Appellate Panel Review held in Columbia, South Carolina on May 15, 2017 per notices timely and properly served on all parties of interest.

Appellate Panel Decision and Order filed 9-18, 2017

ARGUMENTS BRIEFED BY:

Preston F. McDaniel, Esquire, of Columbia, South Carolina
for Claimant/Appellant

Cynthia C. Dooley, Esquire, of Columbia, South Carolina
for Defendants/Respondents

STATEMENT OF THE CASE

The parties were heard by Commissioner Gene McCaskill, Hearing Commissioner, in Columbia, South Carolina on August 30, 2016. On September 20, 2016, Commissioner McCaskill issued the following Stipulations, APA Submissions, Statement of the Case, Evidence of the Case, Findings of Fact, Conclusions of Law, and Order:

STIPULATIONS

Counsel for all parties stipulated at the hearing to the following issues:

1. The purpose of the hearing was to determine the issues as set forth in Forms 52 and 53 and any other issues which may have timely come before the Commission.

2. Notice of the hearing was timely and properly served upon all parties of interest.

3. Venue set in Richland County, South Carolina is proper and was agreed upon by all parties.

4. Claimant's average weekly wage and compensation rate are $1,263.35 and $766.05, respectively.

5. Claimant seeks benefits under the South Carolina Workers' Compensation Act based upon an alleged injury which occurred on February 23, 2015, while employed by the Employer and, therefore, the South Carolina Workers' Compensation Commission has jurisdiction of this case.

APA SUBMISSIONS

The following records were submitted into evidence under the Administrative Procedures Act:

STATEMENT OF THE CASE

This claim arose when the Claimant fell to the ground, hit his head, and suffered injuries that ultimately caused the Claimant to pass away on February 27, 2015. The Claimant is seeking benefits for a compensable death claim.

Claimant contends that this was a work related accident resulting from a slip and fall accident that resulted in a death that is fully compensable. The Claimant contends that the medical records and the statements made by the Claimant after falling and hitting his head should be given great weight and that the resulting death should be found to be fully

compensable. Claimant contends that their medical expert report from Dr. Michael Sribnick shows that the Claimant was not suffering from any medical issues personal to him that would cause him to collapse.

Claimant contends that this case is comparable to and covered under Nicholson v. SCDSS, 411 S.C. 391, 769 S.E.2d 1 (2015), Barnes v. Chapter 1 Realty, 411 S.C. 391, 768 S.E.2d 651 (2015), and Thomas v. Five Star Transportation, 412 S.E. 1, 770 S.E.2d 183 (Ct. App. 2015).

Defendants deny that this is a compensable death claim. Defendants contend that the medical records show that the Claimant was a very sick individual, who suffered from Anemia, Thrombocytopenia (low platelet count), Low potassium (hypokalemia), Hyponatremia, and liver disease among other issues. Defendants contend that the Claimant was an alcoholic who was suffering from diarrhea, vomiting and fatigue prior to the alleged accident date. Defendants contend that their expert report from Dr. Vandersteenhoven shows that the Claimant passed out as a result of conditions peculiar to the Claimant, and, therefore, this is a non-compensable idiopathic fall.

Defendants contend that the Clamant merely collapsed while at work and that the collapse was not causally related to the Claimant's employment. In addition, Defendants argue that the one eye-witness to the claim, Mr. Josiah Fludd, witnessed the event from start to finish. Mr. Fludd testified in his deposition that the Claimant was outside when the fall occurred. He testified that the Claimant was standing still when he fell to the ground without attempting to catch himself or break his fall. Mr. Fludd testified and signed an affidavit that the Claimant collapsed.

Defendants contend, and submitted a medical expert report, that the Claimant collapsed at work but that the fall was idiopathic. Defendants cite *Bagwell v. Ernest Burnwell, Inc.*, 227 S.C. 444, 88 S.E.2d 611 (1955) as authority that an idiopathic fall is not compensable under the Act. Defendants argue that this claim is on point with *Bagwell*, and, therefore, the Claimant's death is not compensable under the act.

EVIDENCE OF THE CASE

The Claimant's widow testified that she was married to Edmund Dillon for nine or ten years. Hr'g Tr. 17. She denied that the Claimant had any other individuals dependent upon him other than herself. Hr'g Tr. 18. She testified that in the months leading up to the accident that she had not noticed any changes in his behavior or appearance Hr'g Tr. 19. She testified that she was never able to speak with the Claimant after the accident because he was unconscious when she got to the hospital. Hr'g Tr. 20. She testified that she is asking the Commission to find the death compensable under the workers' compensation act. Hr'g Tr. 21.

Upon cross-examination, the Claimant's widow testified that she and her husband did not see much of each other due to their work schedules. Hr'g Tr. 24-25. She testified that she had not noticed his jaundice color until she saw him in the hospital. Hr'g Tr. 24. Further, she admitted that the Claimant drank alcohol but that she was not aware of the quantity of alcohol. Hr'g Tr. 24.

Frederick Allen Mogridge appeared and testified for the defense. Mr. Mogridge testified to being a fellow employee at FleetPride with the Claimant. Hr'g Tr. 27. In addition to working at FleetPride for twenty-three years, the witness testified to having worked for a volunteer rescue squad in the past. Hr'g Tr. 27-28.

Mr. Mogridge testified that he had known the Claimant for about twenty-five years and that they were friends Hr'g Tr. 28. He testified that whiles they had a working relationship that they also had a personal relationship. Hr'g Tr. 29. He stated that they worked together on a daily basis at FleetPride. Hr'g Tr. 29. He testified that he had noticed the health of the Claimant leading up to the date of injury. He testified that the Claimant had some health issues in the months prior to the fall. Hr'g Tr. 29. Mr. Mogridge testified that he noticed the Claimant's color had changed and that he was losing weight. Hr'g Tr. 29. In addition, he testified that the Claimant was slow moving and had some problems with his body control, particularly his bowel control. Hr'g Tr. 30.

Mr. Mogridge testified that on the day of the fall that he had been inside and, therefore, did not witness the fall but was notified by Josiah Fludd that the Claimant had fallen. Hr'g Tr. 31-34. He testified that when he came outside that he found the Claimant on the ground bleeding from his head. Hr'g Tr. 31-34. He further testified that the Claimant was unconscious when he found him. Hr'g Tr. 34. Mr. Mogride called an ambulance and forced the Claimant to go to the hospital, against the wishes of the Claimant. Hr'g Tr. 31-34.

On cross-examination, Mr. Mogride Mr. Mogride did admit that it had been raining earlier that morning, but denied that it was raining hard at the time of the accident. Hr'g Tr. 34-37. Mr. Mogride also admitted on cross-examination that neither he nor any supervisor told the Claimant that he could not come into work or sent him to see someone due to his health. Hr'g Tr. 38-39. He asked Claimant to seek medical help, but the Claimant told him to mind his own business. Hr'g Tr. 38-39.

Employer representative Eugene Lane also appeared and testified. On direct examination, he testified that he was out of town on the date of the accident. Hr'g Tr. 44. However, he testified

that he had known the Claimant for twenty-five to thirty years and had been in his wedding. Hr'g Tr. 41. Mr. Lane testified that he had noticed the Claimant's health deteriorating over the months leading up to the accident. Hr'g Tr. 41-42. Specifically, he noted that the Claimant had lost a lot of weight and had become slow moving. Hr'g Tr. 42. However, he testified that the Claimant was a private individual and did not discuss his health with his friends. Hr'g Tr. 42.

FINDINGS OF FACT

After reviewing the evidentiary submissions and listening to the Claimant's testimony and the witness testimony, the following Findings of Fact are rendered:

1. The Claimant's death subsequent to a collapse at work did not arise of out of his employment and therefore his injury is not compensable?

2. The Claimant was at work on the morning of February 23, 2015. While at work, he was injured when he fell. The Claimant was transported by Richland County EMS to Palmetto Health Richland where he was hospitalized.

3. There is no dispute that the Claimant's death on February 27, 2015 resulted from injuries he received when he hit his head in the fall on February 23, 2015.

4. It is the Defendant's position that the Claimant suffered from many conditions, including Anemia, Thrombocytopenia (low platelet count), Hypokalemia (low potassium), Hyponatremia, Liver Disease, and severe dehydration.

5. The medical records indicate the Claimant had a problem with alcohol.

6. As to the Claimant's medical history, a medical record from Kershaw County Medical Center dated February 4, 1994 reports that the Claimant got up to go to the bathroom, had a coughing spell, felt dizzy and passed out hitting his head.

7. The medical note of Dr. Mark Jones/Dr. David T. Ford on February 23, 2015 (date of injury) reports that the Claimant reported that he slipped and fell hitting the back of his

head. Claimant also reported that he had not felt well for the last several days, had not been eating well and that he did notice that his skin had changed color (medical records from that day report that he was jaundice). He also reported that he had been vomiting and had diarrhea; and had not felt well that day.

8. On the day of his fall, the Claimant reported that he slipped and fell. He also reported that he did not lose consciousness.

9. The EDS report of the transport indicates that the Claimant was alert when they arrived, but that during transport his condition declined.

10. Sadly, the Claimant's physical condition deteriorated over the next four days; and on February 27, 2015, the Claimant succumbed.

11. The Amended Death certificate, which is part of the record, lists the cause of death as "cardiopulmonary failure, subdural hematoma with mass effect, subarachnoid hemorrhage."

12. The question at bar – as to a determination of compensability - is whether the Claimant slipped and fell which is what he indicated to medical professionals on the day of his injury; or did he simply collapse and hit his head?

13. In either instance, that fall and the resulting head injury is the cause of death. That fact is not in dispute.

14. The Claimant was outside on break when he fell/collapsed.

15. While there was initially some confusion as to whether the Claimant was on a ladder and fell from that ladder, both parties agree that he was not on a ladder and his fall/collapse occurred while he was standing on the ground.

16. Josiah Fludd was a witness to the fall/collapse. The parties took Mr. Fludd's deposition on 10/15/15.

17. Mr. Fludd testified that, on that day, the Claimant was standing on the sidewalk beside Mr. Fludd's truck.

18. Mr. Fludd testified that he saw the Claimant collapse. He also testified that the Claimant did not try to break his fall nor did he attempt to brace himself in anyway.

19. Mr. Fludd testified that the Claimant fell backwards.

20. He further testified that the Claimant was not walking at the time; and he did not see the Claimant slip.

21. On cross-examination Mr. Fludd testified that he could not see all of the Claimant's legs; but he could see his thighs.

22. While Mr. Fludd could not testify as to whether the Claimant slipped, he did testify that the Claimant's thighs were stationary.

23. I have read Mr. Fludd's deposition in its entirety. Mr. Fludd is simply a witness to the event. He does not stand to gain or lose based on his testimony in this case. I give his testimony great weight.

24. When I consider the record as a whole, I am not persuaded that the Claimant slipped or tripped.

25. I find that the Claimant simply collapsed. A review of the Claimant's medical history gives us insight as to why this could occur. There is medical evidence that the Claimant suffered from numerous conditions peculiar to him that could result in such an event.

26. This is a denied claim. The burden to prove there was a compensable injury rests with the Claimant. He must prove by a preponderance of the evidence that he indeed did slip and fall.

27. Here the Defendants have presented a persuasive case as to idiopathic injury which has no nexus to his work.

28. At the time of this event, the Claimant was on break outside. The Defendants presented a witness that observed the event. While his line of sight is somewhat obstructed, he can see the Claimant from the head down to his thighs. This witness describes the event – he sees the Claimant falling backwards without any flailing or any attempt to break his fall. The witness describes an event that took place from a stationary position. He testified that the Claimant was unconscious. The Claimant stated to medical personnel that he did not lose consciousness. Candidly, whether he was conscious or unconscious is not dispositive of whether he slipped or just collapsed.

29. In this case, I am persuaded by the greater weight of the evidence that the Claimant suffered an idiopathic fall. The description of the event which the Claimant provides is given after he suffers an event so significant that it will lead to his death. It is also clear from the medical evidence that the Claimant is – prior to the fall – suffering from compromising medical conditions. The Claimant's statements at the time of his injury must be viewed through the lens of the events that day and his general physical condition on that day as well.

30. The Claimant's statement as to mechanism of injury must be viewed juxtaposed to the testimony of Mr. Fludd with consideration for the Claimant's general physical health at the time.

31. This case is distinguishable from *Nicholson* and *Barnes*. Here *Bagwell v. Ernest Burnwell, Inc.* is on point. The fact pattern in that case and this case are very similar. In Bagwell, there was an eyewitness who saw the employee fall backward rigidly without attempting to brace the fall. The Court stated in Bagwell that being at work was not enough to justify an award, but it must be shown "either that the cause of the fall or the resulting injury bore some special relation to his work or to the conditions under which it was performed." The Court further noted that "while the cause of [the employee's] fall may be unexplained, the circumstances of his fall are fully covered by the testimony of eyewitnesses." *Nicholson* and *Barnes* are different in that in *Nicholson*, the employee's foot caught on the carpet. The Court held that the employee did not fall due to a condition peculiar to her but fell as a result of tripping on the carpet. In *Barnes*, the injured employee was hurrying to check her email and fell. There was no evidence that there was an internal breakdown causing the fall, so the Court found the injury compensable regardless of whether she tripped over herself or the carpet. This case here is directly on point with *Bagwell* in that there is evidence of an internal breakdown and there is an uninterested witness attesting to the facts of the Claimant passing out.

32. Given the totality of the evidence, the Claimant has failed to meet his burden. As such, the claim is dismissed with prejudice.

CONCLUSIONS OF LAW

Accordingly, as provided in S.C. Code Ann. § 42-17-40 of the S.C. Code Ann., it is the determination of this Commissioner that:

1. The burden of proof applicable to a claim for workers' compensation benefits is the preponderance of the evidence. The Claimant must establish by preponderance of the evidence the facts that will entitle him to an award under the workers' compensation Act. *Walsh v. U.S. Rubber Co.*, 120 S.E.2d 685 (1961);

2. Under S.C. Code Ann. § 42-1-130, the Claimant was a covered Employee at the time of his accident dated February 23, 2015;

3. Under S.C. Code Ann. § 42-1-140, the Defendant/Employer was a covered Employer under the Act on February 23, 2015;

4. Under S.C. Code Ann. § 42-1-160, the Claimant must show the he sustained an injury by accident arising out of and in the course and scope of employment in order to be entitled to benefits;

5. Pursuant to S.C. Code Ann. § 42-1-160, the Claimant has failed to show by a preponderance of the evidence a compensable death by accident. This conclusion is based on Finding of Fact Nos. 16 – 31.

6. The Claimant merely suffered an idiopathic fall due to pre-existing unrelated medical issues as described in the medical records and through witness testimony. This conclusion of law is based upon Finding of Fact Nos. 28 – 30.

7. Therefore, since the Claimant has failed to meet the burden, this claim is dismissed with prejudice. This conclusion of law is based upon Finding of Fact No. 32.

AWARD

Based upon the foregoing Findings of Fact and Conclusions of Law, it is **HEREBY ORDERED:**

1. The Claimant's claim for benefits is denied.
2. This claim is dismissed with prejudice.
3. No hearing costs are assessed.

IT IS SO ORDERED.

Within the statutory period, the Claimant filed an Application for Review in this case, setting forth the reasons for an appeal. A copy of this Application was furnished to all interested parties prior to Appellate Review.

All proper testimony has been taken. Together with all documentary evidence and a transcript of the hearing, appellate briefs were delivered to the individual members of the South Carolina Workers' Compensation Appellate Panel. Oral Argument has been provided to the individual members of the Full Commission and the case has since been under study and consideration.

By appeal, Claimant/Appellant submits the following:

1. That pursuant to S.C. Code of Law §42-17-40, the Claimant requests a review of all of the Findings of Fact, the Conclusions of Law, the Order and Award and of all rulings and decisions made by the Commissioner at the hearing, as contained in the Record or as made at any unrecorded pre-hearing conference, and in any communications concerning the claim, Order, Award and Decision rendered by the Hearing Commissioner in this matter.

2. That the Hearing Commissioner erred as a matter of law by trying to distinguish this case from the cases of *Nicholson v. SCDSS*, 411 S.C. 391, 769 S.E.2d 1 (2015); *Barnes v. Chapter 1 Realty*, 411 S.C. 391, 768 S.E.2d 651 (2015); and *Thomas v. Five Star Transportation*, 412 S.C. 1, 770 S.E.2d 183 (S.C. App. 2015) and by applying an idiopathic fall case which this is not, that being the case of *Bagwell v. Ernest Burwell, Inc.*, 227 S.C. 444, 88 S.E.2d 611 (1955).

3. That the Hearing Commissioner erred as a matter of law by making Conclusion of Law #1 wherein the substantial evidence in the Record clearly establishes by a preponderance of the evidence that the Claimant sustained a compensable injury by accident as defined under SC Law.

4. That the Hearing Commissioner erred as a matter of law in making Conclusion of Law #4 by finding that the Claimant did not establish as a matter of law that the Claimant had sustained a compensable injury under §42-1-160 as defined by our Appellate Courts.

5. That the Hearing Commissioner erred as a matter of law by making Conclusion of Law #5 wherein the evidence established by a preponderance of the evidence that he sustained a compensable injury by accident resulting in his death and by basing that conclusion on Findings of Fact #16-21.

6. That the Hearing Commissioner erred as a matter of law in making Conclusion of Law #6 by finding that the Claimant sustained an idiopathic fall due to a pre-existing unrelated medical issue as described in the medical records and through witness testimony and basing that Conclusion of Law on and as set forth in his Findings of Fact #28-30.

7. That the Hearing Commissioner erred as a matter of law in making Conclusion of Law #7 wherein he found that the Claimant failed to meet his burden of proof and dismissed the claim with prejudice and basing that Conclusion of Law on Finding of Fact #32.

8. That the Hearing Commissioner erred as a matter of law in the Award portion by denying the Claimant benefits and dismissing the Claimant's case with prejudice.

9. That the Hearing Commissioner erred as a matter of fact and law in making of Findings of Fact #17-23 wherein all of these Findings of Fact concerned are based on the testimony of Josiah Fludd and further and specifically in that these Findings of Fact make the testimony of Josiah Fludd's testimony conclusive one way or another as to the, "cause" of the fall. Further, the Commissioner's Findings are based on surmise, speculation and innuendo based on the actual testimony from Mr. Fludd.

10. That the Hearing Commissioner erred as a matter of fact and law by making contradictory Findings of Fact. He made on the one hand a Finding that Mr. Fludd could not testify as to whether or not the Claimant slipped, and on the other hand made the Finding under Finding of Fact #8 that on the day of his fall the Claimant reported that he slipped and fell. He then made Finding of Fact #24 that he was not persuaded that the Claimant slipped or tripped and by Finding of Fact #25 that the Claimant simply collapsed.

11. That the Hearing Commissioner erred as a matter of law by failing to apply the concepts of present sense impression, excited utterance, then existing physical condition, and statement made for medical treatment in reference to the statements that were made by the Claimant (deceased) immediately following the accident and as part of medical treatment following the accident. All of those concepts require the fact-finder to give great weight to those statements wherein the law gives those statements great credibility due to their immediacy and relationship to the event and the condition of the Claimant at the time that they were made.

12. That the Hearing Commissioner erred as a matter of law in making Finding of Fact #23 where this Finding specifically establishes that this Finding by the Commissioner is the subject of being arbitrary, capricious and an abuse of discretion. The Finding that the testimony of Mr. Fludd as a witness under oath is entitled to greater weight because, "he does not stand to gain or lose based on his testimony in this case," does not constitute a lawful basis for assigning greater weight to his testimony especially as compared to the EMS workers and doctors in reference to their findings and the statements they recorded as having been made to them by the deceased worker in this matter within thirty (30) minutes of his slip and fall.

13. That the hearing Commissioner erred as a matter of fact and law by basing his entire factual decision as to whether or not the Claimant sustained injury by accident upon the

factual testimony and evidence of Mr. Josiah Fludd given in his discovery deposition wherein that testimony and evidence does not support the conclusions made from a factual standpoint by the Commissioner.

14. That the hearing Commissioner erred as a matter of fact and law by making Finding of Fact #25 wherein the Hearing Commissioner gave undue weight to possible reasons for a collapse or fall as related by the medical evidence of the employer's expert witness and giving little or no weight to the evidence from the Claimant himself and the Claimant's expert medical witness who opined that preexisting conditions did not contribute to or cause the fall.

15. That the Hearing Commissioner erred as a matter of law in making Finding of fact #28 wherein the Commissioner erred in placing an improper burden of proof on the Claimant in that the undisputed testimony of the Claimant to his medical providers at the time of the injury was that he slipped and fell. The evidence of Mr. Fludd and, in particular, his deposition, reveals that Mr. Fludd was loading a truck at the time, protecting his paperwork from the rain, his view was obscured, his primary focus was not on the Claimant until the Claimant began to fall, and all he really knows is that the Claimant fell, not why or how. The Hearing Commissioner placed too great of a weight on what Mr. Fludd did not see as opposed to what he did see.

On the other hand, Defendants contended that the Hearing Commissioner properly weighed all of the evidence, including, but not limited to, the medical records, witness testimony, and expert opinions in determining that the Claimant merely collapsed from conditions personal to the Claimant.

Defendants further contended that an award is not based on surmise and speculation. Defendants contended that this claim was similar to *Bagwell v. Ernest Burwell, Inc.* Therefore, the hearing Commissioner properly weighed the evidence and determined that the Claimant

could not meet the burden to support a compensable injury by accident under S.C. Code of Laws §42-1-160.

Based upon a review of the whole Record and Briefs, the panel, by **UNANIMOUS** vote, **AFFIRMS WITH AMENDMENTS** to correct scrivener's errors, as agreed upon by the parties, including the proper APA submissions to the Single Commissioner, the decision and order of the Single Commissioner. Accordingly, the Stipulations, APA Submissions, Statement of the Case, Evidence of the Case, Findings of Fact, Conclusions of Law, and Order set forth below shall become and hereby are the law of the case:

STIPULATIONS

Counsel for all parties stipulated at the hearing to the following issues:

1. The purpose of the hearing was to determine the issues as set forth in Forms 52 and 53 and any other issues which may have timely come before the Commission.

2. Notice of the hearing was timely and properly served upon all parties of interest.

3. Venue set in Richland County, South Carolina is proper and was agreed upon by all parties.

4. Claimant's average weekly wage and compensation rate are $1,263.35 and $766.05, respectively.

5. Claimant seeks benefits under the South Carolina Workers' Compensation Act based upon an alleged injury which occurred on February 23, 2015, while employed by the Employer and, therefore, the South Carolina Workers' Compensation Commission has jurisdiction of this case.

STATEMENT OF THE CASE

This claim arose when the Claimant fell to the ground, hit his head, and suffered injuries that ultimately caused the Claimant to pass away on February 27, 2015. The Claimant is seeking benefits for a compensable death claim.

Claimant contends that this was a work related accident resulting from a slip and fall accident that resulted in a death that is fully compensable. The Claimant contends that the medical records and the statements made by the Claimant after falling and hitting his head should be given great weight and that the resulting death should be found to be fully compensable. Claimant contends that their medical expert report from Dr. Michael Sribnick shows that the Claimant was not suffering from any medical issues personal to him that would cause him to collapse.

Claimant contends that this case is comparable to and covered under *Nicholson v. SCDSS*, 411 S.C. 391, 769 S.E.2d 1 (2015), *Barnes v. Chapter 1 Realty*, 411 S.C. 391, 768 S.E.2d 651 (2015), and *Thomas v. Five Star Transportation*, 412 S.E. 1, 770 S.E.2d 183 (Ct. App. 2015).

Defendants deny that this is a compensable death claim. Defendants contend that the medical records show that the Claimant was a very sick individual, who suffered from Anemia, Thrombocytopenia (low platelet count), Low potassium (hypokalemia), Hyponatremia, and liver

disease among other issues. Defendants contend that the Claimant was an alcoholic who was suffering from diarrhea, vomiting and fatigue prior to the alleged accident date. Defendants contend that their expert report from Dr. Vandersteenhoven shows that the Claimant passed out as a result of conditions peculiar to the Claimant, and, therefore, this is a non-compensable idiopathic fall.

Defendants contend that the Claimant merely collapsed while at work and that the collapse was not causally related to the Claimant's employment. In addition, Defendants argue that the one eye-witness to the claim, Mr. Josiah Fludd, witnessed the event from start to finish. Mr. Fludd testified in his deposition that the Claimant was outside when the fall occurred. He testified that the Claimant was standing still when he fell to the ground without attempting to catch himself or break his fall. Mr. Fludd testified and signed an affidavit that the Claimant collapsed.

Defendants contend, and submitted a medical expert report, that the Claimant collapsed at work but that the fall was idiopathic. Defendants cite *Bagwell v. Ernest Burnwell, Inc.*, 227 S.C. 444, 88 S.E.2d 611 (1955) as authority that an idiopathic fall is not compensable under the Act. Defendants argue that this claim is on point with *Bagwell*, and, therefore, the Claimant's death is not compensable under the act.

EVIDENCE OF THE CASE

The Claimant's widow testified that she was married to Edmund Dillon for nine or ten years. Hr'g Tr. 17. She denied that the Claimant had any other individuals dependent upon him other than herself. Hr'g Tr. 18. She testified that in the months leading up to the accident that she had not noticed any changes in his behavior or appearance Hr'g Tr. 19. She testified that she was never able to speak with the Claimant after the accident because he was unconscious when she

got to the hospital. Hr'g Tr. 20. She testified that she is asking the Commission to find the death compensable under the workers' compensation act. Hr'g Tr. 21.

Upon cross-examination, the Claimant's widow testified that she and her husband did not see much of each other due to their work schedules. Hr'g Tr. 24-25. She testified that she had not noticed his jaundiced color until she saw him in the hospital. Hr'g Tr. 24. Further, she admitted that the Claimant drank alcohol but that she was not aware of the quantity of alcohol. Hr'g Tr. 24.

Frederick Allen Mogridge appeared and testified for the defense. Mr. Mogridge testified to being a fellow employee at FleetPride with the Claimant. Hr'g Tr. 27. In addition to working at FleetPride for twenty-three years, the witness testified to having worked for a volunteer rescue squad in the past. Hr'g Tr. 27-28.

Mr. Mogridge testified that he had known the Claimant for about twenty-five years and that they were friends Hr'g Tr. 28. He testified that while they had a working relationship that they also had a personal relationship. Hr'g Tr. 29. He stated that they worked together on a daily basis at FleetPride. Hr'g Tr. 29. He testified that he had noticed the health of the Claimant leading up to the date of injury. He testified that the Claimant had some health issues in the months prior to the fall. Hr'g Tr. 29. Mr. Mogridge testified that he noticed the Claimant's color had changed and that he was losing weight. Hr'g Tr. 29. In addition, he testified that the Claimant was slow moving and had some problems with his body control, particularly his bowel control. Hr'g Tr. 30.

Mr. Mogridge testified that on the day of the fall that he had been inside and, therefore, did not witness the fall but was notified by Josiah Fludd that the Claimant had fallen. Hr'g Tr. 31-34. He testified that when he came outside that he found the Claimant on the ground bleeding

from his head. Hr'g Tr. 31-34. He further testified that the Claimant was unconscious when he found him. Hr'g Tr. 34. Mr. Mogride called an ambulance and forced the Claimant to go to the hospital, against the wishes of the Claimant. Hr'g Tr. 31-34.

On cross-examination, Mr. Mogride did admit that it had been raining earlier that morning, but denied that it was raining hard at the time of the accident. Hr'g Tr. 34-37. Mr. Mogride also admitted on cross-examination that neither he nor any supervisor told the Claimant that he could not come into work or sent him to see someone due to his health. Hr'g Tr. 38-39. He asked Claimant to seek medical help, but the Claimant told him to mind his own business. Hr'g Tr. 38-39.

Employer representative Eugene Lane also appeared and testified. On direct examination, he testified that he was out of town on the date of the accident. Hr'g Tr. 44. However, he testified that he had known the Claimant for twenty-five to thirty years and had been in his wedding. Hr'g Tr. 41. Mr. Lane testified that he had noticed the Claimant's health deteriorating over the months leading up to the accident. Hr'g Tr. 41-42. Specifically, he noted that the Claimant had lost a lot of weight and had become slow moving. Hr'g Tr. 42. However, he testified that the Claimant was a private individual and did not discuss his health with his friends. Hr'g Tr. 42.

FINDINGS OF FACT

After reviewing the evidentiary submissions and listening to the Claimant's testimony and the witness testimony, the following Findings of Fact are rendered:

1. The Claimant's death subsequent to a collapse at work did not arise of out of his employment and therefore his injury is not compensable.

2. The Claimant was at work on the morning of February 23, 2015. While at work, he was injured when he fell. The Claimant was transported by Richland County EMS to Palmetto Health Richland where he was hospitalized.

3. There is no dispute that the Claimant's death on February 27, 2015 resulted from injuries he received when he hit his head in the fall on February 23, 2015.

4. It is the Defendants' position that the Claimant suffered from many conditions, including Anemia, Thrombocytopenia (low platelet count), Hypokalemia (low potassium), Hyponatremia, Liver Disease, and severe dehydration.

5. The medical records indicate the Claimant had a problem with alcohol.

6. As to the Claimant's medical history, a medical record from Kershaw County Medical Center dated February 4, 1994, reports that the Claimant got up to go to the bathroom, had a coughing spell, felt dizzy and passed out hitting his head.

7. The medical note of Dr. Mark Jones/Dr. David T. Ford on February 23, 2015 (date of injury) reports that the Claimant reported that he slipped and fell hitting the back of his head. Claimant also reported that he had not felt well for the last several days, had not been eating well and that he did notice that his skin had changed color (medical records from that day report that he was jaundiced). He also reported that he had been vomiting and had diarrhea; and had not felt well that day.

8. On the day of his fall, the Claimant reported that he slipped and fell. He also reported that he did not lose consciousness.

9. The EDS report of the transport indicates that the Claimant was alert when they arrived, but that during transport his condition declined.

10. Sadly, the Claimant's physical condition deteriorated over the next four days; and on February 27, 2015, the Claimant succumbed.

11. The Amended Death Certificate, which is part of the record, lists the cause of death as "cardiopulmonary failure, subdural hematoma with mass effect, subarachnoid hemorrhage."

12. The question at bar – as to a determination of compensability - is whether the Claimant slipped and fell which is what he indicated to medical professionals on the day of his injury; or did he simply collapse and hit his head?

13. In either instance, that fall and the resulting head injury is the cause of death. That fact is not in dispute.

14. The Claimant was outside on break when he fell/collapsed.

15. While there was initially some confusion as to whether the Claimant was on a ladder and fell from that ladder, both parties agree that he was not on a ladder and his fall/collapse occurred while he was standing on the ground.

16. Josiah Fludd was a witness to the fall/collapse. The parties took Mr. Fludd's deposition on 10/15/15.

17. Mr. Fludd testified that, on that day, the Claimant was standing on the sidewalk beside Mr. Fludd's truck.

18. Mr. Fludd testified that he saw the Claimant collapse. He also testified that the Claimant did not try to break his fall nor did he attempt to brace himself in anyway.

19. Mr. Fludd testified that the Claimant fell backwards.

20. He further testified that the Claimant was not walking at the time; and he did not see the Claimant slip.

21. On cross-examination Mr. Fludd testified that he could not see all of the Claimant's legs, but he could see his thighs.

22. While Mr. Fludd could not testify as to whether the Claimant slipped, he did testify that the Claimant's thighs were stationary.

23. We have read Mr. Fludd's deposition in its entirety. Mr. Fludd is simply a witness to the event. He does not stand to gain or lose based on his testimony in this case. We give his testimony great weight.

24. When considering the record as a whole, we are not persuaded that the Claimant slipped or tripped.

25. We find that the Claimant simply collapsed. A review of the Claimant's medical history gives us insight as to why this could occur. There is medical evidence that the Claimant suffered from numerous conditions peculiar to him that could result in such an event.

26. This is a denied claim. The burden to prove there was a compensable injury rests with the Claimant. He must prove by a preponderance of the evidence that he indeed did slip and fall.

27. Here the Defendants have presented a persuasive case as to idiopathic injury which has no nexus to his work.

28. At the time of this event, the Claimant was on break outside. The Defendants presented a witness that observed the event. While his line of sight was somewhat obstructed, he could see the Claimant from the head down to his thighs. This witness describes the event – he sees the Claimant falling backwards without any flailing or any attempt to break his fall. The witness describes an event that took place from a stationary position. He testified that the Claimant was unconscious. The Claimant stated to medical personnel that he did not lose consciousness. Candidly, whether he was conscious or unconscious is not dispositive of whether he slipped or just collapsed.

29. In this case, we are persuaded by the greater weight of the evidence that the Claimant suffered an idiopathic fall. The description of the event which the Claimant provided was given after he sufferd an event so significant that it will lead to his death. It is also clear from the medical evidence that the Claimant was – prior to the fall – suffering from compromising medical conditions. The Claimant's statements at the time of his injury must be viewed through the lens of the events that day and his general physical condition on that day as well.

30. The Claimant's statement as to mechanism of injury must be viewed juxtaposed to the testimony of Mr. Fludd with consideration for the Claimant's general physical health at the time.

31. This case is distinguishable from *Nicholson* and *Barnes*. Here *Bagwell v. Ernest Burnwell, Inc.* is on point. The fact pattern in that case and this case are very similar. In *Bagwell*, there was an eyewitness who saw the employee fall backward rigidly without attempting to brace the fall. The Court stated in *Bagwell* that being at work was not enough to justify an award, but it must be shown "either that the cause of the fall or the resulting injury bore some special relation to his work or to the conditions under which it was performed." The Court further noted that "while the cause of [the employee's] fall may be unexplained, the circumstances of his fall are fully covered by the testimony of eyewitnesses." *Nicholson* and *Barnes* are different in that in *Nicholson*, the employee's foot caught on the carpet. The Court held that the employee did not fall due to a condition peculiar to her but fell as a result of tripping on the carpet. In *Barnes*, the injured employee was hurrying to check her email and fell. There was no evidence that there was an internal breakdown causing the fall, so the Court found the injury compensable regardless of whether she tripped over herself or the carpet. This case

here is directly on point with *Bagwell* in that there is evidence of an internal breakdown and there is an uninterested witness attesting to the facts of the Claimant passing out.

32. Given the totality of the evidence, the Claimant has failed to meet his burden. As such, the claim is dismissed with prejudice. The parties stipulated by consent at the appellate hearing that the amended and revised order will be the language reviewed by the Panel.

CONCLUSIONS OF LAW

Accordingly, as provided in S.C. Code Ann. § 42-17-40 of the S.C. Code Ann., it is the determination of this Commission that:

1. The burden of proof applicable to a claim for workers' compensation benefits is the preponderance of the evidence. The Claimant must establish by preponderance of the evidence the facts that will entitle him to an award under the workers' compensation Act. *Walsh v. U.S. Rubber Co.*, 120 S.E.2d 685 (1961);

2. Under S.C. Code Ann. § 42-1-130, the Claimant was a covered Employee at the time of his accident dated February 23, 2015;

3. Under S.C. Code Ann. § 42-1-140, the Defendant/Employer was a covered Employer under the Act on February 23, 2015;

4. Under S.C. Code Ann. § 42-1-160, the Claimant must show the he sustained an injury by accident arising out of and in the course and scope of employment in order to be entitled to benefits;

5. Pursuant to S.C. Code Ann. § 42-1-160, the Claimant has failed to show by a preponderance of the evidence a compensable death by accident. This conclusion is based on Finding of Fact Nos. 16 – 31.

6. The Claimant merely suffered an idiopathic fall due to pre-existing unrelated medical issues as described in the medical records and through witness testimony. This conclusion of law is based upon Finding of Fact Nos. 28 – 30.

7. Therefore, since the Claimant has failed to meet the burden, this claim is dismissed with prejudice. This conclusion of law is based upon Finding of Fact No. 32.

ORDER

Based on the foregoing Findings of Fact and Conclusions of Law:

IT IS HEREBY ORDERED that the Order of the Hearing Commissioner filed in the above-captioned matter on February 2, 2017, is hereby Affirmed with Amendments to correct scrivener's errors, including the proper APA submissions to the Single Commissioner, by the Full Commission Appellate Panel. The Claimant for a compensable injury by accident is denied in its entirety.

AND IT IS SO ORDERED.

SOUTH CAROLINA WORKERS' COMPENSATION COMMISSION

Scott T. Beck, Commissioner
On Behalf of the Appellate Panel

FULL AFFIRMATION

Concur:

Susan S. Barden, Commissioner

Aisha Taylor, Commissioner

CERTIFICATE OF SERVICE

This is to certify that the undersigned has on this date served a copy of this order in the above entitled action upon all parties to this case by sending an electronic copy hereof by electronic mail addressed to the attorneys for said parties; or if there is an unrepresented party(ies), by depositing a copy hereof, postage paid in the United States mail, first class, addressed to the unrepresented party(ies) and to the attorney(s) for the represented party(ies).

DECISION AND ORDER

HEARING:	Held in Columbia, South Carolina on August 30, 2016, before Commissioner Gene McCaskill.
APPEARANCES:	Claimant represented by Brian Dumas, Esquire, of Brian Dumas Attorney, LLC, of Columbia, South Carolina.
	Defendants represented by Cynthia C. Dooley, Esquire and Samuel V. Priddy IV, Esquire of Turner Padget Graham & Laney P.A., of Columbia, South Carolina.
PURPOSE OF HEARING:	To determine the issues as set forth on Forms 52 and 53, and any other issues which may have timely come before the Commissioner.
DECISION AND ORDER:	Gene McCaskill, S.C. Workers' Compensation Commissioner.
FILED:	February 2, 2016.

STIPULATIONS

Counsel for all parties stipulated at the hearing to the following issues:

1. The purpose of the hearing was to determine the issues as set forth in Forms 52 and 53 and any other issues which may have timely come before the Commission.

2. Notice of the hearing was timely and properly served upon all parties of interest.

3. Venue set in Richland County, South Carolina is proper and was agreed upon by all parties.

4. Claimant's average weekly wage and compensation rate are $1,263.35 and $766.05, respectively.

5. Claimant seeks benefits under the South Carolina Workers' Compensation Act based upon an alleged injury which occurred on February 23, 2015, while employed by the Employer and, therefore, the South Carolina Workers' Compensation Commission has jurisdiction of this case.

STATEMENT OF THE CASE

This claim arose when the Claimant fell to the ground, hit his head, and suffered injuries that ultimately caused the Claimant to pass away on February 27, 2015. The Claimant is seeking benefits for a compensable death claim.

Claimant contends that this was a work related accident resulting from a slip and fall accident that resulted in a death that is fully compensable. The Claimant contends that the medical records and the statements made by the Claimant after falling and hitting his head should be given great weight and that the resulting death should be found to be fully compensable. Claimant contends that their medical expert report from Dr. Michael Sribnick shows that the Claimant was not suffering from any medical issues personal to him that would cause him to collapse.

Claimant contends that this case is comparable to and covered under Nicholson v. SCDSS, 411 S.C. 391, 769 S.E.2d 1 (2015), Barnes v. Chapter 1 Realty, 411 S.C. 391, 768 S.E.2d 651 (2015), and Thomas v. Five Star Transportation, 412 S.E. 1, 770 S.E.2d 183 (Ct. App. 2015).

Defendants deny that this is a compensable death claim. Defendants contend that the medical records show that the Claimant was a very sick individual, who suffered from Anemia, Thrombocytopenia (low platelet count), Low potassium (hypokalemia), Hyponatremia, and liver disease among other issues. Defendants contend that the Claimant was an alcoholic who was suffering from diarrhea, vomiting and fatigue prior to the alleged accident date. Defendants contend that their expert report from Dr. Vandersteenhoven shows that the Claimant passed out as a result of conditions peculiar to the Claimant, and, therefore, this is a non-compensable idiopathic fall.

Defendants contend that the Clamant merely collapsed while at work and that the collapse was not causally related to the Claimant's employment. In addition, Defendants argue that the one eye-witness to the claim, Mr. Josiah Fludd, witnessed the event from start to finish. Mr. Fludd testified in his deposition that the Claimant was outside when the fall occurred. He testified that the Claimant was standing still when he fell to the ground without attempting to catch himself or break his fall. Mr. Fludd testified and signed an affidavit that the Claimant collapsed.

Defendants contend, and submitted a medical expert report, that the Claimant collapsed at work but that the fall was idiopathic. Defendants cite *Bagwell v. Ernest Burnwell, Inc.*, 227 S.C. 444, 88 S.E.2d 611 (1955) as authority that an idiopathic fall is not compensable under the Act.

Defendants argue that this claim is on point with *Bagwell*, and, therefore, the Claimant's death is not compensable under the act.

EVIDENCE OF THE CASE

The Claimant's widow testified that she was married to Edmund Dillon for nine or ten years. Hr'g Tr. 17. She denied that the Claimant had any other individuals dependent upon him other than herself. Hr'g Tr. 18. She testified that in the months leading up to the accident that she had not noticed any changes in his behavior or appearance Hr'g Tr. 19. She testified that she was never able to speak with the Claimant after the accident because he was unconscious when she got to the hospital. Hr'g Tr. 20. She testified that she is asking the Commission to find the death compensable under the workers' compensation act. Hr'g Tr. 21.

Upon cross-examination, the Claimant's widow testified that she and her husband did not see much of each other due to their work schedules. Hr'g Tr. 24-25. She testified that she had not noticed his jaundice color until she saw him in the hospital. Hr'g Tr. 24. Further, she admitted that the Claimant drank alcohol but that she was not aware of the quantity of alcohol. Hr'g Tr. 24.

Frederick Allen Mogridge appeared and testified for the defense. Mr. Mogridge testified to being a fellow employee at FleetPride with the Claimant. Hr'g Tr. 27. In addition to working at FleetPride for twenty-three years, the witness testified to having worked for a volunteer rescue squad in the past. Hr'g Tr. 27-28.

Mr. Mogridge testified that he had known the Claimant for about twenty-five years and that they were friends Hr'g Tr. 28. He testified that whiles they had a working relationship that they also had a personal relationship. Hr'g Tr. 29. He stated that they worked together on a daily basis at FleetPride. Hr'g Tr. 29. He testified that he had noticed the health of the Claimant

leading up to the date of injury. He testified that the Claimant had some health issues in the months prior to the fall. Hr'g Tr. 29. Mr. Mogridge testified that he noticed the Claimant's color had changed and that he was losing weight. Hr'g Tr. 29. In addition, he testified that the Claimant was slow moving and had some problems with his body control, particularly his bowel control. Hr'g Tr. 30.

Mr. Mogridge testified that on the day of the fall that he had been inside and, therefore, did not witness the fall but was notified by Josiah Fludd that the Claimant had fallen. Hr'g Tr. 31-34. He testified that when he came outside that he found the Claimant on the ground bleeding from his head. Hr'g Tr. 31-34. He further testified that the Claimant was unconscious when he found him. Hr'g Tr. 34. Mr. Mogride called an ambulance and forced the Claimant to go to the hospital, against the wishes of the Claimant. Hr'g Tr. 31-34.

On cross-examination, Mr. Mogride Mr. Mogride did admit that it had been raining earlier that morning, but denied that it was raining hard at the time of the accident. Hr'g Tr. 34-37. Mr. Mogride also admitted on cross-examination that neither he nor any supervisor told the Claimant that he could not come into work or sent him to see someone due to his health. Hr'g Tr. 38-39. He asked Claimant to seek medical help, but the Claimant told him to mind his own business. Hr'g Tr. 38-39.

Employer representative Eugene Lane also appeared and testified. On direct examination, he testified that he was out of town on the date of the accident. Hr'g Tr. 44. However, he testified that he had known the Claimant for twenty-five to thirty years and had been in his wedding. Hr'g Tr. 41. Mr. Lane testified that he had noticed the Claimant's health deteriorating over the months leading up to the accident. Hr'g Tr. 41-42. Specifically, he noted that the Claimant had lost a lot

of weight and had become slow moving. Hr'g Tr. 42. However, he testified that the Claimant was a private individual and did not discuss his health with his friends. Hr'g Tr. 42.

FINDINGS OF FACT

After reviewing the evidentiary submissions and listening to the Claimant's testimony and the witness testimony, the following Findings of Fact are rendered:

1. The Claimant's death subsequent to a collapse at work did not arise of out of his employment and therefore his injury is not compensable?

2. The Claimant was at work on the morning of February 23, 2015. While at work, he was injured when he fell. The Claimant was transported by Richland County EMS to Palmetto Health Richland where he was hospitalized.

3. There is no dispute that the Claimant's death on February 27, 2015 resulted from injuries he received when he hit his head in the fall on February 23, 2015.

4. It is the Defendant's position that the Claimant suffered from many conditions, including Anemia, Thrombocytopenia (low platelet count), Hypokalemia (low potassium), Hyponatremia, Liver Disease, and severe dehydration.

5. The medical records indicate the Claimant had a problem with alcohol.

6. As to the Claimant's medical history, a medical record from Kershaw County Medical Center dated February 4, 1994 reports that the Claimant got up to go to the bathroom, had a coughing spell, felt dizzy and passed out hitting his head.

7. The medical note of Dr. Mark Jones/Dr. David T. Ford on February 23, 2015 (date of injury) reports that the Claimant reported that he slipped and fell hitting the back of his head. Claimant also reported that he had not felt well for the last several days, had not been eating well and that he did notice that his skin had changed color (medical records from that day

report that he was jaundice). He also reported that he had been vomiting and had diarrhea; and had not felt well that day.

8. On the day of his fall, the Claimant reported that he slipped and fell. He also reported that he did not lose consciousness.

9. The EDS report of the transport indicates that the Claimant was alert when they arrived, but that during transport his condition declined.

10. Sadly, the Claimant's physical condition deteriorated over the next four days; and on February 27, 2015, the Claimant succumbed.

11. The Amended Death certificate, which is part of the record, lists the cause of death as "cardiopulmonary failure, subdural hematoma with mass effect, subarachnoid hemorrhage."

12. The question at bar – as to a determination of compensability - is whether the Claimant slipped and fell which is what he indicated to medical professionals on the day of his injury; or did he simply collapse and hit his head?

13. In either instance, that fall and the resulting head injury is the cause of death. That fact is not in dispute.

14. The Claimant was outside on break when he fell/collapsed.

15. While there was initially some confusion as to whether the Claimant was on a ladder and fell from that ladder, both parties agree that he was not on a ladder and his fall/collapse occurred while he was standing on the ground.

16. Josiah Fludd was a witness to the fall/collapse. The parties took Mr. Fludd's deposition on 10/15/15.

17. Mr. Fludd testified that, on that day, the Claimant was standing on the sidewalk beside Mr. Fludd's truck.

18. Mr. Fludd testified that he saw the Claimant collapse. He also testified that the Claimant did not try to break his fall nor did he attempt to brace himself in anyway.

19. Mr. Fludd testified that the Claimant fell backwards.

20. He further testified that the Claimant was not walking at the time; and he did not see the Claimant slip.

21. On cross-examination Mr. Fludd testified that he could not see all of the Claimant's legs; but he could see his thighs.

22. While Mr. Fludd could not testify as to whether the Claimant slipped, he did testify that the Claimant's thighs were stationary.

23. I have read Mr. Fludd's deposition in its entirety. Mr. Fludd is simply a witness to the event. He does not stand to gain or lose based on his testimony in this case. I give his testimony great weight.

24. When I consider the record as a whole, I am not persuaded that the Claimant slipped or tripped.

25. I find that the Claimant simply collapsed. A review of the Claimant's medical history gives us insight as to why this could occur. There is medical evidence that the Claimant suffered from numerous conditions peculiar to him that could result in such an event.

26. This is a denied claim. The burden to prove there was a compensable injury rests with the Claimant. He must prove by a preponderance of the evidence that he indeed did slip and fall.

27. Here the Defendants have presented a persuasive case as to idiopathic injury which has no nexus to his work.

28. At the time of this event, the Claimant was on break outside. The Defendants presented a witness that observed the event. While his line of sight is somewhat obstructed, he can see the Claimant from the head down to his thighs. This witness describes the event – he sees the Claimant falling backwards without any flailing or any attempt to break his fall. The witness describes an event that took place from a stationary position. He testified that the Claimant was unconscious. The Claimant stated to medical personnel that he did not lose consciousness. Candidly, whether he was conscious or unconscious is not dispositive of whether he slipped or just collapsed.

29. In this case, I am persuaded by the greater weight of the evidence that the Claimant suffered an idiopathic fall. The description of the event which the Claimant provides is given after he suffers an event so significant that it will lead to his death. It is also clear from the medical evidence that the Claimant is – prior to the fall – suffering from compromising medical conditions. The Claimant's statements at the time of his injury must be viewed through the lens of the events that day and his general physical condition on that day as well.

30. The Claimant's statement as to mechanism of injury must be viewed juxtaposed to the testimony of Mr. Fludd with consideration for the Claimant's general physical health at the time.

31. This case is distinguishable from *Nicholson* and *Barnes*. Here *Bagwell v. Ernest Burnwell, Inc.* is on point. The fact pattern in that case and this case are very similar. In Bagwell, there was an eyewitness who saw the employee fall backward rigidly without attempting to brace the fall. The Court stated in Bagwell that being at work was not enough to

justify an award, but it must be shown "either that the cause of the fall or the resulting injury bore some special relation to his work or to the conditions under which it was performed." The Court further noted that "while the cause of [the employee's] fall may be unexplained, the circumstances of his fall are fully covered by the testimony of eyewitnesses." *Nicholson* and *Barnes* are different in that in *Nicholson*, the employee's foot caught on the carpet. The Court held that the employee did not fall due to a condition peculiar to her but fell as a result of tripping on the carpet. In *Barnes*, the injured employee was hurrying to check her email and fell. There was no evidence that there was an internal breakdown causing the fall, so the Court found the injury compensable regardless of whether she tripped over herself or the carpet. This case here is directly on point with *Bagwell* in that there is evidence of an internal breakdown and there is an uninterested witness attesting to the facts of the Claimant passing out.

32. Given the totality of the evidence, the Claimant has failed to meet his burden. As such, the claim is dismissed with prejudice.

CONCLUSIONS OF LAW

Accordingly, as provided in S.C. Code Ann. § 42-17-40 of the S.C. Code Ann., it is the determination of this Commissioner that:

1. The burden of proof applicable to a claim for workers' compensation benefits is the preponderance of the evidence. The Claimant must establish by preponderance of the evidence the facts that will entitle him to an award under the workers' compensation Act. *Walsh v. U.S. Rubber Co.*, 120 S.E.2d 685 (1961);

2. Under S.C. Code Ann. § 42-1-130, the Claimant was a covered Employee at the time of his accident dated February 23, 2015;

3. Under S.C. Code Ann. § 42-1-140, the Defendant/Employer was a covered Employer under the Act on February 23, 2015;

4. Under S.C. Code Ann. § 42-1-160, the Claimant must show the he sustained an injury by accident arising out of and in the course and scope of employment in order to be entitled to benefits;

5. Pursuant to S.C. Code Ann. § 42-1-160, the Claimant has failed to show by a preponderance of the evidence a compensable death by accident. This conclusion is based on Finding of Fact Nos. 16 – 31.

6. The Claimant merely suffered an idiopathic fall due to pre-existing unrelated medical issues as described in the medical records and through witness testimony. This conclusion of law is based upon Finding of Fact Nos. 28 – 30.

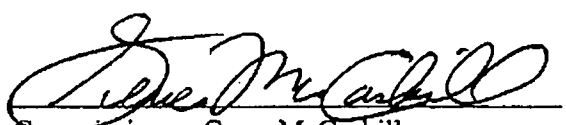
7. Therefore, since the Claimant has failed to meet the burden, this claim is dismissed with prejudice. This conclusion of law is based upon Finding of Fact No. 32.

AWARD

Based upon the foregoing Findings of Fact and Conclusions of Law, it is **HEREBY ORDERED:**

1. The Claimant's claim for benefits is denied.
2. This claim is dismissed with prejudice.
3. No hearing costs are assessed.

IT IS SO ORDERED.



Commissioner Gene McCaskill

CERTIFICATE OF SERVICE

This is to certify that the undersigned has on this date served a copy of this order in the above entitled action upon all parties to this case by sending an electronic copy hereof by electronic mail addressed to the attorneys for said parties; or if there is an unrepresented party(ies), by depositing a copy hereof, postage paid, in the United States mail, first class, addressed to the unrepresented party(ies) and to the attorney(s) for the represented party(ies).

A claim for workers' compensation death benefits is made based on the following grounds:

The Claimant is April Dillon Wife of Edmund John Dillon (employee's name)

1. The employee sustained an accidental injury to the head on February 23, 2015 in Richland County, State of SC.
2. Both the employee and the employer were subject to the South Carolina Workers' Compensation Act at the time of injury.
3. The relationship of employer and employee existed at the time of injury.
4. At the time of the injury the employee was performing services arising out of and in the course of employment.
5. Notice of the accidental injury was given to the employer on 02/23/15 (Month Day Year) in the following manner:
   Employer traveled with employee to hospital
6. ☐ Due to injury, the employee received medical examination and treatment which remains unpaid by the employer.
7. ☐ Due to injury, the employee lost compensable time from work and wages for the periods of:
8. ☒ The employee died on February 27, 2015 as a result of the accidental injury, and death compensation is claimed.
9. At the time of the injury, the employee was paid weekly wages of $Form 20 requested. The claimant demands an accounting of days worked and wages earned as provided by law.
10. Further grounds of claim:
11. Appropriate benefits as provided in the Act for the above grounds and other relief as the Workers' Compensation Commission may direct as just and proper.

☒ 12a. **I am filing a claim. I am not requesting a hearing at this time.**

☐ 12b. **I am requesting a hearing. A $25 fee is required.**

☐ **Mediation**

- ☐a. Mediation is requested to be ordered pursuant to Reg. 67-1801 B.
- ☐b. Mediation is required pursuant to Reg. 67-1802.
- ☐c. Mediation is requested by consent of the Parties pursuant to Reg. 67-1803.
- ☐d. Mediation has been conducted by a duly qualified mediator and resulted in an impasse.

Questions regarding mediation may be submitted to mediation@wcc.sc.gov.

Complete each information blank. Specify clearly when contentions are admitted in part or denied in part.

The employer-insurance carrier in answer to the claim due to the death of Edmund Dillon, Dec'd (employee's name) **respectfully shows:**

1. It is ☐ admitted ☒ denied that the employee sustained an injury on or about the date set forth in the application.
2. It is ☐ admitted ☒ denied that both the employer and employee were subject to the Workers' Compensation Act at the time in question. The reasons for denial are: Defendants deny and dispute that the Claimant sustained a compensable injury/death and argue that there is insufficient factual and medical evidence to establish compensability underneath the South Carolina Workers' Compensation Act.
3. It is ☐ admitted ☒ denied that the relationship of employer and employee existed at the time in question. The reasons for denial are: Defendants deny and dispute that the Claimant sustained a compensable injury/death and argue that there is insufficient factual and medical evidence to establish compensability underneath the South Carolina Workers' Compensation Act.
4. It is ☐ admitted ☒ denied that at the time in question the employee was performing services arising out of and in the course of employment.
5. It is ☐ admitted ☒ denied that notice of injury was given the employer as specified in the application.
6. It is ☐ admitted ☒ denied that the employee was entitled to medical care as a result of the injury.
7. It is ☐ admitted ☒ denied that the employee lost compensable time from work and wages for period(s) of:
8. It is ☐ admitted ☒ denied that the employee's death resulted proximately from accidental injury arising out of and in the course of employment on ___ (m/d/yyyy).
9. It is contended that an average weekly wage of $1,263.35 applies, according to the attached accounting of employee's earnings, as provided by law.
10. Further contentions or grounds of defense are: Discovery is ongoing and Defendants reserve the right to amend and complete additional defenses including but not limited to special and affirmative defenses. Defendants assert an intoxication defense and reserve their right to amend accordingly.

☐ **Mediation**

- ☐ a. Mediation is requested to be ordered pursuant to Reg. 67-1801 B.
- ☒ b. Mediation is required pursuant to Reg. 67-1802.

A claim for workers' compensation benefits is made based on the following grounds:
☐ Injury ☐ Illness ☐ Repetitive Trauma

1. Compensation Rate: $766.05 2. AWW: $1263.35 **Date of Injury:** 2/23/15
3. Type of injury and body part(s): Injury to head resulting in death during the course of employment.
4. Facts in controversy: Whether Claimant's fall at work was due to a condition peculiar to him
5. Legal issues involved: Was the Claimant's fall at work which resulted in his death causally connected to his work?
   Nicholson v DSS, 411 SC 381, 769 SE 2d 1 (2015); Barnes v Charter 1 Realty, 411 SC 391, 768 SE 2d 651 (2015)
   Thomas v. 5 Star Transportation, 412 SC 1, 770 SE 2d 183 (SC Ct. App. 2015) and Appellate Panel review of cases using those cases
6. Unusual aspects:
7. Witnesses (designate if expert):* Claimant's widow;
   Expert reports and records are contained in APA submissions to be presented; Claimant reserves the right to cross examine any expert designated by the Carrier/Employer.; **Claimant reserves the right to amend the Pre-Hearing Brief upon receipt of additional information.**
8. Exhibits: Death Certificate, Amended Death Certificate, medical records and bills and death expenses, OSHA Citation, Form 20,
   Certified Weather Report for day of injury, photographs of location of Claimant's fall
9. Medical evidence (indicate report pursuant to R.67-612; deposition or appearance):
   SEE APA SUBMISSIONS including LNC Report and MD Report pursuant to R. 67-612
10. Name, address, and specialty, if any, of the treating physician: Palmetto Health Richland
11. Impairment rating(s); body part(s); physician and date of opinion: DEATH due to head injury
12. I am amending my Form 50/51 in the following manner:

☐ **Mediation**
- ☐a. Mediation is requested to be ordered pursuant to Reg. 67-1801 B.
- ☐b. Mediation is required pursuant to Reg. 67-1802.
- ☐c. Mediation is requested by consent of the Parties pursuant to Reg. 67-1803.
- ☒d. Mediation has been conducted by a duly qualified mediator and resulted in an impasse.

Questions regarding mediation may be submitted to mediation@wcc.sc.gov.

I certify I have served this document pursuant to Reg. 67-211 by delivering a copy to Samuel V. Priddy, IV and Cynthia Dooley, Turner Padget Graham & Laney, PA, PO Box 1473, Columbia, SC 29202 on the 25 day of May 2016, by ☒ first class postage ☐ certified mail ☐ personal service.

Signature: [signature]
Email: brian@briandumasattorney.com
Date of hearing: June 10, 2016
Time needed for hearing: 1 ½ hours

Questions about the use of this form should be directed to the Jurisdictional Commissioner. Refer to Regulations 67-204 through 67-211 and Regulations 67-601 through 67-615; as well as Regulation 67- 1801. File this form and proof of service on the opposing party according to R.67-611 and R.67-212. Do not send medical reports. * Commissioners reserve the right to admit expert witnesses at hearings.

PRE-HEARING BRIEF

STATE OF SOUTH CAROLINA
COUNTY OF RICHLAND

BEFORE THE SOUTH CAROLINA WORKERS' COMPENSATION COMMISSION

Edmond John Dillon, Dec'd
Claimant,

WCC FILE #: 1501382

vs.

Raffles (FleetPride)
Employer.
_____/

APA SUBMISSIONS *and*
NOTICE OF WITNESSES

TO: SOUTH CAROLINA WORKERS' COMPENSATION COMMISSION AND CYNTHIA DOOLEY and SAMUEL PRIDDY,IV, ATTORNEYS FOR EMPLOYER/CARRIER:

YOU ARE HEREBY NOTIFIED that the Claimant, pursuant to the provisions of the South Carolina Workers Compensation Act and the South Carolina Code of Laws, 1976, as amended, Section 1-23-330, and such regulations issued pursuant thereto, will move at such time as this case is heard before the Commission for the admission of the following reports as direct evidence, to wit:

	MEDICAL EVIDENCE OR OTHER EVIDENCE	PHYSICIAN	DATES	PAGES
1	Kershaw County Memorial Hospital	Guy Kahler, MD	02/04/1994	1-9
2	Richland County EMS	Matthew Gottlieb, EMT-P	02/23/15	10-12
3	Palmetto Health Richland	Dr. Mark Jones	02/23/15 - 02/27/15	13-47

CONDITIONS OF TREATMENT AND/OR SERVICES

CONSENT TO TREATMENT: I hereby authorize Kershaw County Memorial Hospital, my physician, a physician designated by him/her or with whomever he/she may designate as his/her assistant to render medical treatment to me. I consent to any hospital care which encompasses laboratory, diagnostic or medical treatment which my physician or his/her assistant may deem necessary during my hospitalization. If I am an Obstetrical patient admitted to the hospital for the delivery of my baby, I consent to hospital care of my infant(s) encompassing routine diagnostic procedures and medical treatment. TO PROTECT MYSELF AND OTHERS, I also give permission to have blood drawn and tested for infectious diseases including, but not limited to HIV (AIDS VIRUS) and Hepatitis B.

PERSONAL VALUABLES: Kershaw County Memorial Hospital will not be responsible for money, jewelry or other valuables of patients, unless they are deposited at the business office and a receipt obtained therefore. UNDER NO CIRCUMSTANCES WILL THE HOSPITAL BE LIABLE FOR PROPERTY OF PATIENTS.

ASSIGNMENT OF INSURANCE BENEFITS AND RELEASE OF INFORMATION: (1) I hereby authorize payment directly to Kershaw County Memorial Hospital, and to attending physicians, all benefits otherwise payable to me for this hospital stay by insurance companies or other agencies, such payments to be applied, first to this account, second, to amounts due on other accounts at Kershaw County Memorial Hospital, for which I am responsible, and third, any excess payment after all accounts at Kershaw County Memorial Hospital have been paid in full will be refunded to me in compliance with the refund schedule established by Kershaw County Memorial Hospital; (2) If an allowance is made on this account for estimated insurance payments and the insurance company or companies does not make payment within 60 days of discharge or pays an amount less than the amount allowed, I will make immediate payment of the balance due on this account; (3) I will pay an advance fee for each insurance claim filed by the hospital where complete insurance information is not furnished to the hospital prior to the patient's discharge. I understand that I am financially responsible to the hospital for any charges not covered by this assignment.

AUTHORIZATION FOR RELEASE OF MEDICAL INFORMATION: I/We hereby authorize Kershaw County Memorial Hospital to furnish any medical information requested by insurance companies with whom I/We have coverage or any public agency which may be assisting in payment for my care.

AUTHORIZATION TO DISCLOSE INFORMATION: I authorize Kershaw County Memorial Hospital, and all attending physicians to release to the Social Security Administration, or its intermediaries or carriers, any information about me needed for this Medicare claim, including medical information relating to my treatment. Only information needed for the purpose of processing my claim for Medical benefits may be released.

COLLECTION FEES: I/We further agree if this account is placed in the hands of an attorney for collection, or if this debt, or any part thereof, is collected by an attorney or by legal proceedings of any kind, an attorney's fee of 15% besides all costs and expenses incident upon such collection shall be added to the amount due and shall be collectible as a part thereof.

I also authorize the release of medical and related information about my treatment to the Peer Review Organization responsible for reviewing the medical care furnished me by your institution.

I understand that health care services paid for under Medicare and industrial programs may be subject to review by the Peer Review Organization.

I reserve the right to withdraw this authorization at any time.

I understand that my company's hospital insurance plan includes medical review and I hereby authorize the release of my hospital records for confidential review by the Peer Review Organization.

I CERTIFY THAT I HAVE READ (OR HAD READ TO ME) AND FULLY UNDERSTAND THE ABOVE.

INSTRUCTIONS TO THE PATIENT AFTER EMERGENCY CARE

268251 ROOM ERM

Date	Case #	Arrival Time	Discharge Time
	DILLON, EDMUND J	A.M. / P.M.	A.M. / P.M.

NOTE: The examination and treatment you have received have been rendered on an emergency basis only, and are not intended to be a substitute for or an option to provide complete medical care. Your follow-up doctor (named below) will receive a copy of your records and all test reports. It is important that you let him check you again, and that you report to him any new or remaining problems at that time, because it is impossible to recognize and treat all threats of injury or illness in a single Emergency Department visit. Meanwhile, FOLLOW THE INSTRUCTIONS BELOW as indicated to you.

☑ **GENERAL INSTRUCTIONS:**

Call to arrange an appointment at his office to see Dr. _____ in _____ days for follow-up care.

Tell the office receptionist you were seen in the Emergency Room. Call sooner if you think necessary. His phone: _____

Show this instruction sheet to your doctor. Until you see him:

- ☐ Follow label instructions for any prescription given by the Emergency Physician and take medications with you to doctor's office.
- ☐ The medication you received in the Emergency Room may hinder your ability to operate any automobile or other type of machinery.
- ☐ Avoid any use of the injured part.
- ☐ Allow only limited use of the part.
- ☐ You need not necessarily limit activity.

Aspirin for pain or fever is: ☐ OK to use. ☐ Not to be used.

Lab/X-Ray (emergency doctor's reading only. Radiologist will send final report to doctor doing follow-up care.) _____

Treatment rendered: _____

(Tetanus YES ☐ NO ☐ type: _____)

☐ **WOUND CARE** (cuts, abrasions, burns, etc.)

- Keep the dressings clean and dry.
- Elevate the wound to help relieve soreness and help speed wound healing.
- Despite the greatest care, any wound can be infected. If your wound becomes red, swollen, shows pus or red streaks, or feels more sore instead of less sore as days go by you must report to your doctor right away.
- If dressings need to be changed you should: Change them ☐ Call your doctor ☐

☑ **SPRAIN AND FRACTURE, SEVERE BRUISES**

- Elevate the injured part to lessen swelling.
- Ice packs also help prevent swelling, especially during the first 48 hours. Place ice in plastic or rubber bag, cloth cover.
- Apply hot packs after 48 hours of ice. Place hot moist towel on area, cover with plastic and a towel — leave on about 20 minutes or until cool; remove pack and leave off for 20 minutes. Repeat for 24 hours. Avoid heating pads.
- If you have an elastic bandage, rewrap it if it is too tight or loose.

☑ **HEAD INJURY INSTRUCTIONS**

- Problems from such injuries can occur sometime later.
- Report to your doctor immediately if anything listed occurs (even within several months).
- Uncontrollable vomiting, stiff neck, fever. (Vomiting once or twice is not uncommon.)
- Unequal pupils (one pupil large, one small.)
- Confusion or unusual drowsiness.
- Persistent headaches or blurred vision.
- Convulsions or unconsciousness.
- Stumbling or other problem with normal use of arms or legs or areas of skin numbness.
- Bleeding or clear fluid from ears or nose.

☐ NOTE: waken patient hourly first night to check for these signs.

☐ **CAST CARE**

- Keep cast dry at all times.
- Wait 48 hours for the cast to become strong before you allow pressure or weight on any part of the cast.
- Wriggle toes or fingers to help prevent swelling in the cast — this should be done often if it does not cause pain.
- If the part swells anyway or gets cold, blue, or numb, or if pain increases markedly, have it checked promptly by a doctor.

☐ **BACK AND NECK INJURY INSTRUCTIONS**

- Use heat or cold on the injury area — whichever seems to help the most. Be careful not to burn yourself.
- Rest as much as possible until you are improved.
- Avoid positions and movements that make the pain worse.
- Relax emotionally.
- Gentle but firm massage will increase circulation in sore muscles, and so will help to clear the soreness.

OTHER INSTRUCTIONS: _____

I hereby acknowledge receipt of the instructions indicated above. I understand that I have had emergency treatment only, and that I may be released before all of my medical problems are known or treated. I will arrange for follow-up care as instructed above.

Witness Initial _____ Date 2/4/94

Palliative Care Progress Note

Patient: DILLON, EDMUND MRN: R012719295 FIN: R1505401814
Age: Sex: Male DOB:
Associated Diagnoses: None
Author: Jenkins MD, Karin M

Basic Information
56-year-old Caucasian gentleman admitted with subdural hematoma and subarachnoid hemorrhage with midline shift status post craniotomy for subdural hematoma now intubated and unresponsive on the ventilator.

Daughter, Robin and sister at bedside. They confirmed they are waiting for family to arrive then will do terminal extubation. Pt appears comfortable, on fentanyl gtt. No grimace or anxiety. Becomes tachypnic at times, resolved with suctioning.

Impression and Plan
Subarachnoid hemorrhage with acute on chronic subdural hematoma status post emergent evacuation on 2/23 - unresponsive except to painful stimuli on the ventilator, not on any sedatives other than 1 dose fentany received this am. Patient with very poor prognosis, worsening head CT with enlarging Right frontal hemorrhage,

MRP Clinical Documentation

56-year-old Caucasian gentleman admitted with subdural hematoma and subarachnoid hemorrhage with midline shift status post craniotomy for subdural hematoma now intubated and unresponsive on the ventilator.

Chief Complaint

The palliative Care team was consulted to provide

(x) Help to establish and clarify goals of care
(x) Help with medical decision making
(x) Family Support
(x) Patient support
(x) Readdress or clarify choice of code status.
(x) Symptom Management

History of Present Illness

56-year-old Caucasian male with history of heavy alcohol abuse and skin cancer, possibly melanoma status post removal who was at work when he suffered a mechanical fall and developed increasing headache. He wanted to go back to work, but they would not allow him. In the emergency room the patient's neurologic status decompensated significantly. He required intubation. Head CT showed subdural hematoma, acute on chronic as well as subarachnoid hemorrhage. He underwent emergent craniotomy. Currently he is in the SSU, remains intubated. He is not sedated on any medications, he will withdrawal to painful stimuli in his hands and his feet, pupils are pinpoint probably minimally reactive. Daughter is at bedside and much of the history was obtained through her in the chart record.

Patient was also noted to be incredibly jaundiced on arrival. Per ER records the patient had been having nausea and vomiting as well as diarrhea, and has not been eating well for several days prior to his fall. Patient was severely dehydrated by urinalysis and labs. His sodium level on admission was 118 his LFTs were incredibly elevated with an AST much greater than ALT, and a bilirubin of 23.

The paliative care team was consulted to see this patient who is currently located in Room: 514

Participation: I personally saw and examined patient with the resident.
In addition to Care Plan, I manage the following:
Consultants.
Pain Contol.
DVT Prophylaxis: SCD's.
Glycemic Control.
Nutritional Support.
Stress Ulcer Prophylaxis.
Foley: Ongoing resuscitation.
Respiratory failure; ventilatory management on SIMV and no room for weaning given mental status
Hepatic failure; patient family requested consultation with MUSC about possible transplant. We have contacte them and he is not a candidate
Neurologic prognosis poor per NSG and I agree that palliative care consult is a reasonable avenue to pursue at this time
MELD 26; have asked for GI input - likely benefit from lactulose...+/- paracentesis
Hyponatremic and can administer 3% via central line placed today
Neurogenic shock; central access obtained for stand by vassopressor support to maintain MAP > 60mmHg
Malnutrition; can begin tube feeds, but only at trophic rate as he is likely to suffer refeeding based on current hypomagnesemia/hypophos
Need to decrease rate on vent to correct hypocapnea

Radiology results:
CT head:

SUMMARY:

1. Right frontal hematoma size dimensions given above the peripheral hypodensity. There is also a 1.6 cm right frontotemporal parietal subdural hematoma with areas of layering low density within as well. Acute on chronic hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superolateral globular appearance of blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location as well. Extended followup recommended.
2. 9 mm right to left midline shift due to mass effect from the right-sided hematoma as described.

CT cervical spine:

IMPRESSION:

No fractures or subluxation within the cervical spine with moderate to marked canal stenosis at the C5-C6 secondary to posterior spinal disc bulging. There is also degenerative disc disease present at the C3-C4, C4-C5, and C6-C7 levels without significant canal stenosis suggested at C3-C4 with minimal encroachment upon the canal suggested at the C4-C5 and C6-C7 levels. Left-sided neural foraminal stenosis present at the C6-C7, bilateral neural foraminal stenosis suggested at the C5-C6 and right-sided neural foraminal stenosis suggested at the C4-C5 level.

Nurse's Notes: family called, patient took his last breath while we are in the room. no apical pulse to ascultated, no blood pressure. charge nuse assessed parient with me. MD. notified.

DOCUMENT NAME:	Nurses Note
SERVICE DATE/TIME:	2/27/2015 12:33 EST
RESULT STATUS:	Partial Results
PERFORM INFORMATION:	Botello-Naso RN,Grace M (2/27/2015 12:36 EST)
ELECTRONICALLY SIGNED BY:	

Nurse's Notes:

Pt's family called the desk asking for a nurse to come to the room. Pt with long periods of apnea then took his last breadth while we were at the bedside. No spontaneous respirations, carotid pulse or BP noted. Confirmed death with Aramide Mitchell, RN. Family at bedside, Dr. Barber and Michael (AOD) notified by this nurse.

DOCUMENT NAME:	Hospice Note
SERVICE DATE/TIME:	2/27/2015 15:16 EST
RESULT STATUS:	Auth (Verified)
PERFORM INFORMATION:	Duckett Chaplain Resident,Jacqueline M (2/27/2015 15:16 EST)
ELECTRONICALLY SIGNED BY:	Duckett Chaplain Resident,Jacqueline M (2/27/2015 15:16 EST)

Hospice Note:

Pt was not admitted to hospice as planned but I had a chance to visit with the family. He looked imminent. The family was very tearful and sad. I offered prayer and they were appreciative. Chaplain Jerry Fonte visited the pt and family earlier today.

ED Documentation

ACCOUNT NUMBER: 1505401814

ATTENDING PHYSICIAN: David T. Ford, MD

CHIEF COMPLAINT: Fall.

HISTORY OF PRESENT ILLNESS: This is a 56-year-old male presenting after he fell. States he slipped and fell, hit the back of his head. Says he wanted to go back to work, but his firm would not let him. Patient states that he has nontender felt well over the last several days, has not been eating well and did notice that his skin had changed colored, but attributed this to that. States that he has had vomiting and diarrhea and just not felt well, but that today he had a mechanical fall, did not have any syncopal symptoms. Denies any headache, chest pain or increased shortness of breath. He has an abrasion to his back. Patient denies any weakness, any abdominal pain or other complaints.

REVIEW OF SYSTEMS: Denies any recent urinary complaints. Denies any chest pain, shortness of breath. Rest of review of systems negative.

PAST MEDICAL HISTORY: None.

MEDICATIONS: None.

SOCIAL HISTORY: Patient does endorse daily drinking but denies any tobacco or alcohol use.

FAMILY HISTORY: Hypertension.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 98.3, heart rate 79, respiratory rate 18, pulse ox 100 percent on room air, blood pressure 121/79.
GENERAL APPEARANCE: Patient is alert, in full spinal precautions.
HEENT: Abrasions at the back of the occiput, which is currently oozing. Pupils are equal but sclerae are icteric. Slightly dry mucous membranes.
NECK: Supple. No midline step-off or deformity.
LUNGS: Clear to auscultation bilaterally. No wheezes, rales or rhonchi.
HEART: Regular rate and rhythm. No murmurs, rubs or gallops.
ABDOMEN: Soft, distended with hepatomegaly.
EXTERNAL GENITALIA: Patient does have bruising along his sacrum and rectum with rectal prolapse that is reducible. Does have some bright red bleeding due to irritation of the rectum.
MUSCULOSKELETAL: No edema clubbing, cyanosis.
SKIN: The patient is significantly jaundiced.
NEUROLOGICAL: GSC 15.

MEDICAL DECISION MAKING: The patient has no medical history, but given his endorsement of daily alcohol use as well as his physical exam, concern for

intra-abdominal pathology, hepatitis if this really is acute, or other cause. Will obtain broad-based workup for further evaluation. Also concerned given his concern for liver damage, if he did obtain an intracranial hemorrhage or other injury during the fall.

LABORATORY DATA: EKG showing sinus rhythm at a rate of 79. No ST elevation MI. CBC with a hemoglobin 11.8, platelets 127,000, otherwise within normal limits. INR 1.7, PTT 39. BMP with sodium 118, potassium 3.1, glucose 118, BUN 26, otherwise within normal limits. LFTs with a total protein of 6.1, albumin 2, total bilirubin 23.8 with a direct bilirubin of 18.7, indirect 5.1, alk phos 355. AST 146, ALT 74 otherwise within limits. Ammonia less than 10. Lipase 300. CT head without IV contrast showing a right frontal hematoma size dimensions given at 4.6 x 2.4 mm with accompanying peripheral hypodensity also at 1.6. Right frontotemporal parietal subdural hematoma with areas of layering low density as well. Acute on chronic or subacute hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superior lateral globular appearance of the blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location, 9 mm right to left midline shift due to mass effect of the right-sided hematoma. CT cervical spine: No fracture or subluxation. CT abdomen and pelvis with IV contrast pending.

EMERGENCY DEPARTMENT COURSE: The patient was seen upon arrival, full history and physical exam performed. Workup was obtained as stated above and throughout his stay in the ER he continued to have progressive decline in his mental status. With findings on CT scan I have contacted Neurosurgery, and they have come to evaluate the patient. Trauma Surgery has also been aware and they are at the bedside and have decided to intubate for airway protection. Please see their note for full details. Neurosurgery has come to evaluate the patient and plan to take him to the operating room for craniotomy at this time. Family has been updated throughout their stay and agreed to course and plan as well.

IMPRESSION:
1. Acute Intracranial hematoma secondary to blunt trauma (fall).
2. Hyponatremia.
3. Hyperbilirubinemia.
4. Hypokalemia.

DISPOSITION: Patient will be admitted to Trauma Surgery ICU with Neurosurgery consult.

Attending was present for the entire evaluation.

ED Documentation

cc: Emily Mackie, MD-R
cc: David T. Ford, MD

I saw and evaluated the patient. I discussed with resident and agree with resident's findings and plan as written. I supervised all above procedures done by the resident. I provided one on one critical care 32 mins for this patient while in above condition. I reviewed the resident's documentation and agree with the resident's assessment and plan of care. Please refer to dictation for critical care times and medical decision making. I supervised all above procedures done by the resident.

Consultations

3. Diffuse colonic wall thickening suggestive of a pancolitis.
4. Sigmoid diverticulosis without diverticulitis.
5. Cyst left kidney.
6. Tiny 3 mm incompletely imaged nodule questioned within the right middle lobe within the lung periphery. Further characterization with chest CT recommended.

Impression and Plan

1. SAH/SDH s/p crani
2. likely etoh hepatitis with likely underlying liver disease
---hyperbilirubinemia, coagulopathy, thrombocytopenia, ascites, hypoalbuminemia

Plan: Given overall poor prognosis for a neuro standpoint, recommend supportive care. Will check AFP with next blood draw. Cont rally pack daily with folate/thiamine. Could consider US guided paracentesis with fluid studies. Further plans contingent on overall status.

Operative Report
PATIENT: DILLON, EDMUND DICT: Charles Philip Toussaint, MD
MR #: 012719295 DOB:
ADMITTED: 02/23/2015 PT.LOC: STU

DATE OF OPERATION: 02/23/2015

PREOPERATIVE DIAGNOSIS: Subdural hematoma.

POSTOPERATIVE DIAGNOSIS: Subdural hematoma.

PROCEDURE: Right-sided decompressive craniectomy for evacuation of subdural hematoma.

ATTENDING SURGEON: Charles Philip Toussaint, MD

ASSISTANT: None.

ANESTHESIA: General.

COMPLICATIONS: None.

HISTORY OF PRESENT ILLNESS: Mr. Dillon is a 56-year-old male with evidence of liver failure and coagulopathy who presented with worsening mental status. Imaging demonstrated large right-sided subdural hematoma with a large mass effect. He had a significant decline in exam and after extensive discussion with the family in terms of prognosis the patient's family wished to proceed with surgery. I was relatively pessimistic as to the surgical outcome with the presence of liver failure. He was extremely jaundiced on exam. Otherwise, his GCS was a 4T. I discussed the procedure at length with the

Palliative Care Progress Note

Patient: DILLON, EDMUND MRN: R012719295 FIN: R1505401814
Age: Sex: DOB:
Associated Diagnoses: None
Author: **Jenkins MD, Karin M**

Basic Information
56-year-old Caucasian gentleman admitted with subdural hematoma and subarachnoid hemorrhage with midline shift status post craniotomy for subdural hematoma now intubated and unresponsive on the ventilator.

Daughter, Robin and sister at bedside. They confirmed they are waiting for family to arrive then will do terminal extubation. Pt appears comfortable, on fentanyl gtt. No grimace or anxiety. Becomes tachypnic at times, resolved with suctioning.

Impression and Plan
Subarachnoid hemorrhage with acute on chronic subdural hematoma status post emergent evacuation on 2/23 - unresponsive except to painful stimuli on the ventilator, not on any sedatives other than 1 dose fentany received this am. Patient with very poor prognosis, worsening head CT with enlarging Right frontal hemorrhage,

Progress Notes

Acute Alcoholic Hepatitis with elevated bilirubin, jaundice,
Chronic Alcoholic liver disease with evidence of fatty infiltration of the liver, coagulopathy, thrombocytopenia, ascites
history of skin cancer s/p removal
Acute renal failure
Leukocytosis
Coagulopathy s/p FFP

Sister concerned about MAPS in 60s. Discussed with her that this was acceptable and while her brother could pass at any time, he could live for a while with these MAPS. FAmily seems to be handling patient's iminent passing as best as possible. Wife not at bedside, but handling things OK per daughter. We extensively discussed that the patient may not die immediately after terminal extubation and possibly could live for hours to days. We discussed possibly moving him to 11th floor on hospice if this were the case. We discussed the need for them to let us know if he shows any signs of discomfort and agitation, but patient appears comfortable now. Asked that they call us if they had any further questions or concerns

PALLIATIVE CARE SPECIFIC

(b) SOCIAL: CONTEXTUALIZATION OF CARE Continue to work with patient and family
(c) PLAN: Continue to support patient and family
(d) CODE: **IC - to change to DNR 5 when all family arrives**
(e) PROGNOSIS: **Grave**

I had the opportunity to evaluate this patient, review all his medical records, perform a full medical examination.

Palliative care team will continue to see this patient to address physical, emctional and spiritual needs. We appreciate the opportunity to participate in the care of this patient. I spent **20** minutes with patient,daughter, sister, including history, examination, coordination of care.

Radiology

ACCESSION	EXAM DATE/TIME	PROCEDURE	ORDERING PROVIDER	STATUS
CT-15-0012404	2/23/2015 13:25 EST	CT Head W/O IV Contrast	Mackie MD,Emily L	Auth (Verified)

Findings:
HISTORY: 56-year-old male with fall, abrasion to occiput.

FINDINGS: 4.8 mm axial images of the brain without contrast demonstrate a 4.6 x 2.4 mm right frontal lobe hematoma with mild degree of surrounding edema. There is a right-sided subdural mixed density hematoma involving the right frontal and parietal lobes and temporal lobe inferiorly with maximal thickness approximately 1.6 cm as measured at the level of the ventricular atria. There is subdural hematoma also demonstrated over the left frontal region, of maximal thickness approximately 1 cm, which also tracks along the interhemispheric fissure. Extraaxial hyperdense hematoma also demonstrated of the left fronal lobe at the level of the ventricular atrium measuring 7 mm in size having a roundish appearance. This finding is likely subarachnoid in location as there is left Sylvian subarachnoid blood present as well. The posterior fossa structures are unremarkable. No calvarial fracture. Orbits, temporal bones, and paranasal sinuses are grossly unremarkable as well.

SUMMARY:
1. Right frontal hematoma size dimensions given above with accompanying peripheral hypodensity. There is also a 1.6 cm right frontotemporal parietal subdural hematoma with areas of layering low density within as well. Acute on chronic or subacute hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superolateral globular appearance of blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location as well. Continued followup recommended.
2. 9 mm right to left midline shift due to mass effect from the right-sided hematoma as described.

CLINICAL HISTORY:
56-year-old male with fall and abrasion occiput.

Radiology

ACCESSION	EXAM DATE/TIME	PROCEDURE	ORDERING PROVIDER	STATUS
CT-15-0012428	2/23/2015 14:25 EST	CT Abdomen Pelvis W/ IV Contrast Only	Mackie MD,Emily L	Auth (Verified)

Findings:

HISTORY: A 56-year-old male with altered mental status, jaundice, and elevated liver function tests.

TECHNIQUE: Spiral imaging of the abdomen and pelvis performed with 5 mm axial and 2 mm sagittal and coronal reconstructed images generated.

FINDINGS: The heart size is within normal limits. The lung bases demonstrated mild bibasilar atelectasis, otherwise clear. No pulmonary nodule. There is a question of a small pulmonary nodule within the right lower lobe measuring approximately 3 mm in size which is incompletely imaged.

The liver demonstrates diffuse hypodensity within the posterior right lobe, but also focally within the caudate lobe. This likely reflects focal fatty infiltration. The liver is overall diffuse hypodense relative to the spleen as well. The pancreas, spleen, adrenal glands are unremarkable. There is a small simple cyst within the left kidney measuring approximately 6 x 5 mm in size. The right kidney is unremarkable. There is diffuse abdominal ascites. There is no abdominal mass. There is diffuse right colonic wall thickening. This also involves the transverse colon and sigmoid colon compatible with diffuse colitis.

Imaging of the pelvis demonstrates pelvic ascites. Colonic wall thickening is noted, as well as sigmoid diverticulosis with a diffuse colitis suggested. No diverticulitis. The appendix is unremarkable. There is a mild degree of aortoiliac atherosclerotic disease. No evidence of aortic aneurysm.

SUMMARY:

1. Diffuse fatty infiltration of the liver with more focal fatty infiltration within the caudate head of the posterior segment of the right lobe.
2. Abdominal ascites.
3. Diffuse colonic wall thickening suggestive of a pancolitis.
4. Sigmoid diverticulosis without diverticulitis.
5. Cyst left kidney.
6. Tiny 3 mm incompletely imaged nodule questioned within the right middle lobe within the lung periphery. Further characterization with chest CT recommended.

To whom it may concern,

As a nurse, I have concluded, based on the review of medical records, that Mr. Dillon did not suffer from any definitive medical condition that would more than likely have been the cause of his fall.

Key points:

- When EMS arrived on the scene, it was documented that he was **CAOx3**- conscious, alert, oriented x 3 (means he was alert to who he was, where he was and what happened). On the way to the hospital his neurological condition began to change as seen with a decreasing blood pressure. Ultimately, his condition drastically changed and a few days later he expired.

- It was documented Mr. Dillon some vomiting and diarrhea (unknown etiology) for the prior 2 weeks but it is my understanding that he had not missed any days of employment due to this. If nausea and vomiting had been so severe it is *unlikely* that he could have not missed work.

- It was documented on 2/23/15 at 4:39pm- Physician documents that the patient was able to answer questions appropriately, stated he fell at work, admitted to not eating well due to nausea and vomiting recently, but stated he *did not have* any syncopal (fainting) issues prior to the fall.

- It has been noted in the records that his liver values were abnormal but *dehydration* can cause liver enzymes to appear elevated because the circulating blood would be concentrated due to the dehydration (loss of fluids).

It is my conclusion, to a reasonable degree of certainty, that Mr. Dillon did not have any definitive medical condition stated in the records that caused him to faint /fall but did die as a direct result from the fall sustained while at his place of employment.

Respectfully,

Donna Crider, RN

Summary

My medical services in today's business world can directly benefit your company with my detailed nursing experiences as a critical thinking nurse (ICU), as well as, an analytical, investigative Infection Control nurse. My history of constant, continuing education shows my dedication to the acquiring of further knowledge and my love of learning. Being a Cerner instructor for the staff at the Regional Medical center has enabled me to become extremely proficient in reviewing of the electronic medical record and pinpointing areas that are lacking. These skills coupled with my additional, advanced training as a legal nurse consultant will make me one of your most skilled and thorough team players.

Work History

DAC Legal Nurse Consulting, LLC

Orangeburg, SC, United States — 2011

Owner

DAC Legal Nurse Consulting is a nurse owned and operated consulting firm that specializes in medical record analysis for legal and insurance companies.

the Regional Medical Center

Orangeburg, SC — 2001 - 2010

Infection Control Practitioner

Positions

- *Infection Control Practitioner*
- *Admissions Nurse*
- *ICU nurse*

Orangeburg County Disabilities and Special Needs Board

Orangeburg, SC — 1999 - 2000

Director of Nursing

Managed a staff of 8 nurses and provided medical support to 24 residential homes for physically and mentally disabled persons. Revised and updated policies and procedures, monthly medication reconciliations, month psychotropic drug reviews, daily lab review and follow-ups, and provided medical training and teaching as needed.

the Regional Medical Center

Orangeburg, SC 1996 - 1999

ICU nurse

Managed and provide skilled nursing care for post-surgical and ventilator patients often hemodynamically unstable.

Olsten Home Health

Orangeburg, SC, United States 1995 - 1996

Home health nurse

Provided skill nursing care for home bound clients while acting as a liaison between the clients and their primary health care physician. Skills provided: IV therapy, medication teaching, skin care modalities and teaching, nutritional teaching, central line care and management.

Bamberg County Memorial Hospital

Bamberg, SC, United States 1989 - 1995

Supervision/ RN

- *First position was in the lab as an unlicensed lab tech.*
- *Next position was as a certified laboratory lab tech after completing an Associate Degree and obtaining certification by ASCP.*
- *Next position was in the operating and recovery rooms as a registered nurse after completing an Associate Degree in Nursing.*
- *Next postion was a floor nurse working in L&D, emergency room, close observation and medical surgical.*
- *Last position was every other weekend Nursing Baylor supervision charge nurse.*

Education

University of Florida

MEDICAL OPINION AND REPORT OF MICHAEL G. SRIBNICK, MD, JD

After a thorough review of the medical records provided as to Edmund Dillon, those records being the Palmetto Richland hospitalization and the EMS report, and a 1994 Kershaw Medical Center report, I state that to a reasonable degree of medical certainty, that the injury to Edmund Dillon that resulted in his death was caused by his fall at work. I do not find to a reasonable degree of medical certainty that any of his underlying conditions as related in the medical records caused the fall at work that resulted in the head injury that caused his death. I do not find to a reasonable degree of medical certainty that Edmund Dillon's fall at work was caused by a condition peculiar to him. I have particularly noted in my review of the records where the patient stated he slipped and fell or fell at work and the absence of any significant symptoms that would lead to any conclusion that a condition peculiar to him caused his fall at work. I also note that the EMS record stated the fall was work related.

I reserve the right to modify or amend this opinion and report should additional medical evidence be presented to and evaluated by me. Below are the pages of the records I found of particular note.

DATE: 5/23/16

Michael G. Sribnick, MD, JD
Board Certified Internal Medicine

Records Review on Edmund Dillon

Kershaw County Memorial 2/4/94 seen for syncope/vasovagal reaction with unremarkable PE, EKG, negative ETOH, WNL CBC, ABG and BMP and sent home with a head sheet.

EMS report Page 2 of 3 on 2/23/15 reveals: fall was work related.

Page 22 of 633: ER doctor's note 2/23/15 History of Present Illness: 56-year-old Caucasian male with history of heavy alcohol abuse and skin cancer, possibly melanoma status post removal who was at work when he suffered a mechanical fall and developed increasing headache. He wanted to go back to work, but they would not allow him. In the emergency
room the patient's neurologic status decompensated significantly. He required intubation. Head CT showed subdural hematoma, acute on chronic as well as subarachnoid hemorrhage. He underwent emergent craniotomy. Currently he is in the SSU, remains intubated. He is not sedated on any medications, he will withdrawal to painful stimuli in his hands and his feet, pupils are pinpoint probably minimally reactive. Daughter is at
bedside and much of the history was obtained through her in the chart record.
Patient was also noted to be incredibly jaundiced on arrival. Per ER records the patient had been having nausea and vomiting as well as diarrhea,
and has not been eating well for several days prior to his fall. Patient was severely dehydrated by urinalysis and labs. His sodium level on

Phone (843) 789-3504 Web Site: www.michaelsribnicklaw.com Fax (843) 720-8907

admission was 118 his LFTs were incredibly elevated with an AST much greater than ALT, and a bilirubin of 23.
The paliative care team was consulted to see this patient who is who is currently located in Room: 514

Page 28 of 633 progress note 2/24/15: 56yo M s/p fall with acute on chronic subdurals and large RICH, worsening s/p hemicraniectomy, in the setting of apparent acute liver failure and elevation of bilirubin. Worsening status, family updated at bedside, CVC inserted L groin for access given patients rapid fluctuation between hypo and
hypernatremia. Neurosurgery recommends supportive measures at this time. Neurosurgeon Toussaint MD, Charles P.

Page 31- of 633 progress note on 6/23/15 states: 56 y/o that fell today and brought to ER. Head CT revealed SAH and SOH with midline shift and neurosurgery was consulted. Patient has decompensated while in the ER and is about to get intubated which was done.
He is drowsy at time of exam and unable to communicate or contribute to history, but this note signed by his neurosurgeon on page 35 of 633.

Page 34 of 633 on 6/23/15 CT of head and neck IMPRESSION: 1. Right frontal hematoma size dimensions given above the peripheral hypodensity. There is also a 1.6 cm right frontotemporal parietal subdural hematoma with areas of layering low density within as well. Acute on chronic hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superolateral globular appearance of blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location as well. Extended follow up recommended. 2. 9 mm right to left midline shift due to mass effect from the right-sided hematoma as described. No fractures or subluxation within the cervical spine with moderate to marked canal stenosis at the C5-C6 secondary to posterior spinal disc bulging. There is also degenerative disc disease present at the C3-C4, C4-C5, and C6-C7 levels without significant canal stenosis suggested at C3-C4 with minimal encroachment upon the canal suggested at the C4-C5 and C6-C7 levels.
Left-sided neural foramina! stenosis present at the C6-C7, bilateral neural foramina! Stenosis suggested at the C5-C6 and right-sided neural foraminal stenosis suggested at the C4-C5 level.

Nursing note page 42 of 633 on 2/23/15 stated Motor Response: Obeys commands appropriately and Verbal Response: Oriented and converses. Note done by Watson RN, Jennifer D.

Nursing note page 43 of 633 states: Per EMS, pt tripped and fell, denies loc; on arrival pt aaox3, jaundice noted, swollen abdomen noted,
rectal bleeding noted MD at bedside and aware, pt states he has been yellow, no appetite and diarrhea for 2 weeks. Note by Looney RN, Marisa A. on 2/23/15

Page 45 of 633 nursing note 2/24/13 reveals that patient had a Right Craniotomy on 2/23/15. Note by Looney RN, Marisa A.

Page 50 of 633 on 2/27/15 stated family called, patient took his last breath while we are in the room. no apical pulse to ascultated, no blood pressure. charge nurse assessed patient with me. MD. notified. Note by Mitchell RN, Aramide.

Page 95 of 633 states that ET tube was removed by RT on 2/26/15 per nursing notes.

Page 96 of 633 states that trach intervention 2/26/15.

Page 112 of 633 notes foley catheter placed 2/23/15.

Page 148 of 633 notes on 2/23/15 general information: Per EMS, pt tripped and fell, denies loc; on arrival pt aaox3, jaundice noted, swollen abdomen noted, rectal bleeding noted MD at bedside and aware, pt states he has been yellow, no appetite and diarrhea for 2 weeks.

Page 150 of 633 ER documentation: Per EMS, pt tripped and fell, denies loc; on arrival pt aaox3, jaundice noted, swollen abdomen noted, rectal bleeding noted MD at bedside and aware, pt states he has been yellow, no appetite and diarrhea for 2 weeks. Triage nurse Watson RN, Jennifer D.

Page 153 of 633 notes OG Tube placed on 2/23/15 ER

Page 154 of 633 notes foley catheter placed 2/23/15 in ER.

Page 157 of 633 in ER 2/23/16 by Dr. Ford: HISTORY OF PRESENT ILLNESS: This is a 56-year-old male presenting after he fell. States he slipped and fell, hit the back of his head. Says he wanted to go back to work, but his firm would not let him. Patient states that he has nontender felt well over the last several days, has not been eating well and did notice that his skin had changed colored, but attributed this to that. States that he has had vomiting and diarrhea and just not felt well, but that today he had a mechanical fall, did not have any syncopal symptoms. Denies any headache, chest pain or increased shortness of breath. He has an abrasion to his back. Patient denies any weakness, any abdominal pain or other complaints.

Page 158 of 633 Physician notes: EMERGENCY DEPARTMENT COURSE: The patient was seen upon arrival, full history and physical exam performed. Workup was obtained as stated above and throughout his stay in the ER he continued to have progressive decline in his mental status. With findings on CT scan I have contacted Neurosurgery, and they have come to evaluate the patient. Trauma Surgery has also been aware and they are at the bedside and have decided to intubate for airway protection. Please see their note for full details. Neurosurgery has come to evaluate the patient and plan to take him to the operating room for craniotomy at this time. Family has been updated throughout their stay and agreed to course and plan as well. The physicians IMPRESSION: 1. Acute Intracranial hematoma secondary to blunt trauma (fall). 2. Hyponatremia. 3. Hyperbilirubinemia. 4. Hypokalemia.

Page 159 of 633: attestation by Mackie MD, Emily L.: I saw and evaluated the patient. I discussed with resident and agree with resident's findings and plan as written. I supervised all above procedures done by the resident. I provided one on one critical care 32 mins for this patient while in above condition. I reviewed the resident's documentation and agree with the

resident's assessment and plan of care. Please refer to dictation for critical care times and medical decision making. I supervised all above procedures done by the resident. Electronically signed and verified 2/26/15 by Dr. Mackie and by Dr. Ford 3/2/15.

Page 160 of 633 seen by Peter G. Smith, M.D. on trauma team 2/23/15 and not able to give a history, but noted is 56 yo male with no stated hx presents after ground level fail Jaundiced on arrival in ED. Pt. AA0x3 on arrival per ED staff, but mental status progressively deteriorated over 2 hours. CT head showed large R SDH
with midline shift. Pt intubated for GCS 8.

Page 174 of 633 on 2/23/15: Right-sided decompressive craniectomy for evacuation of subdural hematoma. ATTENDING SURGEON: Charles Philip Toussaint, MD

Page 224 of 633 on 2/24/15 revealed a post-operative CT Scan of Head: Addendum by Toussaint MD, Charles P on 24 February 201513:05 postoperative CT head reviewed demonstrating good decompression of the brain but larger intra parenchymal hematoma
with substantial midline shift. This point I recommend supportive care. Very careful with sodium correction. Recommend endocrinology for sodium management I have discussed this with the trauma service on February 23 and they will manage the sodium and consider an endocrinology evaluation. Electronically Signed & Verified on 2/24/15 13:05 by Toussaint MD, Charles P.

Page 246-247 of 633 on 2/26/15 by Dr. Karen M. Jenkins Palliative Care Impressions:
Subarachnoid hemorrhage with acute on chronic subdural hematoma status post emergent evacuation on 2/23-
unresponsive except to painful stimuli on the ventilator, not on any sedatives other than 1 dose fentanyl received this
am. Patient with very poor prognosis, worsening head CT with enlarging Right frontal hemorrhage, Acute Alcoholic Hepatitis with elevated bilirubin, jaundice,
Chronic Alcoholic liver disease with evidence of fatty infiltration of the liver, coagulopathy, thrombocytopenia, as cites history of skin cancer s/p removal, Acute renal failure Leukocytosis, Coagulopathy s/p FFP

Page 557 of 633 on 2/23/15 CT Abdomen: 1. Diffuse fatty infiltration of the liver with more focal fatty infiltration within the caudate head of the posterior segment of the right lobe.
2. Abdominal ascites. 3. Diffuse colonic wall thickening suggestive of a pancolitis.
4. Sigmoid diverticulosis without diverticulitis. 5. Cyst left kidney. 6. Tiny 3 mm incompletely imaged nodule questioned within the right middle lobe within the lung periphery.

CASE NOTES

R/O was notified of the decedent's death by Coroner Gary Watts. The decedent is a Kershaw County resident that works at a business on Shop Rd. In Richland County. It is alleged that the decedent sustained a fall at work 2-23-2015 and was transported to Palmetto Health Richland. It is reported that the decedent underwent brain surgery at Palmetto health Richland, as a result of the fall. The decedent coded and was pronounced 2-27-2015 1230hrs by Dr. Jason Barber. The decedent was released to Powers Funeral home as per family wishes. R/O was unable to reach the decedent's family for details on recent events and history at the time of this report.

R/O secured the decedent's admission blood from the Lab at Palmetto Health Richland and secured them into evidence with the RCCO morgue refrigerator. R/O also issued a subpoena for medical records from Palmetto Health Richland.

[V-Deceased] Edmund J Dillon

This is an official report of the South Carolina Law Enforcement Division Forensic Services Laboratory and is to be used in connection with an official criminal investigation. These examinations were conducted under your assurance that no previous examinations of person(s) or evidence submitted in this case have been or will be conducted by any other laboratory or agency.

Mark A. Keel, Chief
South Carolina Law Enforcement Division

ITEMS OF EVIDENCE

Item: 1.1 **Sample Type: Blood (Toxicology)** - Admissions Blood labeled "DILLON, EDMUND"

Analysis by Headspace Gas Chromatography (GC) and/or Headspace Gas Chromatography/Mass Spectrometry (GC/MS)

Analyte	Result	Units	Threshold
Ethanol	0.018	% (g/dL)	0.010
Methanol	Negative	% (g/dL)	0.010
Acetone	Negative	% (g/dL)	0.010
Isopropanol	Negative	% (g/dL)	0.010

CALEA

ALI-359-T

Screen by Enzyme Linked Immunosorbant Assay (ELISA)

Analyte	Result	Units	Threshold
Amphetamine	Negative	mg/L	0.100
Benzodiazepines	Negative	mg/L	0.050
Buprenorphine	Negative	µg/L	1.000
Carisoprodol	Negative	mg/L	0.500
Cocaine Metabolite	Negative	mg/L	0.200
Methadone	Negative	mg/L	0.050
Methamphetamine	Negative	mg/L	0.100
Opiates	Negative	mg/L	0.075
Oxycodone	Negative	mg/L	0.075
Tramadol	Negative	mg/L	0.050
Zolpidem	Negative	mg/L	0.020

Comprehensive Analysis

A comprehensive drug screen utilizing gas chromatography/mass spectrometry and liquid chromatography/tandem mass spectrometry was performed on this sample. With the exception of the compound(s) listed, no other drugs or poisons of concern were found.

Item: 1.2 **Sample Type: Serum** - Admissions Serum labeled "DILLON, EDMUND"

No Analysis Performed

Item: 2 **Sample Type: Blood (Toxicology)** -

Sample Not Submitted

7f. ZIP CODE:
7g. INSIDE CITY LIMITS? ☐ Yes ☒ No
8. EVER IN US ARMED FORCES? ☐ Yes ☒ No
9. MARITAL STATUS AT TIME OF DEATH: ☒ Married ☐ Married, but separated ☐ Widowed ☐ Divorced ☐ Never Married ☐ Unknown
10. SURVIVING SPOUSE'S NAME (If wife, give name prior to first marriage): April Patricia Woodward
11. FATHER'S NAME (First, Middle, Last): William Vincent Dillon
12. MOTHER'S NAME PRIOR TO FIRST MARRIAGE (First, Middle, Last): Mary Veronica Novak
13a. INFORMANT'S NAME: April Dillon
13b. RELATIONSHIP TO DECEDENT: Family Member
13c. MAILING ADDRESS (Street and Number, City, State, Zip Code):
14. PLACE OF DEATH (Check only one; see instructions)
IF DEATH OCCURRED IN HOSPITAL: ☒ Inpatient ☐ Emergency Room/Outpatient ☐ Dead on Arrival
IF DEATH OCCURRED SOMEWHERE OTHER THAN A HOSPITAL: ☐ Nursing home/Long term care facility ☐ Decedent's home ☐ Other (Specify)
15. FACILITY NAME (If not institution, give street and number): Palmetto Health Richland
15a. CITY OR TOWN, STATE AND ZIP CODE:
17. COUNTY OF DEATH: Richland
18. METHOD OF DISPOSITION: ☐ Burial ☒ Cremation ☐ Donation ☐ Entombment ☐ Removal from state ☐ Other (Specify)
19. PLACE OF DISPOSITION (Name of Cemetery, Crematory, other place): Powers Crematory LLC
20. LOCATION-CITY, TOWN AND STATE: Lugoff, South Carolina
21. NAME AND ADDRESS OF FUNERAL FACILITY: Powers Funeral Home, LLC
22. SIGNATURE OF FUNERAL SERVICE LICENSEE OR OTHER AGENT: Robert Allen Powers Sr (Electronically Verified)
23. LICENSE NUMBER (Of Licensee): 2381
832 Ridgeway Road Lugoff, SC 29078
23a. EMBALMER (Signature): Robert Allen Powers Sr
23b. EMBALMER LICENSE NUMBER: 2381
23c. LICENSE NUMBER (Of Facility): 717

Items 24-49 To Be Completed By: MEDICAL CERTIFIER

ITEMS 24-26 MUST BE COMPLETED BY PERSON WHO PRONOUNCES OR CERTIFIES DEATH.
24. DATE PRONOUNCED DEAD (MM/DD/YYYY): 02/27/2015
25. TIME PRONOUNCED DEAD: 12:30 PM
26. SIGNATURE OF PERSON PRONOUNCING DEATH (Only when applicable): Jason Barber
27. LICENSE NUMBER: 28996
28. DATE SIGNED (mm/dd/yyyy): 2/27/2015
29. ACTUAL OR PRESUMED DATE OF DEATH (Spell Month): February 27, 2015
30. ACTUAL OR PRESUMED TIME OF DEATH: 12:30 PM
31. WAS CORONER OR MEDICAL EXAMINER CONTACTED? ☒ Yes ☐ No

CAUSE OF DEATH (See instructions and examples)
32. PART 1. Enter the chain of events - diseases, injuries, or complications - that directly caused the death. DO NOT enter terminal events such as cardiac arrest, respiratory arrest, or ventricular fibrillation without showing the etiology. DO NOT ABBREVIATE. Enter only one cause on a line. Add additional lines if necessary.

		Approximate Interval Onset to death
IMMEDIATE CAUSE (Final disease or condition resulting in death)	a. Cardiopulmonary Failure	Immediate
Sequentially list conditions, if any, leading to the cause listed on line a. Enter the UNDERLYING CAUSE (disease or injury that initiated the events resulting in death) LAST	Due to (or as a consequence of): b. Subdural Hematoma with mass effect	1-2days
	Due to (or as a consequence of): c. Subarachoid Hemorrhage	1-2days
	Due to (or as a consequence of): d.	
	Due to (or as a consequence of):	

PART II. Enter other significant conditions contributing to death but not resulting in the underlying cause given in PART I.
33. WAS AN AUTOPSY PERFORMED? ☐ Yes ☒ No
34. WERE AUTOPSY FINDINGS AVAILABLE TO COMPLETE THE CAUSE OF DEATH? ☐ Yes ☐ No
35. DID TOBACCO USE CONTRIBUTE TO DEATH? ☐ Yes ☐ Probably ☒ No ☐ Unknown
36. IF FEMALE: ☐ Not pregnant within past year ☐ Pregnant at time of death ☐ Not pregnant, but pregnant within 42 days of death ☐ Not pregnant, but pregnant 43 days to one year before death ☐ Unknown if pregnant within the past year
37. MANNER OF DEATH: ☐ Natural ☐ Homicide ☒ Accident ☐ Pending Investigation ☐ Suicide ☐ Could not be determined
38. DATE OF INJURY (Spell Month): February 23, 2015
39. TIME OF INJURY: 15:13 PM
40. PLACE OF INJURY (e.g. Decedent's home, construction site, restaurant, wooded area): Unknown
41. INJURY AT WORK? ☒ Yes ☐ No
42. LOCATION OF INJURY: State: South Carolina City or Town: Columbia County: Richland

Signature of certifier: Jason K. Barber (Electronically Certified)
46. NAME, ADDRESS, AND ZIP CODE OF PERSON COMPLETING CAUSE OF DEATH (Item 32): Jason K. Barber, 14 Richland Medical Park, Suite 320 Columbia South Carolina 29203
46a. NAME OF ATTENDING PHYSICIAN IF OTHER THAN CERTIFIER:
47. TITLE OF CERTIFIER: Physician
48. LICENSE NUMBER: 28996
49. DATE CERTIFIED (MM/DD/YYYY): 2/27/2015
50. FOR REGISTRAR ONLY- DATE FILED (MM/DD/YYYY): 2/28/2015

Items 51-55 To Be Completed By: Funeral Director

51. DECEDENT'S EDUCATION- Check the box that best describes the highest degree or level of school completed at the time of death.
☐ 8th grade or less
☐ 9th-12th grade; no diploma
☐ High school graduate or GED completed
☒ Some college credit, but no degree
☐ Associate degree (e.g., AA, AS)
☐ Bachelor's degree (e.g., BA, AB, BS)
☐ Master's degree (e.g., MA, MS, MEng, MEd, MSW, MBA)
☐ Doctorate (e.g., PhD, EdD) or Professional degree (e.g., MD, DDS, DVM, LLB, JD)

52. DECEDENT OF HISPANIC ORIGIN? Check the box that best describes whether the decedent is Spanish/Hispanic/Latino. Check the "No" box if decedent is not Spanish/Hispanic/Latino/ Latina
☒ No, not Spanish/Hispanic/Latino/Latina
☐ Yes, Mexican, Mexican American, Chicano/Chicana
☐ Yes, Puerto Rican
☐ Yes, Cuban
☐ Yes, other Spanish/Hispanic/Latino/Latina
(Specify)

53. DECEDENT'S RACE-(Check one or more races to indicate what the decedent considered himself or herself to be)
☒ White
☐ Black or African American
☐ American Indian or Alaska Native
(Name of the enrolled or principal tribe)
☐ Asian Indian
☐ Chinese
☐ Filipino
☐ Japanese
☐ Korean
☐ Vietnamese
☐ Other Asian (Specify)
☐ Native Hawaiian
☐ Guamanian or Chamorro
☐ Samoan
☐ Other Pacific Islander (Specify)
☐ Other (Specify)

54. DECEDENT'S USUAL OCCUPATION (Indicate type of work done during most of working life. DO NOT USE THE TERM "RETIRED"): Salesman
55. KIND OF BUSINESS/INDUSTRY: Tractor Trailer Parts Sales

SOUTH CAROLINA WORKERS' COMPENSATION COMMISSION

W.C.C. FILE NO: 1501382

Edmund Dillon, Dec'd,

Employee,

Claimant,

vs.

Raffles (FleetPride),

Employer,

AND

Gallagher Bassett as TPA for American Zurich Insurance Company,

Carrier,

Defendants.

AFFIDAVIT OF JOSIAH FLUDD

I, Josiah Fludd, do hereby affirm and attest as follows:

1. I was an eye witness to Mr. Edmund Dillon's collapse on February 23, 2015.

2. I saw Mr. Dillon standing idle and completely motionless on a flat/level sidewalk and then proceeded to collapse.

3. Mr. Dillon did not try to break or stop his descent and it was as if he had passed out.

4. Mr. Dillon did not slip or trip, but again was standing idle before collapsing.

This deposition is taken in accordance with the South Carolina Rules of Civil Procedure.

It is agreed and stipulated by the deponent and respective counsel that the reading and signing of the deposition by the deponent is expressly reserved.

WHEREUPON:

JOSIAH FLUDD, being duly sworn and cautioned to speak the truth, the whole truth and nothing but the truth, testifies as follows:

DIRECT EXAMINATION

BY MR. COOK:

Q. Good afternoon, Mr. Fludd. Again, for the record, my name is Matt Cook and I represent Raffles, also known as FleetPride, with respect to the workers' compensation claim that has been filed by the Dillon Family in reference to the events that transpired on February 23, 2015.

My representation of them is being carried out through Gallagher Bassett and American Zurich Insurance Company, as they are also clients of mine in this case. You are here today, sir, as we are taking your deposition. We're taking your deposition pursuant to applicable court rules, including the Rules of Civil Procedure Rule 30, as well as the rules of the Workers' Compensation Commission.

We anticipate that a hearing will ultimately be set in this case where you could very well be called as a live witness. Nevertheless, though, you need to testify today, just as you're testifying before a commission, as your deposition may be submitted in addition to live testimony, or even in lieu of live testimony, in the event that, God forbid, something should happen to you and you could not be there.

As you are testifying today, again, keep in mind that you are under oath. Your testimony must be given honestly. You must give audible responses today. You need to say "yes" or "no" where appropriate. In the event that you need to have a question rephrased, please let us know and we will work with you to rephrase the question. In the event you don't hear a question today, please let me know and we will repeat the question for you. Okay?

A. Yes, sir.

Q. All right, sir. With that being said, let's go ahead and get started here today. Would you please state your full name, for the record?

A. Josiah Fludd.

Q. Mr. Fludd, when were you born?

A.

Q. How old are you, sir?

A. Forty-four.

Q. What is your current physical address?

A. [redacted] Carolina.

Q. How long have you lived at that address?

A. About 20 years.

Q. Are you married?

A. Yes, sir.

Q. Do you live there with your wife?

A. Yes, sir.

Q. Do you and your wife have any children together?

A. Yes, sir.

Q. How many children do you have?

A. Four.

Q. The aforementioned address you mentioned, do you also receive mail at that address?

A. Yes, sir.

Q. Who do you work for?

A. Myself; self-employed.

Q. What is the name of your business?

A. Fludd's Super Lube.

Q. What type of business is Fludd's Super Lube?

A. It's a diesel repair shop.

Q. And do you work on diesel trucks, 18-

wheelers, things of that nature?

A. Yes, sir.

Q. And as part of your business, is that why you go to FleetPride? To get parts and whatnot?

A. Yes, sir.

Q. Did you go to FleetPride on February 23, 2015?

A. Yes, sir.

Q. Did you know Mr. Edmund Dillon, the gentleman that is the subject of this claim?

A. Yes, sir.

Q. How did you know Mr. Dillon?

A. He was a salesman at FleetPride.

Q. Was your relationship with Mr. Dillon confined to your interaction with him at FleetPride?

A. Yes, sir.

Q. Did you have any type of relationship with him outside of FleetPride?

A. No, sir.

Q. Did you know Mr. Dillon enough to be able to recognize him when you were at the store?

A. Yes, sir.

Q. To be able to speak to him?

A. Yes, sir.

Q. Did you have a chance to observe Mr. Dillon

on February 23, 2015, which I believe is the date of accident in this case?

A. Yes, sir.

Q. And when you observed Mr. Dillon, what did you see? Or let me ask it this way.

Was Mr. Dillon standing on a ladder at the time you saw him?

A. No, sir.

Q. Did Mr. Dillon, when you observed him, did he fall from a ladder?

A. No, sir.

Q. Did you observe any ladder in sight?

A. No, sir.

Q. Based on your observations of Mr. Dillon on February 23, 2015, if there is a medical record that references a ladder, based on your observations, would that record be incorrect?

A. It would be incorrect.

Q. When you saw Mr. Dillon, did you see him collapse that day?

A. Yes.

Q. Was he standing motionless before he collapsed? Standing idle?

A. He was standing --

MR. DUMAS: Objection as to leading.

THE WITNESS: -- idle.

MR. COOK: Okay. I'll rephrase.

BY MR. COOK (RESUMING):

Q. What was Mr. Dillon's physical movements at the time you saw him?

A. He was standing, just standing.

Q. Was he standing still?

A. Yes, sir.

Q. Where was he standing?

A. Backside of my truck on the sidewalk.

Q. Did Mr. Dillon collapse?

A. It appeared to be he collapsed.

Q. Did Mr. Dillon try to break his fall?

A. No, sir.

Q. As Mr. Dillon was going down, as he was collapsing, was he flailing around or trying to brace himself in any way?

A. No, sir.

Q. In what manner did he fall? Meaning did he fall forward, sideways, backward?

A. Backwards.

Q. Was he walking at the time he collapsed?

A. No, sir.

Q. Did you see him slip?

A. No, sir.

Q. Did you see him trip?

A. No, sir.

Q. You've had the opportunity to complete an Affidavit in this matter.

MR. COOK: Brian, I think you've seen this.

MR. DUMAS: (Nonverbal response)

BY MR. COOK (RESUMING):

Q. You've had an opportunity to complete an Affidavit in this matter previously. And I'm showing you now the Affidavit that we have on file. Does this Affidavit bear your signature?

A. Yes, sir.

Q. And this is the Affidavit -- it looks like it was completed on July 15, 2015?

A. Yes, sir.

Q. And was this Affidavit notarized?

A. Yes, sir.

Q. Were you truthful in this Affidavit?

A. Yes, sir.

Q. Does this Affidavit reflect your observations of what you saw on February 23, 2015?

A. Yes, sir.

MR. COOK: Defendants move to submit Affidavit as Exhibit A.

MR. DUMAS: We've identified it.

MR. COOK: Okay.

MR. DUMAS: I believe you said that you signed it.

THE WITNESS: Oh, okay.

MR. DUMAS: If you say you signed it, that's fine.

BY MR. COOK (RESUMING):

Q. Mr. Fludd, have you ever worked for FleetPride?

A. No, sir.

Q. At the time of Mr. Dillon's collapse, were you an employee of FleetPride?

A. No, sir.

Q. Have you ever worked for Zurich Insurance Company?

A. No, sir.

Q. At the time of Mr. Dillon's collapse, were you employed by Zurich Insurance Company?

A. No, sir.

Q. Have you ever worked for Gallagher Bassett?

A. No, sir.

Q. Were you employed by Gallagher Bassett at time of Mr. Dillon's collapse?

A. No, sir.

Q. Did you have any, or do you have any, personal grudge against Mr. Dillon?

A. No, sir.

Q. Do you have any grudge against the Dillon family?

A. No, sir.

Q. Have you been promised anything by anyone for your testimony here today?

A. No, sir.

Q. Do you have any personal stake in the outcome of whether the Dillon family is awarded benefits by the Commission or not?

A. No, sir.

Q. If anything, how would you characterize your involvement as being part of this claim now?

A. It's no involvement. Inconvenience.

Q. Are you missing work today?

A. Yes, sir.

Q. Are you here because -- I think I subpoenaed you to be here?

A. I got subpoenaed.

MR. COOK: Okay. Thank you, sir. That's all the questions I have at this time. I'm going to turn it over to Mr. Dumas for any questions he may have for

you.

CROSS-EXAMINATION

BY MR. DUMAS:

Q. Mr. Fludd, hopefully I'm going to be very brief. The word is used in this, in both the questioning by Mr. Cook and in this Affidavit, is as a collapse. Will you just tell me, in your own words, what you saw, how much you saw? Because if I understand it, and just stop me if I'm wrong.

A. Okay.

Q. I called you after I saw this Affidavit.

A. Yes.

Q. Correct? And you and I spoke for a few moments on the phone. Is that correct?

A. Yes, sir.

Q. And I believe you told me then, and you just told us now, that you were loading and unloading your truck?

A. Yes, sir.

Q. I believe you were at the front of the FleetPride entrance.

A. Yes, sir.

Q. It had been raining that day.

A. Yes, sir.

Q. The ground was wet.

A. Yes, sir.

Q. That you saw -- what you saw was Mr. Dillon. Correct?

A. Yes, sir.

Q. I believe you knew him as Ed. Right?

A. Yes. Yes, sir.

Q. And tell me what you actually saw, in your own words.

A. Well, I was loading my truck. I was putting the paperwork in my truck to keep from getting wet.

Q. Sure.

A. And turned to walk back towards the building. And that's when I saw Mr. Ed just stood there and just basically fell over.

Q. Okay.

A. That's what I saw.

Q. And in our discussion, you told me -- and you stop me if I'm wrong.

A. Okay.

Q. That all you saw was him from just below the waist up. Is that correct?

A. Yes, sir.

Q. And that you couldn't say if he slipped or if he didn't.

A. Right.

Q. You just didn't know. Right?
A. No, sir.
Q. Okay. Is that correct?
A. Yes.
Q. Okay. So you don't know if he did slip. Right?
A. I didn't see any of his bottom movement.
Q. Okay. So you don't know whether he slipped or not. Correct?
A. Correct.
Q. Okay. You -- to your knowledge, you have no idea why he fell. Do you?
A. No, sir.
Q. And you don't know if he passed out or what happened. Right?
A. No, sir.
Q. Okay. So I am correct in that?
A. Yes. I'm thinking yes.
Q. Okay. And just to make sure I understand this, you also told me, correct me if I'm wrong, that you were the only one who witnessed when Mr. Dillon fell. Is that correct?
A. Yes, sir.
Q. Because there were no other employees anywhere in sight.

A. No, sir.

Q. And you -- tell me what you saw. Did you see him actually hit the ground?

A. Yes, sir.

Q. And can you describe or tell us as much as you can remember about what happened when he did hit the ground?

A. When he hit the ground, I ran to him because he -- he just fell over. I ran to him and he was unconscious.

Q. Okay.

A. And I ran to the inside and ran and got help.

Q. Okay.

A. Is basically what I done.

Q. Okay. And from what you also told me, and you correct me if I'm wrong, several of the employees, or at least one of the -- someone from -- other employees came to help.

A. Yes, sir.

Q. And what did you see in terms of other employees trying to help?

A. Mr. Fred, when he was coming through, he -- Mr. Ed wanted to move and Fred kept him there. Said, "Don't move. You may have injuries." So Mr. Fred made sure he stood right there still. The other employees

kind of like stood around.

I believe Ed went to the telephone and got a telephone number. They was trying to find a contact. So they called the contact. I went back on the inside. And it was a rainy day, so I got a piece of cardboard. We wanted to kind of like cover him from the -- from the -- it was like a misty rain.

Q. Sure.

A. So they kind of like covered him because he was on -- on the sidewalk. Basically that's what it was.

Q. Okay. And if we had to just summarize your testimony, and I want to make sure we're accurate, you don't know why he fell. Is that correct?

A. No, I don't know. No, sir.

Q. You don't know why he fell?

A. I don't know the cause. No, sir.

Q. Okay. And you just know that you saw him fall?

A. Yes.

Q. You saw him only -- you didn't see him from about a little bit below the waist down. Correct?

A. Yes.

Q. You saw him hit the ground?

A. Yes.

Q. You saw that he was injured?

A. Yes.

Q. You saw him get help? Or rather, you called for help?

A. Yes.

Q. Were you still there when EMS showed up?

A. Yes.

Q. And did they strap him down? Or tell me what you remember.

A. I don't know if they strapped him down or not. I was trying to get out of there.

Q. Okay. Okay. Because you knew he was in good hands? The medical team was there.

A. Yes.

Q. You had already gotten help.

A. Yes.

MR. DUMAS: Can I have just a moment --

MR. COOK: Sure.

MR. DUMAS: -- to talk with Ms. Dillon for just a moment? And we may be able to wrap up.

MR. COOK: Okay.

(OFF THE RECORD FROM 2:13 P.M. TO 2:14 P.M.)

BY MR. DUMAS:

Q. Just very briefly, Mr. Fludd.

A. Yes, sir.

Q. The Affidavit that you signed was drafted by someone other than you. Correct?

A. Yes, sir.

Q. And do you remember what -- was it in an office that you signed this?

A. In a UPS store.

Q. In a UPS store. Do you remember who it was that -- do you have any idea who prepared this?

A. No, sir.

Q. But it wasn't your own words?

A. It was my word -- that's what I described to them, yes.

Q. Okay. You described to someone exactly what you just told us today?

A. Yes.

Q. And because you didn't -- I noticed in your testimony, you said that he just fell.

A. Yes.

Q. And the reason I ask that is because you didn't necessarily use the word "collapse." You said "fell."

A. Okay.

Q. And I just want to make sure that, from what you saw, in your words, what you saw was him fall.

A. I describe a fall as a -- the same -- I would -- my definition of a fall and a collapse is about the same thing.

Q. Okay.

A. You know?

Q. Okay. Mainly because you have no idea how or why it happened?

A. Yeah.

Q. Okay. How long did you see Mr. -- about how long, if you remember, did you see Mr. Dillon before he fell?

A. I saw him once on the inside of the building.

Q. Uh-huh.

A. And one was on the outside from where I was, from putting parts in and out the truck. May have taken ten minutes.

Q. Okay. But you were obviously busy with what you were doing. Correct?

A. Yes.

Q. Because you weren't -- you didn't have any reason to be watching Mr. Dillon for any particular reason. Did you?

A. No, sir.

Q. So I guess what I'm asking is do you remember how long you observed him before he fell? Or is it the

act of falling that caught your eye?

A. I saw him maybe a minute before he -- before he fell.

Q. Okay. Were you actually watching him for that full minute?

A. No. How I was putting paperwork inside my truck had me looking that direction.

Q. Okay. So you were just kind of looking in that general direction?

A. Yes, sir.

Q. So what was it? Maybe you might have seen him one or two seconds before he fell, if that long?

A. No, I probably saw him probably about a minute before he fell.

Q. You were actually watching him?

A. No. I was watching that direction.

Q. Oh, okay. And I assume the motion is what caught your eye?

A. Yes.

Q. The motion of the fall?

A. Yes.

MR. DUMAS: I have nothing further.

REDIRECT EXAMINATION

BY MR. COOK:

Q. Mr. Fludd, just to be clear. You know, every

story has a beginning and a middle and an end.

A. Yes, sir.

Q. And the same is true with Mr. Dillon. Were you facing Mr. Dillon before he collapsed?

A. Yes.

Q. Did you see Mr. Dillon before the act of collapsing started to commence?

A. Yes.

Q. So to state it another way, did you see the beginning of this event?

A. Yes.

Q. And you saw him go all the way down, which I would characterize as being the middle?

A. I saw him fall all the way until I couldn't see him from the tailgate.

Q. And then you came around the tailgate?

A. Yes. I ran around to him.

Q. And was he on the ground?

A. Yes.

Q. And that was the end of his fall?

A. Yes.

Q. Is it fair to say that you saw the beginning and the middle and the end?

A. Yes.

Q. Now, Counsel had asked you earlier about

seeing him from the waist up. So did you see him from his torso, about where his belt would be, all the way up?

A. No, sir. A little bit farther down.

Q. A little bit farther down?

A. Yeah.

Q. Could you see any portion of his legs?

A. I could see, if this is called, a thigh area.

Q. Thigh area.

And when you observed his thigh areas immediately before he collapsed, were his thighs stationary?

A. Yes.

Q. Were his thighs idle?

A. Yes.

Q. Were his thighs moving in a manner consistent with walking immediately before he fell?

A. No, sir.

Q. In your opinion, can somebody walk without their thighs moving?

A. No, sir.

Q. Based on what you observed in the thigh area, do you have any reason to believe that he slipped on anything?

A. No, sir. I couldn't -- no, sir.

MR. COOK: I have nothing further.

RECROSS-EXAMINATION

BY MR. DUMAS:

Q. But just to be clear, sir, you don't know if he slipped on anything or not. Do you?

A. No, sir.

Q. Okay. And you were about how far away from him? And I know most people are notoriously bad on gauging distance.

A. Whatever the distance from here to that corner. No further than that.

Q. Okay.

MR. COOK: The corner of the table?

THE WITNESS: The corner of the building right there.

BY MR. DUMAS (RESUMING):

Q. And you were -- part of your view was obstructed. You couldn't -- in other words, you couldn't see everything because something was blocking a portion of your view?

A. Yes, sir.

Q. What was blocking a portion of your view?

A. My truck.

MR. DUMAS: Okay. And Counsel, it would be fair to say we're talking about maybe

15 yards?

MR. COOK: I wouldn't -- 15 yards would be 45 feet. I don't think it's --

MR. DUMAS: Okay.

MR. COOK: Are you pointing to this corner?

THE WITNESS: This corner right there. Yes, sir.

MR. DUMAS: Of the room?

MR. COOK: Of the room?

THE WITNESS: Of the room.

MR. DUMAS: Maybe about 30 feet, 10 yards?

MR. COOK: I would say 10 yards, a first down at the most.

MR. DUMAS: Okay. About a first down?

MR. COOK: Yes.

BY MR. DUMAS (RESUMING):

Q. Okay. But your truck was blocking a portion of the view?

A. The tailgate from the bed of the truck down was blocking the bottom half.

Q. And your primary attention, at this point in time, was in -- you stop me if I'm wrong. Your primary focus was in keeping your paperwork dry, and completely

your work and your job?

A. Yes.

Q. Because you had no particular reason to be paying any attention at all to Mr. Dillon?

A. No, sir.

Q. Okay. Nothing further.

REDIRECT EXAMINATION

BY MR. COOK:

Q. Mr. Fludd, I understand from your testimony that obviously you were concerned about the business that you had at hand.

A. Yes, sir.

Q. Would I be wrong to say that your business at hand distracted you from the point that you somehow did not get an accurate accounting or a view of Mr. Dillon collapsing? Or did you see him clearly, despite what you had going on?

A. I saw him clearly.

MR. COOK: Thank you. Nothing further.

RECROSS-EXAMINATION

BY MR. DUMAS:

Q. But what you saw clearly was what you've described to us today?

A. Yes.

MR. DUMAS: Okay. Thank you.

MR. COOK: Nothing further. That will conclude your deposition, Mr. Fludd.

(FURTHER DEPONENT SAYETH NOT.)

(THE DEPOSITION OF JOSIAH FLUDD CONCLUDED AT 2:21 P.M.)

CERTIFICATE OF REPORTER

I, MELISSA M. WHITLOCK, COURT REPORTER AND NOTARY PUBLIC FOR THE STATE OF SOUTH CAROLINA, DO HEREBY CERTIFY THAT I REPORTED THE DEPOSITION OF JOSIAH FLUDD ON THURSDAY, THE 15TH DAY OF OCTOBER, 2015, THAT THE WITNESS WAS FIRST DULY SWORN BY ME AND THAT THE FOREGOING 27 PAGES CONSTITUTE A TRUE AND CORRECT TRANSCRIPTION OF MY VERBATIM REPORT OF SAID DEPOSITION.

I FURTHER CERTIFY THAT I AM NEITHER ATTORNEY NOR COUNSEL FOR, NOR RELATED TO OR EMPLOYED BY ANY OF THE PARTIES CONNECTED WITH THIS ACTION, NOR AM I FINANCIALLY INTERESTED IN SAID CAUSE.

I FURTHER CERTIFY THAT THE ORIGINAL OF SAID TRANSCRIPT WAS THEREAFTER SEALED AND DELIVERED TO MATTHEW R. COOK, TURNER PADGET GRAHAM & LANEY, P.A., 1901 MAIN STREET, SUITE 1700, COLUMBIA, SOUTH CAROLINA 29201, WHO WILL RETAIN THIS SEALED TRANSCRIPT AND SHALL BE RESPONSIBLE FOR FILING SAME WITH THE COURT PRIOR TO TRIAL OR ANY HEARING WHICH MIGHT RESULT IN A FINAL ORDER ON ANY ISSUE.

IN WITNESS WHEREOF, I HAVE SET MY HAND AND SEAL THIS 29TH DAY OF OCTOBER, 2015.

Melissa M. Whitlock

MELISSA M. WHITLOCK, COURT REPORTER

MY COMMISSION EXPIRES MARCH 12, 2024

VERIFICATION OF DEPONENT

I, JOSIAH FLUDD, HAVE READ THE FOREGOING DEPOSITION TESTIMONY, WHICH WAS REPORTED BY MELISSA M. WHITLOCK, COURT REPORTER AND NOTARY PUBLIC IN AND FOR THE STATE OF SOUTH CAROLINA, ON OCTOBER 15, 2015.

I FIND THE TRANSCRIPT OF THE DEPOSITION TO BE A TRUE AND ACCURATE TRANSCRIPT ACCORDING TO MY TESTIMONY ON THAT DATE, WITH THE EXCEPTION OF ____ CORRECTIONS AS LISTED ON THE ATTACHED ERRATA SHEET, WHICH WAS COMPLETED BY ME.

Citation and Notification of Penalty

To:
FleetPride Inc
1631 Shop Road
Columbia, SC 29201

Inspection Site:
1631 Shop Road
Columbia, SC 29201

Inspection Number: 317894277
CSHO ID: V0480
Optional Report No.: 0107-16
Inspection Date(s): 8/19/2015 - 10/9/2015
Issuance Date: 10/23/2015

The violation(s) described in this Citation and Notification of Penalty is (are) alleged to have occurred on or about the day(s) the inspection was made unless otherwise indicated within the description given below.

This Citation and Notification of Penalty serves as the ***Agency's Determination*** with regard to an inspection of a workplace under your operation, ownership or control. This inspection has revealed conditions which we believe, do not comply with certain safety and health rules and regulations promulgated pursuant to 41-15-210, South Carolina Code of Laws, 1976, as amended The nature of such alleged violation(s) is described in the enclosed citation with references to applicable OSHA standards, rules and regulations, and provisions of the law. All applicable OSHA standards referenced have been adopted pursuant to S.C. Code Ann. §41-15-220 and are incorporated by reference into this state's regulations pursuant to S.C. Code Ann. Regs. 71-108.

POSTING - The law requires that a copy of the enclosed citation(s), unedited, be prominently posted immediately upon receipt at or near each place a violation referred to in the citation occurred ("affected work area"). In the event that it is not practical to post the citation in the affected work area, the citation must be prominently posted in a place readily observable by all affected employees. It must remain posted until all violations cited therein are corrected, or for three (3) days, whichever period is later.

ABATEMENT - Alleged violations that are not contested shall be corrected by the abatement date specified in the citation Failure to correct an alleged violation within the abatement period may result in an additional assessment of penalties.

As to alleged violations, you are directed to certify to the Compliance Manager, within ten (10) calendar days following the abatement dates assigned, the specific corrective action taken for each violation and date of such action. A copy or summary of this corrective action must be posted in the affected work area on or before submission to OSHA. Employees or their representatives (where applicable) must be informed of their right to examine and copy all abatement documents submitted. Employers must comply with these requests with five (5) working days. **For abatement dates over ninety (90) days, an Abatement Verification Plan may be required to be submitted.**

If additional time is needed to correct the alleged violations in the citation, you may request an extension by writing the Compliance Manager within the following applicable time frames: 1) any time within the thirty (30) day contest period, or 2) not later than one (1) day after the last abatement date for the alleged violation on which an extension is needed.

PENALTY PAYMENT - Penalties as outlined in this Citation and Notification of Penalty, the Agency's Determination, are due within thirty (30) days of receipt unless contested. Make your check or money order payable to the South Carolina Department of Labor, Licensing, and Regulation at the address listed above. Please indicate the inspection number on the remittance.

RIGHT TO CONTEST - You have the right to contest the citation(s), the abatement dates and/or the proposed penalty (ies) enclosed in this **Citation and Notification of Penalty**. As this is the Agency's Determination, you may file a Request for a Contested Case Hearing with the South Carolina Administrative Law Court (ALC) within thirty (30) calendar days of receipt of this Citation and Notification of Penalty. These procedures may be found on the ALC website at http://www.scalc.net/rules.aspx or you may contact the Clerk, SC Administrative Law Court, Edgar A. Brown Building, 1205 Pendleton Street, Suite 224, Columbia, SC 29201, (803) 734-0550.

INFORMAL CONFERENCE - If an employer wishes to have an informal discussion in the interest of reaching a settlement regarding the citation(s), the abatement date(s), and/or penalty(ies) without a formal contest, an informal conference can be arranged by contacting the Informal Conference Office at 803-896-7687. In order for a conference to be scheduled and a decision to be provided, the Informal Conference Office should be contacted as soon as possible after the receipt of the **Citation and Notification of Penalty.**

All informal conferences must be held within the thirty (30) day contest period. **AN INFORMAL CONFERENCE SHALL NOT OPERATE AS A STAY FOR THE THIRTY (30) DAY CONTEST PERIOD AND NO CONFERENCE OR REQUEST FOR A CONFERENCE WILL BE HELD OR ACCEPTED SUBSEQUENT TO RECEIPT OF A NOTICE OF CONTEST.**

If an informal conference is scheduled, the employer must notify the affected employees or union representative of the date, time, and location of the informal conference, the items to be discussed and their right to participate. Notice may be accomplished by the employer by posting a notice (see "Notice to Employees of Informal Conference" provided with this package) by the citation or by serving a copy of the notice on the union representative. A copy of the notice must be provided to the Informal Conference Hearing Officer at the time of the conference. An informal conference will not be conducted unless the employee or union representative has been afforded the opportunity to participate. Be sure to bring to the conference any and all supporting documentation of existing as well as any abatement steps taken thus far. If conditions warrant, we may enter into an informal settlement agreement (ISA) to resolve all issues.

EMPLOYER DISCRIMINATION UNLAWFUL - The law prohibits discrimination by an employer against any employee filing a complaint or for exercising any rights under the OSHA Act. An employee who believes that he/she has been discriminated against may file a complaint no later than thirty (30) days after the discrimination occurred with the South Carolina Department of Labor, Licensing, and Regulation at the address shown above.

CONCLUSION - A follow-up inspection may be conducted for the purpose of determining that you have complied with the posting requirements outlined in the law and abated (corrected) the alleged violations as you have reported in the corrective action documentation. Note that the law provides that whoever knowingly gives false information will be subject to a fine and/or imprisonment.

If you wish further information, you may direct such requests to the Compliance Manager at the address listed above.

NOTICE TO EMPLOYEES OF INFORMAL CONFERENCE

An informal conference has been scheduled with OSHA to discuss the citation(s) issued on 10/23/2015. The conference will be held at the OSHA office located at 110 Centerview Drive, Columbia, S.C. 29210 on _____ at _____. Employees and/or representatives of employees have a right to attend an informal conference.

Citation and Notification of Penalty

Company Name: FleetPride Inc
Inspection Site: 1631 Shop Road, Columbia, SC 29201

Citation 01 Item 001 Type of Violation: **Other**

SC Code Ann. Regs. 71-339(a): Failed to report fatalities, hospitalizations, amputations, and losses of an eye as a result of work-related incidents to OSHA. (1) Within eight (8) hours after the death of any employee as a result of a work-related incident, you must report the fatality to the Occupational Safety and Health Administration (OSHA), U.S. Department of Labor. (2) Within twenty-four (24) hours after the in-patient hospitalization of one or more employees or an employee's amputation or an employee's loss of an eye, as a result of a work-related incident, you must report the in-patient hospitalization, amputation, or loss of an eye to OSHA. (3) You must report the fatality, in-patient hospitalization, amputation, or loss of an eye using one of the following methods: (i) By telephone (1-803-896-7672) or in person to the South Carolina OSHA Office. (ii) By telephone to the OSHA toll-free central telephone number, 1-800-321-OSHA (1-800-321-6742), as follows:

A. A fatality, which occurred on February 27, 2015, had not been reported to South Carolina Department of Labor, Licensing, and Regulation as of August 19, 2015.

Date By Which Violation Must Be Abated: **Corrected During Inspection**
Proposed Penalty: **$3,750.00**

FINAL NOTICE FINAL NOTICE FINAL NOTICE

Dear: EDMUND DILLON

Our records indicate you have not responded to our initial notice and your account is still outstanding. If you have made a payment within the last 10 days please disregard this notice.

This is the final notice you will receive before your account is referred to a licensed collections agency.

You can resolve your outstanding balance through the following methods: visit our website @ www.ezmedinfo.com/pitts, call our Automated Phone System 24/7 or utilize our Call Center at 866-481-7572 during standard business hours.

Once the account has been sent to the collection agency, payment arrangements and any other communication will need to be handled with the agency.

PALMETTO HEALTH

Dear Edmund Dillon:

Thank you for choosing Palmetto Health as your healthcare provider.

There is a balance due on your account as indicated on this statement.

Please send payment in full. For your convenience, we accept MasterCard, Visa, American Express, and Discover. To ensure proper crediting of your account, please include your patient account number on all payments. Your prompt payment is appreciated.

Patients may also request a payment plan on their account through AccessOne, a medical credit card partner that offers interest-free and low-interest long-term payment plans. To set up a payment plan, contact AccessOne at 888-458-6272 or visit www.mya1mc.com.

If you have any questions about your bill, please contact us at the numbers provided on this statement.

Powers Funeral Home, LLC

832 Ridgeway Road / P.O. Box 65, Lugoff, SC 29078- (803)408-8711

DATE February 27, 2015 SERVICE NO. 2015048

DECEASED NAME Edmund John Dillon

DATE OF DEATH February 27, 2015 PLACE OF DEATH KershawHealth Camden, SC

Charges are only those items that you selected or that are required. If we are required by law or by a cemetery or a crematory to use any items, we will explain the reasons in writing below. If you selected a funeral that may require embalming, such as a funeral with viewing, you may have to pay for embalming. You do not have to pay for embalming you did not approve if you selected arrangements such as a direct cremation or immediate burial. If we charged for embalming, we will explain why below.

STATEMENT OF FUNERAL GOODS AND SERVICES SELECTED

A. Total Wages Paid

1. Check Applicable Method: Date of Injury: 02/23/2015 (month day year)
   - ☐ Report of earnings of injured employee based on four completed quarters.
   - ☐ Report of earnings of injured employee who did not complete four quarters based on actual time worked.
   - ☐ Report of earnings of similar employee. Injured employee did not work sufficient time before alleged injury. Hire Date: _____.
   - ☐ Report of earnings of injured employee based on alternative method because Form 20 results in a compensation rate that is not fair and just. (Attach documentation to show how average weekly wage and compensation rate were calculated.)

2. List total wages paid as reported to Employment Security Commission on the Employer Quarterly Contribution and Wage Reports during the four quarters immediately preceding the quarter in which the injury occurred. Do not include the quarter during which the injury occurred.

Quarter	Ending Date	Total Wages Paid	
1st	03-30-14	15,649.32	
2nd	06-22-14	15,960.09	
3rd	09-28-14	18,248.23	
4th	12-21-14	15,836.56	Total Paid 2. 65,694.20

3. List total value of other allowances of any character made in lieu of wages during four quarters above. 3. _____

4. Add lines 2 and 3. TOTAL WAGES PAID: 4. 65,694.20

5. List total number of weeks paid to employee during the four quarters immediately preceding the quarter in which the injury occurred. 5. 52

B. Average Weekly Wage

6. To calculate average weekly wage, divide total wages (line 4) by total weeks paid (line 5). AVERAGE WEEKLY WAGE: 6. 1263.35

C. Compensation Rate

7. The general rule for calculating the compensation rate is to multiply average weekly wage (line 6) by .6667. Estimate compensation rate by multiplying average weekly wage (line 6) by .6667. See part 8 below to determine the actual compensation rate. 7. 842.27

8. The compensation rate is as follows (choose one):
   - ☐ When average weekly wage (line 6) is less than $75.00, the compensation rate is the average weekly wage. Enter average weekly wage on line 8.
   - ☐ When the estimated compensation rate (line 7) is less than $75.00 and average weekly wage (line 6) is more than $75.00, the compensation rate is $75.00. Enter $75.00 on line 8.
   - ☑ When the estimated compensation rate (line 7) is more than the maximum compensation rate for the year in which the injury occurred, enter the maximum compensation rate for the year in which the injury occurred on line 8.
   - ☐ Employee is within the exceptions listed in S.C. Code Ann. Section 42-7-65. List applicable exception here and enter appropriate compensation rate on line 8: _____.
   - ☐ The calculated compensation rate (line 7) applies. Enter amount from line 7 on line 8.

WEEKLY COMPENSATION RATE: 8. 766.05

Employer's representative shall prepare a Form 20 and serve per R.67-211 a copy on the claimant within thirty days of beginning temporary compensation. See R.67-1603 when no temporary compensation is paid. NOTE: Average weekly wage represents average gross pay before taxes and other deductions. WHEN THE CLAIMANT DOES NOT AGREE WITH THE COMPENSATION RATE ON LINE 8, HE OR SHE SHOULD CONTACT THE EMPLOYER'S REPRESENTATIVE TO TRY TO REACH AN AGREEMENT AS TO THE COMPENSATION RATE. IF NO AGREEMENT CAN BE REACHED THE CLAIMANT SHOULD CONTACT THE CLAIMS DEPARTMENT AT (803)737-5723.

PRE-HEARING BRIEF
WCC File No: 1501382

Claimant's Name:	Edmund Dillon, Dec'd	Employer's Name:	Raffles (FleetPride)
Address:		Address:	310 FP1 Col Retail
City	State Zip:	City	Columbia State: SC Zip:
Home Phone:	Work Phone:	Carrier:	Gallagher Bassett as TPA for American Zurich Insurance Company
Preparer's Name:	Cynthia C. Dooley, Esq.	Preparer's Phone #:	(803) 227-4209

A claim for workers' compensation benefits is made based on the following grounds:
☒ Injury ☐ Illness ☐ Repetitive Trauma

1. Compensation Rate: $ 766.05 2. AWW: $ 1,263.35 Date of Injury: 2/23/2015
3. Type of injury and body part(s): Head Injury
4. Facts in controversy: Whether the Claimant suffered a syncopal episode as a result of a condition peculiar to him or a compensable fall
5. Legal issues involved: S.C. Code Ann. §42-1-160
   Bagwell v. Burwell, Inc., 27 S.C. 444, 88 S.E.2d 611 (1955); Miller v. Springs Cotton Mills, 225 S.C. 326, 82 S.E.2d 458 (1954)
6. Unusual aspects: Defendants received Claimant's expert reports on 5/26/16 and will file a motion for postponement in order to take the doctors deposition. Or in the alternative request that the record remain open to allow inclusion of the deposition to be taken after the hearing
7. Witnesses (designate if expert):* Josiah Fludd; Greg Lane, supervisor; Fred Mogride, supervisor; Steve Mathis, co-employee, Dr. Jay Vandersteenhoven, medical expert. Defendants reserve the right to cross examine any expert

   Exhibits: Amended Death Certificate
9. Medical evidence (indicate report pursuant to R.67-612; deposition or appearance):
   See APA submissions along with reports pursuant to R.67-612 including medical expert report
10. Name, address, and specialty, if any, of the treating physician: Palmetto Health Richland of Columbia, SC
11. Impairment rating(s); body part(s); physician and date of opinion: None due to death
12. I am amending my Form 50/51 in the following manner:

☐ **Mediation**
- ☐ a. Mediation is requested to be ordered pursuant to Reg. 67-1801 B.
- ☐ b. Mediation is required pursuant to Reg. 67-1802.
- ☐ c. Mediation is requested by consent of the Parties pursuant to Reg. 67-1803.
- ☒ d. Mediation has been conducted by a duly qualified mediator and resulted in an impasse.

Questions regarding mediation may be submitted to mediation@wcc.sc.gov.

I verify the contents of this form are accurate and true to the best of my knowledge.

I certify I have served this document pursuant to Reg. 67-211 by delivering a copy to Claimant's attorney, Brian Dumas, Esquire, on the 31st day of May, 2016, by: ☒ first class postage ☐ certified mail ☐ personal service.

Signature:
Email: CDooley@TurnerPadget.com
Date of hearing: June 10, 2016
Time needed for hearing: 1 hour

Questions about the use of this form should be directed to the Jurisdictional Commissioner. Refer to Regulations 67-204 through 67-211 and Regulations 67-601 through 67-615; as well as Regulation 67- 1801. File this form and proof of service on the opposing party according to R.67-611 and R.67-212. Do not send medical reports. * Commissioners reserve the right to admit expert witnesses at hearings.

MEDICAL SUMMARY OF EDMUND DILLON

DATE	PROVIDER
2/4/1994	**Kershaw County Medical Center** • 35-year-old white male syncope this a.m. – got up to go to bathroom, coughing spell, felt dizzy, and passed out – poor historian – vague sensation of weak and dizzy for undetermined time period to fall but denies CP, SOB, palpations – no seizure activity or postcoital state. • Vasovagal syncope/orthostatic hypertension. • Follow up with family doctor by Monday or return if condition worsens. • Passing out in bathroom, coughed in bathroom and hit head.
4/24/01	**Columbia Skin Clinic – Letter** • Dates seen: 3/30 and 4/20 • Dx: (1) skin cancer, left upper cheek; (2) Nevus, left upper cheek; (3) Baal cell carcinoma left upper cheek • Tx: Shave biopsy; Curettement and desiccation
1/6/03	**Columbia Skin Clinic** • operation – Mohs micrographic surgery • Post of dx: Basal cell carcinoma, left medial cheek
8/30/05	**Columbia Skin Clinic** • Patient c/o of lesion
9/9/05	**Columbia Skin Clinic** • Letter: recently biopsied a skin lesion was that of a Clark's mole. These lesions are common and generally do not pose a problem. Important to do self-exams
2/14/06	**Columbia Skin Clinic**
2/5/07	**Columbia Skin Clinic** • Patient presents for growth neck
2/3/14	**Dr. Shafi of Providence Hospital** • HPI: in for establishment of care; has history of alcoholism and smoking. Patient was seen in the ER on 12/22/13. Patient has not been to PCP before. • Patient has elevated blood pressure; he has home monitoring

	• Patient has been having over 10 drinks a week for 30 years. Drinks Whiskey. Had been smoking 3 packs a day but has cut that down • Family history – Father: High BP; Mother: Cancer • Impressions: (1) Elevated BP without diagnosis of HTN; (2) Colon cancer screening recommendation; (3) Smoking cessation; (4) Bilateral callus on his feet; (5) Needs full health screening, patient states he will come back to do that; and (6) alcoholism – discussed AA and long-term complications from drinking
10/14/14	**Columbia Skin Clinic** • Patient presents for growth on R forearm for 8 weeks • Tx: Shave bx
10/29/14	**Columbia Skin Clinic** • Presents to treat bxproen BCC by EDC
2/18/15	**Columbia Skin Clinic** • Patient has 4 month Hx of NMSC • Dx: (1) Sk's, solar lentigenes; (2) Hx of NMSC; (3) follicular cyst; (4) Jaundice • Tx: stressed sun precautions; No real treatment today
2/23/2015	**Jennifer D. Watson, RN** • Per EMS, patient tripped and fell, denies loss of consciousness. Jaundice noting along with swollen abdomen and rectal bleeding. Patient states he has been yellow and no appetite and diarrhea for 2 weeks. • Current every day smoker and has been smoking ½ pack for 30 years.
2/23/2015	**Dr. Mark Jones** • Laceration noted on back of head. Patient is jaundiced.
2/23/2015	**Dr. Mark Jones/Dr. David T. Ford** • 56-year-old male presenting after he fell. States he slipped and fell. Hit the back of his head. States he wants to go back to work but his firm would not let him. Patient states he has not felt well over the last several days, has not been eating well, and did notice that his skin had changed color but attributed this to that. He has had vomiting and diarrhea and just not felt well but today he had a mechanical fall and did not have any syncopal symptoms. Denies any headache, chest pain, or increased shortness of breath. He has an abrasion to his back. • Given his endorsement of daily alcohol use as well as his physical exam concerned for intraabdominal pathology, hepatitis [audio unclear] really is acute, or other cause. • Impression: Acute intracranial hematoma secondary to blunt trauma (fall), Hyponatremia, Hyperbilirubinemia, hypokalemia.
2/23/2015	**Dr. G. Peter Smith**

	• 56-year-old male with no stated history presents after ground-level fall. Jaundiced on arrival.
2/23/2015	**Dr. Mark A. Jones** • Patient with questionable medical history although we are told H/O ETOH. He is obviously jaundiced. His labs are severely deranged with bili of 23, NA 118, INR 1.7, PT 20. HGB 11.8. Appears he has end-stage hepatic dysfunction although other etiologies of his hyperbilirubinemia will need to be ruled out. • Liver failure and coagulopathy with cachexia and significant jaundice. • Very likely alcoholic hepatitis superimposed on alcohol induced cirrhosis. At this point, no specific evaluation of his liver disease beyond that already done is planned. • His wife states she has noticed his skin and eyes yellowing over the past 1-2 weeks. She admits that he drinks daily. Unable to testify to the amount but has been drinking daily for many years. Occasionally she has known him to have hand tremors. Tobacco use. • Diffuse fatty infiltration of the liver with more focal fatty infiltration within the caudate head of the posterior segment of the right lobe; abdominal ascites, diffuse colonic wall thickening suggestive of pancolitis sigmoid without diverticulitis, cyst left kidney, tiny 3mm incomplete image nodule question within the right middle lobe of the lung. • Likely ETOH hepatitis with likely underlying liver disease.
2/23/2015	**Dr. Charles P. Toussaint** • 56-year-old male with evidence of liver failure and coagulopathy. • Right-sided decompressive craniotomy for evacuation of subdural hematoma.
2/23/2015	**No physician noted.** • Alcoholic cirrhosis, smoker, jaundiced, ascites.
2/23/2015	**CT of Abdomen** • Revealed diffuse fatty infiltration of the liver, abdominal ascites, diffuse colonic wall thickening suggestive of ankylotis, sigmoid diverticulosis without diverticulitis, cyst on left kidney, 3mm incomplete image nodule question on the right middle lobe.
2/23/2015	**CT of Head**
2/23/2015	**CT of Cervical Spine**
2/24/2015	**Dr. Mark Jones** • Post fall with acute chronic subdurals a large RICH worsenings S/P intercraniotomy in a setting apparent acute liver failure and elevation of bilirubin. • HEPA test failure; patient's family requests a consultation with MUSC about possible transplant. We have contacted them and he is not a candidate.

2/24/2015	**Dr. Alejandro J. Luis** • Traumatic brain injury; acute kidney injury.
2/24/2015	**Jessica A. Justice, RD, LD** • Patient is post fall with SAH and SDH with midline shift of head CT. Patient with extensive ETOH history and presenting signs of end-stage liver disease. • Patient presents with ascites and distended rounded abdomen with end-stage liver disease concern. GI has been consulted and liver enzymes to be monitored. • Jaundice on appearance with foreskin turgor and severe lean muscle wasting in upper and lower extremities with ETOH abuse history – all factors indicating malnutrition. • Per GI consult, fatty infiltrates, diffuse colonic wall thickening related to ascites.
2/24/2015	**X-ray of chest**
2/24/2015	**CT of Head**
2/24/2015	**Kenneth N. Butler, RN** • Fall requiring craniotomy, pmh liver failure • Family denies having primary care physician • MCM problems – knees, drugs/alcohol abuse, financial needs • Alcohol use but wife unsure of amount • Tobacco use smoking 10 cigarettes a day for 30 years
2/25/2015	**Dr. Charles P. Toussaint** • 56-year-old fell today and brought to ER. Head CT revealed SAH and SDH with midline shift and neurosurgery was consulted. Patient has decompensated while in the ER and is about to get intubated. He is drowsy at the time of the exam and unable to communicate or contribute to history. • Laceration to back of head, post op dressing in place, drain in place. • Jaundiced.
2/25/2015	**Dr. Mark A. Jones** • Spoke with family and extended family about the patient's overall poor prognosis including brain injury, liver and kidney failure, respiratory failure and developing infection. They have agreed to change the comfort care while permitting vent support until tomorrow at 3:00 p.m. when his daughter arrives. Eventually will stop all medications except Fentanyl and Propofol if needed for anxiety.
2/25/2015	**Dr. Anthony D. Lowman** • He has ascites. Urine output is essentially zero. He is developing hepatorenal syndrome. I discussed this situation with patient's wife. I have explained that further evaluation of liver disease and intervention for same is not indicated in the current situation.

	• Alcoholic cirrhosis. • Leukocytosis. • Normocytic anemia. • Thrombocytopenia. • Coagulopathy. • Hyperbilirubinemia. • Transaminitis. • Acute kidney failure. • Hypoalbuminemia.
2/25/2015	**Dr. Mark A. Jones** • History of heavy alcohol abuse and skin cancer. • At work when he suffered a mechanical fall and developed increasing headache. • He wanted to go back to work but they would not allow him. • In the ER, his neurological status decompensated significantly and required intubation. • CT shows subdural hematuria acute on chronic as well as subarachnoid hemorrhage. • Underwent emergency craniotomy. • Is in SSU and remains intubated. • Daughter at bedside and much of the history is obtained through her and the chart. • Patient was incredibly jaundiced on arrival. • He has been having nausea and vomiting as well as diarrhea and has not been eating well for several days prior to his fall. Patient was severely dehydrated by urinalysis and labs. • His sodium level on admission was 118; his LFTS were incredibly elevated with an AST must greater than ALT and bilirubin of 23. • Patient was heavy smoker. • 2 sons and 2 daughters with his first wife. • Has been remarried for approximately 7 years with 2 stepchildren. • Was employed at a parts distributor where he fell. • Daughter reports that he does not always drink heavily but may have started after his mom died 9 months ago and probably worsened after his father's death 5 years ago. • When she was young, he drank only occasionally. • Per records, has been drinking unknown amounts. • Acute alcoholic hepatitis with elevated bilirubin, jaundice.
2/25/2015	**Dr. Mark A. Jones** • I spoke with the wife and extended family about the patient's overall poor prognosis including brain injury, liver and kidney failure, respiratory failure and developing infection. They've agreed to change the comfort care while permitting the vent support only until tomorrow at 3:00 p.m. when the daughter arrives.

2/26/2015	**Palmetto Health Richland Karin Jenkins, MD** • 56-year-old Caucasian gentleman admitted with subdural hematoma and subarachnoid hemorrhage with midline shift status post craniotomy for subdural hematoma. Now intubated and unresponsive on the ventilator. • Patient's daughter Robin is at bedside. Confirmed they are waiting for family to arrive and will do a terminal extubation. • Patient with very poor progress, worsening; head CT with enlarged right frontal hemorrhage. • Acute alcoholic hepatitis with elevated bilirubin, jaundiced, chronic alcoholic liver disease with evidence of fatty infiltration of the liver, coagulopathy, thrombocytopenia, ascites, history of skin cancer, acute renal failure, leukocytosis, and coagulopathy. • Providing palliative care.
2/27/2015	**Dr. Mark A. Jones** • 56-year-old male post slip and fall with acute on chronic subdurals enlarged rich, worsening s/p hemicraniectomy in the setting apparent acute liver failure and elevation of bilirubin.
2/27/2015	**Dr. Mark Jones** • He is not a candidate for a liver tx – although his MELD score is 37 which places him greater than 50% mortality at baseline even without the terrible TBI.
2/27/2015	**Grace M. Boteloo-Nasorn** • Patient's family called the desk asking for nurse to come to room. Patient with long periods of apnea and then took his last breath while they were at bedside. No spontaneous resuscitations. Confirmed death with Aramide Mitchell, RN.
2/27/2015	**Dr. Timothy B. Depp** • Patient admitted for fall and intracranial hemorrhage and hyperbilirubinemia. There was a transfer diagnosis of a fall, intracranial hemorrhage, hyperlipidemia, acute kidney injury, leukocytosis, and respiratory failure. Dr. Toussaint performed a hemi craniotomy on February 23, 2015, with a central line placement done by Dr. Depp on February 24, 2015. Consults were obtained with neurosurgery (Dr. Toussaint), palliative care (Dr. Jenkins), and gastroenterology (Dr. Lowman). Patient had a history of apparent heavy alcohol use with recent worsening jaundice, altered mental status with fall and subsequent development of subarachnoid hemorrhage. • A subarachnoid hemorrhage is an interruption to blood flow to part of the brain and is a type of stroke. The blood vessels on the surface of the brain burst and the blood spilled into the surrounding tissue. This type of stroke often happens suddenly with little warning and is the most serious of all types of strokes.
2/27/2015	**Chaplin Spiritual Assessment**

	• Palliative care came with consultant on 2/24 and actually written on 2/24 to help with goals. He had suffered an ICH on 2/23 with fall at work. He was seen by Dr. Karin Jenkins of our team who listed 7 co-morbidities. He was on STICU and then was terminally extubated on February 27. However, with insurance consideration, AETNA and workers' comp due to his fall at work, he is not yet admitted to hospice. I met five of his family members including his wife April, daughter Robin, sister and an older woman and older man spokesman with who I think is his dad and older brother. He has remarried to April, his second wife, and 2 stepchildren. His first wife had given him 2 sons and 2 daughters. He is actively dying. Dr. Jenkins reported that he worked as parts distributor and attended Our Lady of Perpetual Help Catholic Church in Camden. A woman [audio unclear] he is a lapsed Catholic. He has apparently battled with alcoholic cirrhosis and was not a liver transplant candidate and he may have had melanoma.
2/27/2015	**Stephanie Hill** • Burial/death notification, body to be released to Powers Funeral Home at 832 Ridgeway Road, Lugoff, South Carolina 29018. • Body released by Doris McGowan
2/28/2015	**Dr. Jason Barber** • Claimant was admitted to Trauma Services with a right subdural hematoma and underwent decompressive craniotomy, condition declined, he passed away at 12:30 p.m. on February 27, 2015.

A claim for workers' compensation benefits is made based on the following grounds:
☒ Injury ☐ Illness ☐ Repetitive Trauma

1. Compensation Rate: $ 766.05 2. AWW: $ 1,263.35 Date of Injury: 2/23/2015
3. Type of injury and body part(s): Head injury
4. Facts in controversy: Whether the Claimant suffered a syncopal episode as a result of a condition peculiar to him or a compensable fall
5. Legal issues involved: S.C. Code Ann. §42-1-160
Bagwell v. Burwell, Inc., 27 S.C. 444, 88 S.E.2d 611 (1955); Miller v. Springs Cotton Mills, 225 S.C. 326, 82 S.E.2d 458 (1954)
6. Unusual aspects: Defendants received Claimant's expert reports on 5/26/16 and will file a motion for postponement in order to take the doctors' and nurses' depositions. Or in the alternative request that the record remain open to allow inclusion of the deposition yet to be taken.
7. Witnesses (designate if expert):* Josiah Fludd; Greg Lane, supervisor; Fred Mogride, supervisor; Steve Mathis, co-employee, Dr. Jay Vandersteenhoven, medical expert. Defendants reserve the right to cross examine any expert
8. Exhibits: Amended Death Certificate; medical research.
9. Medical evidence (indicate report pursuant to R.67-612; deposition or appearance):
See APA submissions along with reports pursuant to R.67-612 including medical expert report along with CV.
10. Name, address, and specialty, if any, of the treating physician: Palmetto Health Richland of Columbia, SC
11. Impairment rating(s); body part(s); physician and date of opinion: None due to death
12. I am amending my Form 50/51 in the following manner:

☐ **Mediation**
- ☐ a. Mediation is requested to be ordered pursuant to Reg. 67-1801 B.
- ☐ b. Mediation is required pursuant to Reg. 67-1802.
- ☐ c. Mediation is requested by consent of the Parties pursuant to Reg. 67-1803.
- ☒ d. Mediation has been conducted by a duly qualified mediator and resulted in an impasse.

Questions regarding mediation may be submitted to mediation@wcc.sc.gov.

I verify the contents of this form are accurate and true to the best of my knowledge.

I certify I have served this document pursuant to Reg. 67-211 by delivering a copy to Claimant's attorney, Brian Dumas, Esquire, on the ____ day of June, 2016, by; ☒ first class postage ☐ certified mail ☐ personal service.

CONDITIONS OF TREATMENT AND/OR SERVICES

CONSENT TO TREATMENT: I hereby authorize Kershaw County Memorial Hospital, my physician, a physician designated by him/her or with whomever he/she may designate as his/her assistant to render medical treatment to me. I consent to any hospital care which encompasses laboratory, diagnostic or medical treatment which my physician or his/her assistant may deem necessary during my hospitalization. If I am an Obstetrical patient admitted to the hospital for the delivery of my baby, I consent to hospital care of my infant(s) encompassing routine diagnostic procedures and medical treatment. TO PROTECT MYSELF AND OTHERS, I also give permission to have blood drawn and tested for infectious diseases including, but not limited to HIV (AIDS VIRUS) and Hepatitis B.

PERSONAL VALUABLES: Kershaw County Memorial Hospital will not be responsible for money, jewelry or other valuables of patients, unless they are deposited at the business office and a receipt obtained therefore. UNDER NO CIRCUMSTANCES WILL THE HOSPITAL BE LIABLE FOR PROPERTY OF PATIENTS.

ASSIGNMENT OF INSURANCE BENEFITS AND RELEASE OF INFORMATION: (1) I hereby authorize payment directly to Kershaw County Memorial Hospital, and to attending physicians, all benefits otherwise payable to me for this hospital stay by insurance companies or other agencies, such payments to be applied, first to this account, second, to amounts due on other accounts at Kershaw County Memorial Hospital, for which I am responsible, and third, any excess payment after all accounts at Kershaw County Memorial Hospital have been paid in full will be refunded to me in compliance with the refund schedule established by Kershaw County Memorial Hospital; (2) If an allowance is made on this account for estimated insurance payments and the insurance company or companies does not make payment within 60 days of discharge or pays an amount less than the amount allowed, I will make immediate payment of the balance due on this account; (3) I will pay an advance fee for each insurance claim filed by the hospital where complete insurance information is not furnished to the hospital prior to the patient's discharge. I understand that I am financially responsible to the hospital for any charges not covered by this assignment.

AUTHORIZATION FOR RELEASE OF MEDICAL INFORMATION: I/We hereby authorize Kershaw County Memorial Hospital to furnish any medical information requested by insurance companies with whom I/We have coverage or any public agency which may be assisting in payment for my care.

AUTHORIZATION TO DISCLOSE INFORMATION: I authorize Kershaw County Memorial Hospital, and all attending physicians to release to the Social Security Administration, or its intermediaries or carriers, any information about me needed for this Medicare claim, including medical information relating to my treatment. Only information needed for the purpose of processing my claim for Medical benefits may be released.

COLLECTION FEES: I/We further agree if this account is placed in the hands of an attorney for collection, or if this debt, or any part thereof, is collected by an attorney or by legal proceedings of any kind, an attorney's fee of 15% besides all costs and expenses incident upon such collection shall be added to the amount due and shall be collectible as a part thereof.

I also authorize the release of medical and related information about my treatment to the Peer Review Organization responsible for reviewing the medical care furnished me by your institution.

I understand that health care services paid for under Medicare and industrial programs may be subject to review by the Peer Review Organization.

I reserve the right to withdraw this authorization at any time.

I understand that my company's hospital insurance plan includes medical review and I hereby authorize the release of my hospital records for confidential review by the Peer Review Organization.

I CERTIFY THAT I HAVE READ (OR HAD READ TO ME) AND FULLY UNDERSTAND THE ABOVE.

INSTRUCTIONS TO THE PATIENT AFTER EMERGENCY CARE

268251 ROOM ER

Date	Case #	Arrival Time	Discharge Time
	GILLON, EDMUND J	A.M. / P.M.	A.M. / P.M.

NOTE—The examination and treatment you have received have been rendered on an emergency basis only, and are not intended to be a substitute for or an effort to provide complete medical care. Your follow-up doctor (named below) will receive a copy of your records and all test reports. It is important that you let him check you again, and that you report to him any new or remaining problems at that time, because it is impossible to recognize and treat all elements of injury or illness in a single Emergency Department visit. Meanwhile, FOLLOW THE INSTRUCTIONS BELOW as indicated to you.

☑ **GENERAL INSTRUCTIONS:**

Call to arrange an appointment at his office to see Dr. _____ in _____ days for follow-up care.

Tell the office receptionist you were seen in the Emergency Room. Call sooner if you think necessary. His phone: _____

Show this instruction sheet to your doctor. Until you see him:

- ☐ Follow label instructions for any prescription given by the Emergency Physician and take medications with you to doctor's office.
- ☐ The medication you received in the Emergency Room may hinder your ability to operate any automobile or other type of machinery.
- ☐ Avoid any use of the injured part.
- ☐ Allow only limited use of the part.
- ☐ You need not necessarily limit activity.

Aspirin for pain or fever is: ☐ OK to use. ☐ Not to be used.

Lab/X-Ray (emergency doctor's reading only. Radiologist will send final report to doctor doing follow-up care.) _____

Treatment rendered: _____

(Tetanus YES ☐ NO ☐ type: _____)

☐ **WOUND CARE** (cuts, abrasions, burns, etc.)

- Keep the dressings clean and dry.
- Elevate the wound to help relieve soreness and help speed wound healing.
- Despite the greatest care, any wound can be infected. If your wound becomes red, swollen, shows pus or red streaks, or feels more sore instead of less sore as days go by you must report to your doctor right away.
- If dressings need to be changed you should: Change them ☐ Call your doctor ☐

☐ **SPRAIN AND FRACTURE, SEVERE BRUISES**

- Elevate the injured part to lessen swelling.
- Ice packs also help prevent swelling, especially during the first 48 hours. Place ice in plastic or rubber bag, cloth cover.
- Apply hot packs after 48 hours of ice. Place hot moist towel on area, cover with plastic and a towel — leave on about 20 minutes or until cool; remove pack and leave off for 20 minutes. Repeat for 24 hours. Avoid heating pads.
- If you have an elastic bandage, rewrap it if it is too tight or loose.

☒ **HEAD INJURY INSTRUCTIONS**

- Problems from such injuries can occur sometime later.
- Report to your doctor immediately if anything listed occurs (even within several months).
- Uncontrollable vomiting, stiff neck, fever. (Vomiting once or twice is not uncommon.)
- Unequal pupils (one pupil large, one small.)
- Confusion or unusual drowsiness.
- Persistent headaches or blurred vision.
- Convulsions or unconsciousness.
- Stumbling or other problem with normal use of arms or legs; or areas of skin numbness.
- Bleeding or clear fluid from ears or nose.

☐ NOTE: waken patient hourly, first night to check for these signs.

☐ **CAST CARE**

- Keep cast dry at all times.
- Wait 48 hours for the cast to become strong before you allow pressure or weight on any part of the cast.
- Wriggle toes or fingers to help prevent swelling in the cast — this should be done often if it does not cause pain.
- If the part swells anyway or gets cold, blue, or numb, or if pain increases markedly, have it checked promptly by a doctor.

☐ **BACK AND NECK INJURY INSTRUCTIONS**

- Use heat or cold on the injury area — whichever seems to help the most. Be careful not to burn yourself.
- Rest as much as possible until you are improved.
- Avoid positions and movements that make the pain worse.
- Relax emotionally.
- Gentle but firm massage will increase circulation in sore muscles, and so will help to clear the soreness.

OTHER INSTRUCTIONS: _____

I hereby acknowledge receipt of the instructions indicated above. I understand that I have had emergency treatment only, and that I may be released before all of my medical problems are known or treated. I will arrange for follow-up care as instructed above.

I hereby authorize treatment by the Columbia Skin Clinic Physician. I authorize the release of medical information to my primary care or referring physician, to consultants if needed and as necessary to process insurance claims, insurance applications and prescriptions. I also authorize payment of medical benefits to the physician.

In order to establish optimal relations with our patients and avoid misunderstanding and confusion regarding our financial policies our staff is trained to consistently inform you of the financial payment policies of this office. Payment is required for all services at the time they are rendered unless you are in a prepaid plan in which we participate. I understand that any amount that my insurance company does not pay for any reason is due from me. We accept payment in the form of cash, checks or credit cards. I authorize the release of any medical information to: 1. Any insurance company through which I claim benefits. 2. Any physician involved in my medical care. I authorize the assignment of all medical benefits to which I am entitled, including Medicare, private insurance, group policy benefits, and other health plans to this practice. Your signature below signifies your understanding and willingness to comply with this policy. I further authorize the release of my medical information to:

Dear Guy:

Thank you for referring this patient for consultation.

DATE(S) SEEN:
A. 3/30/01
B. 4/20/01

DIAGNOSIS:
A. 1. Skin cancer, left upper cheek
2. Nevus, left upper cheek, just below A
B. 1. Basal cell carcinoma, left upper cheek

TREATMENT:
A. 1. Shave biopsy (a copy of the pathology is enclosed)
2. Reassurance to this appeared benign
B. 1. Curettement and desiccation x 3 each

RETURN VISIT: Four weeks.

Sincerely,

COPY

FILE #:
SSN:
(803) 779-[illegible]

CLINICAL DATA: A - ? RECURRENT BCC BX 01.3753 10MM SHAVE BX

DIAGNOSIS: A - L CHEEK
BASAL CELL CARCINOMA. SEE MICROSCOPIC DESCRIPTION AND COMMENT. (173.3)

GROSS DESCRIPTION:
A - Received in formalin is a piece of tissue of 10x5x1mm. /src/

MICROSCOPIC DESCRIPTION:
A - Sections show a nodular basaloid tumor with peripheral palisading and clefting emanating from the basal layer. In the dermis there is scar tissue.

COMMENT: Although there is scar tissue in the dermis, which indicates this is the site of a previous procedure, the tumor is arising from the epidermis, and thus, is a new focus of carcinoma.

Dear Bill:

Thank you for referring this patient for consultation and treatment.

DATE(S) SEEN: 1/6/03

PRE-OP DIAGNOSIS: Basal cell carcinoma, left medial cheek

POST-OP DIAGNOSIS: Same

NAME OF OPERATION: Mohs micrographic surgery; final defect measured 2.0 x 1.2cm

DISPOSITION: Side to side closure along the natural skin tension line with a good result

The patient was pleased with the arrangement and result and will return to see you for continuation of his dermatological care. Thank you again for this kind referral.

With warmest regards,

Jim C. Chow, M.D.

DERMATOPATHOLOGY REPORT

PATH #:	D05-7736	PATIENT: DILLON, EDMUND J		File #: 252148
SERVICE:	08/30/2005	DOB: [redacted] 46)	SEX: M	SSN: [redacted]
RECEIVED:	08/30/2005	PHYSICIAN: DANIEL WARD, M.D.		
REPORTED:	08/31/2005			

Clinical Data: A - r/o mm

DIAGNOSIS: A - RIGHT UPPER BACK
COMPOUND CLARK'S NEVUS (216.5)

CLS DW BD

Gross Description:

A - Received in formalin is a piece of tissue of 9x7x2mm. /bnm/

Microscopic Description:

A - Sections show skin with a slightly asymmetric proliferation of melanocytes in nests and singly at the dermoepidermal junction and in the upper dermis. There is bridging between adjacent rete ridges. The junctional melanocytes vary slightly in size and shape but show no significant nuclear atypia. Dermal melanocytes become smaller with progressive descent into the dermis. In the papillary dermis there is concentric and lamellar fibroplasia and a patchy lymphocytic inflammatory infiltrate.

Note: The designation "Clark's nevus/nevi" is used in our laboratory to describe nevi that in the past have been classified as "dysplastic nevi" or "nevi with architectural disorder". Unless otherwise specified, the term Clark's nevus defines a lesion with no significant cytologic atypia (Ref: Metcalf JS and Maize JC: Clark's nevus. Semin Cutan Med Surg 18:43-46, 1999).

Mr. Edmund J. Dillon

Dear Mr. Dillon,

The skin lesion which we recently biopsied on you was that of a Clark's mole. These lesions are common and in general do not represent a problem. Although you do not need any further treatment at this time for this lesion, it is important that you perform self skin exams to watch for any new or changing lesions.

Additionally, with a Clark's mole, it is important that you keep regular follow up appointments in our office, especially if you have a family history of melanoma.

Please do not hesitate to call me with any questions or concerns.

Sincerely,

Daniel B. Ward, Jr., M.D.

SERVICE:	02/20/2007	DOB: SEX:	SSN:
RECEIVED:	02/20/2007	PHYSICIAN: WILLIAM MCWILLIAMS, M.D.	
REPORTED:	02/21/2007		

Clinical Data: A - 10MM, DN
B - 6MM, DN
C - 7MM, DN

DIAGNOSIS: A - LEFT UPPER CHEST
COMPOUND CLARK'S NEVUS (216.5)
B - TRUNK, BACK, LEFT
COMPOUND CLARK'S NEVUS (216.5)
C - TRUNK, BACK, RIGHT
COMPOUND CLARK'S NEVUS (216.5)

Gross Description:

A - Received in formalin is a piece of tissue of 10x6x1mm.
B - Received in formalin is a piece of tissue of 10x7x1mm.
C - Received in formalin is a piece of tissue of 10x6x1mm. /src/

COPY

Microscopic Description:

A - B - C - Sections of the three specimens show skin with a slightly asymmetric proliferation of melanocytes in nests and singly at the dermoepidermal junction and in the upper dermis. There is bridging between adjacent rete ridges. The junctional melanocytes vary slightly in size and shape but show no significant nuclear atypia. Dermal melanocytes become smaller with progressive descent into the dermis. In the papillary dermis there is concentric and lamellar fibroplasia and a patchy lymphocytic inflammatory infiltrate.

Note: The designation "Clark's nevus/nevi" is used in our laboratory to describe nevi that in the past have been classified as "dysplastic nevi" or "nevi with architectural disorder". Unless otherwise specified, the term Clark's nevus defines a lesion with no significant cytologic atypia (Ref: Metcalf JS and Maize JC: Clark's nevus. Semin Cutan Med Surg 18:43-46, 1999).

NATURE OF PROBLEM: GROWTH ON NECK ALLERGIES: NONE

I authorize treatment by the Columbia Skin Clinic physician. Until revoked in writing, my signature below authorizes the release of medical information to: (1) my primary care and/or referring physician, to consultants if needed and any physician involved in my medical care; (2) any insurance company through which I claim benefits, to include SSA, CMS or its intermediaries; (3) for processing insurance applications, and prescriptions. I further authorize the assignment of all medical benefits to which I am entitled, including Medicare, MediGap, private insurance, group policy benefits, and other health plans to the Columbia Skin Clinic, LLC.

We wish to establish optimal relations with our patients and avoid misunderstanding regarding our payment policies. Payment is required for all services at the time they are rendered unless you are in a prepaid plan in which we participate. For those patients, applicable copayments and deductibles will be collected. Any amount that your insurance company does not pay is due from you unless we have agreed to accept the carrier's charge determination in which case you are responsible for the copayments, deductibles and any non-covered services. We accept payment in the form of cash, check or credit card. Your signature below signifies your understanding and willingness to comply with this policy.

EJD (initial) **Release of Medical Information**
I do/do not (circle one) authorize Columbia Skin Clinic, LLC and its designated representatives to release medical information to my spouse, parent or guardian. I understand my healthcare provider will use their professional judgment to ensure that information is shared with my family/friend in order to assist with my continuing care. Any information that does not pertain to assisting with my health care and any copies of medical records will require a signed HIPAA compliant authorization. This permission will be considered ongoing until I state in writing otherwise.

EJD (initial) **Consent to Treatment**
I consent to the performance of those diagnostic procedures, examinations, and rendering of treatment by the medical provider and their designated medical office staff as is deemed necessary in the medical provider's judgment.

EJD (initial) **Authorization/Assignment/Financial Responsibility**
I authorize the release of any medical information necessary to process an insurance claim on my behalf. I understand that I am financially responsible for all charges and that I am responsible for obtaining any referrals required by my insurance carrier. I request that my medical insurance carrier make any payment directly to Columbia Skin Clinic, LLC for services rendered to me. As a courtesy, my charges will be filed with my insurance carrier; however, I will be billed if the claim is denied or is not paid in a timely manner. Should my account become a collection problem, additional charges may be incurred.

I acknowledge that this form and the Practice Financial Policy have been read in full and explained as necessary.

DERMATOPATHOLOGY REPORT

PATH #: D14-10125	PATIENT: DILLON, EDMUND J		New File #:
SERVICE: 10/14/2014	DOB:	SEX: M	Old File #:
RECEIVED: 10/14/2014	PHYSICIAN: RICHARD LAWS, M.D.		SSN:
REPORTED: 10/15/2014			

Clinical Data: A - ISK
B - R/O AMP/MM WITH ADJACENT NEVUS

DIAGNOSIS: A - R FOREARM
VERRUCA (078.10)
B - R UPPER BACK
INTRADERMAL NEVUS ADJACENT TO A PIGMENTED BASAL CELL CARCINOMA (216.5) (173.51)

Gross Description:

A - Received in formalin is a piece of tissue of 10x9x2mm.
B - Received in formalin is a piece of tissue of 8x6x5mm. /lb/

Microscopic Description:

A - Sections show skin with hyperkeratosis, papillomatosis, acanthosis, and a prominent granular layer. At the periphery the rete ridges are bent inward.
B - Sections show lobules of basaloid tumor with peripheral palisading and clefting invading the dermis and containing melanin granules. Adjacent to this there is a polypoid piece of skin with small uniform melanocytes in the dermis.

Radiology results:
CT head:

SUMMARY:

1. Right frontal hematoma size dimensions given above the peripheral hypodensity. There is also a 1.6 cm right frontotemporal parietal subdural hematoma with areas of layering low density within as well. Acute on chronic hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superolateral globular appearance of blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location as well. Extended followup recommended.
2. 9 mm right to left midline shift due to mass effect from the right-sided hematoma as described.

CT cervical spine:

IMPRESSION:

No fractures or subluxation within the cervical spine with moderate to marked canal stenosis at the C5-C6 secondary to posterior spinal disc bulging. There is also degenerative disc disease present at the C3-C4, C4-C5, and C6-C7 levels without significant canal stenosis suggested at C3-C4 with minimal encroachment upon the canal suggested at the C4-C5 and C6-C7 levels. Left-sided neural foraminal stenosis present at the C6-C7, bilateral neural foraminal stenosis suggested at the C5-C6 and right-sided neural foraminal stenosis suggested at the C4-C5 level.

Impression and Plan

SDH, SAH
Plan:
1. Keppra 500 bid

2. repeat HCT in am
3. hold all anticoagulants
4. SBP<160
5. q 1 hour neuro checks
6. drain care
7. Ancef for drain. d/c once drain is pulled.
8. remove dressing on POD#2

Mode of Arrival : OR/PACU

Looney RN, Marisa A - 02/24/2015 03:33

~~{[EMS] - previously charted by Looney RN, Marisa A at 02/23/2015 19:55 };~~

Information Source-Admission : Patient
Orientation : Hospital, Unit, Room, Orientation Packet, Patient rights-responsibilities
Who Was Oriented : Patient
Type of Housing : Home
Lives With : Significant Other
Education Level : Can Read and Write
Highest Grade Completed : 12th
Patient's Preferred Language: : English
Modes of Communication : Verbal
Communication Barriers : None
Valuables or Belongings Collected : None Collected

Looney RN, Marisa A - 02/23/2015 19:55

Advanced Directives
Advanced Directives : No Living Will, No Health Care Power of Attorney
Treatment Restrictions : No Restrictions

Looney RN, Marisa A - 02/23/2015 19:55

Latex Screen
Diagnosed as Latex Allergic : No
Problem-Allergic Rxn to Rubber? : No
Medical Cond. Requiring Many Surgeries : No
Allergic Rxn to any foods : None listed below
Hx of Spina Bifida : No
Rxn During Surgery or Procedure : No

Looney RN, Marisa A - 02/23/2015 19:55

Allergies
Allergy Information : Allergy Information Complete

Looney RN, Marisa A - 02/23/2015 19:55
(As Of: 02/23/2015 19:59:35 PM EST)

Allergies (Active)
NKA

Estimated Onset Date: Unspecified ; *Created By:* Looney RN, Marisa A; *Reaction Status:* Active ; *Category:* Drug Allergy ; *Substance:* NKA ; *Type:* Allergy ; *Updated By:* Looney RN, Marisa A; *Reviewed Date:* 02/23/2015 19:56

Psychosocial-Cultural
Alcohol Frequency : Daily
Alcohol Amount per Day : wife unsure of amount

PT.LOC: STU

DATE OF VISITATION: 02/23/2015

ED Documentation

ACCOUNT NUMBER:

ATTENDING PHYSICIAN: David T. Ford, MD

CHIEF COMPLAINT: Fall.

HISTORY OF PRESENT ILLNESS: This is a 56-year-old male presenting after he fell. States he slipped and fell, hit the back of his head. Says he wanted to go back to work, but his firm would not let him. Patient states that he has nontender felt well over the last several days, has not been eating well and did notice that his skin had changed colored, but attributed this to that. States that he has had vomiting and diarrhea and just not felt well, but that today he had a mechanical fall, did not have any syncopal symptoms. Denies any headache, chest pain or increased shortness of breath. He has an abrasion to his back. Patient denies any weakness, any abdominal pain or other complaints.

REVIEW OF SYSTEMS: Denies any recent urinary complaints. Denies any chest pain, shortness of breath. Rest of review of systems negative.

PAST MEDICAL HISTORY: None.

MEDICATIONS: None.

SOCIAL HISTORY: Patient does endorse daily drinking but denies any tobacco or alcohol use.

FAMILY HISTORY: Hypertension.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 98.3, heart rate 79, respiratory rate 18, pulse ox 100 percent on room air, blood pressure 121/79.
GENERAL APPEARANCE: Patient is alert, in full spinal precautions.
HEENT: Abrasions at the back of the occiput, which is currently oozing. Pupils are equal but sclerae are icteric. Slightly dry mucous membranes.
NECK: Supple. No midline step-off or deformity.
LUNGS: Clear to auscultation bilaterally. No wheezes, rales or rhonchi.
HEART: Regular rate and rhythm. No murmurs, rubs or gallops.
ABDOMEN: Soft, distended with hepatomegaly.
EXTERNAL GENITALIA: Patient does have bruising along his sacrum and rectum with rectal prolapse that is reducible. Does have some bright red bleeding due to irritation of the rectum.
MUSCULOSKELETAL: No edema clubbing, cyanosis.
SKIN: The patient is significantly jaundiced.
NEUROLOGICAL: GSC 15.

MEDICAL DECISION MAKING: The patient has no medical history, but given his endorsement of daily alcohol use as well as his physical exam, concern for

intra-abdominal pathology, hepatitis if this really is acute, or other cause. Will obtain broad-based workup for further evaluation. Also concerned given his concern for liver damage, if he did obtain an intracranial hemorrhage or other injury during the fall.

LABORATORY DATA: EKG showing sinus rhythm at a rate of 79. No ST elevation MI. CBC with a hemoglobin 11.8, platelets 127,000, otherwise within normal limits. INR 1.7, PTT 39. BMP with sodium 118, potassium 3.1, glucose 118, BUN 26, otherwise within normal limits. LFTs with a total protein of 6.1, albumin 2, total bilirubin 23.8 with a direct bilirubin of 18.7, indirect 5.1, alk phos 355. AST 146, ALT 74 otherwise within limits. Ammonia less than 10. Lipase 300. CT head without IV contrast showing a right frontal hematoma size dimensions given at 4.6 x 2.4 mm with accompanying peripheral hypodensity also at 1.6. Right frontotemporal parietal subdural hematoma with areas of layering low density as well. Acute on chronic or subacute hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superior lateral globular appearance of the blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location, 9 mm right to left midline shift due to mass effect of the right-sided hematoma. CT cervical spine: No fracture or subluxation. CT abdomen and pelvis with IV contrast pending.

EMERGENCY DEPARTMENT COURSE: The patient was seen upon arrival, full history and physical exam performed. Workup was obtained as stated above and throughout his stay in the ER he continued to have progressive decline in his mental status. With findings on CT scan I have contacted Neurosurgery, and they have come to evaluate the patient. Trauma Surgery has also been aware and they are at the bedside and have decided to intubate for airway protection. Please see their note for full details. Neurosurgery has come to evaluate the patient and plan to take him to the operating room for craniotomy at this time. Family has been updated throughout their stay and agreed to course and plan as well.

IMPRESSION:
1. Acute Intracranial hematoma secondary to blunt trauma (fall).
2. Hyponatremia.
3. Hyperbilirubinemia.
4. Hypokalemia.

DISPOSITION: Patient will be admitted to Trauma Surgery ICU with Neurosurgery consult.

Attending was present for the entire evaluation.

Problem List /Plan

Tr Brain Injury Symptoms : Altered LOC or abnormal GCS, Blunt trauma to cranium
Tr Brain Injury Plan : Neuro checks, CT Head, Intubation, Neurosurgery consult
Tr Brain Injury : SAH, SDH
Tr Spine Injury Symptoms : No injury identified/serial exams
Tr Chest Injury Symptoms : No injury identified/No further eval
Tr Abdominal-Pelvic Injury Symptoms : Other: Ascites, jaundice
Tr Abdominal-Pelvic Injury Plan : CT Abdomen/Pelvis
Tr Abdominal-Pelvic Injury : Other: pending
Tr Extremity Injury Symptoms : No injury identified/serial exams
Tr Soft Tissue Wounds-Lacerations : Laceration
Tr Soft Tissue Wounds-Lacerations Plan : Wound care
Tr Respiratory Failure Symptoms : GCS < 8
Tr Respiratory Failure Plan : Ventilator support/ABG reviewed, Intubation
Tr Respiratory Failure : Pt intubated
Tr Facial Injury Symptoms : No injury identified/serial exams
Tr Pain : No complaint of pain
Tr Coagulopathy : Elevated PT/PTT, Head injury
Tr Coagulopathy Plan : Blood products
Tr Other Problems : Alcohol use
Tr Admitting Service : Trauma
Tr Disposition : Critical Care

Smith MD, Peter G - 02/23/2015 15:13

Attending Attestation

Tr Attending Attestation : I was present during this evaluation, examined the patient, directed the decision making, reviewed the documentation and plan of care., Other: 56 y/o male s/p fall with head trauma. Presented to ED with GCS of 15. Quickly deteriorated to GCS 8 shortly after initial head CT showed severe ICH (IPH, SDH, SAH). We were called to ED and patient was intubated along with ED staff.
(Comment: Patient with questionable medical history although we are told h/o ETOH. He is obviously jaundice. His labs are severely derranegd with bili of 23, Na 118, INR 1.7, PT 20. Hgb 11.8. Appears he has end stage heaptic dysfunction, although other etiologies of his hyperbilirubinemia will need to be ruled out. A CT A/P has been ordered as well. [Jones MD, Mark A - 02/24/2015 08:18])
Tr Attending Comment : NSG emergently consulted. Will give 2 units FFP to begin correction of coags in preparation for possible craniectomy.
Overall very poor prognosis.

Radiology results:
CT head:

SUMMARY:

1. Right frontal hematoma size dimensions given above the peripheral hypodensity. There is also a 1.6 cm right frontotemporal parietal subdural hematoma with areas of layering low density within as well. Acute on chronic hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superolateral globular appearance of blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location as well. Extended followup recommended.
2. 9 mm right to left midline shift due to mass effect from the right-sided hematoma as described.

CT cervical spine:

IMPRESSION:

No fractures or subluxation within the cervical spine with moderate to marked canal stenosis at the C5-C6 secondary to posterior spinal disc bulging. There is also degenerative disc disease present at the C3-C4, C4-C5, and C6-C7 levels without significant canal stenosis suggested at C3-C4 with minimal encroachment upon the canal suggested at the C4-C5 and C6-C7 levels. Left-sided neural foraminal stenosis present at the C6-C7, bilateral neural foraminal stenosis suggested at the C5-C6 and right-sided neural foraminal stenosis suggested at the C4-C5 level.

Impression and Plan

SDH, SAH
Plan:

1. Keppra 500 bid x 7 days
2. repeat HCT in am
3. hold all anticoagulants
4. SBP<160
5. q 1 hour neuro checks
6. to OR for emergent craniectomy

Consultations

Professional Services
attending addendum agree with the above patient seen and examined by me on 02/23/2015.
Liver failure and coagulopathy with cachexia and significant jaundice
Decline in mental status
On exam GCS 6T
CT head demonstrates a large right-sided subdural hematoma with intraparenchymal hematoma right frontal
Labs reviewed by me demonstrating coagulopathy with an INR elevated
Assessment and plan subdural hematoma. Overall poor prognosis but I've discussed with the family risk and benefits of surgical versus nonsurgical treatment. Family wishes to proceed with surgery. We will correct his coagulopathy with fresh frozen plasma and taken to the OR emergently for right-sided decompressive craniectomy

Addendum by Lowman MD, Anthony D on 24 February 2015 21:51
CGA Attending: Patient seen briefly. Very likely alcoholic hepatitis superimposed on alcohol-induced cirrhosis. At this point, no specific evaluation of his liver disease beyond that already done is planned. The" colitis" in on CT is likely related to ascites and not actual colitis.

Chief Complaint
presented with fall

History of Present Illness
Mr. Dillion is a 56 yo cauc male who presented to PHR on 2/23/15 after a fall. Imaging to show SAH and SDH with 9mm mid line shift. He underwent emergent decompressive craniotomy with evacuation. He only withdraws to pain on the

Consultations

right. Neurosurgery and STICU notes states very poor prognosis and anticipate dismal outcome. We have been asked to see for elevated liver associated labs. His Bili is 21, mostly direct, Alk phos 230, AST 107, AST 42. He is thrombocytopenic, 107 and coagulopathic 1.7. His CT of abd shows fatty infiltrates of the liver with a focal fatty infiltration within the caudate head of the posterior segment of right lobe,and ascites. Abdominal ascites, diffuse colonic wall thickening s/o pancolitis. His wife is a bedside and says she has noticed his skin and eyes yellowing over the past 1-2 weeks. She states they work different schedules but she admits that he drinks daily, unable to specify an amount and has for many years. Occasionally she has noted him to have hand tremors. + tobacco use.

FINDINGS: The heart size is within normal limits. The lung bases demonstrated mild bibasilar atelectasis, otherwise clear. No pulmonary nodule. There is a question of a small pulmonary nodule within the right lower lobe measuring approximately 3 mm in size which is incompletely imaged.

The liver demonstrates diffuse hypodensity within the posterior right lobe, but also focally within the caudate lobe. This likely reflects focal fatty infiltration. The liver is overall diffuse hypodense relative to the spleen as well. The pancreas, spleen, adrenal glands are unremarkable. There is a small simple cyst within the left kidney measuring approximately 6 x 5 mm in size. The right kidney is unremarkable. There is diffuse abdominal ascites. There is no abdominal mass. There is diffuse right colonic wall thickening. This also involves the transverse colon and sigmoid colon compatible with diffuse colitis.

Imaging of the pelvis demonstrates pelvic ascites. Colonic wall thickening is noted, as well as sigmoid diverticulosis with a diffuse colitis suggested. No diverticulitis. The appendix is unremarkable. There is a mild degree of aortoiliac atherosclerotic disease. No evidence of aortic aneurysm.

SUMMARY:

1. Diffuse fatty infiltration of the liver with more focal fatty infiltration within the caudate head of the posterior segment of the right lobe.
2. Abdominal ascites.

Consultations

3. Diffuse colonic wall thickening suggestive of a pancolitis.
4. Sigmoid diverticulosis without diverticulitis.
5. Cyst left kidney.
6. Tiny 3 mm incompletely imaged nodule questioned within the right middle lobe within the lung periphery. Further characterization with chest CT recommended.

Impression and Plan

1. SAH/SDH s/p crani
2. likely etoh hepatitis with likely underlying liver disease
---hyperbilirubinemia, coagulopathy, thrombocytopenia, ascites, hypoalbuminemia

Plan: Given overall poor prognosis for a neuro standpoint, recommend supportive care. Will check AFP with next blood draw. Cont rally pack daily with folate/thiamine. Could consider US guided paracentesis with fluid studies. Further plans contingent on overall status.

Operative Report

PATIENT: DILLON, EDMUND
MR #: 012719295
ADMITTED: 02/23/2015
DICT: Peter Smith, MD-R
DOB:
PT.LOC: STU

DATE OF OPERATION: 02/23/2015

PROCEDURE: Endotracheal intubation.

DATE: February 23, 2015.

TIME: 3:30 p.m.

INDICATIONS: GCS of 8.

RESIDENT: Peter Smith, MD-R.

ATTENDING: David T. Ford, MD.

PROCEDURE IN DETAIL: Patient was placed in flat position. Sedation was used, using 30 of etomidate. The patient was also pretreated with 100 of lidocaine. He was given a defasciculating dose of rocuronium at 1 mg and then, after 2 minutes, 120 of succinylcholine. The patient was easily ventilated using an Ambu bag. MAC blade was used and inserted into the oropharynx; at which time, there was a grade 1 view of the vocal cords. I used a 7.5-French cuffed endotracheal tube, which was inserted and visualized going through the vocal cords. Stylet was removed and positive colorimetric change was visualized on the CO2 meter. Breath sounds were heard in both lung fields equally and no breath sounds over the epigastrium. The endotracheal tube was placed at 23 cm, measured at the teeth, and position was confirmed by x-ray.

My attending was present for all evaluations and procedures in this visit.

ELECTRONICALLY SIGNED BY:	Toussaint MD,Charles P (2/24/2015 12:31 EST)

Operative Report
PATIENT: DILLON, EDMUND DICT: Charles Philip Toussaint, MD
MR #: 012719295 DOB:
ADMITTED: 02/23/2015 PT.LOC: STU

DATE OF OPERATION: 02/23/2015

PREOPERATIVE DIAGNOSIS: Subdural hematoma.

POSTOPERATIVE DIAGNOSIS: Subdural hematoma.

PROCEDURE: Right-sided decompressive craniectomy for evacuation of subdural hematoma.

ATTENDING SURGEON: Charles Philip Toussaint, MD

ASSISTANT: None.

ANESTHESIA: General.

COMPLICATIONS: None.

HISTORY OF PRESENT ILLNESS: Mr. Dillon is a 56-year-old male with evidence of liver failure and coagulopathy who presented with worsening mental status. Imaging demonstrated large right-sided subdural hematoma with a large mass effect. He had a significant decline in exam and after extensive discussion with the family in terms of prognosis the patient's family wished to proceed with surgery. I was relatively pessimistic as to the surgical outcome with the presence of liver failure. He was extremely jaundiced on exam. Otherwise, his GCS was a 4T. I discussed the procedure at length with the

Surgical Documentation

patient's wife and brother including risks and benefits. The major risk I was concerned with was recurrent hemorrhage and worsening cerebral edema, as well as his significant hyponatremia.

DESCRIPTION OF PROCEDURE: After informed consent was obtained, the patient was brought emergently to the operating room, placed under general anesthesia. Patient received FFP 2 units to correct his coagulopathy and IV antibiotics prior to incision. Surgical site was shaved and a question mark incision was planned over the right scalp. Surgical site prepped and draped in usual manner. I infiltrated the incision with 1 percent lidocaine with epinephrine. Timeout was performed. Incision was made. Dissection was carried sharply down the pericranium. The scalp flap had Raney clips applied to the edges for hemostasis. The flap was reflected in a myocutaneous fashion anteriorly. The underlying skull was exposed and burr holes were placed in the frontal, parietal and temporal regions. The burr holes were connected and the bone flap elevated. Underlying dura was inspected. Multiple tack up sutures were placed around the bony defect. At this point I opened the dura and evacuated the large subdural hematoma. There was evidence of hemorrhage from the cortical surface in the right frontal region. This was coagulated and hemostasis was obtained. I then inspected for any persistent bleeding. Once this subdural hematoma appeared well evacuated I decided not to put the bone flap back on due to the high risk of recurrent hematoma in the setting of his coagulopathy. I placed a subgaleal Hemovac and reapproximated the scalp flap with multiple interrupted 2-0 Vicryls. Scalp was closed with staples. The drain was sutured in place with a 3-0 nylon. Drapes removed. Dressings applied. Patient was then transferred to the ICU in critical condition.

ESTIMATED BLOOD LOSS: 150 mL.

Please note the bone flap was placed in designated freezer for later implantation.

X-Ray Taken - Final Counts	No		
Last Modified By:	Kerns RN, Barry P 02/23/15 17:57:17		

Post-Care Text:
The patient is free from signs and symptoms of injury due to extraneous objects.

SN - R - IO - Dressing and Packing

Pre-Care Text:
Patient's surgical site is dressed and/or packed to accommodate specific wound characteristics and the patient's overall condition.

Entry 1

Type	Dressing	Site	Head
Items	Sponges, Telfa, Kerlix, Tubular Dressing, Staples	Condition of Dressing	Dry/Intact
Assessed By	Toussaint MD, Charles P		
Last Modified By:	Kerns RN, Barry P 02/23/15 18:53:21		

Post-Care Text:
The patient has a clean primarily closed surgical site covered with a dry sterile dressing at discharge from the CR/PACU.

SN - R - IO - Urinary Catheter

Pre-Care Text:
Patient will be free from injury related to the use of the invasive device.

Entry 1

Urinary Catheter Inserted	No	Urinary Catheter Device Type	Foley
Present on Arrival	Yes	Discontinued in OR	No
Last Modified By:	Kerns RN, Barry P 02/23/15 17:34:17		

Post-Care Text:
Urinary Catheter is secured and assessed for proper function.

SN - R - IO - Catheters Drains Tubes

Pre-Care Text:
Patient will be free from injury related to the invasive device.

Surgical Documentation

	Entry 1		
Device Type	10 Fr. Hemovac Drain	Present on Arrival	No
Location	Head	Inserted By	Toussaint MD, Charles P
Discontinued in OR	No		
Last Modified By:	Kerns RN, Barry P 02/23/15 19:06:07		

Post-Care Text:
Catheters, drains, and tubes are secured and assessed for proper function.

SN - R - IO - Cautery

Pre-Care Text:
Patient will be free from signs and symptoms of electrical injury.

	Entry 1		
Cautery ID			
Unit	ESU	Unit Serial Number	F5C36732A
Cautery Settings			
Cut Setting	35	Coag Setting	35
Bipolar Setting	35		
Grounding Pad			
Grounding Pad Site	Left Thigh	By	Bendziewicz RN, Megan D
Pad Serial Number	50080093X	Skin Condition After: Dry and Intact	Yes
No Cautery Used	No		
Last Modified By:	Kerns RN, Barry P 02/23/15 17:38:53		

Post-Care Text:
Patient is free from any observable signs and reported symptoms of injury related to the use of electrical injury.

SN - R - IO - Communication

	Entry 1		
Communication	Family Update Given	Date and Time	02/23/15 17:17:00
Communication By	Johnson RN, Sjanna Y	Communication To	Ellis, Mica A

Visit Date:2/23/2015 3:04 PM

The following includes your discharge instructions, follow-up instructions, patient education materials, and information regarding your hospital stay.

Our Vision: To be remembered by each patient as providing the care and compassion we want for our families and ourselves.

Patient Follow-Up:

Discharge Instructions: What You Need To Know At Discharge

If at any time you feel that you have a life threatening emergency, call 911 or go directly to the nearest Emergency Department.

After you leave the hospital, you may call the Nursing unit within 24 hours of your discharge if you have any questions about these instructions.

Discharge Unit Telephone Number:
Discharge Prescriptions:
Diet:
Home Activity: ;
Home Activity Restrictions: ;

Shower/Bath:
Return School/Work:

Worsening Symptoms
(When to Call the Doctor): ; ; ; ; ;

Discharge Resources (if needed):

If you would like a copy of your procedures and test, call the Health Information Management (Medical Record Department) Richland 803-434-7111, Baptist 803-296-5860, ParkRidge 803-907-1500

Drug and Alcohol abuse: LRADAC (Lexington/Richland Alcohol and Drug Abuse Counsel) Richland: 803-256-3100, Lexington: 803-733-1376; Palmetto Health Chemical Dependency Program 803-296-2416

Suicide Prevention: National Suicide Prevention Lifeline 1-800-273-8255

Stop Smoking/Tobacco Use: Call for classes on how to quit smoking. Education and counseling provided. Call 803-296-CARE or go to www.Palmettohealth.org or SC (DHEC) Tobacco Quitline 1-800-QUIT-NOW (800-784-8669) 8AM – 3AM daily. For youth: www.rageagainstthehaze.com

I understand that smoking and second-hand smoke increase my chances of suffering a heart attack, heart failure or stroke. I also understand that smoking and second-hand smoke may cause other illnesses that may shorten my life.

Allergies: NKA

Medications:

Please be sure to contact your physician as soon as possible and let him/her know about the new prescription you have been given. Be sure to ask for instructions on continuing the medications you were on before you were admitted to the hospital.

Immunizations:

Immunization(s) Given This Visit

Name	Date
diphtheria/pertussis, acel/tetanus adult	02/23/15 16:32:00

Patient Education:

Yes - Patient/Caregiver has received a copy of the following education materials from the Patient Education database within EPIcenter (the electronic medical record)

Inside the ICU (Intensive Care Unit)

The ICU is a busy place. There may be other patients with monitors in the same unit. Be prepared to see lots of wires, tubes, and equipment.

Your Loved One

Your loved one may be asleep or unconscious. Surgery or illness may make the skin pale, flushed, or ashen (grayish). The person may look puffy and swollen, especially the face, hands, and feet. He or she may feel cold and clammy. This is the body"s normal reaction to stress, low blood pressure, certain medications, and some diseases.

Monitors

Monitors have alarms that signal the nurse when something needs to be checked. But alarms are not always cause for concern. Sometimes even a patient"s slight move may sound an alarm.

Oxygen

Patients in the ICU often need extra oxygen. It may be given through a face mask, ventilator, or nasal cannula. The cannula is a soft tube with two prongs that fit just inside the nose.

Ventilator

A ventilator is a machine that helps a person breathe. If your loved one has breathing problems, he or she may be connected to a ventilator by a special tube. The tube goes in through the nose or mouth. The patient will be unable to speak while on a ventilator. Flash cards or a writing tablet may help in communication.

Compression Stockings

Special compression stockings or other devices may be used to help prevent blood clots.

Tests

Frequent tests and treatments may be performed. At times like these, you may be asked to leave the room to clear the area around the patient. Blood may be drawn frequently, but don"t worry. The body contains a large volume of blood and slowly replaces any blood drawn.

Medication

Medications can cause sleepiness, nausea, or confusion. Your loved one may be receiving several types of medication. These can include antibiotics, sedatives, and medication for pain. Let the nurse know if your loved one seems to be in pain.

IV Lines and Tubes

Your loved one may have one or more IV (intravenous) lines and tubes in place. Tubes help drain or suction fluids or air from the patient"s body. Some IV lines provide nutrition and medication. Others measure blood or heart pressure. Don"t worry if you see an air bubble in the line. All lines and tubes are closely monitored.

Restraints

Your loved one"s hands (and sometimes ankles) may need to be restrained. This prevents him or her from pulling out tubes or wires. The nurse may allow you to remove restraints during a visit. If so, you need to watch carefully so your loved one doesn"t pull out any tubes.

Understanding Ventilators

A ventilator is a machine that helps a person breathe. If someone you care about is on a ventilator, you may have questions.

Why a Ventilator?

- A ventilator is needed when a person can"t breathe well on his or her own.
- Sometimes, breathing takes too much of a person"s energy. If so, the ventilator can take over and do the work.
- Ventilators are common during or after certain surgeries and for lung illnesses.

How Long Is It Used?

- A ventilator can be used for a few hours to a few months or years. How long it is used depends on why it is needed.
- If the ventilator is needed for more than a few weeks, the vocal cords can become damaged. To protect the vocal cords, the breathing tube may be placed into an opening made in the patient"s throat.

Keep Your Loved One Comfortable

- A health care provider is always nearby to check on your loved one.
- If awake, the patient will be able to hear, but not speak. Writing pads and other tools can help him or her communicate.
- Know that medication given to help the patient relax can also make him or her confused and sleepy.

What You May Notice

- A breathing tube carries oxygen from the ventilator to the patient. This tube enters the patient"s mouth or nose.
- Monitors, lights, and alarms alert care providers to changes or problems.
- Tubes give the patient fluid, nutrition, and medication. Tubes may also help with other tasks, such as emptying the patient"s bladder.
- Restraints may hold the patient"s wrists. These keep the patient from accidentally pulling out tubes. But they don"t stop him or her from moving or using the button to call for a care provider.
- The patient may be given medication that prevents movement. This helps conserve his or her energy. Medication also helps him or her relax and sleep.

How You Can Help

- Try to keep your visits short.
- A person on a ventilator can catch some illnesses more easily. Don"t visit if you"re sick.
- At times, you may be asked to wear a mask over your mouth and nose.
- Follow any instructions the health care provider gives you.
- If you have concerns or questions, ask the health care provider.

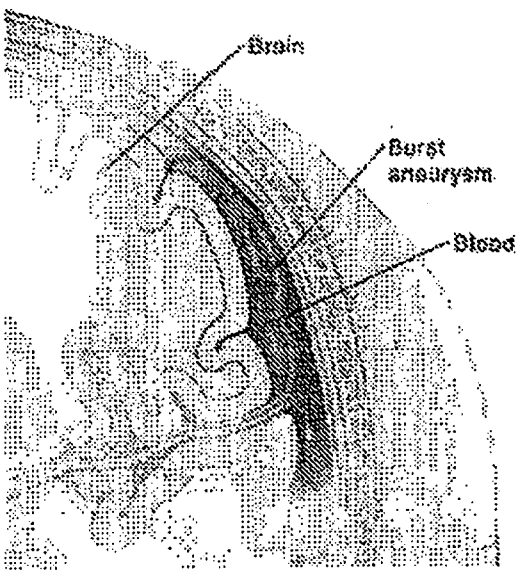
What Is a Subarachnoid Hemorrhage (Stroke)?

A stroke is the interruption of blood flow to part of the brain. A subarachnoid hemorrhage is a type of stroke. A blood vessel on the surface of the brain bursts (hemorrhages). This spills blood into the surrounding tissue. This type of stroke often happens suddenly, with little warning. It is the most serious of all types of strokes.



During a Subarachnoid Hemorrhage

This type of stroke happens when a major blood vessel bursts on the surface of the brain. Normally, the space between the brain and the skull is filled with a clear fluid. When the blood vessel bursts,

blood flows into the space between the brain and the skull. The amount of fluid in this space increases and puts pressure on the brain. This pressure can damage nearby parts of the brain.

Most of these strokes happen when a cerebral aneurysm bursts. An aneurysm is a weak spot in the wall of a blood vessel. A bubble often forms in this weak spot. In some cases, a cerebral aneurysm causes pain or other symptoms. In most cases, though, an aneurysm causes no symptoms until it bursts.

Symptoms of a Subarachnoid Hemorrhage

Any stroke is a medical emergency. If you have any of the following symptoms, even if they seem to get better, **call 911 right away:**

- Sudden, excruciating headache
- Nausea and vomiting (often with headache)
- Sudden decrease in alertness
- Trouble moving or loss of feeling
- Sudden mood changes
- Sudden dimness, double vision, or loss of vision, particularly in one eye
- Eyes suddenly very sensitive to light
- Neck and shoulder pain or stiff neck
- Seizure

Treating Hemorrhagic Stroke

The acute phase lasts from the first minutes to hours after symptoms begin. During this phase, treatment focuses on relieving pressure on the brain and preventing further damage. A procedure or surgery may be done to repair the burst aneurysm. A drain may be placed into the brain to relieve pressure. Medications to control blood pressure may be given through an IV line. Pain medications can also be given as needed. Tests will likely be done to check for other aneurysms in the brain. If they are found, surgery may be done to reduce the risk that they will burst and bleed.

After the acute phase, treatment focuses on recovery. Long-term damage from a stroke can include paralysis, trouble speaking or understanding, and trouble thinking clearly. Rehabilitation therapy (rehab) can help reduce these effects and regain skills. Rehab begins in the hospital. It then continues in an inpatient or outpatient facility, and eventually at home. It will focus on regaining lost skills. It may include:

- Help regaining movement.

- Therapy for speech and language
- Help with swallowing
- Help reducing risk factors for another stroke, such as smoking

In addition, medications that help prevent another stroke may be given. These include medications to control blood pressure and prevent bleeding.

Community Education for Specific Diseases

- **If you have been told you have Heart Failure/Cardiomyopathy, Heart Attack, Stroke/TIA (or a history of one of these conditions)** or you are taking Coumadin (Warfarin) see Disease-Specific Information below

- **If you know someone with any of the symptoms of Heart Attack or Stroke, follow the directions below. Acting fast may save a life.**

HEART FAILURE/ Cardiomyopathy or "Weak Heart"

WHEN TO CALL THE MD

Worsening Symptoms

- Shortness of breath or more shortness of breath than normal
- Difficulty lying flat
- Frequent dry hacking cough
- Weight gain of 2 lbs. or more overnight or 5 lbs. in one week
- Swelling in legs or belly
- Fatigue (feeling tired) that affects your ability to do what you want or need to do
- Persistent nausea/loss of appetite

RISK FACTORS

Include, but are not limited to:

- High Blood Pressure
- Diabetes
- Overweight
- Excessive Alcohol Use
- Substance abuse (i.e. cocaine)
- Previous heart attack
- Coronary artery disease
- Chemotherapy
- Thyroid disorder

- HIV/AIDs
- Sleep apnea
- Congenital heart disease
- Heart valve disease

SPECIAL INSTRUCTIONS

- **Activity:** follow restrictions given.
- **Diet:** Follow a low sodium diet (less than 2000mg). This includes salt (sodium) already in foods and beverages. Sea salt has the same amount of sodium as table salt. Read labels carefully to determine sodium per serving.
- **Fluid Restrictions:** Follow specific instructions given during your stay.
- **Daily Weights:** Every day when you get up, after going to the bathroom, , weigh yourself before eating breakfast, in the same amount of clothes, on the same scale, and write your weight on a calendar or tablet. Remember same time, same clothes, same scale.
- Take medicines as prescribed, even if you feel good. Do NOT stop taking medications unless told to stop by your doctor.
- For severe chest pain or shortness of breath, **CALL 911 IMMEDIATELY. DO NOT DRIVE YOURSELF TO THE HOSPITAL.**

HEART ATTACK Myocardial Infarction (AMI)

WHEN TO CALL THE MD

Warning Signs

- Unrelieved chest, shoulder/arm, back, stomach, or jaw pain or pressure
- Fast or irregular heartbeats
- Nausea, vomiting, or "cold sweat"
- Fullness, indigestion or choking feeling
- Anxiety
- Shortness of breath or more shortness of breath than normal
- Fatigue, weakness, numbness or dizziness

RISK FACTORS

Include, but are not limited to:

- Smoking or second-hand smoke
- High Blood Pressure
- Elevated Cholesterol
- Diabetes

- Overweight
- Physical Inactivity
- Excessive Alcohol Use
- Substance abuse (i.e. cocaine)

SPECIAL INSTRUCTIONS

- If you are not allergic to aspirin and have chest pain, chew an aspirin (325 mg) immediately
- If chest pain is not relieved 5 minutes after taking 1 nitroglycerin tablet, **CALL 911 IMMEDIATELY. DO NOT DRIVE YOURSELF TO THE HOSPITAL.**
- Lie or sit down when taking nitroglycerin.
- While you wait on the ambulance you may take a second dose of nitroglycerin and if your chest pain is not relieved in 5 minutes you may take a third and final dose of nitroglycerin.
- Write date opened on nitroglycerin bottle and replace supply every 6 months.
- Women often have different symptoms of heart attack than men. Common symptoms include sweating, vomiting, palpitations, sleep disturbance, dizziness/ fainting, overwhelming fatigue, anxiety, sense of impending doom, chest discomfort, pressure, or burning, shortness of breath or difficulty breathing, nausea or indigestion not relieved by antacids, pain or weakness in the shoulders, back, neck, arm, jaw, or all over body. If you experience any of these symptoms, **call 9-1-1.**
- Take your medicines as directed even if you feel good. DO NOT stop taking medications unless told to stop by your doctor. If you have a problem with a medication, discuss this with your doctor immediately.

STROKE "CVA or TIA (Mini Stroke)"

WHEN TO CALL THE MD

Warning Signs

- Severe headache, nausea, vomiting
- Visual changes in either or both eyes
- Sudden loss of balance, dizziness
- Sudden right or left side weakness, numbness of face, arm, or leg
- Facial drooping on one side, uneven smile
- Sudden confusion, trouble speaking or understanding what is said

RISK FACTORS

Include but are not limited to:

- Smoking or second- hand smoke
- High Blood Pressure
- Elevated cholesterol
- Diabetes
- Overweight (BMI 25 or greater)

- Physical Inactivity
- Excessive Alcohol Use
- Carotid Artery Stenosis
- Atrial fibrillation

SPECIAL INSTRUCTIONS
If you are experiencing any of the Stroke Warning Signs CALL 911 IMMEDIATELY. DO NOT DRIVE YOURSELF TO THE HOSPITAL.

COUMADIN (WARFARIN) THERAPY

WHEN TO CALL THE MD
Worsening Symptoms
- Unexplained or multiple bruising
- Blood in urine or stool (black tarry stools)
- Abrasions or cuts that will not stop bleeding
- Vomiting blood (may look like coffee grounds)
- Notify your doctor if any changes are made in any of your medications or your diet, as this may change how thin your blood is. You may need to have a lab test.

SPECIAL INSTRUCTIONS
- Coumadin increases the risk of bleeding.
- Carry ID card or wear bracelet stating you are taking Coumadin
- Take your Coumadin exactly as ordered at the same time each day
- If you miss a dose, don't take an extra tablet to make up for it.
- Take the missed dose as soon as possible on the same day, but do not take a double dose the next day to make up for the dose that was missed.
- If you forget to take a dose of Warfarin, remember to tell your health care provider at your next visit or blood test appointment so that they can best assess your dosing schedule.
- Do not take or discontinue any medication except on the advice of a physician.
- Keep appointments for lab to monitor how thin your blood is.
- Review Coumadin booklet or medication information sheet
- Keep your diet pretty much the same each day because many foods contain Vitamin K which helps your blood clot.
- You don't need to avoid foods with Vitamin K, but you do need to keep the amount you eat about the same each day.
- If your diet changes for any reason (such as due to illness, or need to lose weight), notify your doctor.
- Avoid activities with a high risk of injury

I, DILLON, EDMUND, have received the Patient Summary, accompanying education materials, and have verbalized understanding:

Inpatient Depart Summary

Please be sure to contact your physician as soon as possible and let him/her know about the new prescription you have been given. Be sure to ask for instructions on continuing the medications you were on before you were admitted to the hospital.

Immunizations:

Immunization(s) Given This Visit

Name	Date
diphtheria/pertussis, acel/tetanus adult	02/23/15 16:32:00

Patient Education:

Yes - Patient/Caregiver has received a copy of the following education materials from the Patient Education database within EPIcenter (the electronic medical record)

Inside the ICU (Intensive Care Unit)

The ICU is a busy place. There may be other patients with monitors in the same unit. Be prepared to see lots of wires, tubes, and equipment.

Your Loved One

Your loved one may be asleep or unconscious. Surgery or illness may make the skin pale, flushed, or ashen (grayish). The person may look puffy and swollen, especially the face, hands, and feet. He or she may feel cold and clammy. This is the body"s normal reaction to stress, low blood pressure, certain medications, and some diseases.

Monitors

Monitors have alarms that signal the nurse when something needs to be checked. But alarms are not always cause for concern. Sometimes even a patient"s slight move may sound an alarm.

Oxygen

Patients in the ICU often need extra oxygen. It may be given through a face mask, ventilator, or nasal cannula. The cannula is a soft tube with two prongs that fit just inside the nose.

Ventilator

A ventilator is a machine that helps a person breathe. If your loved one has breathing problems, he or she may be connected to a ventilator by a special tube. The tube goes in through the nose or mouth. The patient will be unable to speak while on a ventilator. Flash cards or a writing tablet may help in communication.

Compression Stockings

Special compression stockings or other devices may be used to help prevent blood clots.

Tests

Frequent tests and treatments may be performed. At times like these, you may be asked to leave the room to clear the area around the patient. Blood may be drawn frequently, but don"t worry. The body contains a large volume of blood and slowly replaces any blood drawn.

Medication

Medications can cause sleepiness, nausea, or confusion. Your loved one may be receiving several types of medication. These can include antibiotics, sedatives, and medication for pain. Let the nurse know if your loved one seems to be in pain.

IV Lines and Tubes

Your loved one may have one or more IV (intravenous) lines and tubes in place. Tubes help drain or suction fluids or air from the patient"s body. Some IV lines provide nutrition and medication. Others measure blood or heart pressure. Don"t worry if you see an air bubble in the line. All lines and tubes are closely monitored.

Restraints

Your loved one"s hands (and sometimes ankles) may need to be restrained. This prevents him or her from pulling out tubes or wires. The nurse may allow you to remove restraints during a visit. If so, you need to watch carefully so your loved one doesn"t pull out any tubes.

Understanding Ventilators

A ventilator is a machine that helps a person breathe. If someone you care about is on a ventilator, you may have questions.

Why a Ventilator?

- A ventilator is needed when a person can"t breathe well on his or her own.
- Sometimes, breathing takes too much of a person"s energy. If so, the ventilator can take over and do the work.
- Ventilators are common during or after certain surgeries and for lung illnesses.

How Long Is It Used?

- A ventilator can be used for a few hours to a few months or years. How long it is used depends on why it is needed.

- If the ventilator is needed for more than a few weeks, the vocal cords can become damaged. To protect the vocal cords, the breathing tube may be placed into an opening made in the patient"s throat.

Keep Your Loved One Comfortable

- A health care provider is always nearby to check on your loved one.
- If awake, the patient will be able to hear, but not speak. Writing pads and other tools can help him or her communicate.
- Know that medication given to help the patient relax can also make him or her confused and sleepy.

What You May Notice

- A breathing tube carries oxygen from the ventilator to the patient. This tube enters the patient"s mouth or nose.
- Monitors, lights, and alarms alert care providers to changes or problems.
- Tubes give the patient fluid, nutrition, and medication. Tubes may also help with other tasks, such as emptying the patient"s bladder.
- Restraints may hold the patient"s wrists. These keep the patient from accidentally pulling out tubes. But they don"t stop him or her from moving or using the button to call for a care provider.
- The patient may be given medication that prevents movement. This helps conserve his or her energy. Medication also helps him or her relax and sleep.

How You Can Help

- Try to keep your visits short.
- A person on a ventilator can catch some illnesses more easily. Don"t visit if you"re sick.
- At times, you may be asked to wear a mask over your mouth and nose.
- Follow any instructions the health care provider gives you.
- If you have concerns or questions, ask the health care provider.

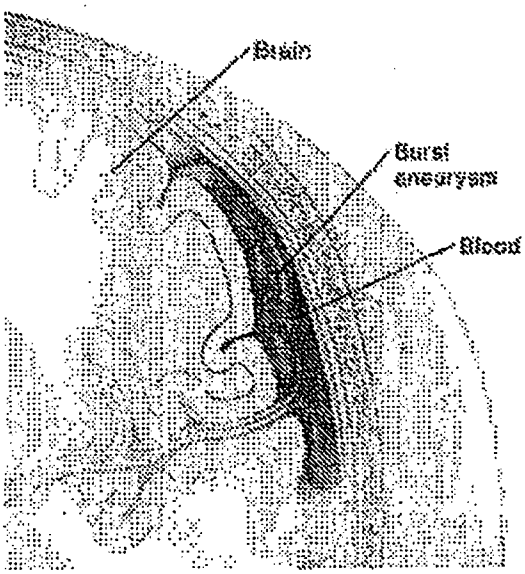
What Is a Subarachnoid Hemorrhage (Stroke)?

A stroke is the interruption of blood flow to part of the brain. A subarachnoid hemorrhage is a type of stroke. A blood vessel on the surface of the brain bursts (hemorrhages). This spills blood into the surrounding tissue. This type of stroke often happens suddenly, with little warning. It is the most serious of all types of strokes.



During a Subarachnoid Hemorrhage

This type of stroke happens when a major blood vessel bursts on the surface of the brain. Normally, the space between the brain and the skull is filled with a clear fluid. When the blood vessel bursts, blood flows into the space between the brain and the skull. The amount of fluid in this space increases and puts pressure on the brain. This pressure can damage nearby parts of the brain.

Most of these strokes happen when a cerebral aneurysm bursts. An aneurysm is a weak spot in the wall of a blood vessel. A bubble often forms in this weak spot. In some cases, a cerebral aneurysm causes pain or other symptoms. In most cases, though, an aneurysm causes no symptoms until it bursts.

Symptoms of a Subarachnoid Hemorrhage

Any stroke is a medical emergency. If you have any of the following symptoms, even if they seem to get better, **call 911 right away:**

- Sudden, excruciating headache

- Nausea and vomiting (often with headache)
- Sudden decrease in alertness
- Trouble moving or loss of feeling
- Sudden mood changes
- Sudden dimness, double vision, or loss of vision, particularly in one eye
- Eyes suddenly very sensitive to light
- Neck and shoulder pain or stiff neck
- Seizure

Treating Hemorrhagic Stroke

The acute phase lasts from the first minutes to hours after symptoms begin. During this phase, treatment focuses on relieving pressure on the brain and preventing further damage. A procedure or surgery may be done to repair the burst aneurysm. A drain may be placed into the brain to relieve pressure. Medications to control blood pressure may be given through an IV line. Pain medications can also be given as needed. Tests will likely be done to check for other aneurysms in the brain. If they are found, surgery may be done to reduce the risk that they will burst and bleed.

After the acute phase, treatment focuses on recovery. Long-term damage from a stroke can include paralysis, trouble speaking or understanding, and trouble thinking clearly. Rehabilitation therapy (rehab) can help reduce these effects and regain skills. Rehab begins in the hospital. It then continues in an inpatient or outpatient facility, and eventually at home. It will focus on regaining lost skills. It may include:

- Help regaining movement.
- Therapy for speech and language
- Help with swallowing
- Help reducing risk factors for another stroke, such as smoking

In addition, medications that help prevent another stroke may be given. These include medications to control blood pressure and prevent bleeding.

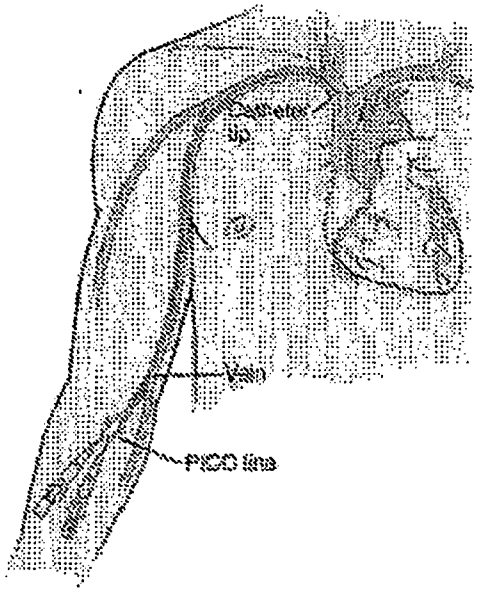
Peripherally Inserted Central Catheter (PICC)

You need a peripherally inserted central catheter (PICC) for your treatment. A catheter is a small, soft tube. The catheter is inserted into a vein in your arm. It is then moved through your vein until the tip sits in the large vein (vena cava) near your heart. A PICC is often used when treatment requires you to receive medication or nutrition for weeks or months. When you no longer need the PICC, your health care provider will remove it. Your skin will then heal. This article tells you more about a PICC and how a health care provider places it in your body.



A PICC may have more than one lumen (channel). This means that different fluids or medications can be given at once. Keep in mind that your PICC should be accessed only by trained medical professionals.

Why Do I Need a PICC?

A PICC takes the place of a standard IV (intravenous) line. A standard IV needs to be changed every few days. Since the PICC can stay in place longer, you may have fewer needlesticks during your

treatment. There is less damage to the small veins where an IV would normally be inserted. Your doctor or nurse can give you more details about why you need the PICC.

Receiving a PICC

A brief procedure is done to place the PICC in your body. This will be done in your hospital room, the radiology department, or somewhere else in the hospital. It may differ slightly from the steps described here. Your health care team can tell you what to expect. In general, during PICC placement:

- You"re fully covered with a large sterile sheet (drape). This lowers risk for infection. Only the spot where the PICC will be placed is exposed. The skin here is cleaned with an antiseptic solution.
- Ultrasound images may be viewed on a video monitor. These are used to help find the best vein to use.
- The area where the PICC will be inserted is numbed with an injection of local anesthetic. This prevents pain during the PICC placement.
- After the pain medication takes effect, the catheter is gently passed into the vein. It"s advanced until the tip is in the vena cava, close to the heart.
- The other end of the catheter extends a few inches from your skin. It may be loosely attached to the skin with sutures (stitches) or a securement device (such as STATLOCK).
- The doctor or nurse will flush the catheter with saline solution, to clear it. The solution may include heparin, which prevents blood clots.
- An X-ray or other imaging test is done. This confirms the catheter"s position and checks for problems.

Risks and Complications

As with any procedure, getting a PICC has certain risks. These include:

- Infection
- Bleeding problems
- An irregular heartbeat
- Injury to the vein or to lymph ducts near the vein
- Inflammation of the vein (phlebitis)
- Clots or air bubbles in the bloodstream

- Blockage of a blood vessel leading to the lung (pulmonary embolism)
- Nerve injury
- Accidental insertion into an artery instead of a vein
- Catheter not positioned correctly

Community Education for Specific Diseases

- **If you have been told you have Heart Failure/Cardiomyopathy, Heart Attack, Stroke/TIA (or a history of one of these conditions)** or you are taking Coumadin (Warfarin) see Disease-Specific information below

- **If you know someone with any of the symptoms of Heart Attack or Stroke, follow the directions below. Acting fast may save a life.**

HEART FAILURE/ Cardiomyopathy or "Weak Heart"

WHEN TO CALL THE MD
Worsening Symptoms
- Shortness of breath or more shortness of breath than normal
- Difficulty lying flat
- Frequent dry hacking cough
- Weight gain of 2 lbs. or more overnight or 5 lbs. in one week
- Swelling in legs or belly
- Fatigue (feeling tired) that affects your ability to do what you want or need to do
- Persistent nausea/loss of appetite

RISK FACTORS
Include, but are not limited to:
- High Blood Pressure
- Diabetes
- Overweight
- Excessive Alcohol Use
- Substance abuse (i.e. cocaine)
- Previous heart attack
- Coronary artery disease
- Chemotherapy
- Thyroid disorder
- HIV/AIDs

- Sleep apnea
- Congenital heart disease
- Heart valve disease

SPECIAL INSTRUCTIONS

- **Activity:** follow restrictions given.
- **Diet:** Follow a low sodium diet (less than 2000mg). This includes salt (sodium) already in foods and beverages. Sea salt has the same amount of sodium as table salt. Read labels carefully to determine sodium per serving.
- **Fluid Restrictions:** Follow specific instructions given during your stay.
- **Daily Weights:** Every day when you get up, after going to the bathroom, , weigh yourself before eating breakfast, in the same amount of clothes, on the same scale, and write your weight on a calendar or tablet. Remember same time, same clothes, same scale.
- Take medicines as prescribed, even if you feel good. Do NOT stop taking medications unless told to stop by your doctor.
- For severe chest pain or shortness of breath, CALL 911 IMMEDIATELY. DO NOT DRIVE YOURSELF TO THE HOSPITAL.

HEART ATTACK Myocardial Infarction (AMI)

WHEN TO CALL THE MD

Warning Signs

- Unrelieved chest, shoulder/arm, back, stomach, or jaw pain or pressure
- Fast or irregular heartbeats
- Nausea, vomiting, or "cold sweat"
- Fullness, indigestion or choking feeling
- Anxiety
- Shortness of breath or more shortness of breath than normal
- Fatigue, weakness, numbness or dizziness

RISK FACTORS

Include, but are not limited to:

- Smoking or second-hand smoke
- High Blood Pressure
- Elevated Cholesterol
- Diabetes
- Overweight

- Physical Inactivity
- Excessive Alcohol Use
- Substance abuse (i.e. cocaine)

SPECIAL INSTRUCTIONS

- If you are not allergic to aspirin and have chest pain, chew an aspirin (325 mg) immediately
- If chest pain is not relieved 5 minutes after taking 1 nitroglycerin tablet, **CALL 911 IMMEDIATELY. DO NOT DRIVE YOURSELF TO THE HOSPITAL.**
- Lie or sit down when taking nitroglycerin.
- While you wait on the ambulance you may take a second dose of nitroglycerin and if your chest pain is not relieved in 5 minutes you may take a third and final dose of nitroglycerin.
- Write date opened on nitroglycerin bottle and replace supply every 6 months.
- Women often have different symptoms of heart attack than men. Common symptoms include sweating, vomiting, palpitations, sleep disturbance, dizziness/ fainting, overwhelming fatigue, anxiety, sense of impending doom, chest discomfort, pressure, or burning, shortness of breath or difficulty breathing, nausea or indigestion not relieved by antacids, pain or weakness in the shoulders, back, neck, arm, jaw, or all over body. If you experience any of these symptoms, **call 9-1-1.**
- Take your medicines as directed even if you feel good. DO NOT stop taking medications unless told to stop by your doctor. If you have a problem with a medication, discuss this with your doctor immediately.

STROKE "CVA or TIA (Mini Stroke)"

WHEN TO CALL THE MD

Warning Signs

- Severe headache, nausea, vomiting
- Visual changes in either or both eyes
- Sudden loss of balance, dizziness
- Sudden right or left side weakness, numbness of face, arm, or leg
- Facial drooping on one side, uneven smile
- Sudden confusion, trouble speaking or understanding what is said

RISK FACTORS

Include but are not limited to:

- Smoking or second- hand smoke
- High Blood Pressure
- Elevated cholesterol
- Diabetes
- Overweight (BMI 25 or greater)
- Physical Inactivity

- Excessive Alcohol Use
- Carotid Artery Stenosis
- Atrial fibrillation

SPECIAL INSTRUCTIONS
If you are experiencing any of the Stroke Warning Signs **CALL 911 IMMEDIATELY. DO NOT DRIVE YOURSELF TO THE HOSPITAL.**

COUMADIN (WARFARIN) THERAPY

WHEN TO CALL THE MD
Worsening Symptoms
- Unexplained or multiple bruising
- Blood in urine or stool (black tarry stools)
- Abrasions or cuts that will not stop bleeding
- Vomiting blood (may look like coffee grounds)
- Notify your doctor if any changes are made in any of your medications or your diet, as this may change how thin your blood is. You may need to have a lab test.

SPECIAL INSTRUCTIONS
- Coumadin increases the risk of bleeding.
- Carry ID card or wear bracelet stating you are taking Coumadin
- Take your Coumadin exactly as ordered at the same time each day
- If you miss a dose, don't take an extra tablet to make up for it.
- Take the missed dose as soon as possible on the same day, but do not take a double dose the next day to make up for the dose that was missed.
- If you forget to take a dose of Warfarin, remember to tell your health care provider at your next visit or blood test appointment so that they can best assess your dosing schedule.
- Do not take or discontinue any medication except on the advice of a physician.
- Keep appointments for lab to monitor how thin your blood is.
- Review Coumadin booklet or medication information sheet
- Keep your diet pretty much the same each day because many foods contain Vitamin K which helps your blood clot.
- You don't need to avoid foods with Vitamin K, but you do need to keep the amount you eat about the same each day.
- If your diet changes for any reason (such as due to illness, or need to lose weight), notify your doctor.
- Avoid activities with a high risk of injury

I, DILLON, EDMUND, have received the Patient Summary, accompanying education materials, and have verbalized understanding:

Radiology results:
CT head:

SUMMARY:
1. Right frontal hematoma size dimensions given above the peripheral hypodensity. There is also a 1.6 cm right frontotemporal parietal subdural hematoma with areas of layering low density within as well. Acute on chronic hematomas are suggested. There is also subarachnoid blood within the left Sylvian fissure with a more superolateral globular appearance of blood within the superior aspect of the Sylvian fissure, likely subarachnoid in location as well. Extended followup recommended.

2. 9 mm right to left midline shift due to mass effect from the right-sided hematoma as described.

CT cervical spine:

IMPRESSION:

No fractures or subluxation within the cervical spine with moderate to marked canal stenosis at the C5-C6 secondary to posterior spinal disc bulging. There is also degenerative disc disease present at the C3-C4, C4-C5, and C6-C7 levels without significant canal stenosis suggested at C3-C4 with minimal encroachment upon the canal suggested at the C4-C5 and C6-C7 levels. Left-sided neural foraminal stenosis present at the C6-C7, bilateral neural foraminal stenosis suggested at the C5-C6 and right-sided neural foraminal stenosis suggested at the C4-C5 level.

Impression and Plan

SDH, SAH

Plan:

1. Keppra 500 bid
2. repeat HCT in am
3. hold all anticoagulants
4. SBP<160
5. q 1 hour neuro checks
6. drain care
7. Ancef for drain. d/c once drain is pulled.
8. remove dressing on POD#2

Glycemic Control.
Nutritional Support.
Stress Ulcer Prophylaxis.
Foley: Ongoing resuscitation.
Respiratory failure; ventilatory management on SIMV and no room for weaning given mental status
Hepatic failure; patient family requested consultation with MUSC about possible transplant. We have contacte them and he is not a candidate
Neurologic prognosis poor per NSG and I agree that palliative care consult is a reasonable avenue to pursue at this time
MELD 26; have asked for GI input - likely benefit from lactulose...+/- paracentesis
Hyponatremic and can administer 3% via central line placed today
Neurogenic shock; central access obtained for stand by vassopressor support to maintain MAP > 60mmHg
Malnutrition; can begin tube feeds, but only at trophic rate as he is likely to suffer refeeding based on current hypomagnesemia/hypophos
Need to decrease rate on vent to correct hypocapnea
