List of Tables

(c) Indicates characteristics that are ranked by county.
(d) Indicates characteristics that are ranked by school district.

POPULATION

Table No.	Page No.
1. Median Age of Population as of April 1, 2000 (c).....	2
2. Total Population as of April 1, 2000 (c).....	3
3. Percent Change in Total Population from April 1, 1990 to April 1, 2000 (c).....	5
4. Percent of Population Classified as Minority, 2000 (c).....	7
5. Percent of Population Five to Seventeen Years Old, 2000 (c).....	9
6. Percent of Population Five to Seventeen Years Old Classified as Minority, 2000 (c).....	11
7. Percent of Population Classified as Rural, 2000 (c).....	13
8. Percent Change in Urban Population, 1990 to 2000 (c)	15
9. Percent of Families with Related Children Ages Birth to Seventeen Headed by a Single Parent, 2000 (c).....	17
10. Percent of Population Twenty-Five Years Old or Over with Less Than a Twelfth-Grade Education, 2000(c).....	19
11. Percent of Population Twenty-Five Years Old or Over with at Least a Bachelor's Degree or Equivalent, 2000 (c).....	21
12. Estimated Population as of July 1, 2000 (c).....	23
13. Percent Change in White Population from April 1, 1990, to July 1, 2000 (c).....	25

14. Percent Change in Minority Population from April 1, 1990, to July 1, 2000(c)	27
15. Percent of Population in Public or Nonpublic School Membership (K-12), 2000-01 (c).....	29
16. Percent of Registered Voters Who Voted in the Statewide General Election on November 3, 2000 (c).....	31
17. Percent of Pregnancies among Females Fourteen to Seventeen Years Old, 2000 (c)	33
18. Crime Rate in Reported Incidents per 10,000 Population, 2000 (c)	34

ECONOMICS

Table No.	Page No.
19. Median Household Income, 2000 (c).....	38
20. Percent of 2000 Families below Poverty Level in 2000 (c).....	37
21. Percent of 2000 Families with Related Children Ages Birth to Seventeen below Poverty Level in 2000 (c).....	39
22. Percent of 2000 Families with Female Householder, No Husband Present, with Related Children Ages Birth to Seventeen below Poverty Level in 2000 (c).....	41
23. Percent of State Income Tax Returns with Taxable Income of Less Than \$8,000 in 1998 (c).....	43
24. Percent of State Income Tax Returns with Taxable Income of \$8,000 to \$12,999 in 1998 (c).....	44
25. Percent of State Income Tax Returns with Taxable Income of \$13,000 to \$24,999 in 1998 (c).....	45
26. Percent of State Income Tax Returns with Taxable Income of \$25,000 and Over in 1998 (c).....	46
27. Average Weekly Salary of Workers Covered in Employment, 1998 (c)	47

28. Per Capita Personal Income, 1999 (c).....	48
29. Percent Increase in Per Capita Personal Income from 1995 to 1999(c).....	49
30. Percent of the Total Civilian Labor Force Unemployed, 1998 (c).....	51
31. Percent of Nonagricultural Wage and Salary Employment in Manufacturing, 1998 (c).....	53
32. Percent of Nonagricultural Wage and Salary Employment in Construction and Mining, 1998 (c).....	55
33. Percent of Nonagricultural Wage and Salary Employment in Transportation and Public Utilities, 1998 (c).....	57
34. Percent of Nonagricultural Wage and Salary Employment in Wholesale and Retail Trade, 1998 (c).....	59
35. Percent of Nonagricultural Wage and Salary Employment in Finance, Insurance, and Real Estate, 1998 (c).....	61

116.	Current Operating Expenditures per Pupil for Debt Service, 2000-01 (d).....	341

Using This Document

Rankings of the Counties and School Districts of South Carolina is produced to provide useful information about school districts for decision-making. Characteristics resulting from or connected with the educational process in South Carolina are presented. The 2002 edition contains one hundred sixteen tables. The information in each table is presented in two ways: alphabetically by district or county name and numerically by district or county ranking.

Sources are supplied in the section titled "References for Tables" that follows the tables. Appendix A provides additional information about revenues and expenditures.

The rank of 1 is the highest value. Depending upon the characteristic, a district or county may wish to rank high or low. High, low, or median values for the characteristics presented in the tables are not intended to measure the quality of education in any school district. Many factors must be taken into consideration when assessing the quality of education.

Statistics for Felton Laboratory School, South Carolina Department of Juvenile Justice, Palmetto Unified District, and South Carolina School for the Deaf and the Blind are excluded from all tables.

Orangeburg County school districts were consolidated after the 1996-97 school year. Figures presented for Orangeburg District Three for school years prior to 1997-98 are combined from the preconsolidated Orangeburg Districts Three and Seven; Orangeburg Four from preconsolidated Districts One, Four, and Eight; and Orangeburg Five from preconsolidated Districts Two, Five, and Six.

Due to rounding procedures, state totals presented for tables in this publication may not equal the sum of district/county figures or may not be exactly the same as listed in the source document.

Care should be taken when using the financial data in this report in conjunction with those of previous years. Several accounting changes were incorporated in the statewide accounting system during fiscal years 1987-88 and 1988-89. Also expenditure categories were reorganized to conform to InSite™.

Questions concerning differences in the accounting system should be directed to Henry Sweatman, District Auditing and Field Services, 803-734-7420. Questions concerning InSite™ should be directed to Melanie Jinnette, Office of Finance, 803-734-3805. Other questions, comments, or requests for electronic versions of this document should be directed to Dr. Vervyn L. Watson or Mr. Wayne Gunter, Office of Research, Room 1205 Rutledge Building, Columbia, South Carolina 29201, 803-734-8296.

DEF_2907-0012

REC037708

Meanings of Terms

ability index. A measure of local revenue-producing ability that is based on property values within a school district. It is calculated by dividing the fiscal capacity of the school district by the fiscal capacity of the State. See *fiscal capacity*.

academically gifted students. Those who are identified in grades one through twelve as possessing demonstrated or potential abilities for high performance in academic areas and therefore require services or programs not ordinarily provided by the regular school program.

administrative staff. Public school staff located within school districts or schools and involved in duties of managing and organizing local education programs. Administrative positions from the professional certified staff (PCS) listing are used to identify this category of staff. For the purpose of this publication, administrative positions are school principals and assistant principals; vocational center directors, assistant directors, job placement coordinators, adult program coordinators, and other administrative specialists; and district, county, and area superintendents and assistant superintendents. This staff count differs from the staff used in the computation of leadership expenditures. See *expenditures, district leadership and expenditures, school leadership*.

adult basic programs. A combination of class instruction equivalent to that found in grades one through eight and consisting of basic skill areas such as reading, writing, and mathematics. The program serves adults aged eighteen and over, unless special permission is granted by a local school board. Class instruction is provided in school districts, churches, housing projects, community centers, health care centers, workplaces, and other sites.

adult high school programs. A combination of class instruction equivalent to that found in grades nine through twelve. The program serves adults aged eighteen and over, unless special permission is granted by a local school board. Adults who are literate and can function in everyday life but are not proficient in skill areas may enroll. This includes adults seeking a high school diploma or equivalent completion through the General Educational Development (GED) examination. Classes are offered in school districts, vocational centers, churches, housing projects, community centers, health care centers, workplaces, and other sites.

Advanced Placement (AP) Program. A cooperative educational endeavor sponsored by the College Board. It serves primarily eleventh- and twelfth-grade students who wish to pursue college-level studies while still in secondary school.

assessed valuation. The value placed upon property for the purpose of taxation. The process of making the official valuation of property is under the auspices of each county assessor and in cooperation with the State Department of Revenue and Taxation. See the section 5, "Finances," for further information.

average daily attendance. The aggregate number of days for which students are in attendance divided by the number of days in the reporting period. Average daily attendance (ADA) is computed for all public schools and districts at the end of 45 and 135 days of school.

average daily membership. The aggregate number of days for which students are in membership divided by the number of days in the reporting period. Average daily membership (ADM) is computed for all public schools and districts at the end of 45 and 135 days of school. The latter count is considered official for funding purposes. See *membership*.

average salary. The sum of individual salaries divided by the number of individuals. For classroom teachers, only individuals teaching full time within a combination of position codes 03-09 for a contracted period of at least one hundred ninety days within the school year are included. The salary is the total contracted salary for the school year and does not include bonus or incentive pay.

bachelor's degree. An earned basic degree from an approved college that allows an individual to become certified to instruct in one or more subject areas. Regular teachers must possess a bachelor's degree and meet requirements of certification as adopted by the State Board of Education. A teacher with this basic degree is issued a Class III certificate. An earned bachelor's degree plus eighteen semester hours of graduate credit in a planned program approved by the State Board of Education entitles an individual to receive a Class II certificate. Certain categories of vocational teachers attain a Class II or Class III trade and industrial certificate through a combination of education and work experience.

building upkeep and maintenance. See *expenditures, building upkeep and maintenance*.

business services. See *expenditures, business services*.

capital investment. See *capital projects*.

capital projects. A payment or payments associated with the acquisition of land and buildings, the remodeling and construction of buildings and additions to buildings, initial installation or extension of service systems and other built-in equipment, and improvement to sites. It is usually an expenditure that results in the acquisition of or improvement to assets intended to be permanent or fixed. Such a payment is a capital investment or is said to be capital in nature as contrasted with a current expenditure.

completer. A person who has received formal recognition from school authorities, by the granting of a diploma, for completing a prescribed course of studies in a secondary level school or who has received a certificate of attendance or other certificate of completion in lieu of a diploma.

county. One of the basic forty-six territorial units of local governments into which the state of South Carolina is divided.

crime rate. The number of crimes per 10,000 population. The information is collected and classified by the South Carolina State Law Enforcement Division according to the guidelines of the International Association of Chiefs of Police (IACP) and the Federal Bureau of Investigation (FBI). Crime includes murder, rape, robbery, aggravated assault, breaking and entering, larceny, and motor vehicle theft.

current operations. Activities of a school district for a certain school year. The term is normally used to denote monies that are not of a capital nature and are applied during and for the school year under consideration. See *expenditures, current operating*.

debt service. A payment or payments made for the purpose of reducing a debt, excluding current loans, and usually resulting from a capital investment. Such payments are not considered to be associated with the current operations of a school district.

doctorate. An earned advanced degree that meets requirements for teacher certification as adopted by the State Board of Education. An individual having earned this degree is awarded a Class I-Advanced certificate.

dropout. A student who leaves school for any reason other than death, prior to graduation or completion of a course of studies and without transferring to another school or institution.

education experience. The total years employed in education with appropriate certification for the position or positions held. For one year of teaching experience credit, the teacher shall have been employed under contract in a full-time teaching position for eight-tenths (.8) of a full-time equivalent (FTE), which is 152 days of a 190-day school year. Partial FTEs accrued over multiple years shall be credited as one year of teaching experience upon the teacher's reaching a total of at least eight-tenths (.8) of an FTE. (The number of years of experience for retirement purposes is computed differently than that for certification credit. One hundred eighty days of employment are necessary to qualify for one year of retirement credit.)

enrollment. A student count encompassing the number of students present for thirty-five days of school. A student is counted in enrollment on the thirty-fifth day that he or she has been present in school, provided that the student has not been counted in the enrollment of any other school in the State. The enrollment count is cumulative for the school year—that is, a student remains on the enrollment for the original school of entry for any given school year.

equalized revenue. The theoretical amount of funds that a school district would receive if local property taxes other than those designated for debt service were distributed to the school districts in direct proportion to the ability indices of the school districts. The amount is obtained by multiplying the ability index of the school district by the state total of local property taxes for current operations. See *ability index* and *tax revenue*.

expenditures, business services. Funds spent for fiscal services, internal services, central support: staff, statistical, and data processing services.

expenditures, capital projects. See *capital projects*.

expenditures, current operating. Funds spent by the school district for all school district activities excluding capital projects and debt service. See *current operations*.

expenditures, debt service. See *debt service*.

expenditures, district leadership. Includes funds spent for activities performed by the board of education, superintendent, deputy, associate, or assistant superintendents in the direction and management of all affairs of the school district. All personnel and materials in the office of the superintendent are included. Also, information services and fringe benefits are included.

expenditures, instruction and instructional support. Includes funds spent for activities dealing with the teaching of pupils or the interaction between teachers and pupils regardless of where activities occur; funds spent for approved instructional media such as television, radio, telephone, technology, software, and correspondence; funds spent for aides, clerks, teaching machines, and the like; funds spent for adult education, community services, and pupil activity; and funds spent for pupil services, instructional staff services, and program development. Fringe benefits are included.

expenditures, building upkeep and maintenance. Includes funds for keeping the grounds, buildings, and equipment safe and in effective working condition. Fringe benefits are included.

expenditures, pupil food service. Includes funds spent for providing food service to pupils. Fringe benefits are included.

expenditures, safety. Includes funds spent for activities concerned with maintaining order and security in school buildings, on the grounds, and in the vicinity of schools at all times: traffic control on grounds and in the vicinity of schools, police for school functions, building alarm systems, and hall monitoring services.

expenditures, school leadership. Includes funds spent for activities of principals, assistant principals, and other assistants in general supervision of all operations of the school, evaluation of staff members of the school, assignment of duties to staff members, supervision and maintenance of the school records, and coordination of school instructional activities with instructional activities of the school district. Clerical staff for the activities are included as are fringe benefits.

expenditures, transportation. Includes funds spent for providing transportation for pupils. Fringe benefits are included. Funds expended directly by the State Department of Education are excluded.

family. A householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. See *household*.

federal revenue. Funds collected by the federal government and distributed to school districts either directly or through intervening agencies. Funds designated for capital projects or debt service are excluded from the table displaying revenue per pupil from federal sources in this publication. See appendix A.

fiscal capacity. The assessed value of property located within a school district, adjusted to account for current market value. This measure of school district financial strength is calculated annually by the South Carolina Department of Revenue and Taxation and is the sum of five property tax components. See the section 5, "Finances," for further information.

full-time equivalency (FTE). The amount of employed time in a less than full-time position expressed in proportion to that required in a full-time position, with 1.0 representing one full-time position. FTE is expressed in tenths.

funding index. The State Department of Education (SDE) funding district tax index, which is based upon whether local required support exceeds the total cost of the district foundation program. When such exceeding does occur, the SDE adjusts the district index of tax paying ability to reflect a local support equal to the cost of the district's Education Finance Act (EFA) Foundation Program. This determination by the SDE is in accordance with the FY 1998-99 Appropriation Act proviso.

gifted students. See *academically gifted students*.

household. A household includes all the persons who occupy a housing unit. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. See *family*.

housing unit. A housing unit is a house, an apartment, group of rooms, or a single room occupied as separate living quarters or, if vacant, intended for occupancy. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. Both occupied and vacant housing units are included in the housing inventory, except that tents, caves, boats, vans, and the like are included only if they are occupied. Vacant mobile homes are included, provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' sales lots, at the factory, or in storage yards are excluded from the housing inventory.

instruction. See *expenditures, instruction*.

leadership. See *expenditures, district leadership and expenditures, school leadership*.

levy. See *tax levy*.

local revenue. Funds received by the school district from local sources including local taxes, tuition, transportation fees, earnings on investments, food sales, rentals, donations, and miscellaneous local sources. Monies received for capital projects or debt service are not classified in this category. See *local taxes*. See also appendix A.

local taxes. The part of revenue that a school district receives as a result of local taxation. Included in this category are taxes levied within the school district boundaries, such as levies for current operations, levies for debt service, delinquent taxes, levies for permits, licenses, and other taxes. Also included are taxes received by the school district from intermediate or other local governmental units. Such taxes include county equalization tax, revenue in lieu of taxes, and money that may not have been earmarked for school purposes. See *tax revenue*. Also see *local revenue* and appendix A.

lunch, free. School lunches provided to public school students without payment of a lunch fee. Student eligibility for free lunch is based on the completion of an application by the parent or guardian and the determination that family size and income as declared on the application meet the criteria for free lunch.

lunch, reduced-price. School lunches provided to public school students at a less than full-price fee. Student eligibility for reduced-price lunch is based on the completion of an application by the parent or guardian and the determination that family size and income as declared on the application meet the criteria for reduced-price lunch.

master's degree. An earned advanced degree that meets requirements for teacher certification as adopted by the State Board of Education. A teacher who has earned this degree is awarded a Class I certificate. An earned master's degree plus thirty semester hours of graduate credit in a planned program approved by the State Board of Education entitles a teacher to receive a Class I-Specialist certificate. Certain categories of vocational teachers attain a Class I trade and industrial certificate through a combination of education and work experience.

median age. The age value in an ordered set of values below and above which are equal numbers of values. The median age listed in the 2000 census was computed using the age of persons in completed years as of April 1, 2000.

median household income. The amount that divides the household income distribution into two equal sections, one group having incomes above the median and the other having incomes below the median. The median income for households is based on the distribution of the total number of household units, including those with no income.

membership. The number of pupils present plus the number of pupils absent. The State Department of Education collects aggregate days present and absent for all students at the end of 45 and 135 days of school. The aggregate days present and absent divided by the number of days for the appropriate school period equals average daily membership for a given period.

membership, weighted. The total obtained by adding the weighted membership for each classification of pupils as specified by the Education Finance Act. The weighted membership for each classification is found by multiplying the average daily membership for the 135-day period by the weighting factor for that classification. The weighting factors are as follows:

CLASSIFICATION WEIGHTING FACTOR

1	Kindergarten Pupils	1.30
2	Primary Pupils (Grades 1-3)	1.24
3	Elementary Pupils (Grades 4-8)	1.00
4	High School Pupils (Grades 9-12)	1.25
5A	Educable Mentally Handicapped Pupils	1.74
5B	Learning Disabled Pupils	1.74

zbx

SDE-32861

DEF_2907-0019

REC037715

6A	Trainable Mentally Handicapped Pupils	2.04
6B	Emotionally Handicapped Pupils	2.04
6C	Orthopedically Handicapped Pupils	2.04
7A	Visually Handicapped Pupils	2.57
7B	Hearing Handicapped Pupils	2.57
7C	Autistic Pupils	2.57
8	Speech Handicapped Pupils	1.90
9	Homebound Pupils	2.10
10	Prevocational Pupils	1.20
11	Vocational Pupils	1.29

These weighting factors are used to provide for relative cost differences among programs for different students.

mills. Units of property taxation. A mill is one tenth of one percent. See *tax levy*.

minority count. A sum of persons who report that they belong to or identify with the black racial groups of Africa, Hispanic groups, groups with Asian American (Pacific Islander) origins, or groups with American Indian (Alaskan native) origins.

net taxable sales. Gross sales less allowances for nontaxable items. Businesses currently report sales by the county in which the product was retailed.

nonpublic (private) school. A sectarian, ecumenical, or secular school operating within South Carolina and offering, generally for a tuition charge, elementary- and secondary-level instruction to resident or day students of legal school age. For the purposes of this publication, the term *elementary- or secondary-level instruction* applies to kindergarten through grade twelve.

per capita. Per person.

per capita personal income. The mean (average) income per person. The figure is calculated by adding the total personal income of every man, woman, and child in a particular group and dividing by the number of persons in that group, including those with no income. Persons without income (children, for example) tend to lower the per capita income. See *personal income*.

per pupil. Refers to division by the pupil count. The financial tables in this document that refer to revenue, expenditures, assessed valuation, or wealth per pupil use the average daily membership count at the end of 135 days of school for kindergarten through grade twelve.

personal income. The United States Bureau of Economic Analysis defines *personal income* as the income received by, or on behalf of, all residents of an area from all sources. It is the sum of wage and salary disbursements, other labor income, proprietor's income, rental income of persons, personal dividend income, personal interest income, and transfer of payments, less personal contributions for social insurance. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms. Not only individuals but also nonprofit institutions, private trust funds, and private health and welfare funds are classed as "persons."

poverty level. A classification based on the income of families and unrelated individuals using a poverty index that provides a range of income thresholds varying by size of family, number of children, and age of the family householder or unrelated individual.

professional staff. Includes administrative, supervisory, and teaching staff reported through the professional certified staff (PCS) listing. For the position code identifications, see appendix B.

public school. An elementary or secondary-level school operated by publicly elected or appointed school officials in which the program and activities are under the control of these officials and supported by public funds.

revenue. See *state revenue*, *local revenue*, and *federal revenue*.

rural population. The population not classified as urban. See *urban population*.

safety. See *expenditures, safety*.

salary. The total amount regularly paid or stipulated to be paid to an individual, before deductions, for personal services rendered while on the payroll of a school district. See *average salary*.

school district. The basic administrative unit in the organization of public schools within South Carolina. Public school districts operate under the jurisdiction of local school boards and through the school district superintendent or chief administrator.

six-year certificate. An earned master's degree plus thirty semester hours of graduate credit in a planned program approved by the State Board of Education. A teacher earning this certificate is awarded a Class I-Specialist certificate. An applicant must possess a minimum of sixty graduate semester hours and must meet requirements for an initial area of certification as adopted by the State Board of Education.

state revenue. Funds collected by the State and distributed to school districts. Funds that are dispersed directly by the State, such as those for operating the school bus system, are not included as revenue at the school district level. The portion of fringe benefits paid by the State are included in the revenue of the school districts for school years 1981-82 and 1987-88 through 1988-89. Such fringe benefits are included in the budget of the State Department of Education for all other years that fringe benefits were partially or wholly funded by the State. Funds designated for capital projects or debt service are excluded from the table displaying revenue per pupil from state sources in this publication. See appendix A.

supervisory staff. Persons occupying the professional positions of director, supervisor, consultant, and coordinator of special instructional areas and located within the county or school district office constitute supervisory staff. The specific position types are listed in appendix B under the heading "County/District Office Personnel Only."

tax base. The value to which the tax rate is applied to determine the tax due. For property tax, the base is the assessed valuation; for income tax, the base is the taxable income.

tax effort. The ratio calculated by dividing tax revenue for current operations by equalized revenue for a school district. See *tax revenue* and *equalized revenue*.

tax levy. The tax rate, the ratio of tax to the tax base. For property tax, the rate is in mills and is applied to the assessed valuation to determine the tax. See *mills*.

tax revenue. Funds received by a school district through taxation of local property. Tables in this document distinguish between taxes received for current operations and taxes received for debt service. See *local taxes*. See also appendix A.

taxable income. The aggregate amount of income on which South Carolina personal income tax liability is based. For an individual, it is the figure on which income tax is determined by applying the tax rates or by using the tax tables.

teaching staff. A person employed either full-time or part-time by any school district either to teach or to supervise teaching. See appendix B.

teacher turnover. The ratio of teacher attrition to the base-year teacher count expressed as a percent. Only full-time teachers who possess valid credentials and are employed more than one hundred forty days during a school year are counted for the year. The teacher turnover rate is the smaller of the percent of prior-year teachers who terminate and the percent of current-year teachers who are newly employed. Use of the smaller percentage largely compensates for effects due to expansion or contraction of programs and/or the student population base within a school district.

urban population. All persons residing in areas determined to be urbanized areas or in places of twenty-five hundred or more residents outside urbanized areas. See *urbanized areas*.

urbanized areas. These areas are defined by population density and are composed of an incorporated place and surrounding densely settled areas that have a combined population of at least fifty thousand. There is no minimum size for the incorporated place that forms the central city of the area. The boundaries of urbanized areas do not generally conform to county boundaries. See *urban population*.

wealth per pupil. The fiscal capacity of a school district divided by the membership. See *fiscal capacity* and *per pupil*.

white count. A sum of persons who report that they belong to or identify with people having their origins in any of the original peoples of Europe, North Africa, or the Middle East.

SECTION

1

POPULATION

Tables 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10 include county counts from Summary Tape File 1A of the United States Department of Commerce, Bureau of the Census. Data contained in this source are based on a 2000 census sample. In these tables, the state figures include counts for the Fort Jackson military installation as well as the eighty-six school districts.

SDE-32890

SECTION

2

ECONOMICS

Tables relating to employment in various categories (tables 31 through 37) display estimates of nonagricultural wage and salary employment by the county in which the work was performed rather than by the county in which the workers resided. This reporting is consistent with the reporting in previous editions. The figures for the State may not equal the sum of county figures in the employment tables due to rounding procedures and the inability to allocate some workers in the South Carolina totals to specific counties.

In order that the confidential nature of data reported by employers be preserved, information is not shown in the source document for industries who had fewer than three reporting units or when any one firm accounted for 80 percent or more of employment in the industry.

As in the past twenty-four editions of *Rankings of the Counties and Schools Districts of South Carolina*, the labor force statistics used to calculate unemployment percentages (see table 30) were reported on the basis of residence rather than the place of work and were based on an annual benchmark derived from the Current Population Survey.

Table 27 gives the 2000 average weekly salary of workers covered in employment. The data reported in the source document are based on employment and payroll information reported by employers to the Unemployment Compensation Division of the South Carolina Employment Security Commission on their regular quarterly tax reports.

Taxable sales figures presented in table 39 were compiled by the South Carolina Department of Revenue and Taxation. Figures presented include sales tax returns filed between December 1998 and November 1999, regardless of the period covered. This reporting is consistent with that of the previous edition of *Rankings*.

SECTION

3

PUPILS

The official count for pupils in kindergarten through grade twelve is the average daily membership (ADM) at the end of the 135-day accounting period. To allow certain comparisons, tables 40 through 47 present enrollment figures for kindergarten through grade twelve rather than ADM figures. Enrollments in basic and high school adult education programs are now provided only for the counties in table 54.

PROFESSIONAL STAFF

Professional staff counts by degree category as provided in tables 67 through 69 are based on certification levels, as in the five previous editions of *Rankings*. Prior to the 1995 edition, professional staff counts by degree category were based on educational level. Certain categories of vocational teachers obtain a certification level through a combination of education and work experience. Therefore, fewer teachers actually have academic degrees awarded by colleges and universities than is indicated by the certification level.

The teacher count used in calculating pupil-teacher ratios presented in table 78 includes teachers of special education. Child development teachers are not included. The pupil count used in computing pupil-staff ratios in tables 78 through 80 is the average daily membership in kindergarten through grade twelve for the first 135 days. Three- and four-year-old pupils are excluded.

Unless otherwise stated, statistics for personnel in special education schools are included in tables relating to professional staff. County personnel have not been included in the various staff tables due to the impracticality of allocating such staff to individual districts. See Appendix C for a definition of the term *staff* as it is used in the various tables.

SDE-33092

SECTION

5

FINANCES

State funds for fringe benefits have been issued directly to the school districts since 1987-88 rather than being held at the State Department of Education as in prior years. This funding procedure was also followed for the 1981-82 school year. Consequently, the total fringe benefits are now included in the operating funds of the school districts.

The pupil count used in the computation of expenditures and revenues per pupil is the 135-day average daily membership for kindergarten through grade twelve.

Table 99 reflects the fiscal capacity as updated annually by the South Carolina Department of Revenue and Taxation. The fiscal capacity shown for each district in this table is determined by the South Carolina Department of Revenue and Taxation and is the sum of five different parts or types of fiscal capacity.

SDE-33093

Part 1 is the adjusted assessed value of all owner-occupied residential property, which is 4 percent of the full market value.

Part 2 is the assessed value of agricultural property as determined through applying a 4 percent or 6 percent assessment ratio according to use.

Part 3 is the adjusted assessed value of all the other real property such as commercial property, rental homes, vacation homes, and so on, with the assessment rate set at 8 percent of the full market value.

Part 4 is the total assessed value of all the locally assessed personal property such as personal automobiles, boats, airplanes, and so on.

Part 5 is the total assessed value of property under the jurisdiction of the South Carolina Department of Revenue and Taxation. The types of property included in part 5 are utilities, inventory lock in, fees in lieu of tax payments, manufacturers and business personal property, carlines, airlines, railroads, pipelines, and so on.

Adjusted assessed value, referenced above in parts 1 and 3, is determined annually by the South Carolina Department of Revenue and Taxation. The assessed value is adjusted for each district to reflect fair market value as determined by a sale-appraisal ratio study involving sales data for the two most current years. The sum of these five fiscal capacity parts for any given school district divided by the derived fiscal capacity for the state produces the index of taxpaying ability, commonly referred to as the "ability index," for a given district (see table 102).

The funding index used by the South Carolina Department of Education is presented again this year in Table 103. This index used in conjunction with the base student cost and the weighted membership determines the funding under the Education Finance Act. The funding index for 2000-01 is based on property values as of December 31, 1997.

The ability index calculated by the South Carolina Department of Revenue and Taxation is based on property values as of December 31, 2000. Tax effort for 2000-01 is presented in Table 102 along with the ability index.

Current operating expenditures reported in this publication (tables 88 and 104) include the totals for district and school leadership, instruction and instructional support, building upkeep and maintenance, pupil food services, transportation, safety, and business services. Expenditures for capital projects and debt service (tables 114 and 115) are not included in the tables reflecting current operating expenditures.

See Appendix A for a complete listing of school district audit accounts used in the computation of revenues and InSite™ categories used in the computation of expenditures.

- Table 1. Summary Tape File 1A, 2000 (U.S. Dept. of Commerce, Bureau of the Census).
- Table 2. Summary Set 1 Extract in *School District Data Book: 2000 Census School District Special Tabulation* (National Center for Education Statistics, U.S. Dept. of Education, CD-ROM). Figures for Orangeburg District Three were combined from the preconsolidated Orangeburg Districts Three and Seven; Orangeburg Four from preconsolidated Districts One, Four, and Eight; and Orangeburg Five from preconsolidated Districts Two, Five, and Six. State figure equals the sum of district figures plus the Fort Jackson military installation.
- Table 3. See table 2, above. Additionally, 1990 Census Summary Tape File 1 (U.S. Dept. of Commerce, Bureau of the Census). Dorchester District Four figures for 1980 were obtained by combining figures for Dorchester County Districts One and Three. State figures are taken from 2000 *Census of Population: General Population Characteristics, South Carolina* (U.S. Dept. of Commerce, Economics and Statistics Administration, Bureau of the Census). District figures are estimates derived from county data and may not match county figures; sum of district figures may not equal state figures.
- Table 4. Summary File Set 1 Extract. Figures for Orangeburg District Three were combined from the preconsolidated Orangeburg Districts Three and Seven; Orangeburg District Four from preconsolidated Districts One, Four, and Eight; and Orangeburg District Five from preconsolidated Districts Two, Five, and Six. State figure equals the sum of district figures plus the Fort Jackson military installation.
