your client and you to agree to treatment of Mr. Kneece by Dr. Larry Bergmann, and this will serve to confirm that you have set an appointment for Mr. Kneece for January 2, 2006, at 3:30 p.m. I will keep you posted as to his treatment with Dr. Bergmann.

I am in receipt of a copy of a Form 17 provided me by the carrier which provides that Mr. Kneece was able to return to work on January 9, 2003. I am confused by the Form 17 inasmuch as we agreed that our settlement agreement provides that temporary total payments will be stopped effective July 18, 2005, the date that Mr. Kneece reached maximum medical improvement as a result of his shoulder surgery. We would be perfectly happy to execute a Form 17 that reflects the date that we agreed upon for cessation of temporary total.

Please let me know how you would care to proceed with respect to the Form 17.

I hope you and your family have a Merry Christmas and Happy New Year.

Sincerely,

ELLIOTT & ELLIOTT, P.A.

RE: Ricky Kneece vs. Kneece Farms
WCC No.: 9920867

Dear Stephen:

This will confirm that the parties have agreed to settle the issues raised by the Defendants' appeal. The parties have agreed as hereafter set out.

The Defendants have agreed, as ordered by the Commission, to be responsible for the Claimant's causally-related medical treatment for his compensable injuries as set out in the Commission's Order dated April 18, 2005, including, but not limited to treatment and surgery for the injuries to Claimant's left knee, left shoulder and left elbow by Drs. James O'Leary and Michael Green as the authorized treating physicians.

Further, as ordered by the Commission, the Defendants have agreed to be responsible for treatment for the Claimant's closed head injury and depression including all treatment by Dr. Randolph Waid and all future treatment including that from Dr. Waid and his referral to Dr. Larry Bergman, both of whom are Claimant's treating psychologists.

The Claimant has agreed to a stop payment of temporary total disability payments made after the Claimant was released by Dr. Green July 18, 2005, after his shoulder surgery (see Dr. Green's note of 07/18/2005). The Defendants will be entitled to a credit of all payments made after July 18, 2005. The balance of the terms of the Commission's Order of April 18, 2005, will remain in effect.

However, as I mentioned, Dr. Green has now raised a question as to whether the Claimant suffered a neck injury as a result of the accident. Dr. Green has referred the Claimant to Dr. P. Douglas deHoll to investigate the possibility of a neck injury caused by Claimant's accident. The parties have agreed that all issues regarding the Defendants' liability for treatment by Drs. Green and deHoll for injuries to his neck, including treatment, and/or surgery, as well as any future temporary total disability payments and permanent disability shall be held in abeyance. It would be our hope that the parties could amicably resolve any future issues between them as we have done today.

I am enclosing Claimant's medical records from Midlands Orthopaedics since December 6, 2004, for your review. As I bring you up to date with Dr. Green's treatment of the Claimant, I will provide you with any additional medical records or opinions concerning the neck injury at that time.

In the meanwhile if you have questions, please feel free to call me.

Sincerely,

ELLIOTT & ELLIOTT, P.A.

Scott Elliott

NEW PATIENT ENCOUNTER

NAME: KNEECE, DELANO R
DATE: 09/13/2005

ACCOUNT #: 252876
DOB: [redacted]

CHIEF COMPLAINT (S): LEFT SHOULDER PAIN.

HISTORY OF PRESENT ILLNESS: Mr. Kneece is a 45-year-old male who has had two previous shoulder operations on the left. He also complains of pain in the neck and the left trapezius. He has no pain radiating down below the elbow but some pain in the region of the deltoid. He has a grabbing pain in the left shoulder with external rotation.

PHYSICAL EXAMINATION:

MOTOR: Motor exam in bilateral deltoid, biceps, triceps, wrist extensor, wrist flexor and intrinsic musculature is 5/5.

SHOULDER: Full range of motion of bilateral shoulders without pain. Rotator cuff is 5/5. No signs of impingement.

REFLEXES: Deep tendon reflexes at the biceps, triceps, and brachial radialis is 2+ and symmetrical.

No clonus.

Toes are downgoing.

Negative Hoffmann. Negative Spurling. Negative Lhermitte.

SENSATION: Light touch is subjectively within normal limits in bilateral upper extremities. All dermatomes are well represented.

PALPATION: Nontender to palpation in the cervical spine and mild tenderness to palpation in the trapezius on the left.

RANGE OF MOTION: Normal of range of motion of the cervical spine regarding flexion, extension, lateral bending and lateral rotation.

VASCULATURE: Palpable radial pulse bilaterally.

SKIN: No obvious skin lesions or cutaneous stigmata.

RADIOGRAPHS: AP and lateral of the cervical spine are normal.

ASSESSMENT: LEFT SHOULDER PAIN STATUS POST TWO PREVIOUS SURGERIES, POSSIBILITY OF A C5 RADICULOPATHY.

PLAN: MRI of the cervical spine. Follow-up after MRI.

FOLLOW-UP OFFICE VISIT

NAME: KNEECE, RICKY
DATE: 07/18/2005

ACCOUNT: 252876
DOB: [redacted]

CLINICAL STATUS: I am seeing Ricky in follow-up. He has problems with adduction and external rotation especially with loaded position or sustaining position. This correlates well with his large Hill-Sachs lesion. He is probably rotating his defect up against his articular surface of the glenoid, but otherwise he seems stable. External rotation with the elbow at the sides is a little bit less than the other side which is what we wanted. He is working on some strengthening. He tries not to use it, especially in above chest level activities. His elbow is doing great. He has found something called Gout Cure that seems to be helping him out with his gout. He could not tolerate the Allopurinol. It started making him lose hair, etc. Hopefully that will work.

DIAGNOSIS: STATUS POST ARTHROSCOPIC REDO CAPSULAR SHIFT PROCEDURE.
STATUS POST GOUTY TOPHUS EXCISION, LEFT ELBOW.

PLAN: We will go ahead and release him at this time.

RETURN APPOINTMENT: As needed.

CLINICAL STATUS: I am seeing Ricky in followup. His motion is coming but a little bit tight in abduction and external rotation. However, his strength is returning. He is looking much better. He is starting to use it more.

DIAGNOSIS:
1. THREE MONTHS STATUS POST ARTHROSCOPIC CAPSULAR SHIFT PROCEDURE, LEFT SHOULDER.
2. GOUTY TOPHUS EXCISION, LEFT ELBOW.

PLAN: At this point, will rehab him. See him in 3 months to see how he is doing.

CLINICAL STATUS: I am seeing Ricky in followup. His shoulder motion is tight but exactly about where it should be at this time. Elbow looks great. He has good motion. Little extraneous soft tissue but certainly no pocket of fluid evident that I can tell.

IMPRESSION:
1. STATUS POST GOUTY TOPHUS AND OLECRANON BURSA EXCISION, LEFT ELBOW.
2. STATUS POST RE-DO CAPSULAR SHIFT PROCEDURE, LEFT SHOULDER.

PLAN: At this point, motion is about where it should be. Will have him start working on active range of motion, gentle rotator cuff strengthening. Will see him in 6 weeks for reevaluation.

CLINICAL STATUS: I am seeing Ricky in followup.

His MRI confirmed evidence of biceps pathology. He has a split biceps tendon with a rupture between the anchor point and the bicipital groove. It has still been causing him quite a bit of pain and problem. His olecranon bursitis is still present as well.

DIAGNOSIS: 1. CHRONIC OLECRANON BURSITIS, LEFT ELBOW.
2. INTRAARTICULAR LEFT BICEPS TENDON RUPTURE.

PLAN: At this point he is symptomatic enough I think he would probably be a good candidate for an arthroscopic assisted biceps tenolysis with a mini open tenodesis. Proximal biceps screw from Arthrex would be the anchor choice. At the same time, I will go ahead and excise his left chronic olecranon bursitis. This can be done on an outpatient basis under regional/general anesthetic.

RETURN APPOINTMENT: Will see him 11-13 days postop if he wishes to proceed in this fashion.

To Whom It May Concern:

Thanks very much for asking Post Trauma Resources to treat Mr. Ricky Kneece after he was injured at work.

It is our opinion that Mr. Kneece has reached maximum medical improvement for psychological symptoms that developed. Although he is improved, he continues to report symptoms dysphoria, difficulties adjusting to his cognitive disability, irritability and withdrawal. He also continues to report symptoms consistent with a head injury.

Based on the AMA guidelines and using the Epstein et al (1998) method for determining psychiatric impairment, Dr Roger Deal, psychiatrist, and I are of opinion that Mr. Kneece has experienced an eleven-percent whole person, permanent impairment. This is our opinion only concerning his psychological status, not his cognitive impairments. In order to maintain his current status, Mr. Kneece will require the use of psychotropic medication and medication management as long as he is experiencing chronic pain and cognitive difficulties.

Thanks again for allowing us to work with Mr. Kneece and feel free to contact us if we can be of any assistance.

Sincerely,

2/5/07

DISCHARGE SUMMARY

PATIENT:	Kneece, Ricky	DICT:	Steven Page, MD
MR #:	00-86-24-45-9	ATT:	Raymond P Bynoe, MD
ADMITTED:	11/22/1999	DOB:	[redacted]
DISCHARGED:	11/27/1999	PT.LOC:	

DISCHARGE DIAGNOSES:
1. Closed head injury.
2. Nondepressed skull fracture.
3. Nondisplaced femoral condyle fracture.
4. Scalp laceration.

PROCEDURES:
1. Primary closure of scalp laceration.
2. Primary closure of nonopen knee laceration.

HOSPITAL COURSE: This is a 40-year-old white male who was working on an 18-wheeler who had a tire explore and the rim hit him in the head. The patient had positive loss of consciousness and was unresponsive at the scene initially, but then woke up upon evaluation by EMS services. The patient was transported and on arrival had a GCS of 13 with an RTS of 12 with a blood pressure of 150/100, pulse 75, and respiratory rate of 14. The patient had 100% O2 saturations on nonbreathing mask. Evaluation revealed a 10 cm superficial scalp laceration, a closed head injury, a nondisplaced femoral condyle fracture on the left lower extremity, and a laceration over the knee that did not communicate with the joint. A CT scan of the head showed a nondepressed skull fracture, a subarachnoid hemorrhage within the basal cisterns, a right frontal lobe contusion, a thin frontal epidural hematoma, and a thin parietal subdural hematoma. The patient was admitted and evaluated by both neurosurgery, orthopedic surgery, and plastic surgery. The patient had close neurologic monitoring for his head injury. The patient's knee laceration was injected and felt to not communicate with the joint, and therefore was closed primarily. The patient's scalp laceration was also closed primarily nurse. By hospital day #2, the patient's neurologic function improved such that he had a GCS of 15 and was alert and oriented, and was responding appropriately to questions. A repeat CT scan was basically unchanged from his admission CT scan. A CT of the patient's face revealed a right orbital roof fracture and right orbital floor fracture with minimal displacement which was elected to be managed nonoperatively. The patient was placed in a knee immobilizer and was made touchdown weightbearing on his left lower extremity and was started on physical therapy which he progressed well with, and became independent with ambulation using a walker. The patient had significant swelling about his face and raccoon eyes which improved during his hospital stay. Due to the patient's lack of change on the patient's CT scan and his improved neurologic function, the neurosurgeons felt it was appropriate to continue conservative management, and felt that the patient did not need to be in the hospital from their standpoint. The plastic surgery service and the orthopedic service also felt the patient was ready to be discharged from their standpoint. The patient remained afebrile and hemodynamically stable. He

had an improved appetite and tolerated a regular diet. When the patient improved with physical therapy enough that he was felt to be independent with mobilization using a walker he was discharged to home.

DISCHARGE INSTRUCTIONS: The patient will be discharged to home

ACTIVITY: His activity is touchdown weightbearing on his left lower extremity and ambulate with a walker.

DIET: His diet is as tolerated.

MEDICATIONS: His medications include:
1. Tylox 1 to 2 q.4 p.r.n. pain.
2. Nasal Ocean Spray every 2 hours to both nostrils while awake.

OTHER INSTRUCTIONS:
1. The patient is to have a knee immobilizer in place at all times.
2. He is to ambulate with a walker.
3. The patient may not blow his nose.
4. The patient will have home physical therapy to continue with ambulation and gait training.

FOLLOW-UP: The patient will follow up with Dr. Voss in the Orthopedic Clinic in approximately one week. The patient will follow with Dr. Lefaivre in the Plastics Clinic in approximately three weeks, and will follow up with Dr. Lenwood Smith in the Neurosurgery Clinic in approximately four weeks.

OPERATIVE REPORT

PATIENT:	Kneece, Ricky	DICT:	Raymond P Bynoe, MD
MR #:	00-86-24-45-9	ATT:	Raymond P Bynoe, MD
ADMITTED:	11/22/1999	DOB:	
DISCHARGED:	11/27/1999	PT.LOC:	

DATE OF OPERATION:

PREOPERATIVE DIAGNOSIS: Forehead laceration.

POSTOPERATIVE DIAGNOSIS: Forehead laceration.

OPERATION PERFORMED: Laceration repair.

ATTENDING SURGEON: Raymond Bynoe, M.D.

RESIDENT SURGEON: Michael Pallaci, M.D.

DETAILS OF PROCEDURE: The forehead was prepped and draped in the usual sterile fashion and local anesthesia with 1% Lidocaine with Epinephrine was administered. The wound was copiously irrigated with sterile saline and explored. The laceration penetrated the galea and the skull was palpable. At this point, the wound was irrigated further. The laceration was closed in layers. The galea was closed with 5 3-0 Vicryl sutures, 3 subcuticular sutures were placed of 4-0 Vicryl and the skin was closed with 14 interrupted 5-0 Nylon sutures.

Ord Diag: EXPLOSION TO FACE

Unenhanced CT head scan was performed and images photographed in bone and brain windows.On the bone windows, there is a right frontal skull fracture which is comminuted, but not depressed. There is subarachnoid blood in the basal cisterns along the faux and along the tentorium, as well as cerebral extracranial soft tissue swelling over the right frontal area and what would appear to be a small anterior frontal extracerebral collection of blood. This measures only several millimeters.Punctate contusions in the right frontal lobe and at least one posterior left frontal lobe. The ventricles are normal. There may be a very thin extracerebral collection over the left parietal lobe also, measuring only 2.0-3.0 mm in diameter. There is soft tissue swelling over the right orbit and some subcutaneous emphysema in the periorbital soft tissue.

IMPRESSION:COMMINUTED RIGHT FRONTAL FRACTURE WITH PROBABLE THIN SUBDURAL HEMATOMA BENEATH THE FRACTURE AND CONTRECOUP THIN SUBDURAL OVER THE LEFT MID AND POSTERIOR PARIETAL AREA. THERE ARE PUNCTATE CONTUSIONS IN THE RIGHT FRONTAL LOBE AND AT LEAST ONE ON THE LEFT, AS WELL AS PARAFALCINE AND TENTORIAL SUBDURAL COLLECTIONS. THERE IS SUBARACHNOID BLOOD IN THE BASAL CISTERNS AND THE CSF SPACES ARE GENERALLY SOMEWHAT SMALL.

CT OF THE ABDOMEN AND PELVIS
11/22/99

CLINICAL HISTORY: Motor vehicle trauma.

Following administration of oral contrast and a total of 150 cc of IV contrast, 7 mm spiral images were obtained from just above the diaphragm to the symphysis pubis.

ABDOMEN: Images through the lower thorax reveal small bilateral lower lobe consolidations consistent with mild atelectasis. There is no evidence of pneumothorax on these images. The liver is normal in size demonstrating diffusely decreased density compared to the spleen, consistent with widespread fatty infiltration. There is no evidence of injury or focal lesion. The gallbladder is mildly distended. There is diffuse fullness throughout the pancreas which however is normal in contour and there is no evidence of reactive changes within the adjacent fat. The spleen is normal. Both kidneys demonstrate normal contours and function with the right kidney containing well circumscribed fluid density lesions, with the largest measuring approximately 2.5 cm at its greatest diameter. No evidence of intraperitoneal fluid collections is identified to suggest presence of hemoperitoneum.

PELVIS: The bladder contains a Foley catheter and is mildly distended. No evidence of dependent fluid is identified to suggest the presence of hemoperitoneum.

CLINICAL HISTORY: 39-year-old male follow up for multiple intracranial abnormalities.

KNEECE, RICKY
CT HEAD WITHOUT CONTRAST
11/23/99

TECHNIQUE:

Serial CT scans were obtained through the head without contrast enhancement.

FINDINGS:

Expected further evolutionary changes have occurred in the right frontal pole patchy contusion/hematoma subjacent to the right frontal skull fracture. Diffuse cerebral edema is unchanged. Subarachnoid hemorrhage is redemonstrated over the tentorium and in the interhemispheric fissure. Again there is probable left tentorial subdural hematoma which is unchanged. The very high right posterior frontal-focal epidural hematoma is stable. The very thin bilateral convexity subdural hematomas are stable. The punctate left posterior frontal parasagittal contusion is no longer visible. No new areas of contusion or hematoma are seen. Multiple facial skull base and calvarial fractures and abnormalities have been detailed on the CT of the facial bones of 11/23/99.

RE: Ricky Kneece Claim: L16755 TM CRA SC

To Whom It May Concern:

Ricky Kneece is a patient who presented with a history of being hit by a motor grader tire one and one half weeks ago with severe facial injuries, skull and cheek fractures. Patient has had multiple surgeries.

On my exam, patient has 20/20 vision in both eyes. He did have full range of motion of extraocular motilities. There were no pupil abnormalities and no diplopia. Slit lamp exam showed 2-3+ papillary reaction. Cornea was clear. Anterior chamber was deep and quiet and lens was normal in good position with no dynesis. Cup/disc was .4. Macula and peripheral retina were all normal.

Patient was felt to have a viral conjunctivitis and was placed on Ocuflox. He had multiple facial contusions but ocularly was doing well.

Very truly yours,

H. L. Milne, M.D.

CHIEF COMPLAINT: Recurrent dislocations of his left shoulder

PRESENT ILLNESS: This is a very pleasant, right hand dominant 41 year old gentleman who apparently has had multiple dislocations to his left shoulder, since he injured his shoulder and back during a climbing accident approximately ten years ago. He extended his left arm to try to break is fall, and dislocated his shoulder at that time. He had three or four yearly dislocations of his shoulder up unto November of 1999, when he was involved in another accident when a lock ring blew off of a tire and he re-dislocated his shoulder again. Since that time, he has been dislocating his shoulder an average of 10-15 times a year. Most recently, this occurred four weeks ago. He was kindly sent by one of our nurses, JoAnn Adkins, to my office for treatment of the same. He is right hand dominant.

PAST HISTORY:
Allergies: None
Medications: None
Surgeries: Hernia repair x3, appendectomy
Illnesses: Asthma, chronic bronchitis, gout

SOCIAL HISTORY: He has two children, does not live alone, and is on no special diet. He does not smoke and uses alcohol socially. He is employed as a farmer.

FAMILY HISTORY: Positive for high blood pressure, cancer, arthritis
FAMILY PHYSICIAN: Dr. Carl White

REVIEW OF SYSTEMS:

Present Weight: 205 lbs. Present Height: 5'10"

Neurological: Frequent headaches, loss of balance
Hematologic: Non-contributory

PHYSICAL EXAMINATION: Physical examination is limited to the patient's left upper extremity. Clinically, he is a well

293

developed gentleman who has full ROM of his glenohumeral joint. He has no tenderness directly on palpation of the rotator cuff, AC joint, the tuberosities of the humerus. When he is examined supine, he has gross instability along the anterior aspect of the shoulder with a positive apprehension sign. I can actually sublux the shoulder anteriorly and feel a click or pop. He has no posterior or inferior instability.

RADIOGRAPHS: PA internal and external rotation views do show a mild Hill-Sachs lesion along the anterolateral aspect of the humerus. The axillary lateral view shows that the humeral head is actually subluxed anteriorly 50% off of the rim of the glenoid.

DIAGNOSIS: ANTERIOR INSTABILITY OF THE SHOULDER

DISPOSITION & RECOMMENDATIONS: This patient is going to require an arthroscopic Bankart repair. Because of this, I am going to refer him over to see Dr. O'Leary or Dr. Green. He is otherwise discharged from the office.

MEDICATIONS PRESCRIBED: None

RETURN APPOINTMENT: See Dr. Green or Dr. O'Leary in the near future.

IN RE: Ricky D. Kneece

I am of the opinion that to a reasonable degree of medical certainty Mr. Kneece's accident of November 22, 1999, exacerbated or aggravated an existing injury to his left shoulder, and that the left shoulder surgery scheduled for December 2004 and that of November of 2001 are treatment related to his workers compensation injury of November 22, 1999.

:LINICAL STATUS: I am seeing Ricky in follow-up. He complains of pain when ie just holds his arm up in an abducted position, maybe 45-60 degrees, for iny long period of time, such as driving his tractor, because he is a farmer.

'HYSICAL EXAMINATION: He has good strength with Yergason, speed test, isolated supraspinatus, resisted internal and external rotation and Hawkins :est are all essentially negative. There is a little bit of discomfort at :elease of each of these activities.

)IAGNOSIS: STATUS POST ARTHROSCOPIC SHOULDER STABILIZATION PROCEDURE WITH :ONTINUED PAIN, LEFT SHOULDER.

'LAN: At this point, I would recommend one more MRI to look at his rotator :uff and biceps. If there is no pathology of that region, then I would go ahead and settle his case and release him. I do not have any further surgical procedures that would be of benefit to him.

:ETURN APPOINTMENT: After MRI.

Content/Process

Other themes: reported overall improvement with no change in cogntive deficits

Session Content: Reported that his condition is improved and that his major concern for us today was a change in his headached pattern. Headaches seem more common during the nighttime hours and after discussion it appears that this is because of a reduction in sleep medication - likely making him more aware of the discomfort, will discuss further with Dr. Deal. Otherwise, I heard more acceptance, less frustration with cognitive impairments that are likely permanent.

To Whom It May Concern:

Thanks very much for asking Post Trauma Resources to treat Mr. Ricky Kneece after he was injured at work.

It is our opinion that Mr. Kneece has reached maximum medical improvement for psychological symptoms that developed. Although he is improved, he continues to report symptoms dysphoria, difficulties adjusting to his cognitive disability, irritability and withdrawal. He also continues to report symptoms consistent with a head injury.

Based on the AMA guidelines and using the Epstein et al (1998) method for determining psychiatric impairment, Dr Roger Deal, psychiatrist, and I are of opinion that Mr. Kneece has experienced an eleven-percent whole person, permanent impairment. This is our opinion only concerning his psychological status, not his cognitive impairments. In order to maintain his current status, Mr. Kneece will require the use of psychotropic medication and medication management as long as he is experiencing chronic pain and cognitive difficulties.

Thanks again for allowing us to work with Mr. Kneece and feel free to contact us if we can be of any assistance.

Sincerely,

Content/Process

Session Content: He reports headaches are still a major problem for him, not responding to the medicines he was given so he is going to speak to Dr. Shissias again to pursue further treatment. He has many stressors but tells me he is not letting these bother him, though it is difficult to see how the injury of his son, the strain on his wife with both of them having head injury, conflicts with a neighbor, worries about his sister and a few other negative situations would not be putting more stress on him. I have no clear sense of whether the headaches are related to this but when we initially gave him the effexor it did have a positive effect on the headaches.

Interventions

1) z - review target symptom list
2) z - review of recent stressors
3) z - educate regarding risks and benefits of medication

Response to Interventions: Sleep is generally improved as is control of anxiety. He seems pressured and irritable to me.

Medications

Medication: Effexor 150mg. bid Start Date: 2/8/2006

Medication: Trazadone 100 mg. hs Start Date: 1/17/2006

Medication Plan: No change in the medicines. He will contact Dr. Shissias about followup for the headaches.

Content/Process

Session Content: He remains under intense interpersonal stress, worried about his family and his own health problems. He is not doing as well since he went up on the dose of topamax so went down to the prior level where he found it was helpful with the headaches and gave him no daytime sedation. He tells me his wife says he "fights" in his sleep and he is not satisfied with the CPAP machine setting so is going to have this reevaluated.

He feels the medicines we are using remain helpful and he has no side effects from any of them.

He reports some success managing some of the equipment he had problems with before so is still working to improve his memory and usefulness in his business.

Interventions

1) z - review target symptom list
2) z - review of recent stressors
3) z - educate regarding risks and benefits of medication

Response to Interventions: Remains very symptomatic but is functioning better in some areas.

ORDERING DR: CARL A WHITE MD

REPORT STATUS: Signed

ORDERED BY: CARL A WHITE MD
LOCATION: REG CLI IMRI
STUDY TYPE: 0920-0002 IMRI/MRI BRAIN W&WO CONTRAST

DATE OF EXAM: 09/20/07

CLINICAL DATA: 47M, HYPOTHYROIDISM, POST TRAUMA

MRI OF THE BRAIN WITHOUT AND WITH ENHANCEMENT:

COMPARISON: None.

TECHNIQUE: Sagittal inversion recovery, axial FLAIR, axial diffusion and axial T1 weighted sequences were obtained. An axial gradient sequence was performed. Post Gadolinium enhancement (20 cc. of MultiHance) axial and coronal T1 weighted sequences were obtained.

There is a 32 X 32 X 43 mm area of increased signal in the right frontal lobe involving both the gray and white matter on the T2 weighted sequences. This area is low in signal on the T1 weighted sequence. The appearance is compatible with encephalomalacia. There is a linear area of decreased signal involving the frontal bone anterior to this process suggesting an old skull fracture. This would suggest that this area of encephalomalacia is related to previous trauma. On the gradient sequence, there is some low signal in the inferior aspect of this process compatible with hemosiderin which would not be unexpected with trauma to this location as well. No other significant areas of abnormal signal, mass effect or abnormal enhancement are seen. On the coronal post contrast images, the pituitary gland is unremarkable. The pituitary is unremarkable in appearance on the sagittal inversion recovery sequence.

READING: 32 X 32 X 43 mm. area of encephalomalacia involving the anterior right frontal lobe with findings suggesting an old fracture anterior to this. This would suggest that this represents encephalomalacia related to previous trauma. Otherwise unremarkable MRI of the brain.

TESTING (Medical Examiner completes Section 3 through 7) Name: Last, First, Middle,

3. **VISION** **Standard: At least 20/40 acuity (Snellen) in each eye with or without correction. At least 70 degrees peripheral in horizontal meridian measured in each eye. The use of corrective lenses should be noted on the Medical Examiner's Certificate.**

INSTRUCTIONS: When other than the Snellen chart is used, give test results in Snellen-comparable values. In recording distance vision, use 20 feet as normal. Report visual acuity as a ratio with 20 as numerator and the smallest type read at 20 feet as denominator. If the applicant wears corrective lenses, these should be worn while visual acuity is being tested. If the driver habitually wears contact lenses, or intends to do so while driving, sufficient evidence of good tolerance and adaptation to their use must be obvious. *Monocular drivers are not qualified.*

Numerical readings must be provided.

ACUITY	UNCORRECTED	CORRECTED	HORIZONTAL FIELD OF VISION
Right Eye	20/ 15	20/	Right Eye 180°
Left Eye	20/ 15	20/	Left Eye 180°
Both Eyes	20/ 15	20/	

Applicant can recognize and distinguish among traffic control signals and devices showing standard red, green, and amber colors ? ☒ Yes ☐ No

Applicant meets visual acuity requirement only when wearing:
☐ Corrective Lenses

Monocular Vision: ☐ Yes ☐ No

Complete next line only if vision testing is done by an opthalmologist or optometrist

Date of Examination | Name of Ophthalmologist or Optometrist (print) | Tel. No. | License No./ State of Issue | Signature

4. **HEARING** **Standard: a) Must first perceive forced whispered voice ≥ 5 ft., with or without hearing aid, or b) average hearing loss in better ear ≤ 40 dB**
☐ Check if hearing aid used for tests. ☐ Check if hearing aid required to meet standard.

INSTRUCTIONS: To convert audiometric test results from ISO to ANSI, -14 dB from ISO for 500Hz, -10dB for 1,000 Hz, -8:5 dB for 2000 Hz. To average, add the readings for 3 frequencies tested and divide by 3.

Numerical readings must be recorded.

	Right ear	Left Ear
a) Record distance from individual at which forced whispered voice can first be heard.	10 - 12 Feet	10 - 12 Feet

b) If audiometer is used, record hearing loss in decibels, (acc. to ANSI Z24.5-1951)	Right Ear			Left Ear

5. **BLOOD PRESSURE/PULSE RATE** **Numerical readings must be recorded. Medical Examiner should take at least two readings to confirm BP.**

Blood Pressure	Systolic	Diastolic
	130	80

Driver qualified if ≤140/90.

Pulse Rate: ☒ Regular ☐ Irregular

Record Pulse Rate: 70

Reading	Category	Expiration Date	Recertification
140-159/90-99	Stage 1	1 year	1 year if ≤140/90. One-time certificate for 3 months if 141-159/91-99.
160-179/100-109	Stage 2	One-time certificate for 3 months.	1 year from date of exam if ≤140/90
≥180/110	Stage 3	6 months from date of exam if ≤140/90	6 months if ≤ 140/90

6. **LABORATORY AND OTHER TEST FINDINGS** **Numerical readings must be recorded.**

URINE SPECIMEN	SP. GR.	PROTEIN	BLOOD	SUGAR
	1.025	negative	negative	negative

Urinalysis is required. Protein, blood or sugar in the urine may be an indication for further testing to rule out any underlying medical problem.

7. PHYSICAL EXAMINATION | Height: 5' 11" (in.) Weight: 227 (lbs.) | Name: Last, Kneece First, Ricky Middle, D

The presence of a certain condition may not necessarily disqualify a driver, particularly if the condition is controlled adequately, is not likely to worsen or is readily amenable to treatment. Even if a condition does not disqualify a driver, the medical examiner may consider deferring the driver temporarily. Also, the driver should be advised to take the necessary steps to correct the condition as soon as possible particularly if the condition, if neglected, could result in more serious illness that might affect driving.

Check YES if there are any abnormalities. Check NO if the body system is normal. Discuss any YES answers in detail in the space below, and indicate whether it would affect the driver's ability to operate a commercial motor vehicle safely. Enter applicable item number before each comment. If organic disease is present, note that it has been compensated for. See *Instructions to the Medical Examiner* for guidance.

CONSULTATION

D. Ricky Kneece is a 48-year-old man who sustained probably a mild to moderate head injury with a contusion is his right frontal lobe when a tire exploded 8 or 9 years ago. He claims he was amnestic for weeks. He was in the hospital for a few days. Since that time, he has had psychiatric problems, depression, continued anger, et cetera and daily headaches. He has tried a multitude of medication. As far as I can tell, he has been on no specific therapy for migraines. He has had no seizures. He has had temper tantrums that he claims he never had before.

This is a Workers' Compensation case. His examination is absolutely normal. I did not do any extensive psychological testing, but he answered all of my questions readily and was oriented. He had normal language function and was able to recite details of his disease in correct sequence although he and his claim that he has some deficits for remembering things that he used to do on his farm for he continues to be a farmer and drive a tractor, et cetera.

We will try him on Tenormin 50-100 mg at bedtime to see if a beta-blocker might help his headaches and I have given him samples of Amerge and Maxalt as a therapeutic trial. We will see him again in a week or two and do an EEG.

PROGRESS NOTE

Delano "Ricky" Kneece had a normal EEG. He claims Tenormin made him sleepy, but it might have reduced his headache intensity some, but not the frequency. The samples I gave him of Maxalt, et cetera did not help. I have reassured him that his EEG is normal. I do not think he has any serious problem of an organic nature wrong with him. Hopefully he will do better

CHIEF COMPLAINT: Here for CPE, follow-up of hypertension.

HISTORY OF THE PRESENT ILLNESS: Patient comes in for a CPE. Reports he has been doing okay, has not had any major difficulties since last time. In regards to his hypertension, he maintains on lisinopril without any side effects from it. He feels well with it and is doing okay. For testosterone deficiency, he continues on the Androgel and has some difficulty remembering it. He reports that he really has not noticed much improvement since starting it but has noticed the most improvement since changing from the Synthroid to Armour Thyroid. He does have central hypothyroidism from a previous traumatic brain injury and feels like his energy level is slightly better. He continues to have some difficulties in the morning when he first gets up and having some sluggishness but this does not seem as bad since starting the Armour. He maintains on the CPAP for obstructive sleep apnea and does okay with it. He reports he does not sleep as well once he is on CPAP machine. He feels well otherwise, has not had any major changes in his own health. Since last time, his son, who is working with camels out in Myrtle Beach, had a significant injury, broke a leg and then suffered a hemorrhagic stroke and is still having difficulties with this, as well as neuropathic pain afterwards.

PAST MEDICAL HISTORY: Significant for gout, traumatic brain injury with frontal lobe injury, depression, nephrolithiasis in 2008.

SURGICAL HISTORY: Left shoulder surgery x2. Left elbow and left knee x2. Appendectomy. Right inguinal hernia x2. Left inguinal hernia repair.

HEALTH MAINTENANCE: Pneumovax given in 2000. Last tetanus vaccine around 2004. PSA August 2009 was 0.5.

FAMILY HISTORY: As above, otherwise unchanged.

SOCIAL HISTORY: Married. Wife recently had to leave her job so that she could help transport their son back and forth and reports that he is thinking about coming home. He is currently trying to get in his wheat crop and just finished getting in his cotton crop.

DRUG ALLERGIES: None known.

CURRENT MEDICATIONS: Lisinopril 20 mg daily; Effexor-XR 150 mg b.i.d.; Trazodone 100 mg 2 p.o. every h.s.; CoQ10 daily; Mobic p.r.n.; Armour 60 mg p.o. daily; Singulair 10 mg p.o. daily during peak seasons of spring and fall; Androgel 5 mg daily; Cetirizine 10 mg p.o. every h.s.; Vitamin C 1000 mg p.o. daily and Vitamin D3, 2000 international units daily, both of these during the wintertime only.

REVIEW OF SYSTEMS: As per HPI. Reports he occasionally has some difficulties with repeat urination at night where he feels like he has to go back again shortly after his first emptying. No major problems with starting or stopping otherwise, reports the only time he has this is usually at night and it is not an everyday concern. Remaining ROS as per HPI. Also positive for some continued shoulder and knee pain but chronic and unchanging. Otherwise ROS negative based on 10-points.

PHYSICAL EXAMINATION

VITAL SIGNS: Blood pressure 110/70, heart rate 95, saturation 95% on room air, weight 224 (down 8 pounds).

GENERAL: Resting, no apparent distress.

HEENT: Normocephalic, atraumatic. Pupils equal, round, reactive to light. Sclerae anicteric. Nares patent. Nasal mucosa clear. TMs and canals clear bilaterally. Oropharynx clear, mucous membranes moist.

NECK: Supple. Full range of motion.

CARDIOVASCULAR: S1, S2. Regular without any murmurs, rubs, gallops. No clubbing, cyanosis, or edema.

LUNGS: Clear to auscultation bilaterally. No wheezes, rales, or rhonchi.

ABDOMEN: Bowel sounds present. Soft, nontender, nondistended.

NEUROLOGIC: Alert, appropriate. Nonfocal. Deep tendon reflexes 2+ in bilateral brachial, radial, patellar, and Achilles. Strength 5/5 throughout.

MUSCULOSKELETAL: Grossly intact.

SKIN: Benign appearing nevi on back. No worrisome lesions.

LYMPH: Without cervical or supraclavicular lymphadenopathy.

RECTAL: Normal tone. Prostate slightly enlarged but no nodularity or other abnormalities appreciated to it.

ASSESSMENT AND PLAN

1. HYPERTENSION. Continue lisinopril at current dosing; doing well with this without any major difficulties with side effects.
2. CENTRAL HYPOTHYROIDISM. He does seem to be doing better with Armour Thyroid. Continue this; last TSH and Free T4 were excellent.
3. TESTOSTERONE DEFICIENCY. Given the difficulties remembering the Androgel, discussed possibly switching to Depo-Testosterone but for now he would like to stick with the Androgel and see how he does with it on a more consistent basis.
4. IMPAIRED FASTING GLUCOSE. Glucose mildly elevated to 132 on work-up laboratories. Reports usually in the 100-104 range when his wife checks them at home. Today, check finger-stick blood sugar. If remains borderline elevated go ahead and start Metformin and plan on repeating this in the next several months.
5. HEALTH MAINTENANCE. Up to date on usual age-appropriate screenings and vaccinations. Return in 4-6 months, sooner if any acute issues arise.

CHIEF COMPLAINT: Concerns about headaches, vasomotor rhinitis.

HISTORY OF THE PRESENT ILLNESS: Patient presents for follow-up. He has been having worsening headaches recently. He called his neurologist Dr. Shissias and he tried him on a wash out program x10 days then placed him on Relafen with an on cycle and off cycle. Headaches have not improved any. He spoke with him yesterday and he was going to call in what sounds like either Topamax or gabapentin but has not had it done yet. He has been going through some personal issues with his mother-in-law but patient is waiting on him at this point. He does note that he has been having increasing appetite recently and has been having difficulties with this. He has not gained any weight but has been relatively stable. His other concern is with runny nose. He has it every time he eats and he has been having this for a long period of time. He has previously been on Flonase in the past for his allergies and he notes that this did help him during this time. He continues on Singulair and generic cetirizine.

PAST MEDICAL HISTORY/ALLERGIES/MEDICATIONS: Reviewed and unchanged.

REVIEW OF SYSTEMS: As per HPI. Denies any chest pain, palpitations, dyspnea, dyspnea on exertion.

VITAL SIGNS: Blood pressure 110/68, heart rate 84, O2 SAT 96%, weight 222.
GENERAL: Resting, no apparent distress.
HEENT: Normocephalic, atraumatic. Pupils equal. Sclerae anicteric.
CARDIOVASCULAR: S1, S2/regular.
LUNGS: Clear to auscultation bilaterally. No wheezes, rales or rhonchi.

ASSESSMENT/PLAN
1. IMPAIRED FASTING GLUCOSE. Check A1C. Continue Metformin as previously prescribed.
2. VASOMOTOR RHINITIS. Add fluticasone nasal spray to regimen to see if this helps cut down on his symptoms. Otherwise return for physical exam in 4 - 5 months or sooner if any acute issues arise.

REFERRAL INSTRUCTIONS

Mr. Kneece's file was referred for a Vocational Evaluation for a determination as to whether or not, as a result of his injury, he had also sustained any permanent functional impairment and limitations that would impact his capacity to perform and sustain work and earn income.

EVALUATION METHODOLOGY

1. An in-depth review of the file was conducted to obtain relevant background information with regard to Mr. Kneece's age, education, past relevant employment experience and current work/life status. An in person interview with Mr. and Mrs. Kneece was requested, however, this was denied by plaintiff's counsel Mr. Scott Elliott, Esq. The documents reviewed were: Memorandum from Mark Cauthen; Tax Returns – 1999 – 2009; Deposition of Lawrence H. Bergmann, Ph.D (April 26, 2007); Deposition of Ricky Kneece (September 23, 2010); Deposition of Roxanne Kneece (September 29, 2010) ; Oral Deposition of Ricky Kneece (December 17, 2044); SC Worker's Compensation Commission – Employer's Answer to Request for Hearing; Index for Medical Records including Palmetto Richland Memorial Hospital (11/22/99 - 11/27/99), Dr. Jean- Francois Lefaivre (11/22/99 – 12/22/99), Palmetto Neurosurgery & Spine – Dr. Lenwood Smith (11/27/99 –09/30/01), Dr. Fank Voss (12/01/99 – 07/26/00), The Eye Center – Dr. Rick Milne (12/03/99 – 02/29/00), Internal Medical Associates (04/13/00 – 04/23/10), Psychological Service Associates – Dr. Linda Moore (07/03/00 – 08/21/00), Moore Orthopaedic Clinic – Dr. Bradley Presnel (01/09/01),

2. The employment history was researched using standard vocational reference materials that are detailed in the **Resources and References** section at the end of this narrative. This employed the *McCroskey Vocational Quotient System 2009* (**McCroskey Transferable Skills Program**) and the *MVQS Volcano 9.0 Critical Variables (CV) Vocational Analysis Incorporating the MVQS Rehabilitation Economist and the MVQS Handbook for Analyzing Jobs-Revised.*, which utilizes the most advanced research on the **VDARE Process** (McCroskey, Wattenbarger, Field & Sink, 1977), which applies job analysis information published by the U.S. Department of Labor (DOL) in the *Dictionary of Occupational Titles* (DOT), Revised 4th Edition, 1991, and the new *O*Net Dictionary of Occupational Titles*, 1998, to determine modal ability levels associated with the jobs Mr. Kneece successfully performed.

EDUCATION

Mr. Kneece graduated from Pelion High School, in Pelion, South Carolina in the year 1978. He has had no formal training beyond high school except for training on John Deere tractors.

MILITARY SERVICE

Mr. Kneece reported having no military service.

FAMILY/SOCIAL

Mr. Kneece resides at 204 Delano Kneece Road, Pelion, SC. He is employed by Kneece Farms in Gilbert, SC. He is an owner/operator of the farm along with his father and two sons. Mr. Kneece is married and has two sons, J.D. and Kain. He resides with his wife Roxanne and one son.

The tax information was reviewed. Not all of the W-2's were provided so it was difficult to separate out what was Mr. Kneece's income. The W-2's that were provided documented that Mr. Kneece had his individual income increase from the years 2001 until 2005. The family income had also increased from 1999.

Tax Year (Married Filing Joint)	Total Joint Income Reported on Line 7 (1040)	Mr. Kneece Individual Income (based on W-2's, if provided)	Mrs. Kneece Individual Income (based on W-2's, if provided)

MEDICAL INFORMATION

The medical file was reviewed. The medical data will not be reiterated in detail in this section since the medical records are well documented. The pertinent medical information that was significant from a vocational standpoint was the neuropsychological evaluations by Dr. Waid and Dr. Brawley. These were important due to the head injury that Mr. Kneece sustained. Mr. Kneece tested with a Full Scale IQ of 76. When compared to testing that Dr. Waid completed, Dr. Brawley noted a decline in a couple of areas such as simple manual speed and Trails A. She felt that this may be due to the presence of

continued psychiatric distress. His other areas of functioning are consistent as noted by Dr. Brawley. Dr. Brawley described Mr. Kneece has having a mild residual brain dysfunction as a result of his accident.

Mr. Kneece noted that he has had three hernias and appendicitis as prior medical history.

Mr. Kneece is currently taking several medications to include Trazodone, Valium oxycarbazepine, and Effexor. He still reported having headaches, increased irritability feeling of depression, feelings of anxiety, decreased frustration tolerance and decreased libido.

EMPLOYMENT EXPERIENCE

Mr. Kneece is employed by Kneece Farms. He is part owner of this farm. He described his job duties as that of a farmer. The farm grows corn, cotton and peanuts. He also sharecrops on his uncle's property. Once the crops are in, winter maintenance is performed on equipment and irrigation systems. Mr. Kneece reported that the majority of his job duties consist of driving a tractor. Farming has been Mr. Kneece's profession all of his life. Mr. Kneece has described that he has modified some of his job duties since his injury such as climbing and elevator leg or climbing on irrigations. He also added that he does not mix chemicals any longer or calibrate the equipment. He stated that if lifting is an issue he will have someone else help him.

Mrs. Kneece is also employed by Kneece Farms as a bookkeeper. Mr. Kneece stated that his wife began to work other employment as well for the health insurance.

ANALYSIS OF THE EMPLOYMENT EXPERIENCE

The jobs Mr. Kneece successfully performed were researched in the Dictionary of Occupational Titles, The Classification of Jobs, The Encyclopedia of Job Requirements, and The Revised Handbook for Analyzing Jobs. Reference to these job titles is important, as they have known capacity statements attached to them, which represent modal ability levels associated with these jobs that are partial indicators of Mr. Kneece's pre-disability work capacities.

D.O.T. NO.	D.O.T. TITLE	VQ	SKILL	EXERTIONAL LEVEL
404161010	Farmer, Field Crop	121	Skilled	Medium
421683010	Farmworker, General I	104	Semi-Skilled	Heavy
906683014	Liquid-Fertilizer Servicer	100	Semi-Skilled	Medium
929683014	Tractor Operator	103	Semi-Skilled	Medium

In general, these jobs have middle average to very low levels for the academic abilities of (R) Reasoning, (M) Mathematics and (L) Language. They contain high middle average to below middle average for (S) Spatial Perception; (P) Form Perception; (F) Finger Dexterity; (M) Manual Dexterity; (Q) Clerical; (K) Motor Speed and Coordination; and E) Eye-Hand-Foot Coordination and (C) Color Discrimination.

These jobs are rated in the average range in terms of difficulty on the **McCroskey Vocational Quotient Scale**, a standardized, empirically derived index of vocational difficulty that considers all of the mental and physical capacity worker trait factors to determine an overall level of job difficulty. This index ranges from a low of about 72.00 to a high of 154.00. The VQ distribution for all jobs in the DOT has been transformed (McCroskey, 1992) to a Mean of 100.00 and a Standard Deviation (SD) of 15.00. In general, the higher the VQ, the more difficult and rewarding the job. Jobs with VQ's falling roughly between 85.00 and 115.00 fall within the "average range" of overall difficulty. The occupations that Mr. Kneece has successfully performed in general require Heavy and Medium physical demands, using the U. S. Department of Labor's 5-point rating scale: Sedentary, Light, Medium, Heavy and Very Heavy.

ANALYSIS OF EMPLOYABILITY

Employability, technically and specifically defined, is a status that "exists if a person possesses skills, abilities and traits necessary to perform a job."[1] McCroskey asserts that employability theoretically exists when "worker capacity equals or exceeds the demands of a job."[2] Employability is a measure of individual capacity measured against the demands of jobs. The ability to actually be placed in a paying job is referred to as "placeability." Field indicates that placeability exists when "economic conditions and employer attitudes are such that a person can actually be placed in a job; the difficulty of placing a person with a disability in a job."[3]

Mr. Kneece has worked his current job since before he was a teenager. He continues to work his job driving a tractor. He has had to modify some of his job duties since his injury. He expressed frustration because he is aware that he can not perform all of the duties that he has done in the past. He is fortunate to have excellent family support and the opportunity to continue to work and earn income.

ANALYSIS OF EARNING CAPACITY

The power to earn income is a function of the capacity to perform and sustain work activity. The capacity to perform and sustain work is predicated upon individual physical and mental capacities, which are measurable and expressed in terms of worker trait

functional levels by the U.S. Department of Labor. This analysis was done in accordance with this quantitative system.

Mr. Kneece has never lost income in his profession since his injury.

SUMMARY

Mr. Kneece has permanent physical and cognitive functional impairments as a result of the November 22, 1999 industrial accident. These impairments have slightly lower his vocational capacity to the extent that he would not have the residual functional capacities necessary to perform a range of the jobs requiring physical exertion beyond medium level of physical work. He has been able to modify his job duties so that he continues to work.

Mr. Kneece has demonstrated a steady employment history up until his accident. He made a remarkable recovery and returned to work within a short period of time. He has also demonstrated the ability to work modified duties with his employer after his accident.

Mr. Kneece sustained serious injuries when the tire of a motor grader exploded while he was in the process of changing the tire. Despite his serious injuries Mr. Kneece has continued to work on his family farm and earn income. His income has increased since the date of injury as documented by the tax records reviewed from 1999 to 2009. His job duties have been modified in a manner that provides him the opportunity to continue to work and earn income.

It is my professional opinion, that Mr. Kneece does possess skills to be considered employable based on his physical and neuropsychological limitations. His impairments and the functional limitations that have resulted from the injury, to a reasonable degree of vocational certainly, have not diminished his ability to earn income.

This opinion is based on the information provided. I will review my opinion and provide a supplemental report if new evidence is discovered that would affect this Vocational Evaluation.

RE: Ricky Kneece Evaluation

Dear Mr. Cauthen,

Per your request, I performed an extended clinical interview and neuropsychological evaluation on the above captioned patient on January 28, 2011. Mr. Kneece was originally scheduled for evaluation January 4, 2011 but did not present for this evaluation.

I would like to provide you with a summary of my findings from the 1/29/11 evaluation. As part of this evaluation I reviewed medical records to include the neuropsychological reports of Randy Waid, Ph.D. Dr. Waid also provided me with the raw data from his evaluations.

As you know, Mr. Kneece is a 50 year-old, right handed male who was involved in an accident while working on November 22, 1999. The details of his accident and injuries have been well detailed in prior records and will not be repeated in this report. He did sustain a significant brain injury from this accident to include findings on CT scan of edema, hemorrhage and contusion. Mr. Kneece is currently reporting residual cognitive and emotional changes as a result of this accident. His wife confirms these continuing difficulties. Mr. Kneece has made remarkable recovery from the accident and has been able to return to work at the family farm. They note however, that they have had to employ compensatory measures (automation, simplifying procedures, etc.) in order for him to be able to adequately function in the work setting. His wife reports that despite these measures he does continue to make some mistakes. Mr. Kneece also has a very strong support system of family friends which has also aided his functionality.

Behaviorally, Mr. Kneece exhibited tearfulness on a couple of occasions during the interview. He was also tangential when answering some of the interview questions.

Mr. Kneece reports vegetative symptoms including never feeling rested in the mornings, weight gain of 25 pounds, decreased energy level, loss of interest in hunting and fishing, feelings of depression, feelings of anxiety, increased irritability, decreased frustration tolerance and decreased libido.

Mr. Kneece was born in Columbia, SC. He was the youngest of three children and reports his childhood as being "good". He completed high school reporting to have been an average student. He has been married for 27 years and has two grown sons. He reports to have worked at the family farm his entire life.

He is currently on several medications to include Trazodone, Valium oxycarbazepine, and Effexor.

Formal IQ testing was not performed as this had previously been conducted by Dr. Waid. On Dr. Waid's 2002 evaluation, Mr. Kneece obtained a Full Scale IQ of 76 (Verbal IQ 81, Performance IQ 75). This was consistent with his estimated premorbid functioning from the WTAR also administered by Dr. Waid. The estimated premorbid scores were Full Scale IQ 76 (Verbal IQ 75, Performance IQ 80).

357

When the current results are compared to Dr. Waid's previous evaluations it was noted that there has been decline in a couple of areas such as simple manual speed and Trails A. It is believed that this may be due to the presence of continued psychiatric distress. Other areas of functioning are consistent.

Mr. Kneece continues to suffer from several vegetative symptoms, chronic pain and stressors. He is also on multiple medications. It is not believed that he is at MMI with regards to his vegetative symptoms and the current efficacy of his medications should be assessed.

In summary, when premorbid functioning is taken into consideration, Mr. Kneece does appear to be experiencing mild residual brain dysfunction as a result of his accident. He is also experiencing personality/psychological residual symptoms and would benefit from additional treatment for these. As Dr. Waid notes, Mr. Kneece has made good recovery from his brain injury and is able to continue to work on the family farm. This has been facilitated by his excellent support system and the use of compensatory strategies.

Thank you for allowing me to participate in the evaluation of this patient. Please do not hesitate to contact me should you have further questions.

Sincerely,

Tora Brawley, Ph.D.

Who Must File Schedule SE

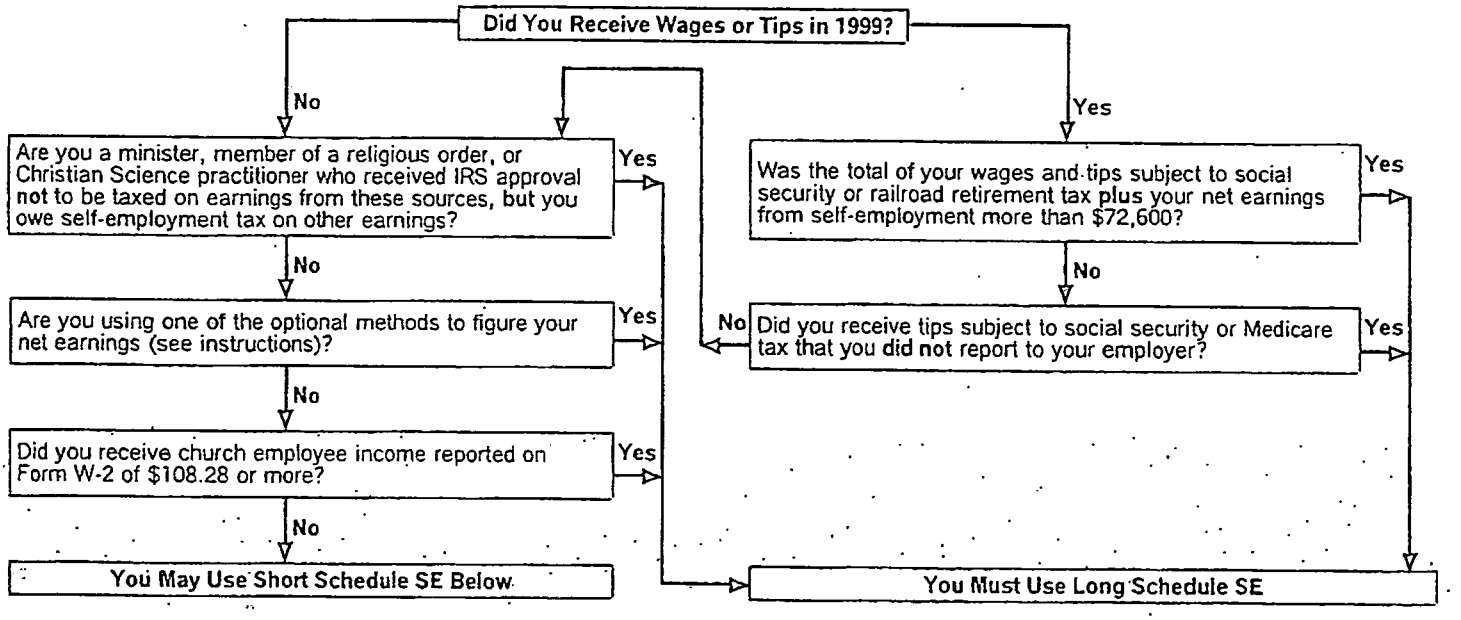
You must file Schedule SE if:

- You had net earnings from self-employment from **other than** church employee income (line 4 of Short Schedule SE or line 4c of Long Schedule SE) of $400 or more, **Or**
- You had church employee income of $108.28 or more. Income from services you performed as a minister or a member of a religious order **is not** church employee income. See instructions.

Note: *Even if you had a loss or a small amount of income from self-employment, it may be to your benefit to file Schedule SE and use either 'optional method' in Part II of Long Schedule SE. See instructions.*

Exception: If your only self-employment income was from earnings as a minister, member of a religious order, or Christian Science practitioner, **and** you filed Form 4361 and received IRS approval not to be taxed on those earnings, **do not** file Schedule SE. Instead, write 'Exempt – Form 4361' on Form 1040, line 50.

May I Use Short Schedule SE or Must I Use Long Schedule SE?



Section A – Short Schedule SE. Caution: *Read above to see if you can use Short Schedule SE.*

Our File No.: 5400-0032

Dear Scott:

This letter is to advise you that an appointment for neuropsychological evaluation has been scheduled for your client, Ricky Kneece, for January 4, 2011 at 9:15 a.m. with Dr. Tora Brawley of University Specialty Clinics, Department of Neuropsychiatry and Behavioral Science. Dr. Brawley's office is located at 15 Medical Park, Suite 141 in Columbia, South Carolina. Please advise your client that testing with Dr. Brawley will begin promptly at 9:30 a.m. and to plan on staying until approximately 2:00 p.m.

Please note that if your client "no shows or cancels" this appointment, there will be a charge of "$250.00" for the missed appointment. Enclosed is a letter from Dr. Brawley's office concerning the appointment.

If you should have any questions regarding this appointment, please let me know.

Very truly yours,

Mark D. Cauthen

RE: Ricky Kneece

Dear Mr. Cauthen:

The above referenced client's appointment for neuropsychological testing with Dr. Tora Brawley is scheduled for **January 4, 2011** at **9:15 a.m.** Testing with Dr. Brawley starts promptly at **9:30 a.m.** and requires four to five hours. Therefore, the client should be prepared to stay until approximately 2:00 p.m. If the client has not arrived and been checked in by 9:30 a.m., they will be considered a no show and the appointment will have to be rescheduled.

If the client is unable to keep the appointment, please allow a 48-hour notice to avoid a fee of $250.00. If the client is a no show or cancels in less than 48 hours on the first scheduled appointment, there will be a charge of $250.00. If the client is a no show or cancels in less than 48 hours on other scheduled appointments, there will be a charge of $1700.00 for each visit. Attached, please find a list of Dr. Brawley's charges. *As the attorney arranging this appointment, you are accepting full responsibility for payment to our office.*

If the client utilizes glasses or hearing aids, please have him/her bring them to the appointment.

We are located at the Department of Neuropsychiatry and Behavioral Sciences at 15 Medical Park, Suite 141, Columbia, SC 29203 or 3555 Harden Street Ext., Suite 141, Columbia, SC 29203. Please do not hesitate to contact me at (803) 434-4229, if you have questions or need further information.

Thank you for choosing Dr. Brawley and the University Specialty Clinics.

Sincerely,

Thank you for Dr. Brawley's resume. I have had a chance to review her resume and check her references. However, I have put a call into her to speak to her and have not heard back from her. Nor have I heard from her assistant to determine Dr. Brawley's availability later in the month. I will need to talk with Dr. Brawley before I am able to recommend to my clients that we meet with her but I don't want to run afoul of her cancellation policy.

I have talked with Mrs. Grimley and am checking her references. I will get back to you in the next several business days. In any event let's put off that Dr. Brawley interview. Thanks.

PS
I found the main number to Dr. Brawley's practice and was advised by the answering service that their offices are closed until January 4th. Do you have a contact number to cancel the January 4th appointment?

Scott, attached is a CV for Dr. Tora Brawley. She is a neuropsychologist with the same qualifications as Randy Waid. They have been involved in lots of cases together on opposite sides. Although she is a PhD and not a physician, your client relies on the opinions of a neuropsychologist and such an expert is likely the most qualified to address the cognitive deficits from which your client allegedly suffers. I have also seen 42-15-80 applied to order evaluations of a psychologist numerous times; therefore, I fully expect the Commissioner would order the evaluation if we can't agree. I also think he would probably order your client to comply with a voc. assessment with Cindy Grimley. Since you rely on the voc assessment of Bill Stewart, that's only fair.

As far as the date for the eval w/ Dr. Brawley, that was the earliest time available and her schedule is predictably tight. It could be rescheduled, but that may require pushing the hearing back. Please let me know as soon as possible if you will agree with these evaluations. I am also awaiting an appointment date for an evaluation with a neurologist and I will let you know about this as soon as possible.
Thanks, Mark

Dear Ms. Treisch:

Please be advised that I represent Ricky Kneece. Mark Cauthen, the attorney for Mr. Kneece's employer, has scheduled an appointment for Mr. Kneece with Dr. Brawley for January 4, 2011, at 9:15 a.m. I have attempted to call your office today to discuss this appointment with Dr. Brawley and have not heard back. On behalf of Mr. Kneece, I am cancelling the January 4th meeting. Since I am cancelling more than 48 hours prior to be scheduled appointment, I trust that no late fee will apply.

Please call me upon receipt of this correspondence to discuss rescheduling. I look forward to hearing from you.

RE: Ricky Kneece Evaluation

Dear Mr. Cauthen,

As you are aware, the above captioned patient is scheduled to be evaluated in my office January 31, 2011. Due to the complexity of the evaluation, amount of materials that need to be reviewed and my schedule, the normal turn around time for reports of my findings is two weeks. This is standard for all of my evaluations. To further complicate things I will be in North Carolina from February 1- 4 for a family medical matter. Despite this, I will make sure that the report from this evaluation is completed within the two week period following the evaluation. You should have my report by February 14th.

I would like to point out that Mr. Kneece was originally scheduled for an evaluation with me on January 4, 2011 but did not attend this appointment due to attorney objections. Had Mr. Kneece attended his original appointment, you would already have received my report.

I thank you in advance for your understanding and cooperation.

Sincerely,

Dear Mr. Elliott:

I have been requested by Mark Cauthen, Esq. to perform a Vocational Assessment on your client Ricky Kneece.

I left a voice message and sent you an email previous to this letter. I have not received a response from you.

I would request that I be able to meet with Mr. Kneece and his wife within the few weeks. I provided several dates but those dates have already passed. Please contact me so that we may schedule a convenient time. I would agree to meet with him at his home or your office. It is expected that this meeting would last 2 - 4 hours, depending if testing were required.

Thank you in advance for your cooperation.

Dear Mark:

I am in receipt of your correspondence of January 21, 2011 wherein you advise that you have scheduled a neurological evaluation for Ricky Kneece with a Dr. Ben Bashinski. As I advised you in a recent email, Mr. Kneece would decline to submit to any further neurological evaluation. When we asked your client to refer Mr. Kneece to a neurologist for treatment in 2008, your client referred him to Dr. Julian Adams, who refused to treat Mr. Kneece. As you are aware, Mr. Kneece is treating with Dr. Charles Shissias, a neurologist in Beaufort, South Carolina. Mr. Kneece would be happy for you to authorize continuing treatment with Dr. Shissias. Your client certainly has had ample opportunity to assist Mr. Kneece with his treatment and has declined to do so (for instance, your client has refused to pay for the medications prescribed by Dr. Deal, the authorized treating psychiatrist). The final hearing in this matter is set for February 14, 2011. No useful purpose would be served by submitting to an evaluation by a neurologist of your choice at this time.

If you have questions, please feel free to contact me.

Sincerely,

ELLIOTT & ELLIOTT, P.A.

RE: Ricky Kneece

Dear Mr. Cauthen:

I understand that there has been a delay in obtaining Dr. Brawley's neuropsychological evaluation on Mr. Kneece. Given the fact, that Dr. Brawley will not be evaluating Mr. Kneece until January 28, 2011 and her report will follow approximately two weeks later I am requesting that I postpone my vocational evaluation until after her report is finalized. It is very important that I have this updated information especially because the injury Mr. Kneece sustained is a brain injury. It is of most importance that an updated neuropsychological evaluation be obtained so that I may consider his current functional levels as is relates to his vocational capacity.

Respectfully submitted,

Re: Ricky Kneece v. Kneece Farms
WCC File No: 9920867
Claim No.: L16755
Our File No.: 5400-0032

Dear Scott:

Please find enclosed a subpoena for copies of your client's updated federal and state tax records for 2007 to present.

I have submitted your client's prescription list from Big Discount Pharmacy to my client for reimbursement of causally related and authorized prescriptions; however, we need some additional information regarding the prescriptions. In the list you provided, most of the prescriptions beginning on page five (5) to the end of the list are designated as "paid". However, prescriptions on the first four (4) pages are not. Please advise of the status of payment of related prescriptions on the first four (4) pages and if any have been paid, provide us with documentation of the same.

As to your client's mileage reimbursement request, please provide the dates of each medical appointment with Dr. Bergman along with the round trip mileage for each visit. My client cannot reimburse mileage for multiple visits to providers which are grouped together.

Please let me know if you should have any questions regarding these matters.

Very truly yours,

Mark D. Cauthen

RE: Ricky Kneece v. Kneece Farms
WCC File No: 9920867
DOI: 11/22/99
Claim No.: L16755
Our File No.: 5400-0032

Dear Ms. Ursula:

This letter is in follow up to your conversations with my paralegal, Mary Bush, regarding prescription medications for Ricky Kneece in the above matter. As we discussed, the prescription list originally provided by your pharmacy to Mr. Kneece and/or his attorney for the fill dates from 12/2/99 to 9/3/10 has the customer price and the total price listed as the same price (total). Therefore, we would appreciate it if you could provide us with a prescription list with the amount Mr. Kneece paid (i.e. customer price, co-pay) and the actual total amount that the 3rd party insurance carriers were charged for each prescription. We will need this information in order for the workers' compensation carrier to reimburse the appropriate parties for prescriptions related to Mr. Kneeces' work injury.

Thank you for your assistance with this request and should you have any questions, please do not hesitate to contact my office.

Very truly yours,

Mark D. Cauthen

4. Whether claimant has reached MMI. Claimant is in need of further treatment. Dr. Green on 12/17/04 has stated that claimant is in need of surgery to left shoulder and that this is related to this accident. Also claimant is in need of treatment to help him cope with cognitive deficits secondary to his traumatic brain injury and for depression per the reports of Dr. Randolph Waid of MUSC dated 10/21/02 and Dr. William Stewart dated 12/31/04. Also Dr. Waid was authorized by the carrier but has not been paid.

5. Whether the carrier has acted in bad faith. On its Form 21, they rely on the report of Dr. O'Leary who performed left knee surgery on the claimant yet they have denied payment for Dr. O'Leary's treatment without explanation. Dr. O'Leary has affirmatively stated it is related yet carrier ignores this uncontradicted opinion. Likewise, carrier authorized Dr. Green in 06/02 for the left knee and then when Dr. Green opines that his left shoulder problems are related and that he needs surgery, they ignore it.

10. Michael Green, M.D. – orthopedic surgeon;
James O'Leary, M.D. – orthopedic surgeon;
Lenwood Smith, M.D. – neurosurgeon;
Randolph Waid, Ph.D. – Clinical Psychiatry - MUSC;
William Stewart, Ph.D. – Certified Vocational Evaluator
