

THE STATE OF SOUTH CAROLINA
In The Court of Appeals

APPEAL FROM SPARTANBURG COUNTY
Court of Common Pleas

R. Keith Kelly, Circuit Court Judge

Appellate Case No. 2017-002522
Case No. 2010-CP-5743

RECEIVED
OCT 18 2018
SC Court of Appeals

Gregory J. Feldman, MD, Joseph A. Boscia, III, MD, and
Upstate Lung & Critical Care Specialists, PC,

Appellants,

v.

Ray E. "Chuck" Thompson, and Charles M. Fogarty, MD,

Respondents.

**RECORD ON APPEAL
VOLUME X**

Matthew H. Henrikson, Esq.

INDEX

ORDERS

1. Order Granting Defendants' Motion to Dismiss filed March 23, 2012.....	1
2. S.C. Court of Appeals Unpublished Opinion No. 2014-UP-273, Heard June 4, 2014 – Filed June 30, 2014	14
3. Remittitur from the Court of Appeals dated May 19, 2015	19
4. Consent Order entered December 11, 2015	21
5. Discovery Order filed April 14, 2017	23
6. Order Granting Defendants' Motion for Summary Judgment dated July 20, 2017	26
7. Order Denying Plaintiffs' Motion for Reconsideration dated November 14, 2017	34

PLEADINGS

8. Plaintiffs' Complaint filed October 27, 2010.....	53
9. Plaintiffs' Amended Complaint filed June 16, 2011	62
10. Plaintiffs' Second Amended Complaint dated October 11, 2011	80

MOTIONS AND MEMORANDA

11. Defendant William Mark Casey's Motion to Dismiss filed December 20, 2010	99
12. Defendant Fogarty's Motion to Dismiss Plaintiffs' Complaint filed December 20, 2010.....	101
13. Defendant Thompson's Motion to Dismiss filed December 21, 2010.....	116
14. Defendant William Mark Casey's Motion to Dismiss Amended Complaint filed July 5, 2011	117
15. Defendant Thompson's Motion to Dismiss Amended Complaint filed July 7, 2011	120

16. Defendant Fogarty's Motion to Dismiss Amended Complaint filed July 5, 2011	122
17. Defendant Fogarty's Motion to Dismiss Second Amended Complaint filed October 25, 2011	125
18. Defendants' Motion for Summary Judgement with Exhibits filed December 7, 2016	128
Exhibit A	131
19. Defendants' Amended Motion for Summary Judgement with Exhibit A dated March 30, 2017	132
Exhibit A	134
20. Defendants' Brief in Support of Motion for Summary Judgement with Exhibits 1 -28 dated June 15, 2017	135
Exhibit 1	176
Exhibit 2	178
Exhibit 3	187

2

3 THE COURT: We're gonna continue with the trial of the
4 case this morning.

5 The plaintiff can call its next witness.

6 MR. TURNER: May it please the Court, Your Honor.

7 The plaintiff would call Doctor Randolph Waid.

8 THE COURT: Sir, if you'd come forward to my left to be
9 sworn please.

10 RANDOLPH WAID, being first duly sworn,
11 testified as follows:

12 THE COURT: Have a seat, sir. Once you're seated, I'm
13 going to ask that you state your name for the record.

14 WITNESS: My name is Louis Randolph Waid.

15 THE COURT: And, Mr. Turner, it's your witness now.

16 MR. TURNER: Thank you, Your Honor.

17 THE COURT: Yes, sir.

18 DIRECT EXAMINATION

19 BY MR. TURNER:

20 Q Doctor Waid, you traveled up here from Charleston, is
21 that right, this morning?

22 A That is correct.

23 Q And your personal background, could you give the jury a
24 little bit of insight into your personal background?

25 A Well, I have a Ph.D. in clinical psychology from the

1 University of North Texas that was awarded in 1982. I
2 followed my internship here at the, the Medical University
3 of South Carolina. I returned to the University in 1983 and
4 have been on the faculty at the Medical University of South
5 Carolina. I've been in the departments of psychiatry and
6 neurology as my expertise area has been neuropsychology as
7 well as clinical psychology, and I became the director of
8 the assessment center at the Medical University of South
9 Carolina, which is a clinic that, where we train
10 neuropsychology fellow and interns as well as services
11 throughout the hospital particularly in neurology and
12 psychiatry because neuropsychologists deal with behavioral
13 problems that stem from neuropathology, injuries to the
14 brain, Alzheimer's, Attention Deficit Disorders, learning
15 disabilities, these sorts of patients, and so we are
16 particularly involved with that.

17 I remained at the University, but in '98 I did leave
18 the faculty practice, continued my research, and established
19 a private practice that actually is in Mt. Pleasant, South
20 Carolina.

21 Q All right. So, prior to, you said 1998?

22 A That's correct.

23 Q Prior to 1998, you were a, on the faculty, a teacher,
24 and a director at MUSC at the University?

25 A I was full-time at the University and now I'm just

1 part-time.

2 Q Okay. So, you're still teaching there?

3 A Oh, yes, indeed.

4 Q Okay. And teaching subjects that we just discussed

5 here?

6 A I still do that. I'm still involved in research too,

7 which is mainly been in the substance abuse area.

8 Q All right. And tell the jury what a neuropsychologist

9 is, what that field encompasses please?

10 A Again clinical psychology is the study -- well,

11 actually psychology is the study of human behavior.

12 Clinical psychology is the study of, of abnormal behaviors

13 obviously, psychiatric disturbances, and so forth. Clinical

14 psychologist are involved in intervention, treatment,

15 assessment, and research on the variety of the clinical

16 syndromes.

17 Again, neuropsychology, clinical neuropsychology

18 specializes in those type of problems that stem from

19 pathology affecting the brain. So, we have additional

20 neurology training as well as our populations, populations

21 can stem from, you know, children that have a head injury or

22 some type of developmental disorder. A head injury, very

23 common population to deal with traumatic brain jury, toxic

24 injuries, and also stemming to the late age, Alzheimer's.

25 And, so, we specialize in those populations and serve

1 in the same capacities that clinical, clinician in terms of
2 evaluation, assessment, intervention as well as research.
3 Clinical neuropsychologists have been very involved in
4 understanding how the brain works because often studying
5 damaged brains gives you a heck of a lot of input about how
6 it works. And, so, they're also involved in that aspect.

7 Q And, and you are currently involved in those areas, you
8 listed a lot of them, but your practice continues---

9 A Yes.

10 Q ---to develop?

11 A Yeah, my practice specializes in regular clinical
12 psychology, but we do a lot of evaluations across the
13 lifespan of people who have these sorts of neuropathology
14 problems including, again, in children with learning
15 disabilities and Attention Deficit Disorder.

16 Q And you're qualified to review diagnostic tests, but
17 would it be a fair statement to say diagnostic test, such as
18 an M.R.I. or C.T., those deal with the structure, if it was
19 a, of the brain rather than what you deal with, with your
20 testing, which is the output of the brain?

21 A Yes, to put it simply, I'm highly involved in a string
22 of physicians. If you come into the emergency room and you
23 have a brain injury, you're gonna see a neurosurgeon first.
24 He's, he's an operative guy. He's there to fix your tissue.
25 If you got an intracerebral bleed, a hematoma, or you need a

1 craniotomy. So, the analogy I say is like a car. The
2 surgeons opens up the hood of the car and sees if there's
3 anything to cut, fix, or so forth. He's a surgeon. Really
4 in the second string is a neurologist. He also opens up the
5 hood of the car and sees if he needs to throw some oil in
6 there or something to treat some of the symptoms that that
7 car is having.

8 The neuropsychologist, like psychology, we deal with
9 behavior, and, so, we -- the analogy there, when we get into
10 the passenger seat next to you, and see how you're driving
11 the car. The behavioral outcome from whatever might of
12 happened to the engine. And, so, we deal with that. And,
13 so, many many of our referrals come from neurologists and
14 neurosurgeons because we deal with the behavioral outcome of
15 the pathology that might be hurting the brain or engine in
16 the case of the description I gave.

17 MR. TURNER: Okay. Your Honor, at this point I would
18 move to qualify -- I actually I left out one other question.

19 Your board certifications?

20 A I'm a licensed clinical psychologist and I'm a fellow
21 in the American Board of Forensic Examiners and actually my
22 board certifications seeking in forensic psychology. I also
23 do criminal work, but that's where I'm at.

24 MR. TURNER: Okay. At this time, plaintiff would move
25 to qualify Doctor Waid as an expert in the field of

1 neuropsychology.

2 THE COURT: Any objection?

3 MR. GUNN: No, sir.

4 MR. KING: No, sir.

5 MR. MANN: No, Your Honor.

6 THE COURT: Without objection he'll be so certified.

7 You may proceed, Mr. Turner.

8 Q All right. One thing that, Doctor Waid, and I hadn't

9 planned to start with this, but would you agree you often

10 call in a neurologist, is that what you said, or, or A

11 neurologist is called in before you?

12 A It wouldn't be atypical for a chain of -- if the

13 neurosurgeon's not gonna do surgery, often a neurologist

14 might be next though sometimes if there's not symptoms like

15 headaches, the neurosurgeon might refer right to us. But a

16 lot of our referrals do indeed come from the neurologist who

17 tends to be the next in line after a potential surgical

18 procedure and there's no need for surgery, the

19 neurosurgeon's done and ultimately the neurologist is more

20 of a person dealing with medications that might help the

21 brain.

22 Q Okay. And in this case, you're aware of two events, is

23 that correct, from hospital, two events, and I'll just refer

24 to them that way, at Spartanburg Regional dealing with

25 William Mark Casey?

1 A I am aware of those, yes.

2 Q Okay. And you've reviewed or have you reviewed medical
3 records regarding 5/28/2004 and 6/3/2004?

4 A That is correct. I did review those medical records
5 depicting those events and trying to understand them as I
6 involved with this man and evaluating him over a year after
7 that.

8 Q And I, I think I heard you say, if you had a
9 pulmonologist performing a procedure, and that was the
10 treating physician for the, for Mr. Casey, that would be
11 where the neuro-consult would generally be called in by the
12 treating physician?

13 A It can eventually be called in by anybody who might be
14 seeing the person in the hospital as it relates to mental
15 status changes or problems like that. Obviously they're
16 involved in their expertise level of care and they'll seek
17 the consultation if they need to.

18 Q Okay. All right. And at the hospital, you've, you
19 would be familiar, I would think, consults are called in
20 fairly regularly to get a specialist involved if, if need
21 be?

22 A Sure. That is correct.

23 Q And the, the specialist, if it's a neurologist that's
24 gonna be called in, depending on the mechanism of the
25 injury, if a neurologist is gonna be called in, that would

1 be done by the treating physician?

2 A Often it would be done by the primary care physician, I
3 mean the primary treating physician in the hospital if they
4 are other specialties needed to evaluate the patient.

5 Q Okay. And you're aware, from reviewing the records,
6 Doctor Boscia performed a flexible bronch?

7 A I am aware of that.

8 Q And that Doctor Feldman performed the rigid bronch in
9 the hospital?

10 A I'm aware of those events taking place.

11 Q Okay. And correct me if I'm wrong, did you see any
12 neurological consult called in by either of the physicians?

13 A I don't believe I did see any of that.

14 Q In order to diagnose potential cognitive deficits in a,
15 in a person, could you explain to the jury what sort of
16 testing you utilize in order to, to make that happen?

17 A Yes, you know, when you have a impact on the brain, and
18 you have a compromise in brain behavior functioning, you can
19 think of them expanding from something that's rather mild
20 and subtle to massive and severe. Neuropsychologists, quite
21 frankly, are often called in to, on the cases where they're
22 more mild to moderate because when you have a severe
23 incident compromising the brain, you got a devastating
24 injury, and, and, obviously, nothing's working. Motor won't
25 work. They're devastated, and often that's, they're not

1 even testable.

2 So, when you look at evaluations, as they might have to
3 do with milder forms, even like the Academy of Neurology
4 wants you to use neuropsychology more there because bedside
5 examinations, the most common one called a mental status
6 examination, is relatively weak in being able to assess for
7 deficits that might stem from this milder form of injury to
8 the brain.

9 For example, on the mental status, which is the most
10 common bedside examination, if you know what day it is, and
11 who you are, where you're at, and if you can remember three
12 objects after about a half a minute, you pretty much can get
13 a 30 out of 30. That's basically the most common mental
14 status examination used by doctors, even neurologists.
15 Often, as the client continues to complain, then they'll be
16 a referral to neuropsychology.

17 Now, again, on more severe traumatic brain injuries or
18 neurological or even a hypoxic injury where you have anoxia,
19 massive injury to the brain, the scan show it and the
20 person's devastated, eventually they may end up in
21 neuropsychology, but they'll have to be a recovery curve.
22 So, again, you have to think of these as continuums from
23 mild to just massive unfortunate events that can occur.
24 And, so, basically a person on a mental status examination
25 can, can look okay even though there could be deficits

1 present.

2 Q Okay. And you're familiar with the term emboli or air
3 embolus, aren't you

4 A Yes, I'm very much aware of that and very much in my
5 career have seen people post-surgery, even when surgery has
6 gone well without an absolute event, who had cognitive
7 changes, and neurologists will refer it and sometimes it's
8 inferred that there's air emboli even when the procedure did
9 not go negatively, so to speak, or in code. Other times the
10 mechanism can be there in which there would be inferred some
11 air emboli or some lack of oxygen, full oxygen getting to
12 where it needs to get so.

13 So, obviously it can happen. Even in studies now,
14 empirical studies on people who have heart transplants, the
15 heart translates, they go well, those people have cognitive
16 changes after successful heart translate mainly because they
17 have to be on a machine for about eight to ten hours. It's
18 a very long procedure. So, these sorts of incidents do
19 occur and it can -- they range from, again, massive to
20 subtle. But air emboli, or a lack of oxygen getting to,
21 particularly the brain, is the mechanism for the injury.

22 Q And the big difference there, if you looked at it in
23 terms of the spectrum with air emboli, micro bubbles or very
24 tiny bubbles getting into the wrong place, and ultimately
25 ending up in the brain, that can be on one end of the

1 spectrum, and macro or much larger bubbles getting in to the
2 places where pulmonary, veins or---
3 A Sure.
4 Q ---or areas where they're not suppose to be, that may
5 be on the other end of the spectrum?
6 A Sure.
7 Q And you would expect with macro, am I hearing you, that
8 you're gonna have some immediate devastating injuries?
9 A Absolutely.
10 Q And gross motor para, paralysis and things of that
11 nature?
12 A Much more greater the damage and it would be greater
13 results from an acutely, that's obvious, with a greater
14 event, an event where you have a much more devastating loss
15 of oxygen to the brain. Obviously the worst event is death.
16 So, ultimately, this is why, if you have a heart attack,
17 minutes are very important cause essentially oxygen's not
18 getting to the brain.
19 Q And, and that's something, you said minutes are
20 important, if, in, I'm talking in reference to Mr. Casey,
21 you come out of the operating room and you've reviewed the
22 records you've stated, correct?
23 A Yes, that is correct.
24 Q And into the post anesthesia recovery unit, the P.A.C.
25 Unit?

1 A That's correct.

2 Q They take you off the first ventilation system and put
3 a mask, I forget what it's called, goes on your nose, around
4 your ears?

5 A That's correct.

6 Q It gives you some oxygen and then you have to be
7 re-intubated---

8 MR. GUNN: I object to leading, Your Honor.

9 THE COURT: I'll ask you not to lead the witness. I've
10 been listening to the last couple of questions, and they're
11 becoming more and more leading. I'll sustain the objection.
12 Rephrase your question.

13 Q When you reviewed the medical records of Mr. Casey from
14 the ridge bronchoscopy, how was he -- was he provided
15 ventilation?

16 A Basically at a level of this, there are experts
17 involved in his care at this time who, and their, their
18 expertise is their area. As a neuropsychologist, I know
19 that an event took place that had a mechanism, potential
20 mechanism of emboli or oxygen not getting there.

21 MR. GUNN: Your Honor, we object to that.. That's
22 outside of his area, area of expertise. He's not a, he's
23 not a medical doctor. He's got---

24 MR. TURNER: Well, he mentioned hypoxia.

25 MR. GUNN: Might I, might I finish please, sir?

1 MR. TURNER: I didn't realize you weren't finished, Mr.
2 Gunn.
3 MR. GUNN: Yeah, I wasn't.
4 MR. TURNER: I apologize for that.
5 MR. GUNN: If Your Honor please, this is, this is
6 outside his area of expertise, and he's told us that in his
7 deposition.
8 THE COURT: All right. Anything further?
9 MR. GUNN: No, sir.
10 THE COURT: All right.
11 MR. TURNER: All right. He's mentioned hypoxia and I
12 think he's well qualified as a neuropsychologist. Be glad
13 to proffer to the Court if we need to, but---
14 THE COURT: Well, I'm gonna ask that you lay---
15 MR. TURNER: ---hypoxia---
16 THE COURT: ---that you lay some foundation for the
17 opinion.
18 MR. TURNER: Yes, Your Honor.
19 THE COURT: So, I'm gonna sustain the objection at this
20 time and allow you to ask some additional questions.
21 MR. TURNER: Okay.
22 Q Doctor Waid, you first saw William Mark Casey, and you
23 may need to refer your notes, can you tell the jurors what
24 time, time period you first had contact with Mr. Casey?
25 A I first saw Mr. Casey on August 30th of 2005, and I

1 followed-up to complete the evaluation on
2 September 10th of 2005. That constituted my evaluation of
3 this man at that time.

4 Q So, two different dates, but one evaluation and one
5 report resulting out of that --?

6 A . That is correct.

7 Q -- those dates?

8 And you're familiar with the term hypoxia, are you not?

9 A I am familiar with the term hypoxia.

10 Q Okay. Can you tell the jurors what hypoxia is?

11 A It's a broad based term that insinuates that there's
12 some reason or another a lack of full oxygen getting to the
13 brain, a lack of full oxygen. Anoxia would be no oxygen,
14 which is obviously gonna be much more detrimental. But
15 hypoxia is basically a mechanism that we're aware of.
16 Again, counsel's right, how that occurred or whatever, I'd
17 leave that to other experts. But that is the potential
18 causal factor that is of concern had already been expressed
19 as a concern by other treating doctors. Thus he ends up
20 with a neuropsychologist.

21 Q Okay. And from your review, anoxia is, is not an issue
22 in this case where there's absolutely no oxygen whatsoever
23 going to the patient's brain?

24 A That is correct. The term anoxia would mean absolutely
25 no oxygen being there, and obviously that's a much more

1 critical situation.

2 Q Okay. But based on your expertise, hypoxia, where you
3 have some oxygen, but it's an inadequate level of oxygen
4 going to the brain, you could say, within a reasonable
5 degree of medical certainty, that that applied in your first
6 report to Mr. Casey?

7 MR. GUNN: Your Honor, I object. That's still not in
8 his expertise, area of expertise. We've, we've got umpteen
9 medical experts who all addressed that.

10 MR. TURNER: I---

11 THE COURT: Yes, sir.

12 MR. TURNER: Okay. On the anoxia, it's in the report,
13 and if you want, Your Honor, I'll, I'll be glad to -- might
14 be better just to proceed on. I'll strike that question.

15 THE COURT: I'm gonna, at this time, ask you again, you
16 may refer back to other opinions. I don't know what, what
17 he's relied on.

18 MR. TURNER: Yes, Your Honor.

19 THE COURT: And perhaps we should get into that.

20 MR. TURNER: Lay a foundation better.

21 THE COURT: Yes, sir.

22 Q All right. Would you -- when you met with Mr. Casey
23 August the 30th and September 10th of 2005, you, did you
24 administer testing on Mr. Casey?

25 A Well, yes, we eventually did administer testing.

1 Obviously we reviewed the records that led up to our event.
2 We also -- and saw the other aspects of what was going on
3 and what the complaints were and what other measures had
4 already been applied. We did a rather extensive interview
5 of this man to understand his personal complaints. We then
6 do a rather extensive review of everything, make sure we've
7 covered everything even if they don't, report, report it.
8 It's very important to know all of those things even as
9 history.

10 And, so, after that process then we get to what we call
11 neuropsychological testing, which is the actual way of
12 assessing the brain behavior functions to better understand
13 what's going on behaviorally at the brain level, and what
14 functional areas of the brain are maybe not working in the
15 manner that they should based on models of how they should
16 be working.

17 So, in essence, if you look at neuro-psych testing,
18 it's a kind of a hierarchy of what we do. We get the
19 simplest abilities that you hear, see, and smell, and we do
20 these things first, and then ultimately we measure
21 attention, concentration. Kind of like the key board before
22 we get to the computer, very important. A lot of people who
23 come to me complain about memory, but it, it can -- memory
24 is involved in many tasks that constitutes whether you
25 remember something.

1 So, attention, concentration, processing abilities,
2 what we call executive functioning, very important frontal
3 area of the brain. Then we measure true memory, the ability
4 to hold information in the hard disk, retain it, and be able
5 to go in there and retrieve it, and that can be poor visual
6 memory on the right side of the brain in most people or
7 auditory memory. We measure language ability. Visual
8 spatial skills and then we measure also what we call higher
9 integrative abilities, the way the brain comes together and
10 interacts between all those systems to give you abstract
11 thinking, problem solving, reasonings, and those advanced
12 skills, the very integrated aspect.

13 We also measure people emotionally because things like
14 depression, pain, sleep disturbance can interfere with one's
15 brain definitely or add to the problem as well as measuring
16 people from a point of view of why they're giving us good
17 effort, faking it, bad effort, falsifying, malingering.
18 When we put it all together, that's about six to eight hours
19 of working with a client over the testing phenomena to
20 understand their brain behavior functioning or, and/or their
21 emotional problems.

22 Q And so, during what I'll call the first visit and
23 evaluation with Mr. Casey, August 30th and September
24 10th of 2005, you performed these tests on Mr. Casey?

25 A We did. It's not unusual, even though he drove some

1 distance, to want to do it over two half days because it is
2 fairly involved, and obviously, while I want to understand
3 your fatigue, I don't want that to be the only thing I'm
4 measuring. So, it's useful to be able to do that over two
5 periods of time and we did in this case, and we were able to
6 conduct a rather extensive evaluation of him as well as
7 understand his complaints as well as review the medical
8 records. Okay.

9 Q And you're not sure that or, or do you know if he drove
10 or if he rode down to Charleston?

11 A Tell you, in 2005, I'd have to go back to my notes to
12 check on that.

13 Q Okay.

14 A But he was on time. I remember that.

15 Q Okay. So, your first evaluation, how many months out
16 from the rigid bronchoscopy procedure of 6/3/2004 was that
17 approximately?

18 A Again, the occurrence of that was in late May and early
19 June. And so, we're seeing him in August. So, it's about
20 14 months.

21 Q Okay. And could you tell the jury or the jurors is
22 there some importance with the timing of the testing as far
23 as whether you're expected to recover at a certain time or,
24 or---

25 A Well, different sorts of neurological injuries have

1 timetables, but almost classically you'll see that most of
2 us in the field want to give everybody a full year to
3 recover as it relates to the brain behavior functions. Some
4 of motor functioning issues can often take up to two years.
5 So, if I was to see somebody after a traumatic brain injury,
6 and saw them three months out, did an evaluation, I would
7 actually anticipate they should get better cause you do
8 recover from brain injuries.

9 So, we have different recovery curves that we expect.
10 A stroke is a little different. But generally one would not
11 be comfortable saying this is a permanent impairment without
12 giving them a full year recovery as it relates to the brain.
13 Obviously components that are reversible, like depression,
14 pain, any time you can fix those you might get better
15 functioning of the brain level cause they're interfering
16 with the brain. They're not actually a tissue problem.

17 So, we saw him 14 months out. At some point we would
18 say whatever brain recovery, tissue recovery he was making
19 he would of made, but obviously, as is gonna be discussed
20 there, this man also has other issues that are interfering
21 with the brain like depression and pain and fatigue. So,
22 those have been present at both evaluations.

23 Q And tissue recovery, is that neurons, dendrites, and
24 things in the brain that take over for damaged ones?

25 A Well, brain tissue repairs. Not repairs so much as, as

1 recovers from an insult. If you come in, if you have a car
2 accident today, and have a traumatic brain injury, if you
3 don't die within 48, 64 hours, you're gonna get better.
4 Your brain swelling will go down, function will return, and,
5 quite frankly, if I measure somebody with a brain injury
6 three months and they're not better by one year, then I have
7 a question of why, they should get better because their
8 brain swelling goes down. So, we understand these recovery
9 curves as they relate to different sorts of injuries.

10 Q Okay. And jurors are probably gonna hear this, this
11 term as we get into the report, and I think if you define it
12 for them it might help a little bit, multifactorial, can you
13 tell the jurors what that that means?

14 A Sure. Well, you know, basically when -- sometimes our,
15 our job's a little bit easier if you just go out and have an
16 uncomplicated head injury and don't hurt anything else. We
17 can pretty much hold that accountable, that is the brain.
18 But as often in the case, for example, in a motor vehicle
19 accident, I have people who also have now spinal injury,
20 live in chronic pain. Everybody can relate that when you
21 have a headache, you're in pain, you're not focusing and
22 concentrating as well. So, these are factors outside of the
23 brain that can cause people to be forgetful, have memory
24 problems that are not necessarily brain tissue. And, so, it
25 can be very difficult to kind of isolate only what's not

1 working at the brain level versus what's interfering with
2 the brain.

3 For the person, they're still forgetful. I mean don't
4 get me wrong. They still have it, but sometimes there's a
5 need to disentangle that and isolate which factor.

6 So, when we say multifactorial, we are saying, you
7 know, yeah, this incident certainly could be contributing as
8 well as this and this, and depression is certainly one that
9 can do it, fatigue and sleep disturbance. Pain is a major
10 player. So, when you say multifactorial you're talking
11 about multiple reasons.

12 Now, that's for what happens with the person in their
13 life. When we test them, we can observe that. I can see
14 that a person's in pain during the testing. I can see that
15 a person is too drugged up and they're toxic. I can see
16 that a person is just depressed.

17 So, in the testing situation, we often can see that at
18 work, and the reason I point that out is that's very
19 important because testing often is better. People do better
20 on testing often than they do actually in day-to-day life
21 because the testing is ideal, one on one, generally a quiet
22 place. Real world is multitasking, a lot going on, fatigue
23 sets in. So, often test results are a little bit better
24 than the complaints that the people have in real life, and
25 there can be a, a, kind of a separation between those two.

1 They're actually having more of that here. So, the testing
2 allows us to get a cleaner catch of how the brain is doing.

3 Q And they may do worse -- would you agree a patient
4 could possibly do worse, such as Mr. Casey, if you add those
5 stimulus back in, in the environment?

6 A Absolutely. You know, particularly multitasking, which
7 people have -- the brain has a beautiful way of keeping up
8 with multiple things in day-to-day pursuits. When you hurt
9 a brain, that multitasking, the ability for me to be at a
10 party and listen to one person, and then take half of my
11 head off and hear somebody bad mouthing back here. When you
12 deal with people after neurologic injury they'll tell you
13 that's, that's what goes.

14 That also means they end up forgetting though actually
15 it's not truly memory. It's more processing the frontal
16 lobes that can keep up with multiple things. So, that's
17 what a neuropsychologist understands, and that's what we
18 bring to the situation where our patients to help them
19 understand what's happening to them.

20 Q Okay. And you mentioned depression, fatigue, and pain
21 are things in the multifactorial sense that can get in the
22 way.

23 Are those three things that you, you saw exhibited by
24 Mr. Casey?

25 A It was, in my opinion, that indeed Mr. Casey had a

1 contribution in terms of his compromise in life and
2 day-to-day pursuits in terms of his complaints as they
3 related to memory and attention, that the mood disorder and
4 depression was a player, and, and certainly causes more
5 problems for him in day-to-day pursuits. I also felt that
6 he had some sleep disturbance and fatigue that was
7 contributing also in terms of that, in both times that I saw
8 him.

9 And, so, from time to time pain too. But, in the
10 testing situation, we didn't see that so in the way on the
11 days we saw him, and, again, we even tested him over two
12 half periods to try to reduce the potential that fatigue
13 would be contributing to our test results. But in his life,
14 I assure you it, it, it is in the way.

15 Q And that testing plural, you, by agreement with the
16 parties, we did a second evaluation of Mr. Casey, is that
17 correct?

18 A That is correct.

19 Q Through you?

20 A Yes.

21 Q Okay. And can you tell us sort of the decision to do a
22 second evaluation?

23 You'd done one in 2005?

24 A Yes, the decision came from a vantage point of this
25 case going on for quite some time and being deposed and

1 ultimately kind of an agreement that, you know, I would like
2 to have an updated evaluation of him to see where he's
3 gotten to, how he's functioning, to see the consistency
4 between that. Mr. Casey was being seen by a psychologist.
5 So, we had some of his data over time and seeing there's
6 been some concern that Mr. Casey had also gotten more
7 depressed. And so, we did an updated evaluation to bring it
8 all up-to-date to have a better understanding of him in 2009
9 since the last time I saw him was 2005, and allowed for
10 greater comfort in, in providing of opinions.

11 Q Okay. And I think -- is that -- that's the date of
12 evaluation, May 29th and June 2nd, 2009?

13 A Yes, we saw him on two dates in May and June of 2009.

14 Q Okay. All right. So, I'm gonna just call them the
15 first evaluation and the second evaluation to try to keep
16 it, it simpler.

17 A Okay.

18 Q And you mentioned the psychologist.

19 There was some testing also done by someone else,
20 wasn't there, in this case---

21 A Yes.

22 Q ---that you were able -- were you able to utilize that
23 testing to compare it to some of yours to see consistencies
24 or inconsistencies?

25 A Yes, indeed. He was administered some I.Q. test as

1 well as before 2009 some memory testing. Those were
2 standardized instruments, the same ones we used. So,
3 obviously that data was utilized to understand Mr. Casey.

4 Q And the -- I always get this mixed up, I call it the,
5 the WAIS-III, and I understand there's a WAIS-IV now, but
6 tell me what the WAIS-III stands for.

7 A The Wechsler Adult Intelligence Scale III Edition is,
8 for lay people, gives you your famous I.Q. test. But
9 actually it's comprised of four factors of tests. It, it
10 measures your verbal educationally oriented abilities,
11 abilities that should not be too much negatively affected by
12 any acute injury. It measures the right side of your brain,
13 the visual spatial skills. It measures working memory,
14 which is that ability to kind of hold information in the,
15 and act on it and then overall processing speed.

16 However, for lay people, it gives you a full scale
17 I.Q., which is everybody's -- what they refer to as their
18 I.Q., a verbal I.Q., which tells you more of your left side
19 of your brain educationally oriented skills, and a
20 performance I.Q., which is more oriented toward your right
21 side of your brain, visual spatial skills. It's a test
22 that's been around just forever. We are now moving toward
23 and using the Fourth Edition.

24 Q Okay. And in, in both times that you saw Mr. Casey in
25 '05 and in '09, the first and second evaluation, would you

1 tell the jurors whether you noticed any toxic effects such
2 as I think you said drugs, alcohol impairment?
3 A No, we didn't see Mr. Casey to be compromised by what's
4 called toxic, but what I mean by that is sometimes, when you
5 start a medication, use pain medication, these things, you
6 look sedated. You look kind of fogged out. Obviously
7 that's a drug effect. We look for that because, at some
8 point, we're not sure if we want to evaluate that client
9 because all that we're measuring is kind of that, that
10 effect.

11 That was not his presentation at all. We thought he
12 was mildly depressed, but not to the point that it was
13 interfering. He did not look toxic or over sedated. He
14 wasn't falling asleep. He got fatigued, tired during four
15 or five hours, but that's when we broke it up a little bit.
16 So, neither did he look like he was unduly compromised from
17 a mental status point of view due to any toxicity or drug
18 effect.

19 Q All right. And, and you also had the fortune of having
20 some early records sent to you, didn't you?

21 A Yes, we had educational records from his educational
22 pursuits and we did have those for review.

23 Q And do you -- recall what Mr. Casey's, I want to call
24 it the P-A-C---

25 A Well, basically his education---

1 Q ---I.Q.?

2 A Yes, his educational records were good. He'd done
3 well. He had some I.Q. quotients given, which would be I.Q.
4 tests that are sometimes given in the school situation, can
5 be done in group format. I reported in one that he had an
6 I.Q. of 113. That was actually obtained in the sixth grade.

7 However, you need to understand, from their early
8 TerMine studies at Stanford, you know, your I.Q., unless
9 something happens, the one you get at eight or nine should
10 be predictive of the one you have at age 30. I.Q. is a very
11 well researched concept and it's very predictive. Now, if
12 you don't gain or you hurt yourself or something happens,
13 obviously it can change. But generally I.Q. is fairly
14 consistent over time.

15 And, so, we have him -- we had some records that
16 certainly indicated at least average intelligence if not a
17 bit above that, and he did fairly well in school, and he
18 didn't have any evidence of a learning disability or any
19 other kind of pre-compromises in his brain as it might
20 relate to his school years.

21 Q Okay. And did each of these evaluations take -- did
22 you spend, did you say, eight to ten hours approximately on
23 each of them?

24 A Yes, both of them would be about eight hours for his
25 work. Obviously our additional work involved scoring and

1 reading records and so forth.

2 Q Okay. If you could, take the jury through the first
3 evaluation that you did, and I realize it's rather lengthy,
4 but summarize what you think are the important test results
5 that relate to Mr. Casey's claim for cognitive dysfunction?

6 A Yes, again, using the hierarchy model about, you know,
7 can you see and hear and all that, it's kind of interesting.
8 He did basically have some difficulty with spine auditory on
9 the left side, kind of a suppression. If you did this to
10 him, he wouldn't, he wouldn't quite hear that. But hearing
11 was grossly intact and all his senses were grossly intact.

12 Mr. Casey's performance and really implicated the
13 primary cluster problems he was having was what we call
14 these frontal executive abilities, attention, concentration,
15 sustaining focus, speed of processing, multitasking, and
16 when you have difficulties effectively encoding and
17 processing information, you end up being forgetful.
18 However, it's not a true memory problem like Alzheimer's.
19 Ultimately what we saw in his testing was these difficulties
20 there that were pronounced and clearly in the impaired
21 range, generally found on most of them, occasionally he
22 would do good on one. But that would also result in some
23 reduced immediate learning.

24 So, if I read a story to him or some of these immediate
25 learning kind of immediately he would be kind of diminished

1 on that. But he did not show loss of information meaning
2 what he did get in was being reduced, but he didn't have
3 rapid forgetting meaning 30 minutes later he had no idea
4 what the story was. That was retained pretty well, which
5 makes sense.

6 See, in Alzheimer's, which is more severe, very severe
7 memory impairment, you can read a story and they do look
8 pretty well, and then 30 minutes later you'll say can you
9 tell me that story again, and Alzheimer's patients typically
10 will say what story. They've actually forgot the source of
11 the information. That's how bad their memory is.

12 His is more of an encoding problem, and it was found
13 consistently as though he could profit on learning tasks
14 where we would give him like the list five times. Then he,
15 then he would correct that. So, his problem was mainly one
16 of encoding or, again, analogous to a computer system
17 keyboard to the hard disk. He had a problem keyboard to the
18 hard disk, getting information in, not keeping up.

19 Now, that will result in people being forgetful. But,
20 again, my analogy to y'all would be my wife telling me ten
21 things to get at Harris Teeter, and about on the third
22 object I'm basically over here looking at the Laker game and
23 I come back with two of them. She thinks I forgot. I did
24 not forget. It never got in. And so, you don't process.
25 People come in and say they're forgetful, but the mechanism

1 is totally different.

2 And, so, this is the pattern we consistently saw in
3 him. The problem with the attention concentration then is
4 also it gets in the way of other tasks. For example,
5 sometimes you do well or not well on a visual spatial task.

6 Does that mean a visual spatial impairment here?

7 No, it means, again, concentration of focus is
8 variable, and, therefore, it gets in the way.

9 Q Would you explain visual spatial to the jurors?

10 A Sure.

11 Q I'm having trouble with that one.

12 A Visual spatial is the right side of your brain where
13 you deal with information and that deals with spatial. From
14 a memory point of view, for example, if all of you could
15 kind of close your eyes and kind of see where you wanted to
16 go and see you got to take a left turn by that white house
17 on that corner, that's spatial visual memory. Very
18 important, quite frankly. You don't appreciate it till it's
19 gone. But, you know, it's loci. It's visualizing. It's
20 working with shapes.

21 I got plenty of learning disabled carpenters who have
22 great right side of the brain, but have, can't read and
23 spell, left side of the brain. So, again, these are
24 different abilities.

25 Left side is language, verbal. It's the side our

1 society uses more unless, unless you're a carpenter or an
2 engineer. But, again, that's more language, and that's the
3 way it is for all right-handed people and majority of
4 left-handed people too. Some left-handed people are
5 different and organized different.

6 But, generally, that's what we mean. Right, spatial,
7 rhythm, music, language, analytic thinking, and very
8 different sides of the brain.

9 Q And Mr. Casey, is he right-hand dominant or left-hand
10 dominant?

11 A Mr. Casey is right-hand dominant.

12 Q Okay. Now, as you went -- the WAIS test, the WAIS-III
13 test, that also has subtest to it, is that correct?

14 A Yes, it did.

15 Q Okay. And can you tell the jury what the subtests are
16 designed to do and why you even have them?

17 A The, again, the subtest is because the WAIS itself is
18 made up of ten to twelve subtests. Some of them are under
19 what we call verbal, educationally, oriented abilities. If
20 you did well in school you should know Shakespeare wrote
21 Hamlet. If I have a brain injury today going home to
22 Charleston again, believe it or not, three months from now
23 if somebody asked me who wrote Hamlet, I will still know
24 it's Shakespeare. That's not gonna be offended.

25 Perceptual organization, a little difficult. Though

1 you guys don't have that, it's ingrained. If I ask you to
2 put blocks together to match a design, that's not an over
3 learned task for any of you. So, it has a little bit more
4 of a new learning. It's gonna show up more under
5 neurological injury.

6 Working memory is the ability to kind of, for the
7 frontal lobe to hold information. If I give you digits,
8 increasing span, and ask you to give them back to me in
9 either in the same order or even worse, hold them in your
10 head and give them back to me in backward orders, that's
11 more frontal, working memory. If you have attention deficit
12 in your life, you'll already show a deficit in that.
13 Attention deficit people don't do.

14 Processing speed is really not very intellectual. You
15 got to do things fast. However, it's very sensitive to
16 brain injury because that means all of the brain comes
17 together to do something fast. And so, processing speed is
18 a diffuse finding, but it really -- it's kind of like
19 putting a certain symbol to a digit as quick as you can.
20 It's not particularly intellectually demanding. But you got
21 to do things fast. It tends to concentrate and remember.

22 So, those are the four factor scores that we look at as
23 neuropsychologists. So, you can see a full scale I.Q. is
24 just a summary score of all of that. And so, sometimes a
25 full scale I.Q. can be down, but it's because, you know, you

1 can't hold digits in your head. Not because you're not
2 dumb, smart. You just can't hold digits.

3 Q So, performance, did you say the performance speed,
4 would you expect that to be relatively high for a
5 coordinated person such as an athlete?

6 A Basically, you know, you would expect in an athlete,
7 first of all, visual motor skills, visual spatial skills.
8 Catching a ball and throwing a ball and hitting a baseball
9 obviously involved good visual motor integration abilities,
10 and you certainly would expect speed really to be up in most
11 everybody unless they have some kind of reason for it not to
12 be up. But, you know, ultimately you would expect
13 particularly from athletes, time and time again, their
14 visual motor skills are good.

15 Q Okay. Could you go through with the jury the sort of
16 summary of what your finding -- well, let me ask you this
17 first.

18 What area of the brain did you focus on or it appeared
19 that the cognitive dysfunction was most prevalent in?

20 A Again, from a analysis of his performance, it was
21 indicated that his frontal executive abilities, being able
22 to process information, being able to encode it effectively,
23 multitask, sustain his focus, concentration, even kind of an
24 emotional control area of the brain, we thought he primarily
25 had a, what we call a frontal executive compromise that then

1 contributed to some variable performance on other tests as
2 well as decreased immediate learning though, again, when you
3 gave him the information learned more than once he would
4 correct, he would show a good ability to profit from hearing
5 it. So, we thought his, the implication of the, the test
6 results in terms of their functional are of the brain was
7 these frontal executive abilities.

8 Q Okay. And, and one more thing before we get into the
9 actual report, I forgot, you're always looking for people
10 who are trying to cheat or get around the test, malingerers,
11 is that a fair statement?

12 A Well, yes, anytime there's secondary gain, albeit money
13 or just an opportunity to get any kind of gain in life, even
14 not do something, we, we want to assess effort and we want
15 to assess potential for falsification of the presentation.
16 So, effort goes from literally giving us the wrong answer
17 when you have the right answer, which is called malingering,
18 which is random, not trying at all, to good effort to
19 assured us that it's good effort. And, so, when you look at
20 our measures, we're looking at those things.

21 We don't just look at measures either. I mean if any
22 lay person comes in and does eight hours of
23 neuropsychological testing, you don't have any idea what all
24 we're measuring and whether or not it's consistent and holds
25 together in terms of how the brain works. I had a man come

1 in last week, had no trouble finding me from Sumter, did
2 beautifully, and then scored in the lower, less than first
3 percentile memory.

4 How did you find my place?

5 You didn't -- wasn't consistent with how he was living.
6 So, had, had, we had trouble with that.

7 And so, also, is it consistent with the potential of a
8 known neurological injury?

9 Does it, does it fit with what you know about the
10 neurological injury?

11 We can distinguish between Alzheimer's or vascular type
12 dementia based on the type of performances on the test.
13 Matter of fact, neuropsychology is often asked to make the
14 differential. Alzheimer's looks very different than a
15 vascular dementia, and that's a very important question in
16 the elderly, quality of life issues.

17 So, that's another way we look. So, there's many ways
18 that we can look at it, but we do have very specific tests
19 that are designed to measure effort and whether or not we
20 got appropriate effort.

21 Q And in both evaluations, can you, could you tell this
22 jury whether you feel, whether you strongly believe that Mr.
23 Casey gave good effort or did not?

24 A It is our opinion that he gave good effort and that the
25 tests were valid and reliable assessment of where he's at,

1 both with regard to the specific symptom related to the test
2 that are the test made, but also the consistency of his
3 performance as it related to what areas seemed to be, what
4 areas didn't seem to be implicated. For example, this is a
5 man who thought he was forgetful, but he actually did forget
6 information. He didn't effectively learn it.

7 Same complaint, but it made sense. That also makes
8 sense with what the potential injury might of been. So, we,
9 we thought that all held together on both occasions and I do
10 not see Mr. Casey just falsifying or poor effort. He gave
11 us good effort.

12 Q Okay. And you've not considered Mr. Casey a
13 malingerer?

14 A Not based on our evaluations and the empirical data
15 that we obtained.

16 Q All right. And in -- well, I'll wait till you actually
17 get to the, to the TOM Test, but would you take jurors
18 through the highlights and/or your summary of the evaluation
19 of Mr. Casey's mental state approximately 14 to 15 months
20 after the rigid bronchoscopy June 3rd, 2004?

21 A Well, it was our understanding of him, based on the
22 testing, that he was a man of at least average intelligence.
23 We thought intellectual and neuropsychological testing
24 revealed him to be demonstrating slow mental and information
25 processing speed. He had some compromise in his capacities

1 to effectively sustain attention, concentration. Assessment
2 of memory revealed that his difficulties were with regard to
3 immediate learning, memory, getting it right away. But he
4 did not show rapid forgetting. He did not lose information
5 if he could get the information learned. We thought that
6 was there.

7 We thought the speed of processing difficulties were
8 clearly there, and the reduced immediate learning and we
9 thought those were the primary areas that were contributing
10 to his complaints. We did not see specific impairment with
11 regard to visual spatial skills or language skills. Higher
12 reasoning was generally efficient, though, again, when you
13 don't intent to concentrate sometimes, you don't quite do as
14 well on that, and we also thought everything was okay from a
15 sensory perception functioning.

16 Motor functioning was so much slow and weaker than we
17 anticipated too.

18 Q Is that spatial sense, you---

19 A Well, I think that's below---

20 Q Played sports.

21 A Well, it's below his expected performance just for his
22 age and gender, but also, yeah, obviously for somebody who
23 has been active in sports, and you would expect them to have
24 average dexterity and strength on those tests. He didn't.
25 That could be due to a lot of reasons actually.

1 Q And you knew, when you did the first evaluation of Mr.
2 Casey, that you weren't looking for Alzheimer's, that,
3 that---

4 A No, we weren't looking for Alzheimer's, and if you
5 performed like an Alzheimer's patient I wouldn't of believed
6 it.

7 Q I guess what I'm saying is, from the beginning, you had
8 sort of the guidelines of this is the type of -- you were
9 provided -- let me strike that.

10 You were provided records and other materials I believe
11 by both sides, and, so, based on those materials, you knew
12 that, in general, what you were evaluating Mr. Casey for, is
13 that correct?

14 A Yeah, we had some rationale for what might of happened,
15 and that certainly guides our thinking about this
16 evaluation. Obviously we reviewed our medical records. I
17 count on my experts. I count on other physicians and
18 radiographic studies.

19 MR. TURNER: Your Honor, may I approach?

20 THE COURT: Yes, sir, you may.

21 Q Now, on radiographic studies, like an M.R.I., C.T.,
22 something of that nature, could you tell the jurors the
23 difference, if it shows up, something shows up, a black dot
24 or a part of the brain's missing versus if it comes out,
25 comes out impression normal?

1 A I count on the neuroradiologist report even though I
2 like looking at this film. I'm not an expert. But
3 obviously, if you're a neuropsychologist, you want to show,
4 you want to understand what the neuro radiographic studies
5 show. If you got a stroke in the left side of the brain,
6 obviously that implicates certain functions are gonna be
7 hurt and does it all make sense.

8 A normal C.T. scan, particularly on the day of an
9 accident, and a normal M.R.I. would be my preference to have
10 if I was injured, but does not mean uninjured. Particularly
11 in the more subtle deficits. You have to understand mild
12 hypoxia, or air emboli, whatever, if you have findings on
13 M.R.I., you're devastatingly injured if it shows up on the
14 M.R.I. because that kind of lack of oxygen will show up
15 under the M.R.I. So, those kind of---

16 MR. GUNN: Your Honor, that's not -- he has no
17 expertise in this area. That's for a radiologist and a
18 neurologist.

19 MR. TURNER: He gave the spectrum earlier as for the
20 difference between micro air emboli being on one end of the
21 spectrum and macro emboli being on the other, and macro
22 emboli had devastating results.

23 THE COURT: Yes, sir, you may though need to ask
24 questions to see if he has reviewed M.R.I. findings in these
25 type cases, whether or not he's relied on those type tests

1 before in reaching his conclusions. None of that
2 information's been presented thus far. So, I'll ask that
3 you set a better foundation for this information---

4 MR. TURNER: Yes, sir.

5 THE COURT: ---from this witness.

6 MR. TURNER: Yes, Your Honor.

7 THE COURT: Since he's not a medical doctor.

8 MR. TURNER: Yes, Your Honor.

9 THE COURT: You may proceed.

10 MR. TURNER: Thank you.

11 Q Doctor Waid, have you relied on diagnostic tests before
12 in other cases and also provided in this case?

13 A When you do a neuropsychological evaluation you look at
14 all the data that you can including the report of any
15 radiographic studies as they relate to the brain and/or any
16 place else in the body. So, those are obviously. The
17 neuropsychologist is intimately involved with understanding
18 neuro radiographic studies of the brain because they have
19 implication for which functions have been offended. So, we
20 do rely on it and try to understand the pathology so we can
21 now measure, measure the behavioral manifestations or
22 difficulties as a result of that.

23 So, we do. But we do not read those studies and I'm
24 not an expert on reading those. But certainly I'm
25 interested in know if the M.R.I. showed something or not or

1 if the C.A.T. scan showed something or not or we also, at
2 the M.U. are involved in more advanced techniques like
3 positive tron emission tomography. So, obviously
4 neuropsychologist are aware of that, but, you know, we're
5 not -- we don't do the reading of the studies.

6 Q And you were provided some diagnostic tests, at least
7 one, in Mr. Casey's case?

8 A I was aware of an M.R.I. that was conducted some time
9 later that was normal by reading of the radiologist.

10 Q Okay. And, and if it's normal, that does not rule out
11 damage to the brain, correct?

12 A That is correct.

13 Q Okay. You were going through, and I may of stopped
14 you, the first report and the, and the highlights. Did
15 you---

16 A Yes.

17 Q Did you---

18 A Well, the other highlight that has to be brought out is
19 that we're aware of emotional difficulties. Obviously our
20 assessment revealed that, you know, both the review of the
21 records as well after this event brought up concerns
22 regarding post-traumatic stress, depression, he was in
23 psychological treatment, fatigue, anxiety, fearfulness of
24 returning to the hospital, being socially withdrawn and
25 isolated as well as having some pain and sematic symptoms.

1 So, it certainly was our understanding that these
2 difficulties persisted. He was still in treatment, both
3 psychologically and psychiatrically as well as being
4 involved in use of medications for those. So, you know, we,
5 we need to understand those things cause they also can
6 impact on brain functioning from outside the brain,
7 interfere with the brain. So, we were aware that those are
8 ongoing and thought they were, you know, actually quite
9 evident as they related to his life. Didn't feel like those
10 issues got in the way with the testing much, but obviously
11 he's having problems with depression.

12 Q Okay. And the problems with depression, could a
13 patient who was once fairly bright and now realizes what
14 they have lost become more depressed as a result of that, in
15 your experience, once they realize what they've lost?

16 A Fortunately or unfortunately neuropsychologist are
17 often involved in traumatic incidents, and, basically, when
18 you have everything functioning one day and you get in a car
19 accident and you have an incident and then things don't
20 function and you make errors, obviously you become
21 depressed. You can become socially withdrawn and isolated,
22 particular in head injury. This happens all the time.

23 In a, chronic pain patients, when have a accident, and
24 you end up with spinal pain, the rate of major depression in
25 chronic pain patients, it runs at about 40 to 50 percent

1 that they will get depressed particularly after several
2 surgeries did not give them the hopeful fantasized relief.

3 So, when your life dramatically changes, getting
4 depressed is not unusual and that occurs to a lot of people
5 after any type of traumatic accident or incident. Certainly
6 seemed to be the case here too.

7 Q And some of the, the conclusions that you made on the
8 first report as far as problems with Mr. Casey, could, could
9 you enumerate some of those for the jury and help them
10 understand what, what you found?

11 My understanding, my understanding is you were
12 measuring, trying to measure the output of the brain and see
13 if it's normal, and, if not, where the deficiencies are, and
14 that's part of the evaluation process.

15 A Basically the finding is put in a diagnostic
16 nomenclature. As I've already explained to you, we, we
17 thought there were neurocognitive impairments particularly
18 effecting the frontal attentional executive abilities. We
19 thought he had a mood disorder with depression as the
20 features. We thought his mood disorder was due to the way
21 that persistent semantic symptoms and neurological changes.
22 We also gave him a diagnosis at that time of cognitive
23 disorder not otherwise specified, and what that implies is
24 that he has some change in loss and abilities, but not to
25 the severity that we would call it a dementia.

1 A dementia is a major loss and that can be due to
2 Alzheimer's and that dementia just means a more severe loss.
3 We thought he had deficit cognitive changes and we
4 attributed those to the interfering effects of his sematic
5 symptoms, mood disturbance, sleep disturbance, and at that
6 juncture, the potential that he had a permanent neurological
7 deficit due to the complications of the surgery. We thought
8 all those factors to be contributing to the experience he
9 was having in day-to-day pursuits. We were less convinced
10 that depression was in the way based on the day of the
11 testing, but in terms of how this man was doing, we had no
12 doubt that those were contributing to his complaints in
13 day-to-day pursuits.

14 Q And you took that into consideration---

15 A We took---

16 Q ---in formulating your opinion that---

17 A Yes.

18 Q Okay. And could you say, within a reasonable degree of
19 medical certainty, that, based on your evaluation of Mr.
20 Casey, that his mood disorders, major depressive like
21 episode, it's secondary to neurocognitive and sematic
22 symptomology and within a reasonable degree of medical
23 certainty more probable permanent neurological deficits due
24 to complications of laser bronchoscopy?

25 MR. GUNN: I object to that, Your Honor. He, he added

1 that -- well, first of all, he said to a reasonable degree
2 of medical certainty. We don't mind him asking questions
3 within the reasonable degree of scientific certainty in his
4 field. Secondly, he added that laser bronchoscopy. This,
5 this witness is already told us he doesn't, he's not
6 medical.

7 MR. TURNER: This may need---

8 THE COURT: Why don't you rephrase the question?

9 MR. TURNER: Okay.

10 THE COURT: Cause this, this gentleman's not been
11 qualified in the field of medicine.

12 MR. TURNER: I'm, I'm---

13 THE COURT: He's qualified in the field of psychology.
14 I'm going to ask you to rephrase the question.

15 Q Okay. Doctor Waid, under Axis -- tell the jury what
16 the, I think it's the DMD-IV?

17 A DSM-IV.

18 Q DMS-IV?

19 A That's okay.

20 Q I got it backwards.

21 A That is our Diagnostic and Statistical Manual of Mental
22 Disorders Fourth Edition. It's really our book of our
23 diagnosis that we utilize and have to code by.

24 Q And it's broken down to five axis, isn't it?

25 A We have five multi-axis that depict clinical disorder,

1 whether you have longstanding traits or attitudes or
2 personality behaviors associated with a personality
3 disorder, Axis II. Axis III would be medical problems that
4 are contributing to Axis I. Axis IV would be psychosocial
5 stressors, other stressors ongoing in your life, and Axis V
6 is a scale we use to give a global assessment rating of your
7 functioning, kind of what level of impairment do you have.

8 Q Okay. And that global, that global level of
9 functioning, what -- is that out of a -- what is the score
10 based on, out of a hundred?

11 A Yeah, it goes up a hundred. It's based in our book.
12 And, so, obviously, it's based on impairment and social and
13 occupational and other functional roles you have. We gave
14 him a score of 54, which would be serious impairment.
15 Again, again, it's psychiatry. So, this is a little bit
16 neurology, but we use it anyway.

17 You have to understand in the 40's, you probably have a
18 very significant psychiatric disturbance, might even be
19 hallucinating. But 50, in the 50 means you got a serious
20 impairment with regard to, you know, role functioning as it
21 relates to social, occupational, and then it can go, you
22 know, moderate, mild, and then basically doing, doing well
23 as the score gets higher.

24 Q And what did you find for the global, global, the GAF?

25 A I gave him a score of 54 cause of obvious serious

1 impairment, you know, in terms of social and vocational
2 function.

3 Q All right. And as to Axis I, could you tell the jury
4 what you, what your opinion on the report was on Axis I?

5 A Yes, on Axis I we gave a diagnosis of mood disorder
6 with some major depressive like episode. It's based on a
7 little bit a review of the records and work with his
8 psychologist and concern that things had gotten worse as his
9 life had gotten better. We thought that was secondary to
10 the persistence of his neurocognitive and semantic
11 difficulties as well as opinion and then, on 2009, the
12 belief that more likely than not, based on
13 neuropsychological data and evidence and review, that he had
14 a permanent neurological deficit due to the events that
15 transpired in the hospital.

16 We gave him a diagnosis of anxiety disorders with
17 generalized anxiety. Again, due to having to cope with
18 these symptoms as well as he's developed this kind of fear
19 of going back to the hospital. It took an event to really
20 get him back there, kind of a phobia about that, and we gave
21 him a diagnosis of cognitive disorder not otherwise
22 specified, again, due to the interfering effects of
23 depression or psychological disruption, sleep disturbance,
24 semantic symptoms, and, again, the probable persistent
25 neurocognitive deficits as a result of the complications in

1 the hospital.

2 MR. GUNN: Now, Your Honor, we -- he's already -- he is
3 testified he doesn't -- I mean we don't mind him connecting
4 things up to a temporal basis, but he keeps saying as a
5 result of what happened in the hospital and this witness is
6 not qualified to say that. He's qualified to give the
7 status of Mr. Casey before and after and that's fine. But,
8 but not, not medical causation.

9 THE COURT: Mr. Turner.

10 MR. TURNER: Your Honor, they base it on the five axis,
11 which is within his specialty, and Axis I is what he is just
12 related to the jury, and it connects. Other specialties may
13 be able to do it as well. But his specialty goes through
14 the axis and the, the global functioning and Axis I---

15 THE COURT: Well, I understand what his speciality does
16 now.

17 MR. TURNER: It deals---

18 THE COURT: My understanding of his testimony was he
19 has relied on the opinions of other professionals in
20 formulating his opinions, is that correct?

21 MR. TURNER: And, and -- that is correct, Your Honor,
22 and he's also reviewed all the records and we could list the
23 depositions, but---

24 THE COURT: Well, that might be a good idea---

25 MR. TURNER: He's reviewed medical records first hand.

1 THE COURT: ---to place that in the record.
2 Now, he has the right, Mr. Gunn, to rely upon---
3 MR. GUNN: Yes, sir.
4 THE COURT: ---opinions of other professionals in
5 formulating his opinion.
6 MR. GUNN: Rule 704, yes, sir.
7 THE COURT: Yes, sir. So, I'm gonna allow that, that
8 to go forward.
9 So, if you'd like to lay a foundation perhaps as to
10 exactly what he has reviewed, and upon the things that he
11 based his opinion upon. So, I'll allow you to proceed,
12 Mr. Turner.
13 MR. TURNER: Yes, Your Honor.
14 THE COURT: I won't strike the last statement based on
15 your future questioning. We'll see how that comes out.
16 MR. TURNER: I'll do a better job with foundation.
17 Q On the first report, Doctor Waid, did you -- you
18 reviewed the medical records for treatment for the admission
19 5/28/04---
20 THE COURT: Just one second. We've got a juror with a
21 problem. We're gonna take a little break at this time.
22 MR. TURNER: Yes, sir.
23 THE COURT: I'm gonna instruct the witness not to
24 discuss his testimony with anyone during the break, and at
25 this time I'll allow you to retire to the jury room. Please

1 don't begin any discussions until such time as I've advised
2 you to do so.

3 You may retire.

4 (Whereupon, the following takes place outside the
5 presence of the jury.)

6 THE COURT: I'll inform the attorneys that this
7 particular juror informed the bailiffs that he had an asthma
8 attack last night and he's having, he's suffering from some
9 issues in that regard, and I don't know if he's gonna be
10 able to continue or not. He said he would try this morning
11 and we'll see how it goes. I don't know what his particular
12 problem is right now, but we'll find out.

13 We'll be in recess for about ten or fifteen minutes.

14 MR. KING: Is he an alternate or do you know?

15 MR. MANN: No, he's a primary.

16 THE COURT: He's a primary. He's a primary.

17 MR. TURNER: I'll try to do a better job with
18 foundation.

19 (Whereupon, a short recess was taken at this time.)

20 THE COURT: All right. Gentlemen, I am going to
21 release the juror from service. According to Rule 47(b),
22 the juror will be replaced in the order in which they're
23 called. Tina Craig will be the next juror.

24 Any objection?

25 MR. THOMPSON: None from the plaintiff.

1 THE COURT: Any objection from this side?
2 MR. KING: None, Your Honor.
3 MR. GUNN: No, sir.
4 MR. KING: No, sir.
5 MR. TURNER: Your Honor, will we -- did you again, or,
6 he---
7 THE COURT: Beg your pardon?
8 MR. TURNER: I kind of got sidetracked, Pam may be able
9 to tell, whether I started to make a proffer when he got
10 sick or we were---
11 THE COURT: No, you were still -- you were in the
12 process of asking questions.
13 MR. TURNER: Okay.
14 THE COURT: All right. If you'll bring that juror in.
15 I'll excuse him and then we'll bring the panel in. But just
16 bring him in at this time.
17 (Whereupon Juror Lamb comes into the courtroom at this
18 time.)
19 THE COURT: Sir, I'll get you to state your name for me
20 please.
21 JUROR: Charles Lamb.
22 THE COURT: I appreciate your effort to try to
23 continue. I'm told by the bailiffs that's probably not
24 going to be possible and would you confirm that as well?
25 JUROR: Not today at least.

1 THE COURT: All right. Well, we're gonna continue with
2 the trial. So, I'm gonna excuse you at this point in time.
3 The bailiffs will show you out. If you need an excuse from
4 work the clerk will take care of that for you. Go by the
5 Clerk's Office. You'll receive a voucher for your pay later
6 on. I appreciate your efforts and your service in the case,
7 but you're gonna be released at this time.

8 JUROR: Thank you very much.

9 THE COURT: Thank you.

10 (Whereupon, the juror leaves the courtroom at this
11 time.)

12 MR. TURNER: Your Honor, before the jury comes in, I
13 believe I---

14 THE COURT: Close the door.

15 MR. TURNER: ---may save some time if I proffer Axis I.
16 That's what the objections, the last three have been about,
17 and, and proffer that. That is Axis I in his report, and it
18 deals with the---

19 THE COURT: Let me hear what they---

20 MR. TURNER: ---bronchoscopy.

21 THE COURT: Well, what's gonna be the issue on that?

22 MR. GUNN: I think the objection was misunderstood by
23 counsel. My objection is not -- I mean he's qualified to go
24 into these axes. No question about that. My, my, my
25 objection was his relationship relating it to an event in

1 the hospital. That, that was the issue. Not---

2 THE COURT: And that was my ruling. Again, the
3 objection is not to him, the opinion that he is formulated
4 within his area of expertise, and he has the right, as an
5 expert, to rely on the opinions of other experts that he is
6 received and he, he can choose what he chooses to use for
7 his opinion. They, of course, can attack what opinions he
8 might use as a, as the basis of his opinions. But this
9 witness is not a medical doctor and won't be allowed to give
10 an opinion as to what he said was the cause. He could state
11 that I took Doctor X's opinion concerning the cause and I
12 used that in formulating my opinion as to what he, occurred.
13 He can testify in that fashion.

14 MR. TURNER: Okay.

15 THE COURT: But he, he's not allowed to give an opinion
16 as a medical doctor as to causation of the underlying
17 injury---

18 MR. TURNER: Yes.

19 THE COURT: ---whatever that might of been.

20 MR. TURNER: Yes, Your Honor.

21 THE COURT: So, for the temporal issue, the only thing
22 there is -- can we caution -- there's a list of what he
23 reviewed in, in making both reports. The only -- I have an
24 objection to the Massachusetts guys.

25 THE COURT: You have an objection to him using a

1 Massachusetts guy?

2 MR. TURNER: Well, no, it's listed there, and there's

3 redactions and we still haven't worked that out yet. And

4 so---

5 THE COURT: I'm not sure I understand what you're

6 talking about. Maybe you can explain that to me.

7 MR. TURNER: I was gonna just remove -- well, I guess

8 he could say -- okay. He, he, he didn't rely on it. Then

9 he'll leave them out.

10 THE COURT: Okay.

11 MR. TURNER: Now---

12 THE COURT: But he has a right to testify as to what,

13 what he's relied upon to formulate his opinion.

14 MR. TURNER: Yes, sir.

15 THE COURT: And that can even be information that's not

16 necessarily admissible into Court, and -- but they have the

17 right to attack the basis of his opinion, but the -- he

18 had -- he can only offer an opinion within his field of

19 expertise.

20 MR. TURNER: Yes, Your Honor.

21 THE COURT: And that's, that's -- if he goes into

22 diagnosing medicals issues, then I'm sure I'll hear from Mr.

23 Gunn pretty quickly there.

24 MR. TURNER: Yes, Your Honor.

25 THE COURT: You understand where we are?

1 MR. TURNER: I do.

2 THE COURT: And I don't know that a proffer is
3 necessary at this point in time.

4 MR. TURNER: I would agree with you, Your Honor.

5 THE COURT: Okay. All right. Let's bring the jury in
6 please.

7 (Whereupon, the following takes place within the
8 presence of the jury.)

9 THE COURT: All right. Mrs. Tina Craig?

10 JUROR: Yes, sir.

11 THE COURT: You are now on the jury panel in chief. I
12 have released, released the young man who was ill today.
13 So, you no longer are an alternate. You are on the jury
14 panel.

15 You understand that, ma'am?

16 JUROR: Yes, sir.

17 THE COURT: All right. When we broke the plaintiff was
18 in the process of examining this witness.

19 You may proceed, Mr. Turner.

20 MR. TURNER: Please, please the Court, Your Honor.

21 CONTINUED DIRECT EXAMINATION

22 BY MR. TURNER:

23 Q Doctor, Doctor Waid, as to Axis I in your report,
24 you -- did you rely on opinions of other physicians as well
25 as documentation and medical records that were sent to you

1 by either the defense or the plaintiff's attorneys?

2 A Yes, I did.

3 Q Okay. And were you able to establish, based on
4 reviewing all of those hospital records, deposition
5 testimony of other physicians, and other documentation, able
6 to establish the temporal aspect as to when Mr. Casey's
7 symptoms that you've been describing, this cognitive
8 dysfunction, first set in?

9 A Yes, I was able to establish a temporal relationship
10 with an understanding of both cognitive complaints and
11 difficulties, as well as emotional difficulties, subsequent
12 to the event that we're discussing about the
13 hospitalization.

14 Q Okay. All right. So, you were able to establish a
15 temporal relationship with the event from the
16 hospitalization, and that would be the ridge bronchoscopy of
17 6/3/2004?

18 A That is my understanding, yes.

19 Q Okay. Now, would you read for the jurors your opinion
20 in Axis I as to whether -- let me, let me ask you a little
21 bit different way.

22 The temporal relationship you were talking about as to
23 the rigid bronch on 6/3/2004, in your opinion, is that
24 causally related based on the physician opinions, documents
25 and other materials that you received and reviewed, and any

1 weight that you put on it, if any, as to what is related in
2 Axis I to an applied and acceptable scientific, scientific
3 principle and recognized and acceptable principles of
4 neuropsychology?

5 A Yes, it is, and both, again, related to the cognitive
6 difficulties as well as the mood and anxiety difficulties.

7 Q Okay. And you said frontal lobes, subcortical, can you
8 tell the jury what the subcortical region of the brain is?

9 A Yes, I can. From your neuro anatomy, you have higher
10 cortical, gray matter, subcortical is the white matter.
11 It's white because it's interrelated a little differently,
12 and it's subcorticle and it has different functional basis
13 of what it does. Higher cortical is the higher region of
14 the brain having to do with much more sophisticated thinking
15 and memory. The subcortical regions are much more
16 innervated with small blood vessels, and, therefore, much
17 more susceptible to events that might involve the lack of
18 oxygen because of the amount of bloods vessels---

19 MR. GUNN: Your Honor, I object to this. This is, this
20 is information to get from a neurologist. This is medical
21 information. He's talking about the blood vessels in the
22 brain and so forth.

23 THE COURT: He's, he's not offering an opinion. He's
24 offering testimony he, I assume he has -- it appears that
25 he's studied that. I'll allow him to testify as to what his

1 understanding of the brain's matter is. I mean -- I would
2 expect he may of studied it, but at any rate, he can
3 describe it if he knows it.

4 MR. GUNN: Okay.

5 THE COURT: He's not offering an opinion at this time.

6 A So this neuro anatomy is that way. If, ultimately,
7 from a behavioral point of view, a neuropsychology point of
8 view, we understand the brain and how it functions and the
9 types of disorders and diseases that effect the subcortical
10 region. For example, Parkinson's has a motor component.
11 But we also know they have a frontal executive component
12 because of the way of neuro anatomy has fibers that got to
13 the frontal lobe.

14 So, often, when you have injuries in this white matter
15 subcortical region, you'll get this frontal executive. But
16 you do not get the higher cortical losses like the true
17 memory and the skills. And, so, from a neuro anatomy and
18 understanding neuro behavioral stuff, that's how we
19 understand it and that's where you have much more
20 expectation for the frontal executive finds, and when more
21 severe, you'll clearly have motor problems with the
22 subcortical as you do in Parkinson's with the kind of motor
23 shuffle and motor problems or multiple sclerosis where
24 there's a large motor component.

25 So, that's our understanding. We have, as

1 neuropsychologist, an understanding of anatomy function
2 where it's mediated through and then the insult and what it
3 could of done.

4 Q Okay. And you placed it in the subcortical region as
5 one of the areas---

6 A That, that would be your concern and as it relates also
7 to this frontal executive issue, again, owing that other
8 things can contribute to the frontal executive problem also.

9 Q Okay. And you mentioned motor weakness, that's also
10 in, in your report, isn't it, motor weakness with Mr. Casey?

11 A He did have some motor weakness or dexterity issues.
12 But he ambulated well. Those are some changes that have
13 occurred, and, again, some of those could be brain, but
14 also, you know, he's got some back, back pain and other
15 things that could be contributing to that too.

16 Q Okay. And the, in comparison with other testing that
17 was done and your own, you, you reviewed other testing,
18 exact same test, correct?

19 A That is correct.

20 Q And it was -- there were three months between the test
21 given June of 2005 and the testing you gave to Mr. Casey?

22 A Yes.

23 Q Okay. And the -- do you remember what the full scale
24 I.Q. differences were between the two?

25 A Doctor Grace got a full scare I.Q. of 97, a verbal I.Q.

1 of a hundred, and a performance I.Q. of 104. We got a full
2 scale I.Q. of 96, verbal I.Q. of 91, and a performance I.Q.
3 of 104. They were fairly consistent actually within various
4 acceptable range as relates to those particular scores.

5 Q Okay. And I'm gonna take you back to the last page of
6 your report, the neurocognitive deficits consistent with the
7 subcortical injury, can you describe those for the jury?

8 A Again, they are what I've described. Ultimately this
9 man's primary cluster of difficulties is with regard to
10 attention, concentration, multitasking, executive
11 functioning, attentional aspects of memory, being able to
12 immediately take that information in. That's his primary
13 cluster along with the slowness in his mentation. Those
14 would be considered his primary cluster.

15 Obviously those can invariably interfere with
16 performance in other areas, but those are consistently found
17 and have been consistent across the evaluations conducted on
18 him.

19 Q And reclusiveness, did you, did you note that with Mr.
20 Casey outside of those symptoms as well?

21 A He definitely has some comorbid, emotional
22 psychological problems coping with this, the changes in his
23 life, not being able to do the things that he use to do,
24 and, yes, we do see him as having mood and anxiety problems.

25 Q Okay. And you also administered the WTAR?

1 A The Wechsler Test of Adult Reading.

2 Q Okay.

3 A That's correct.

4 Q Okay. And that also dealt with executive function and

5 sustained focus.

6 Can you tell the jury what the results of the, the WTAR

7 test were?

8 A The Wechsler Test of Adult Reading is utilized to

9 provide an objective measure that would predict or estimate

10 what one's intellectual abilities were before an incident.

11 And so, it's an actual measure we have, again, utilizing

12 things that don't get offended much, and, and basically the

13 WTAR predicted that Mr. Casey's I.Q. functioning should be

14 more in line with a full scale of a 107, a verbal I.Q. of

15 108, and a performance I.Q. of 104. Again, consistent with

16 some educational records and everything that would say that

17 this man was well within the average range, if not in the

18 upper range of average.

19 So, it's another measure to try to get at whether

20 there's a deviation there. It doesn't say why. But it does

21 say that he should be performing better as it relates to

22 those particular measures.

23 Q And that's important because you did not know Mr.

24 Casey, did you, before June 3rd, 2004?

25 A That is correct. I did not know him and it's a rare

1 instance when I know any of my clients before an incident.

2 Q And the problems with immediate learning, would that
3 also include lack of getting adequate oxygenation to the
4 brain?

5 MR. GUNN: Your Honor, I object to that. This is
6 medical. He's asking for medical. He's asking whether or
7 not lack of medical or lack of adequate oxygenation to the
8 brain causing that.

9 MR. TURNER: I'll strike it and try to make it simpler
10 with an easier question.

11 THE COURT: Thank you, sir.

12 Q Problems with immediate learning, can you tell the jury
13 what that encompasses?

14 Immediate learning specifically deals with an area if
15 I'm not mistaken?

16 A Yeah, immediate learning has to do, again, with the
17 ability to kind of take information from the keyboard,
18 again, in your world, and effectively get it stored in the
19 brain. It's learning. You have reduced learning, reduced
20 ability. You read a page and you don't quite incorporate
21 the information as well. If you go to school, you have to
22 read it two or three times now rather than one. So, it's
23 the ability to effectively get the information out here into
24 true memory, and then that's part of the frontal executive
25 issues that we're talking about in this man.

1 So, it shows up in those scores, but his retention rate
2 is good meaning what he gets in he retains. Again, part of
3 that cluster that we've already talked about.

4 Q And -- okay. And this may come up later, the TOM Test,
5 it's called the TOM Test?

6 A (Witness nods affirmatively.)

7 Q That's the retention trial?

8 A The test of memory malingering is a symptom validity
9 test that basically is there to assess the testing effort
10 and it's given across two trials in a retention trial and
11 certain scores are utilized to assure that good testing
12 effort is provided. Mr. Casey's performance on that on both
13 occasions as, as well as other symptom test was consistent
14 with provision of good effort.

15 Q Good effort not.

16 And if it was one point lower or one point higher, is
17 it quantifiable?

18 It'd still be good effort, wouldn't it?

19 A No, it's not quantifiable. You have a cutoff score.
20 The analogy is basically very easy. You have a 50/50 chance
21 of being right on the test on any occasion. It's like
22 flipping a coin. If you go out and meet somebody today and
23 flip the coin a hundred times and it comes up heads 82 times
24 you need to check the coin. The same, the same principle
25 used here, and by the second trial, we even expect you to

1 have 45 out of 50 correct. If you end up a little bit low,
2 but 45, we'll give you a retention trial, and if, in your
3 retention trial you improve, it's consistent with good
4 effort. If you weren't trying at all, random, would be 25
5 out of 50. If you were falsifying, you would beat chance in
6 the other direction.

7 So, if you come in and only get 18 out of 50 right on
8 the Tom, you're giving me a wrong answer when you know what
9 the right answer is. That's malingering. So, malingering
10 is the worst scenario. Effort can certainly be effected in
11 people even though they're not malingering. So, those are
12 two different kind of strikes. But when you beat odds in
13 the wrong direction, you need to check the coin.

14 Q Okay. I -- just a few more.

15 The memory, memory lapses, is that something that is
16 associated with this cognitive dysfunction or depression in
17 your expertise?

18 A In Mr. Casey's case, in his day-to-day life, there's no
19 doubt that functional factors such as pain, fatigue, and
20 depression add to the burden of his complaints as they
21 relate to forgetfulness and attention problems. What we are
22 stressing is that in the testing situation, we're able to
23 observe and see it more often if a person's given
24 depressionogenic (phonetic) behaviors and so forth. I
25 believe Mr. Casey's cognitive abilities are definitely

1 effected by his functional factors like depression and pain.
2 I didn't see it as a major player during the testing
3 situation, but obviously we believe he has a mood problem
4 and that it contributes to the morbidity in his life
5 day-to-day.
6 MR. TURNER: Okay. Your Honor, if I may approach the
7 witness?
8 THE COURT: Yes, you may.
9 Q Doctor Waid, if you would, look at that and just see if
10 that is a letter that you had, one of the documents that
11 counsel had provided to you.
12 Do you---
13 A Yes, sir.
14 Q Do you recognize?
15 A Yes, it is.
16 Q Okay. And without dragging you all through it, would
17 you read the third paragraph and tell me---
18 MR. GUNN: Wonder if you mind telling us what that is?
19 MR. TURNER: Yeah, Billy, be glad to.
20 THE COURT: Please show it to counsel.
21 Q This is, this is---
22 THE COURT: Just show it to him. Take it over and show
23 it to him.
24 Q Doctor Waid, I'm going to refer you to what's been
25 marked as Joint Exhibit 2, medical exhibits, Book 2 of 3,

1 and bates stamp is CT 0818. It's a three page letter and,
2 and you recognize or do you recognize -- it's actually in
3 reverse order.

4 A I---

5 Q Okay.

6 A ---do recognize it.

7 Q Okay. And this is Lung and Chest Medical Associates,
8 and doctor, and the physician, those are -- this is a
9 document you've reviewed, reviewed before?

10 A Yes, it is.

11 Q Okay. Paragraph 3.

12 A That's correct.

13 Q You've read it?

14 A Yes, I have.

15 Q Okay. Well -- all right. And would you read it to the
16 jury and just tell them that you agree, either agree or
17 disagree with it?

18 A With reference to the patient's difficulty
19 concentrating, he undoubtedly had air emboli given his
20 lengthy duration of anesthesia and laser perforation of the
21 endotracheal tree with result in leakage of air---

22 MR. GUNN: Your Honor, I object to that, to, to his
23 reading the whole thing about air emboli. He can, he can
24 base it on what Doctor, Doctor Fogarty says, his opinions,
25 as Your Honor ruled a while ago. But, but he's gonna be

1 asked now whether he agrees with the air emboli. He doesn't
2 have that capability.

3 MR. TURNER: Well, if, if I'm not mistaken, that's
4 exactly what Doctor Gonda, his family practitioner, did
5 yesterday.

6 MR. KING: No, sir.

7 MR. GUNN: No, sir.

8 THE COURT: No, I didn't allow him to do that as a
9 matter of fact.

10 MR. TURNER: Oh, okay. If he, if he---

11 THE COURT: So, I am going to allow you to ask this
12 witness if he has utilized that opinion in formulating his
13 opinion. But whether or not he agrees with that, he's not a
14 medical doctor. I'll sustain the objection in that regard.

15 MR. TURNER: Yes, Your Honor.

16 THE COURT: So, if you wish to ask him if he's utilized
17 that and how he's utilized that, I'm sure he'll tell us.

18 Q Doctor Waid, you reviewed that document?

19 A Yes, I have.

20 Q And you've utilized that in making and formulating the
21 opinions that you've expressed to these jurors here today?

22 A Yes, I have.

23 Q All right. And do you agree with Paragraph 3 on, on
24 bates stamp CT 0818?

25 MR. GUNN: Your Honor?

1 THE COURT: Sustained.

2 Q Okay. You relied on Paragraph 3 and reviewed it in

3 formulating your reports?

4 A I did.

5 MR. GUNN: Asked and answered, Your Honor. He's -- I

6 mean he said he---

7 THE COURT: He's already asked -- I'm gonna ask him not

8 to ask the question again.

9 Q Did you rely on it in formulating---

10 MR. GUNN: Your Honor, that is the third time.

11 THE COURT: I am not gonna allow the question. He's

12 already answered that he used it.

13 Q Okay. And, Doctor Waid, you still have your report

14 with you?

15 A Yes, I do.

16 Q Okay. If you'd go to the last -- Axis I, I think this

17 is where we got hung up before. If you would, let the jury

18 or summarize Axis I.

19 It is -- let me make sure for the jury, Axis I, that's

20 major disorders, right?

21 A That's clinical disorders.

22 Q Clinical disorders.

23 Tell me what your clinical finding was for Mr. Casey on

24 Axis I.

25 A Mood disorder with depression, anxiety disorder with

1 generalized anxiety, and cognitive disorder, and O.S., not
2 otherwise specified. I viewed those things as present, and
3 due to the persistence of his neurocognitive and sematic
4 symptoms, I viewed those as temporally related to potential
5 mechanism that could of caused neurological injury.

6 MR. TURNER: Your Honor, that's all the questions I
7 have for Doctor, Doctor Waid at this time.

8 THE COURT: Mr. Gunn, you may cross-examine.

9 MR. GUNN: Yes, sir.

10 CROSS-EXAMINATION

11 BY MR. GUNN:

12 Q Doctor Waid, I believe it's apparent by now, but you're
13 not a medical doctor, are you, sir?

14 A No, I am not.

15 Q All right, sir. And you have not seen Mr. Casey to
16 provide any treatment to him, have you, sir?

17 A I have not.

18 Q The only thing that you have done is done these
19 evaluations of him?

20 A That is correct.

21 Q Is that correct?

22 A That is correct.

23 Q And these evaluations that you've done of, of him in
24 the Year 2005 and 2009 were set up by his lawyers, were they
25 not?

1 A That is correct.

2 Q You were first engaged, in August of 2005, by his

3 attorneys at the time, Ken Anthony and Mr. Thompson?

4 A That is correct.

5 Q What is your fee for professional services?

6 A My fee for neuropsychological evaluations regardless is

7 \$150 on the hour for the evaluation at, per hour.

8 Q All right, sir. How about for depositions and coming

9 up here?

10 A Travel time is also 150 since I'm out of my office, and

11 I do get \$320 on deposition hour and expert testimony hour.

12 Q All right. Do you know how many hours you have placed

13 into this project?

14 A I have placed approximately ten to twelve hours the

15 first evaluation, ten to twelve the second. I did a

16 deposition with you guys also I believe and today.

17 Q All right. Now, the -- so, probably what, 30, 35

18 hours?

19 Would that be fair?

20 A I think that would be fair after today---

21 Q Yeah.

22 A ---when I drive back.

23 Q Plus any out-of-pocket expenditures?

24 A I don't have any. I just got up this morning. So, I

25 don't charge for that.

1 Q Mileage?

2 A No.

3 Q Nothing?

4 A No.

5 Q Okay.

6 a Travel time's travel time.

7 Q Sure.

8 Okay. You, you indicated earlier that the second

9 evaluation, the one that was done on August the 30th and

10 September 2nd, 2009, that that was done by agreement of

11 the parties.

12 Did I hear you say that?

13 A I don't believe I said that. I did discuss doing it at

14 the deposition. That was May and June of, by the way, of

15 2009, and there was a statement made then that, that I

16 wanted to do it and I was gonna do it. But I don't know

17 that -- I'm not sure about agreement.

18 Q I think I was down there on May 15th, 2009, when that

19 deposition was taken and may even of asked a question or

20 two, and I don't remember making any agreement with you that

21 I thought you ought to do that or not.

22 A I don't---

23 Q Is my, is my mind failing me?

24 A Potentially, but I wouldn't rate that at this point.

25 Q You think my mind's failing me?

1 A No, just being a joke. Just facetious. I'm sorry. My
2 point to you is I'm not sure I made an agreement with you.
3 I certainly told counsel I thought it would be a better idea
4 for me to have a reevaluation and that would be the other
5 attorneys.

6 Q Okay. You made, you made an agreement with plaintiff's
7 attorney?

8 A Right.

9 Q Okay. All right, sir. Now, you told us in your
10 deposition that was taken on May 15th, 2009, you told us,
11 didn't you, that Mr. Casey, for his first appointment back
12 on August the 30th, 2005, that he drove to Charleston?

13 A If I told you that I'll agree to that. I just, today,
14 don't remember if I drove or not, yeah.

15 Q Sure.

16 Well, it might be important.

17 A Okay.

18 Q But that's what you told us.

19 A That's correct.

20 Q You got no reason to disagree with that?

21 A I wouldn't disagree with that.

22 Q All right, sir. We've been here about seven or eight
23 days it seems like, and, and I want to try to do something
24 that hadn't been done yet, and that's to ask some questions
25 or maybe bring out some things that Mr. Casey can do.

1 Okay?

2 A Sure.

3 Q He can do some things, can't he?

4 A Yes.

5 Q All right. When he first came to see you on August the

6 30th, 2005, he drove to Charleston. We talked about that.

7 A That is correct.

8 Q He arrived on time?

9 A I believe so.

10 Q Kept his appointment?

11 A He did.

12 Q He was well groomed?

13 A He was.

14 Q Good personal hygiene?

15 A Yes, sir.

16 Q He was conversant?

17 A He was.

18 Q He handled himself well?

19 A He did.

20 Q So, we know that he can see people and this is the

21 first time he ever met you?

22 A That is correct.

23 Q We know that he can see people, meet people, greet

24 people and present well, don't we?

25 A That is correct.

1 Q All right, sir. And let me ask you this.

2 You said that you broke your evaluation up into two

3 sessions, August the 30th and then again on

4 September 2nd, 2005, in order to prevent fatigue, right?

5 A That is correct, yes, sir.

6 Q That's what you do with all your clients, is it not?

7 A No, it isn't. Unfortunately when you're Court ordered

8 or I.M.E. you got one day you got to do it. We also made

9 that decision based on him being, observed to be somewhat

10 fatigued after lunch. So, made a decision then to --

11 sometimes when people come from the Upstate or other places,

12 we try to get it done often. They're financially strapped a

13 little bit. So -- but I do think it's ideal, if you're

14 asking me, to kind of do it in two and a half days.

15 Q Well, especially if a fellow got a 210-mile drive down

16 there and a 210-mile drive back, it's best to split it up,

17 isn't it?

18 A I would even say coming down the night before would be

19 ideal. You're trying to---

20 Q All right.

21 A ---not have that interference.

22 Q All right, sir. Insofar as your findings on that

23 August the 30th and September 2nd, 2005, evaluation, let

24 me, let me make sure I know about some of the things that

25 you did find. Indulge me just a second if I could please,

1 sir.

2 A Sure.

3 Q You found that Mr. Casey had no evidence -- well, well,
4 strike that. Let me go back and ask you, he could hear,
5 see, and speak well?

6 A Yes, sir.

7 Q That's one of the things he could do?

8 A Yes, sir, in terms of gross, he could. Fine testing
9 indicated some left auditory issues, but it didn't seem to
10 interfere with him being able to hear.

11 Q He had no evidence of visual inattention?

12 A That's correct. He didn't have neglect to either side
13 of space.

14 Q Tell the jury what that means.

15 A Sometimes when people have a injury to the parietal
16 area of the brain, they end up having what we call a
17 hematocoelia. They -- literally their vision will be cut
18 off and can't see either to the right side or the left side.
19 It's called a visual neglect. It's obviously a
20 somatosensory impairment often because of injury back here.
21 Wasn't anticipated on this type of incident, but when you
22 get that, it's, it's a problem.

23 Q He doesn't have it?

24 A He does not.

25 Q He had total recall, recall score after five, five

1 administrations, which placed him in the 73rd percentile for
2 his age peers?

3 A In 2009 it was 73rd, 50th the first time. That was
4 where we gave him the redundant learning that I told the
5 jury about where if you give it to him more than once he
6 starts to gain. That is correct.

7 Q Well, that's a good thing, isn't it?

8 A That's -- I think so, sure.

9 Q Tells us he has a good learning curve?

10 A He has a learning curve. Basically beyond the
11 immediate learning problem he starts to gain.

12 Q He had no evidence of dysphrasia?

13 A That's correct.

14 Q Dysphrasia is the loss of the ability to perform
15 coordinated tasks?

16 A Basically it's a, actually fine motor drawing. Kind of
17 basically if you show somebody an iron cross, can they draw
18 it, or another one would be like a three dimensional design,
19 can you draw it.

20 Q We know, from the medical experts in this case even on
21 plaintiff's side, that Mr. Casey has no sensory or motor
22 deficits, don't we, sir?

23 A That is correct.

24 Q All right, sir.

25 A Well, no, no gross motor. I did tests some of his fine

1 dexterity strength and it was off. But I, again, I don't
2 think he has any gross motor deficits in terms of more
3 significant deficits.

4 Q One of the items that you relied upon heavily was the
5 deposition of Doctor Jantz from the University of Florida,
6 who testified last week, didn't you?

7 A I don't know that I relied upon it heavily. I looked
8 at everything and got everybody's opinions as they relate to
9 this case.

10 Q Well, you saw where Doctor Jantz said he has no motor
11 or sensory deficits, didn't you?

12 A That is correct, gross motor. I think a couple doctors
13 said that, yeah.

14 Q For higher reasoning abilities, Mr. Casey was slow, but
15 able to sequence find motor movements for no, for go and no
16 go---

17 A That is correct.

18 Q ---test?

19 A Yes.

20 Q He performed in the average range on executive
21 functioning test involving letter and category fluency?

22 A Yeah, they were a little bit in the low range of
23 average, but they were within average limits.

24 Q He did not demonstrate an excess rate of errors in the
25 Wisconsin, Wisconsin card sorting test, which put him in the

1 44 percentile or average?

2 A That is -- basically that's a finding where he did not
3 have perceptorive (phonetic) errors, and that, that's
4 correct. He didn't have that type of errors. He didn't do
5 particularly well on the Wisconsin, but he didn't have what
6 we call perceptorive (phonetic) errors, which is where
7 you're continuing to use the same solution set even though
8 we've given you plenty of information to change.

9 Q Not---

10 A He didn't have that type of error.

11 Q Okay. Not having perceptive errors is a good thing,
12 isn't it?

13 A Perceptorive errors, yeah, would be much more expected
14 in a more severe type of pathology, and he didn't have that
15 type of error at a high rate.

16 Q In the tactual, tactual, tectorial performance test,
17 which demands keen kinesthetic and proprioceptive abilities
18 as well as organizational and planning skills he did well.

19 A He did within the average limits. He's a little bit
20 deficient on his open second trial, nondominant hand
21 performance, but otherwise within average limits.

22 Q His initial right-hand performance was average. That
23 is---

24 A That is---

25 Q ---he was in the 49th percentile.

1 A That is -- technically, yeah, 48th percentile for that
2 T score.

3 Q And on the nondominant or left side, 42nd percentile.

4 A That's about the 20th percentile, that's correct.

5 Q His, his total time performance, meaning, meaning just
6 how he did speed wise, was in the average range?

7 A Yes, sir.

8 Q Your current evaluation showed Mr. Casey to function in
9 the average range of intellectual abilities?

10 A That is correct. The data you use in 2000, he was
11 still within the average range, in the low range of it, but
12 he was in the average range.

13 Q All right, sir. Now, let me go over these axes with
14 you if I could. Is there much -- is there any difference
15 between these axes things or Page 9 of your report, on
16 May, the last report, that is the, the May 2009 report and
17 the 2005 report?

18 A In 2009 I added the anxiety disorder mainly because
19 some of the anxiety and fearfulness that he has as it
20 relates particularly to returning to the hospital and some
21 of that, but otherwise the disorders were the same pretty
22 much with the other two I've talked about.

23 Q Okay. Well, let's look at 2009.

24 A Okay.

25 Q Axis I, mood disorder with depressed mood secondary to

1 persistent sematic symptomology and potential permanent
2 neurological deficit due to complication---

3 A Okay. That---

4 Q ---of laser bronchoscopy.

5 A That's, that's 2005 and that would be correct.

6 Q Well, that's 2009 too, isn't it?

7 A I don't believe so, but---

8 Q Excuse me. Let's look at 2009. I'm sorry. Mood
9 disorder with depressed mood secondary to persistent sematic
10 symptomology and potential permanent neurological deficit
11 due to complication of laser bronchoscopy, bronchoscopy.

12 Okay. Depressed mood, the record in this case is clear
13 that Mr. Casey suffered depression back in 2003 before this
14 event, did he not?

15 A My understanding he had pain and there was concern
16 about comorbid depression, that is correct.

17 Q All right, sir. I mean Doctor Gonda's records are
18 clear that he treated Mr. Casey for depression, and, in
19 fact, gave him Paxil and he had significant depression at
20 that time?

21 A Again, I'm not differing with you other than the fact
22 that it was comorbid with the pain. Both were there and
23 it's very common to use an anti-depressant in the
24 pain/depression mode. It's a little bit different creature
25 then depression by itself and very common in chronic pain.

1 So, yes, he did give him an anti-depressant, that is
2 correct.

3 Q Well, the, the depression, as I recollect the records
4 of Doctor Gonda, and we can look at them if need be---

5 A Sure.

6 Q ---the, the depression arose out of both the chronic
7 back pain that I'll ask you about in a minute as well as
8 family difficulties and financial difficulties that he had?

9 A That is correct and my understanding too.

10 Q All right. He, he was undergoing a divorce?

11 A Yes, sir.

12 Q And you will agree with me that even in a, even in a
13 mutual divorce, when, when the parties have agreed for the
14 divorce, it's, it can still be a weighty thing, can't it?

15 A I believe marital separation, divorce can be stressful,
16 yes.

17 Q Yes, sir, I mean it's -- and these things that we see
18 in Parade Magazine and everywhere, it's listed as a very
19 very stressful episode in one's life, isn't it?

20 A Again, yeah, I would agree that it can be stressful.

21 Q And, and you saw that he complained about problems that
22 his children were having?

23 A That is correct.

24 Q And financial stresses?

25 A I was -- I saw that, yes.

1 Q And a very very hard job?

2 A My understanding -- yeah, interfacing with his job.

3 Q All right, sir. And, and the back pain, the chronic

4 back pain that Doctor Gonda treated him for, which

5 contributed to his depression, that went all the way back to

6 the late 90's, didn't it?

7 A Certainly was evident in the records I looked at about

8 2001. So, I would assume that late 90's is a fair estimate.

9 Q Well, did you see in Doctor Gonda's records where, on

10 two, on February 1st, 1999, Mr. Casey told him he was

11 trying to get an easier job at Michelin?

12 A I'm not sure if I saw that, but I wouldn't necessarily

13 doubt that if you wanted -- you know, I saw that he was

14 having some pain difficulties. Not just 1999, 2001. I'm

15 pretty sure about 2001 in the records that I saw.

16 Q Absolutely no question but that he had significant

17 chronic pain before any treatment by Doctor Boscia or Doctor

18 Feldman, isn't there?

19 A That is correct. Low back pain was a chronic issue.

20 Q And there's no question but that he was on significant

21 amounts of opioid medication before treatment by Doctor

22 Boscia and Doctor Feldman?

23 A There was use of pain medication.

24 Q As well as after?

25 A That is correct.

1 Q Okay. Axis II, no diagnosis.

2 What, what is Axis II?

3 A Generally a cluster of different diagnosis. One of

4 them being the personality disorders where you might have a

5 pervasive pattern of behaviors added to some traits

6 consistent with a personality disorder.

7 Q Okay. And you've, and you've made no diagnosis there?

8 A Yeah, I don't believe I saw any evidence for coming out

9 of adolescence into his adult life that he had such a

10 disorder.

11 Q Okay. Well, what are you talking about, preexisting

12 stuff there?

13 A Sure. You come out of adolescence and you have

14 personal traits that just compromise you socially and

15 cognitively dependent histrionic antisocial. Those are the

16 personality disorders. Didn't see any evidence for that.

17 Q Okay. Axis III, pain/sematic symptomology, motor

18 weakness, now, the motor weakness we, we've talked about the

19 fact that none of the medical doctors found any motor or

20 sensory deficit, did they?

21 A Again, you're gonna go from gross and I'm gonna go to a

22 finer way of measuring it, and, so, on strength measuring,

23 since some of those are off, it's not gross. Gross would

24 mean he can't walk and do those sort of things. But it's

25 some of the testing we did from a dexterity and strength

1 point of view is off. I don't think it's a major issue and
2 I'm not sure it's brain related either.

3 Q Well, let me ask you about that. On his right-hand you
4 found him in the 49 percentile, that is his dominant hand,
5 and the left, on the left, and the left-hand you found him
6 at the 42th percentile on the screen?

7 A Sure.

8 Q Okay. So, that's well within the average range, isn't
9 it?

10 A That's -- yes, on that one I saw the finger tapping was
11 slow, but the grip strength was mild deviation bilaterally.
12 Again, depending on which you -- that was 2005, and that's
13 why I put motor weakness. In 2009, I added it, but motor
14 weakness also is his complaint of just de, deconditioning.

15 Q Well, I -- in -- is the motor weakness out then in
16 2009?

17 A Not from the point of view of this guy just saying he's
18 got diffuse deconditioning. He just doesn't feel as strong.
19 It's a complaint. So, it's in there under that. But in
20 terms of his, again, measurement on both times, his
21 measurement was down for dexterity and down for grip
22 strength particularly with guarded dominant right-hand.

23 Q All right, sir. Dexterity, would, would you agree with
24 me, that being a pretty good golfer, maybe a ten or twelve
25 handicap, would be evidence of some pretty good dexterity?

1 A I would think it's pretty good. It's evidence of good
2 visual motor and motor planning and motor skills, yes.

3 Q All right, sir. Axis III, pain sematic symptomology,
4 we've talked about that. We just discussed the motor
5 weakness. Residual back pain.

6 The back pain has absolutely nothing to do with Doctor
7 Feldman and Doctor Boscia, does it?

8 A That -- it does not.

9 Q Episodic chest pain, that has nothing to do with Doctor
10 Feldman and Doctor Boscia, does it?

11 A Not making any opinion regarding that at all. I just
12 know he has some episodic, but I make no opinion that it's
13 related to this event at all.

14 Q Well, did you see in the October 10th, 2008, notes of
15 Doctor Gonda where doctor, where Mr. Casey told Doctor Gonda
16 that I don't have any chest pain related to my
17 hospitalization?

18 A I may have, yeah. I'm just talking about -- these are
19 just complaints. I'm not diagnosing anything. These are
20 kind of complaints or difficulties he's having. So, he
21 reports some episodic chest pain back in 2005, and I, and I
22 would agree. I'm not necessarily saying it's related to the
23 event or not, not making any opinion whatsoever regarding
24 that.

25 Q Why don't we look at it just so, just so---

1 A Okay.

2 Q ---just so you know I'm being straight with you.

3 Okay?

4 A Fair enough.

5 Q I'm gonna show you CT 01020, and didn't he tell Doctor

6 Gonda here, about a year and a half ago, on October 10th,

7 2008, he has no chest pain or shortness of breath from the

8 collapsed lung?

9 A With due respect, I just have to say the sentence

10 before. He continues with chest pain, which no one has ever

11 been able to figure where it is coming from. Then the

12 statement by doctors he has no chest pain or shortness of

13 breath from the collapsed lung. So---

14 Q That's the patient's---

15 A I don't know that that's the patient's. That could be

16 opinion. All, all I'm stressing for my records is he has

17 some chest pain. I don't know the ideology, and I'm not an

18 expert on chest pain. So, I'm just pointing out in the

19 diagnosis that there is chest pain that episodically effects

20 this man.

21 Q This is in evidence and will speak for itself, but I

22 ask you, sir---

23 A Sure.

24 Q ---this record is clear in this case that Mr. Casey,

25 what Mr. Casey was doing at the hospital on May the 28th,

1 2004, was seeking treatment for chest pain of several weeks
2 duration, duration, was he not?
3 A I believe so, yes, sir.
4 Q Okay. And, and you've seen, you've seen nothing where
5 Doctor Feldman, Doctor Fogarty or his group have been able
6 to solve that chest pain, have they?
7 A I have not seen it clarified by those physicians.
8 Q And that's, and that's one of the things that you list
9 in your diagnosis here?
10 A Again, I'm just listing the complaint.
11 Q Okay.
12 A That's correct.
13 Q Axis IV, Axis IV, what is, what is, what is Axis IV,
14 what's the slot there?
15 A Other potential environmental stressors ongoing in his
16 life.
17 Q Marital separation?
18 A Yes.
19 Q Not gonna blame that on the doctors, are you?
20 A I'm not blaming anything on the doctors. My point is
21 these are other stressors that certainly might impact on
22 Axis I, which is the mood disorder, which you've already
23 brought out. So, the fact that he is going through a
24 separation and a divorce back in 2005 is noted.
25 Q All right, sir. And that, and that happened -- well,

1 2005, that was going on before he sought treatment from
2 Doctor Feldman and Doctor Boscia, wasn't he?
3 A Yes.
4 Q Okay. Disability/unemployment, worker's compensation
5 litigation, you, you, you just put that in there?
6 A Those are all potential stressors. Not verifying to
7 what extent, but those are ongoing stressors in his life,
8 that's correct.
9 Q All right, sir. And you saw, and you saw -- one of the
10 things that you saw and considered and reviewed in this case
11 is the notes of Doctor J. Grace, a psychologist here in
12 Spartanburg?
13 A I did review, review his records, yes.
14 Q All right. And you saw where Doctor Grace has seen Mr.
15 Casey every couple of weeks?
16 A That is my understanding.
17 Q And insofar as this litigation things, did you see
18 notations in there where a great deal of the time and effort
19 that Doctor Grace has put into it is simply monitoring the
20 litigation?
21 A I suspect -- I didn't see that personally. But I, I
22 wouldn't have any doubt that it comes up in their
23 interactions, but I wasn't aware of that.
24 Q All right, sir. Now, one of the things that you looked
25 at and considered was Mr. Casey's school records?

1 A Yes, I considered them.

2 Q All right. Let me find them because I, I may have a
3 question about them. I've got so much stuff up here.

4 Indulge me just a moment, Your Honor.

5 THE COURT: Yes, sir.

6 Q Now, I'm gonna ask you some questions about this and
7 these are in the record as CT 1002, 1003, 1004, 1005, and
8 1006, and I'm gonna tread lightly because I don't want
9 anybody rooting around out there at Spartanburg High
10 checking on Billy Gunn. That'd be ugly.

11 Mr., Mr. Casey was a graduate of Dorman High School,
12 wasn't he?

13 A Yes, sir.

14 Q Okay. And at Dorman High School, in 1977, he was 295th
15 in a class of 455?

16 A Yes. Yes, sir.

17 Q And he had a G.P.R. of 1.80?

18 A That is correct.

19 Q Okay. Now, that's not all that great, is it?

20 A It's not a good academic performance.

21 Q And the year before that, in the 11th grade, he was
22 371 in a class of 551?

23 A Yes, sir.

24 Q With a G.P.R. of 1.625?

25 A That's correct.

1 Q Does that show you lack of effort?

2 A That's what it would be because his actual achievement

3 measures and all that are very good and that's the brain.

4 Q A phenomena with which I'm familiar.

5 A One that I have dealt with myself with my children.

6 Q My experience is much more personal.

7 A I mean basically obviously non-elective factors come

8 into performance, but you're looking at his attitude

9 measures and all of that and they're really quite good.

10 Q Yes, sir.

11 Year before that, looks like 362 in a class of 571?

12 A That is what I read too.

13 Q With a G.P.R. of 1.667?

14 A That is correct.

15 Q All right, sir. To be more specific, to be more

16 specific, during this year, and I don't, and I'm not, this

17 is, this is ninth grade, English, C's, general math, C's,

18 physical science, couple of D's and a couple of, whatever an

19 E is.

20 A That is correct.

21 Q World geography, an A minus and a couple of B's?

22 A That's correct.

23 Q Latin II---

24 A That's---

25 Q ---E's.

1 What are E's?

2 A I suspect they're failure in this system. Yeah,

3 failing, and, yeah, Latin II, got -- he got that. Got a C a

4 Latin I, but that's correct.

5 Q Were you here when the testimony came in that after he

6 got more interested in sports and girls that his grades went

7 down further?

8 A Yeah, that's my understanding, and actually his grades

9 up through the sixth grade were A's and B's. So, he got

10 sidetracked in some form or fashion.

11 Q Okay, sir. All right, sir. Now, when you, when you

12 tested Mr. Casey from an I.Q. standpoint, the test we just

13 called an I.Q. or aptitude---

14 A Yes, sir.

15 Q ---score, what, what did you say -- did you say he

16 functioned in the average range?

17 A Basically, in 2005, when we did the I.Q. in our office,

18 he functioned in the average range indeed. Full scale I.Q.

19 of 96.

20 Q All right. And in 2009, what was it?

21 A In 2009 he had a full scale I.Q. of -- it was lower.

22 Full scale I.Q. of 90.

23 Q Okay. When did you graduate from college?

24 A I graduated from college in 1974.

25 Q Okay. Did you, did you have the fortune or good

1 fortune to serve in Vietnam, in the military?

2 A I did not serve in Vietnam.

3 Q So, you don't know about the military concept of the

4 guys that came along that we called 6-7's, when they lowered

5 the aptitude score?

6 A I know it actually very well. I've spent my first

7 eight years in V.A. treating Vietnam veterans with

8 posttraumatic stress.

9 Q Right.

10 A I know the war well.

11 Q Well, do you know, do you know who the guys we were

12 that were 6-7's?

13 A Well, yeah, I have an understanding that it lowered

14 requirements for the draft.

15 Q From 70 to 6-7?

16 A Uh-huh. (Affirmative).

17 Q And, and that, and that the guys that -- you could tell

18 who those guys were because the first two digits of their

19 serial number were 6-7, U.S. 6-7 or R.A. 6-7.

20 A Yeah, usually it was based on their performance on the

21 Bata exam, that's correct.

22 Q Yes, sir.

23 And, and some of those, some of those men were flat

24 performers, were they not?

25 They were good guys who would do what they were told

1 and, and were, and were brave decent men who could carry out
2 orders and function well?

3 A Yes, I believe some of those could be good warriors.

4 Q And they have I.Q.'s of between 67 and 70?

5 A I would have -- I can't confirm that, but they did
6 reduce it. I'm not sure that I would buy that, 67 to 70.

7 Q All right. When you first saw Mr. Casey, he was mildly
8 depressed, but it did not compromise him?

9 A It did not seem to interfere significantly with his
10 ability to meet the demands of testing.

11 Q All right. He was able to tell you the medication he
12 was on?

13 A For the most part, yes.

14 Q And who had provided those medications?

15 A Yes, for the most part, yeah.

16 Q The Ateral had been discontinued?

17 A It was by the second contact with him in 2055.

18 Q All right. And you will agree with me that chronic
19 pain can interfere with the testing process?

20 A Yes, chronic pain is definitely something that can
21 interfere with testing or in the day-to-day cognitive
22 functioning.

23 Q And, and this record is quite clear that Mr. Casey
24 suffers, has suffered with chronic pain since the late 90's?

25 A Low back pain in particular seems to have been present

1 chronically.

2 Q You will also agree with us that there is a capacity
3 for medications to interfere with the testing process?

4 A Again, use of medication, if it hinders you from
5 clarity in your thinking, attention, makes you toxic, can
6 interfere with testing.

7 Q All right. And I believe what you've told this jury is
8 that Mr. Casey did not appear to you to be toxic and, and
9 didn't appear to be---

10 A That is correct actually. We did not feel like we are
11 having a great deal of drug interference due to the
12 medications, both pain and other ones that he was having on
13 the days of testing.

14 Q All right.

15 A I did say to the jury that that certainly can get in
16 the way in real life, but it was not observed in the testing
17 situation.

18 Q All right, sir. Now, now, let me, let me make, make
19 sure that we understand.

20 Insofar as, insofar as -- when we -- I'm gonna use the
21 term drug abuse.

22 A Okay.

23 Q Okay. And I want to have an understanding with you and
24 with this Court that when I use that term I'm not talking
25 about an immoral bad person. I'm talking about drug abuse

1 that relates to chronic pain.

2 A That's correct.

3 Q That, that kind of drug abuse in, in an, in an attempt

4 to take care of chronic pain.

5 A Okay.

6 Q Okay?

7 A Yes, sir.

8 Q I don't want to, I don't want to put it in the context

9 of a bad guy.

10 A Okay.

11 Q I mean out -- you know. But there is, there is, in

12 this record, is there not, sir, significant evidence of the

13 use of a lot of opioid medications, other synthetic opiates,

14 a lot of drugs of different types prescribed for Mr. Casey

15 over what, a ten year period, correct?

16 A There certainly is evidence in the records I read of

17 2001 to 2002 and in that area of indeed using the opiate

18 based medication as well as some concern of running out of

19 them too early and so forth and trying to, as we talked in

20 deposition, you know, get control of that situation indeed.

21 Q And as a matter of fact, you saw in the records of

22 Doctor Gonda where there were any number of several at least

23 episodes that Mr. Casey ran out of medication early for his

24 chronic back pain prior to 2004?

25 A Yes, I saw several episodes of that.

1 Q And an occasion where he told Doctor Gonda that his
2 wife had taken his medication?

3 A I saw that on one instance, yes.

4 Q An occasion that he had purchased Percocet from
5 friends?

6 A Purchased or at least got it from friends, yes.

7 Q Okay. And, and those are all red flags that would tell
8 one that there was an overuse or abuse of medication on the
9 part of the patient?

10 A There is a potential situation of that, potential
11 situation of better control. As I talked with you, counsel,
12 in deposition, even a better use of neuropathic pain
13 medicines in my opinion should of been pursued at that time,
14 which are nonaddictive and non-opiate---

15 Q Right.

16 A ---to give him more relief. So, it's a matter of
17 getting patients the proper relief and finding a balance
18 between use of opioids and non-opioids. In that situation,
19 I thought he could of used a different approach, but he
20 definitely was running out early and using the pain
21 medicines more than they were prescribed.

22 Q All right, sir. And this record, this record shows in
23 this case, does it not, Doctor Waid, that Mr. Casey has
24 consistently, since about, since the early 2000's, before
25 2004, been on opioid pain medication, primarily Lortab,

1 sometimes Darvocet, maybe some Percocet, Tramadol, which I
2 think is a synthetic---

3 A Yes, sir.

4 Q ---opioid or would we call that an opiate?

5 A No, it's a synthetic. It's not even as good as
6 Darvocet quite frankly.

7 Q Okay.

8 A Generally not very useful quite frankly.

9 Q All right.

10 A But, yeah, he did get some of that too.

11 Q He's been on those. He has consistently been on
12 antidepressants?

13 A Again, I was aware of antidepressants being used in
14 that time period, yes.

15 Q He has been on -- and all of these at the same time?

16 A Again, the anti-depressant and pain pills at the same
17 time, yes.

18 Q Okay. And as well as Ateral?

19 A Well, I was aware of Ateral. I'd have to check on the
20 dates of when that started to help them focus and
21 concentrate. I know that was used post-incident. I'd have
22 to check about pre-incident.

23 Q And Ateral is a, is a salt mix amphetamine?

24 A Yeah, it's an amphetamine salts. It's just like
25 Ritalin or Viavance. Very common use as for frontal

1 executive problems.

2 Q Known in street parlance as Speed?

3 A Back in, when I went to college in the 70's we actually

4 got Speed. We didn't have as much psycho-stimulants around,

5 but it is in the same ball park.

6 Q Okay. And, and to sleep, Ambien?

7 A He was given some medications to help him sleep, that's

8 correct.

9 Q Okay.

10 A Again, definitely after the incident. I would have to

11 check from before. But wouldn't doubt it because pain

12 patients often have trouble sleeping too.

13 Q Now, now, over, over a period of years, that, that

14 medication therapy there, that regimen, would be tough on a

15 guy, wouldn't it?

16 A Basically the book on that is it's, it's interaction

17 between a lot of years and your advancing age. That

18 regimen's gonna be much more---

19 Q My advancing age?

20 A Well, anybody's advancing age.

21 Q Okay.

22 A I'm 58. My brain plasticity is not as good to handle

23 these medications. In the 20's it's not doing anything

24 that's gonna be harmful in the long run particularly once

25 you get off of it. Substance abuse and those kind of impact

1 permanently on the brain are more age related than, than how
2 much.

3 Q Well, in the, in the late 40's and early 50's it
4 wouldn't be good for you, would it?

5 A In the late 40's not as much. But, you know, as you
6 have advancing age, you need be weary of the amount of
7 pharmacology you're using because your brain can't tolerate
8 it as well.

9 Q But you're telling the jury now all of this, all this
10 medication like that would cause no interference with the
11 testing process, with the, the executive function, with the
12 ability to carry out daily tasks and that sort of thing

13 A Be -- it would be my contention on several counts.
14 One, I think pain's a bigger player. You need to get pain
15 relief. So, you want to do that. It's a two edge sword
16 cause if you leave a person out there in pain, they're gonna
17 actually be more cognitively impaired than using the
18 medications. Two, yeah, the data is pretty clear on this
19 even as it relates to alcohol where I do research. It's an
20 interaction between excessive use and also liver enzymes and
21 other bodily things being effected.

22 So, amount alone doesn't do it, and, three, again, I
23 would tell you, in the testing situation, you can observe
24 that toxicity. So, I do not think he has any permanent
25 neurocognitive impairments as a result of that. So,

1 obviously, if you continue to abuse over many years, the
2 threshold for having some deficits gets lower.

3 Q The pain, the part the pain, the pain plays in it, the
4 pain long since preexisted any treatment and care by Doctor
5 Feldman or Doctor Boscia, didn't it?

6 A Yes, sir, he has a history for low back pain.

7 Q And he had depression and anxiety, those were part of
8 his background before June of 2004?

9 A Well, I'll certainly agree with the depression. I'm
10 not aware of the anxiety that I'm dealing with which is more
11 fearful around hospitals and stuff. The depression, though,
12 certainly seemed onboard with the comorbid pain as well as
13 the family situation.

14 Q All right, sir. Well, when I took your, when I came
15 down for your deposition, and your deposition was taken, you
16 told us that anxiety was part of his background, didn't you?

17 A Yeah, but not when I was talking and telling you a
18 little bit more about specific theories and phobias. Those
19 seemed to be new. I wouldn't doubt he had some anxiety.
20 Anxiety and depression are like brother and sister. They're
21 together anyway.

22 Q All right. Now, I know you're not a medical doctor,
23 but you're, you're aware of the distinction between
24 objective symptoms and subjective symptoms in a patient?

25 A Yes, I'm aware of objective findings versus subjective

1 report.

2 Q Okay. Objective, objective findings are things that a
3 physician can see, feel, touch, test by diagnostic methods
4 in a patient?

5 A Yes, usually they show up more under the x-rays---

6 MR. TURNER: Objection.

7 A ---and stuff like that.

8 MR. TURNER: The same with a medical doctor.

9 THE COURT: I'm not sure the distinction between
10 objective and subjective findings is a medical phrase. I'll
11 allow him to ask about the difference between those two
12 distinctions. I don't know where he's going with it, but
13 we'll see how that works out.

14 MR. GUNN: Yes, sir.

15 THE COURT: Go ahead, Mr. Gunn.

16 Q And subjective, on the other hand, is based entirely on
17 what the patient might tell the, the doctor or, or tell you?

18 A Yes, you know, there's a certain subjectivity. For
19 example, pain and pain thresholds and, and its relationship
20 to objective evidence. Some people complain more than
21 others and so forth. So, we call that the subjective mode,
22 that's correct.

23 Q All right. And you would agree with me that Mr.
24 Casey's pain, back pain is subjective in nature?

25 A I would, I would say his complaints of pain come under

1 the subjective mode. It's him reporting it.

2 Q All right. Mr. Casey has demonstrated to you a good
3 ability to remember things?

4 A Again, when it's effectively learned, yes, sir. The
5 trouble is the learning process. Not the retention process.

6 Q Okay. You would agree with me that, in the testing
7 process, anger, depression, and anxiety would be disruptive
8 factors?

9 A I would agree that those emotions can be, again, as
10 I've stated before, we didn't see them interfering. But we
11 believe they interfere in his life and make his cognitive
12 complaints more pronounced in day-to-day pursuits than what
13 we obtained in the testing situation.

14 Q And you would agree with me that much of Mr. Casey's
15 being down in mood, that is depressive mood, being down, is
16 a result of other stressors in his life such as the
17 financial condition he was in, the family situation, all
18 that sort of stuff?

19 A Well, I wouldn't agree with that in 2009. A lot, a lot
20 of stuff had worked out better. I think a bigger player is
21 the change in his life and some of the things he can't do,
22 and even finances and stuff like more so family in 2009. In
23 2009, a lot of things had rectified and gotten better as it
24 related to the family situation.

25 Q Insofar as things he would be unable to do, one of

1 those things that apparently is very important to him, I
2 think we had a witness the other day, Mrs. Crotts, said
3 that, that golf is Mark's life.

4 Were you here when that took place?

5 You just came down this morning, didn't you?

6 A That's correct.

7 Q So, you didn't hear Mrs. Crotts say golf was Mark's
8 life?

9 MR. TURNER: Asked and answered.

10 A I did not hear that.

11 MR. GUNN: Is that---

12 THE COURT: He didn't, he didn't really respond to the
13 first question, and then he asked it again. I'll allow him
14 to do that.

15 Go ahead.

16 A No, I didn't, I didn't hear her say that, but I was
17 aware this is an avid golfer, and also reviewed in Doctor
18 Grace's data, it's clear that a loss of being able to do a
19 hobby or a pursuit that you have a fever for would be a
20 downer for any of us.

21 Q Yes, sir.

22 And, and a little bit earlier I think we agreed that a
23 ten or twelve handicap would be pretty good evidence of some
24 manual dexterity, didn't we?

25 A Good coordination, dexterity, yeah, in terms of being

1 able to be a golfer like that, sure.

2 Q All right. And your first encounter with Mr. Casey was

3 on August the 30th, 2005?

4 A That is correct.

5 Q Did, did you know that two days before that he shot an

6 87 on his home course?

7 A I knew he was still trying to play some, but I didn't

8 know his particular score.

9 Q Okay. And did you know that on a couple days after

10 that, on September 2nd, he went down and played 18 holes?

11 A I wasn't aware of what he did after my meeting with him

12 on August 30th.

13 Q And that two days after that he played nine holes?

14 A Yes, I was aware he was still playing some. He wasn't

15 scoring well, but he was playing well based on the report

16 that I got from him.

17 Q And then, a few days after that, on September the 10th

18 he came down for phase two of his evaluation?

19 A He did.

20 Q All right. And have you seen the report of Doctor Jeff

21 Smith where Doctor Jeff Smith said that he was having

22 difficulty, it was read in open Court the other day, the

23 psychiatrist?

24 A Which report are you referring to?

25 Q Well, Doctor Smith -- let me find it.

1 Indulge me just a moment if Your Honor please.
2 THE COURT: Yes, sir.
3 (Pause.)
4 Q Where Doctor, Doctor Smith said he had major depressive
5 disorder with reduced energy, sad mood, agitation,
6 motivation?
7 A Yes, sir.
8 Q Okay. And that his -- he was unsatisfactory in dealing
9 with customary work stresses?
10 A Yes, sir.
11 Q All right. Relating to co-workers and supervisors,
12 unsatisfactory?
13 A I was aware he was having difficulties there, yeah.
14 Q Dealing with the public, he wasn't doing well?
15 A That's correct.
16 Q Okay. And that was, that was submitted on, this record
17 will show from the witness the other day, on September the
18 15th and it was dated September the 12th, wasn't it?
19 A That is dated September 12th.
20 Q Okay, sir. Well, did you know that on September the
21 18th, just a few days after that, Mr. Casey went down and
22 played 18 holes and then played what we call a, what people
23 that play golf call an emergency nine?
24 Hadn't had quite enough, and played another nine holes, so,
25 he played 27 holes?

1 A I was not aware of that, but it doesn't particularly
2 bother me.

3 Q It doesn't bother you?

4 A No, sir.

5 Q Okay.

6 A I would encourage him to actually do that and not be
7 socially withdrawn---

8 Q Sure.

9 A ---and isolated. Kind of you get into the, this issue
10 of being debilitated, that becomes part of the problem. In
11 terms of treating his depression, I'd like for him to get
12 out and play.

13 Q All right. Thank you, sir.

14 THE COURT: Mr. King.

15 Mr. Mann, you want to examine this witness?

16 MR. MANN: Yes, Your Honor.

17 THE COURT: All right.

18 CROSS-EXAMINATION

19 BY MR. MANN:

20 Q Doctor Waid, how are you today?

21 A Good.

22 Q And we previously met when we took your deposition down
23 at your office.

24 THE COURT: Doctor, if you breathe into that microphone
25 we get that sound.

1 WITNESS: I'm sorry.

2 THE COURT: You can get close, but not quite that

3 close. There you go, sir.

4 All right. Go ahead, Mr. Mann.

5 MR. MANN: Okay.

6 THE COURT: I'm sorry.

7 MR. MANN: Oh, no worries, Your Honor. Thank you.

8 Q A couple of quick questions now.

9 You indicated that you are employed by the Medical

10 University of South Carolina, correct?

11 A Well, I certainly was full-time and now I'm only a

12 little, a little bit of research money now.

13 Q And the services that you're offering today are not

14 affiliated with MUSC?

15 A No, they're not affiliated with the Medical University.

16 Q Okay. And if I recall correctly, your office where we

17 met was not on the grounds of MUSC?

18 A No, it's in Mt. Pleasant.

19 Q And, so, you have an independent practice besides your

20 teaching duties?

21 A Yeah, I went independent about two years, left what we

22 call the University Medical Practice Plan in 1998.

23 Q And your meetings with Mr. Casey were not -- also --

24 they also were not affiliated with MUSC?

25 A No, they were at my office.

1 Q Okay. To ask an obvious question, but do recognize Mr.
2 Casey?

3 A Yes, I do.

4 Q And this is the individual that came down and sat
5 through the testing with you?

6 A Yes, it was.

7 Q All right. Have you had an opportunity to observe him
8 today during the Court proceeding?

9 A Some. Not much.

10 Q All right.

11 A But I mean obviously I've seen him over there. But --.

12 Q And, and is his presentation today consistent with what
13 you observed during his testing?

14 A Pretty much. I really haven't engaged with him much
15 verbally or asking him to do any tasks. But he looks the
16 same.

17 Q All right. And I'm simply putting this on the record.
18 So, this is the basis of my questions.

19 But would you agree that he appears well groomed?

20 A Yes.

21 Q Consistent with what you saw during your testing?

22 A Yes.

23 Q All right. And he's had the ability to sit and take
24 notes during the testimony that's been offered?

25 A Yes.

1 Q Do -- and, and this may be beyond what you've been able
2 to observe, but has he appeared to be able to assist his
3 counsel with this case?

4 A It's beyond what I observed, but I, even from a
5 cognitive impairment point of view, I don't have any problem
6 with him being able to do that. It's not a massive brain
7 injury that would make him drool and sit in a wheelchair.
8 This is the kind of subtle frontal executive. It's real.
9 But it's far from the kind of patients I have to see that
10 are massively injured. So, you know, obviously I would have
11 trouble if he looked different cause it wouldn't make sense.

12 Q All right. And, so, again, then he's consistent with
13 what you observed previously?

14 A Yes.

15 Q Okay. Have you ever, and I'm not sure if plaintiff's
16 counsel asked you, but have you ever formulated opinions as
17 to whether or not Mr. Casey could engage in employment?

18 A I offered an understanding that he was not able to
19 return, but I do not offer that expert opinion. I sometimes
20 have to rate such things for Social Security disability and
21 so forth I'm asked to do it. My preference is to have a
22 vocational expert do that as it relates to understanding all
23 that and whether or not he can go back. So, I do some work
24 on that, but I'm not here to offer that opinion is what I'm
25 telling you.

1 Q And, so, this, again, I think you've answered it very
2 clearly though---

3 A Sure.

4 Q ---you're not prepared today to offer opinions
5 respecting his employability?

6 A That's right because, quite frankly, cognitively
7 speaking, you know, that wouldn't stop him, but it would get
8 in the way. But there's other issues here, pain and
9 emotional and physical. So, I would leave that to a
10 vocational expert.

11 Q Doctor Waid, I appreciate that. Thank you.

12 A Okay.

13 THE COURT: Redirect.

14 MR. TURNER: Just briefly, Your Honor.

15 THE COURT: Yes, sir.

16 REDIRECT EXAMINATION

17 BY MR. TURNER:

18 Q Doctor Waid, the, the name Debbie Goode, does that
19 refresh your memory as to the friend that drove Mr. Casey
20 down to the first evaluation?

21 A Again, my memory about how he got there is really gone.
22 Ultimately, he arrives. I wasn't aware if he drove himself
23 or not. I knew he didn't have a wife situation to drive him
24 down. But I would have to defer to somebody else for
25 accuracy on how he got to my office the first time.

1 Q Okay. If I told you his son, Travis, brought him down
2 the second time, you wouldn't take issue with that, would
3 you?

4 A I wouldn't take issue with that at all.

5 Q You were asked some questions I think by Mr. Gunn, in
6 the 1990's, I couldn't tell you the record, 1990's, that's
7 probably Gonda's records, but throughout the records you've
8 reviewed, Mr. Casey was fully functional on the production
9 line at Michelin?

10 A Yes, sir, actually some of the records indicated that
11 part of why he was trying to get these medicines, he was
12 trying to stay fully functional and doing a job that
13 certainly aggravated his low back pain to a more disruptive
14 level. So, he was really dealing with the interaction
15 between low back pain and meeting the demands of his job
16 which had a fairly significant physical capacity. And, so,
17 he was trying to remain functional, as best I could tell,
18 from the review of the records I had.

19 Q Okay. And one other thing, it caught me offguard, I
20 didn't get to jump up, but when I think of Speed on the
21 street, there's something about Speed, isn't that a slang
22 name for a street drug?

23 A Speed is in the class of psycho-stimulants known as an
24 amphetamine. You can have it made like meth or you can have
25 Speed for diet pills. These psycho-stimulants used for

1 A.D.H.D. like Ateral are really a variations of that. Salts
2 are not as strong as Speed or what we call, we call a
3 methamphetamine. Ritalin is Merthiolate. It's a totally
4 different chemical structure. They're just grouped in what
5 we call the psycho-stimulants. They will enhance your
6 concentration, your focus, won't sleep, appetite suppression
7 as well as some people they might get too racy actually.
8 But they -- definitely medications we use a lot in
9 neurologic injury because they actually improve the frontal
10 lobes and their ability to focus and concentrate. After a
11 mild head injury or brain injury in my college students, we
12 actually get them back to college, but they have to use this
13 medicine to be successful.

14 Q Okay. You called it an M-Salt (sic)?

15 A The Ateral is really an, called amphetamine salt. It's
16 not the full methamphetamine that is much stronger than is
17 generally what people party with, but don't get me wrong,
18 I'm -- certainly college kids can party a little bit with
19 Ateral and things like that.

20 Q You know, Doctor Smith, he was prescribing it though to
21 improve Mr. Casey's concentration according to his records
22 you reviewed?

23 A Most, most definitely and it's not even a -- it's good.
24 Mr. Casey was complaining of attention, concentration,
25 memory problems and Doctor Smith gave it a shot, which is

1 totally understandable.

2 Q Okay. And so, the, the last question I asked you, the
3 testing, the, the permanent impairment, once you take out
4 and I know that there was some pain and some things before,
5 they began after this 6/3/2004 procedure?

6 A Yes, my opinion they do and he has an acquired
7 attention executive problem, and he, in my opinion, even if
8 you get rid of the pain and depression he's gonna have to do
9 something to improve that or deal with it would be my
10 opinion.

11 Q And, at this point in the game, we're six years, well,
12 I did poor math, from 2005, about four or five years, it's
13 not likely to change, is it?

14 A No, I---

15 Q It's most likely permanent?

16 A I think prognosis is poor for change in that he's got
17 to deal with this as a permanent situation.

18 Q Okay. No further questions.

19 THE COURT: Recross.

20 MR. GUNN: Yes, sir.

21 RE CROSS EXAMINATION

22 BY MR. GUNN:

23 Q The Ateral, the Ateral, when, when a person is taking
24 Ateral, and, and the Ateral begins to wear off, they have a
25 pretty serious sort of coming down or crash and burn

1 situation, don't they?

2 A Not really. Basically you can have what we call a
3 little bit of a drag effect as the medicine's half life
4 wears out. It can renew a little bit of draggy feeling,
5 maybe make you a little bit irritable. However, when you're
6 already on an antidepressant, as this man was, and the use
7 of it, that tends to guard against it. So, when we're
8 dealing with college students who talk about this drag
9 effect and be wary of it, also that's a good, a good time to
10 go exercise and push it out.

11 So, you can get a little draggy effect, a little
12 moodiness sometimes or if you have any underlying depression
13 you can pull it out. When we have that real bad we just put
14 a person on antidepressants and then it takes away that drag
15 effect.

16 Q And you said that the crux of Mr. Casey's cognitive
17 deficit is in the area of executive functioning?

18 A Attention executive functions, speed of processing,
19 frontal executive abilities, yes, sir.

20 Q All right, sir. The, one of the things you considered
21 in formulating your opinions was the negative M.R.I. that
22 you saw on February 4th, 2007?

23 A Yes, sir, I was aware of the negative M.R.I.

24 Q That, that, that M.R.I. was indeed in the name of Mark
25 Johnson, was it not?

1 A That is correct.

2 Q With a, with a date of birth other than that of Mr.
3 Casey?

4 MR. THOMPSON: Your Honor, I have an in camera matter
5 I'd like to take up.

6 THE COURT: Ladies and gentlemen of the jury, at this
7 opportunity, at this time I'm gonna ask you to retire to the
8 jury room while I take up something with the attorneys.
9 Please do not begin any discussions until I advise you to do
10 so.

11 (Whereupon, the following takes place outside the
12 presence of the jury.)

13 THE COURT: Yes, sir.

14 MR. THOMPSON: Judge Couch, we had made a motion
15 relative to Doctor Godwin and this brain M.R.I. that was
16 made February of '07. It was my understanding that the
17 Court ruled that the, that the M.R.I. itself could be used
18 from medical purposes and medical purposes only throughout
19 the trial, and that it could be used also for impeachment
20 purposes if the opportunity rose, arose if Mr. Casey
21 testified. But as to anything else concerning the
22 background of the M.R.I., Doctor Godwin's involvement, any
23 involvement on my part, that that was not going to be
24 allowed in the case, and, in fact, it was done with an
25 alias, which I would construe that as being apart of the

1 background as to how the M.R.I. was obtained, and would,
2 assuming that the Court agrees that that is how the Court
3 ruled, I would make the objection that that should be
4 disallowed on this basis and move to strike that testimony.

5 THE COURT: Mr. Gunn.

6 MR. GUNN: Well, if Your Honor please, first of all,
7 the document is in the record CT 0183 and shows the patient
8 as Mark Johnson with another, another date of birth.
9 Secondly, if Your Honor please, we have the transcript from
10 the hearing April 29th. Your Honor ruled that, Pages 35
11 and 36, that essentially it would come in for the two
12 purposes that outline, that were outlined by Mr. Thompson.
13 But that if there was any evidence of intent to deceive,
14 that all the circumstances would be allowed.

15 If Your Honor please, we, we, we've got a memorandum of
16 law to hand up to the Court. At this point, at this point
17 all we want to do is bring out the name, the name and the
18 date of birth, and we have a memorandum of law we'd like to
19 hand up.

20 THE COURT: As to what?

21 MR. GUNN: As to, as to the admissibility of the, of
22 all of the circumstances.

23 THE COURT: I thought we've already had a hearing on
24 that.

25 MR. GUNN: Yes, sir.

1 MR. TURNER: We did.

2 MR. GUNN: Yes, sir.

3 THE COURT: Are you asking me to reconsider my order?

4 MR. GUNN: Well, I haven't seen the order, sir.

5 THE COURT: Well, I made an order from the bench---

6 MR. GUNN: Yes, sir. Yes, sir.

7 THE COURT: ---as to the---

8 MR. GUNN: And we have it. I mean we, we've got the

9 transcript.

10 THE COURT: Well, I'm looking at my ruling. We've got

11 notes as to what I did. There were basically five specific

12 things. I said it could be for the purpose of the

13 information of the, in the, contained in the test, to attack

14 the credibility of the plaintiff's prior inconsistent

15 statements. As for deep, as for the details as to how the

16 plaintiff's attorney went about conducting the test, it

17 could not be used. So, to the extent to which it might be

18 used at trial, I would have to rule on those things as to

19 credibility et cetera at trial. So, that, that was

20 basically my ruling.

21 MR. GUNN: All right, sir.

22 THE COURT: Now, I -- so far you've asked if he's aware

23 of the M.R.I. and the name that was on it.

24 MR. GUNN: Yes, sir, that's, that's all. That's all

25 I'm gonna ask him, the name, and the date of birth, being

1 some other date of birth.

2 THE COURT: And the test is already into evidence?

3 MR. GUNN: Yes, sir.

4 THE COURT: Okay.

5 MR. GUNN: That's all I want to do at this point.

6 MR. MANN: Your Honor, may I be heard?

7 THE COURT: Mr. Mann.

8 MR. MANN: May I be heard?

9 THE COURT: Yes, sir.

10 MR. MANN: May I approach with Doctor Waid's original

11 deposition just in case it's needed during this

12 cross-examination. I would like to also bring to the

13 Court's attention, during Doctor Waid's deposition in

14 Charleston, he was asked specifically about the M.R.I. and

15 also because he is here to testify as to the cognitive

16 abilities of the plaintiff, he was additionally asked as to

17 whether or not Mr. Casey would have the ability to remember

18 going over to Charlotte for the M.R.I., would he have the

19 ability to remember laying down on a piece of equipment

20 going through the M.R.I., and would he have the ability to

21 tell the truth about it and recall these events. And Doctor

22 Waid testified affirmatively that he would be able to tell

23 the truth about these things.

24 That's all, Your Honor.

25 MR. THOMPSON: Judge Couch, you know, my understanding

1 that the Court's rule---

2 THE COURT: Well, excuse me.

3 Mr. Mann, at this time he's not denied that he took it.

4 MR. MANN: And, and I believe that's correct, Your

5 Honor. However, I don't---

6 THE COURT: I mean if you had a prior inconsistent

7 statement, if he admits that he made a prior inconsistent

8 statement at trial, extrinsic evidence can't come in after

9 he makes that admission.

10 MR. MANN: I would agree with that, Your Honor.

11 THE COURT: And I think -- have you taken his

12 deposition since the M.R.I.?

13 MR. MANN: We not have, Your Honor.

14 THE COURT: Okay. Go ahead, Mr. Thompson.

15 MR. THOMPSON: Judge Couch, and, and maybe you, you can

16 clarify this for me, but as I understood the Court's ruling,

17 it was, you know, the door would be completely kicked open

18 if there was evidence on the part of Mr. Casey as to being

19 involved in the actual planning of the M.R.I. with an intent

20 to commit fraud basically upon the Court, and---

21 THE COURT: Well, he hasn't testified.

22 MR. THOMPSON: Yes, sir.

23 THE COURT: The point I was trying to make is he's not

24 testified at this point in time.

25 MR. THOMPSON: If I could, one, one matter.

1 THE COURT: And I don't know what his testimony is
2 going to be on this point. That's the reason I asked if the
3 deposition had been taken since that time that may reveal
4 what his testimony would be on that point. So, I, and,
5 again, my understanding of the rule is if you've made a
6 prior inconsistent statement, if you admit that you made a
7 prior inconsistent statement, the rule is pretty clear.

8 MR. THOMPSON: Yes, sir.

9 THE COURT: From that point forward, extrinsic evidence
10 on that point can not come in.

11 MR. THOMPSON: Yes, sir.

12 THE COURT: Going by the rule. Now, if he denies he
13 made prior inconsistent statements and he denies that, that
14 he did that, then extrinsic evidence does come in. If he
15 fails to admit is the way the rule works, works. He'd have
16 to admit that he made a prior inconsistent statement.

17 MR. THOMPSON: And as to that---

18 THE COURT: Well, now, this, this document, Mr.
19 Thompson, is already in evidence in that name. It's already
20 in evidence.

21 MR. THOMPSON: Could I just make a very---

22 THE COURT: Yes, sir.

23 MR. THOMPSON: Your Honor, you know, we initially had a
24 different medical book and we agreed to put together a Joint
25 Exhibit. It didn't get put together, quite frankly, on a

1 timely basis and Mr. Gunn had it stamped, bade stamped with
2 a copy delivered to us I think it was Tuesday morning, and I
3 think it come out in the testimony where a number of
4 documents that, that were part of the, part of the record to
5 be included were not included, and the original notebook was
6 some 500 pages and the one I've got now is 1,100 pages, and
7 that M.R.I. apparently is what, ten by eleven now, and,
8 quite frankly, I haven't seen it. I haven't been able to
9 thumb through this 1,100 pages to see exactly what's in
10 there, and I was, I was acting with the assumption that the,
11 that the scan had been reduced in size, but consistent with,
12 I understood the Court's ruling, that, that the name,
13 wherever it is, if it's at the top, that that part would be
14 redacted.

15 THE COURT: Well, again, all's I know is that I asked
16 if that, if there was any objection, any objection to the
17 documents. They've now been admitted is the way I
18 understand it.

19 Am I---

20 MR. KING: You're correct.

21 MR. GUNN: Yes, sir, I mean---

22 MR. KING: Yes, sir.

23 THE COURT: It's in the record.

24 MR. MANN: Your Honor, if I may add---

25 MR. THOMPSON: It was admitted with the stipulation

1 that, you know, we, we could add documents and saw something
2 that was missing---

3 THE COURT: Well, I don't remember that stipulation
4 being put on the record. When it went in, I asked if there
5 was any objection to the documents and there was none. It
6 was admitted. It's in the record. If it's in the record in
7 that other name, I'm gonna ask him if he understood that
8 that test relates to this individual. That's as far as I'm
9 gonna let him go with it at this point in time.

10 MR. THOMPSON: Yes, sir.

11 THE COURT: And I understand that's all you wanted to
12 ask him.

13 MR. GUNN: Yes, sir, that's all I wanted to get in
14 evidence.

15 MR. THOMPSON: Yes, sir.

16 THE COURT: And so, I'm gonna let him ask him if he
17 understands that that test, even though it's in a different
18 name, relates to this individual.

19 MR. THOMPSON: Yes, sir, thank you.

20 THE COURT: Now, later on, depending on the testimony
21 concerning the, the test from your client, we'll see where
22 it goes. I don't know what that testimony is gonna be.

23 MR. MANN: Your Honor, may I briefly be heard?

24 THE COURT: Certainly, Mr. Mann.

25 MR. MANN: Would we have an opportunity, before this

1 witness is released, because he is all the way up from
2 Charleston---

3 THE COURT: We don't have to release him.

4 MR. MANN: But, but---

5 THE COURT: If he's under subpoena.

6 MR. MANN: I was, I was---

7 THE COURT: Let me finish. If he's not under subpoena,
8 I don't have any hold over him. Now, you have the right --
9 Mr. Mann, I'm talking to you.

10 MR. MANN: I'm sorry.

11 THE COURT: And you -- if -- you have the right to have
12 a subpoena issued for him if you wish to do that and call
13 him at a later point in the trial.

14 MR. MANN: We will---

15 THE COURT: I think the testimony you just related to
16 me just now, I don't know if it's relevant at this point in
17 time in the issue that's before the Court other than
18 credibility of the plaintiff if he testifies. Now, if he
19 testifies and his credibility is called into question, that
20 information may become relevant at that point in time.

21 MR. MANN: Thank you, Your Honor.

22 THE COURT: You certainly have the right to issue a
23 subpoena for this gentleman and require his presence later
24 in the trial. We're not through. You haven't presented
25 your case yet.

1 MR. MANN: Yes, Your Honor.
2 THE COURT: We're not through with the case.
3 MR. MANN: Thank you, judge.
4 THE COURT: Anything else, Mr. Gunn?
5 MR. GUNN: No, sir, that's all I wanted to do.
6 MR. THOMPSON: Nothing from the plaintiff.
7 THE COURT: All right. Bring the jury in. We're gonna
8 go till about 12:30 and then we're gonna break for lunch.
9 I'll just let you know that. I don't know where you are in
10 your questioning. Make you aware of it.
11 MR. GUNN: Just about through, Your Honor.
12 THE COURT: All right.
13 (Whereupon, the following takes place within the
14 presence of the jury.)
15 THE COURT: You may proceed, Mr. Gunn.
16 MR. GUNN: All right, sir.
17 CONTINUED RECROSS EXAMINATION
18 BY MR. GUNN:
19 Q Doctor Waid, I was asking you about the M.R.I. of
20 February 4th, 2007, that was negative that was among the
21 documents that were given to you.
22 A Yes, sir.
23 Q All right. I'm gonna ask you about that. It's, it's
24 in the, it's in this record as CT 01083, and is that the
25 document that you looked at, the negative M.R.I.?

1 A Yes, it is.

2 Q And the conclusion was negative M.R.I. of the brain

3 without contrast?

4 A That is correct.

5 Q And the patient's name shown there was -- and that was

6 performed at Presbyterian Hospital in Charlotte?

7 A I believe that's correct.

8 Q All right. And the patient's name shown there is Mark

9 Johnson?

10 A That is correct.

11 Q And the date of birth is 10/18/58.

12 What is Mr. Casey's date of birth?

13 A 11/3/58.

14 Q Different---

15 A Yes, sir.

16 Q ---dates of birth?

17 A Yes.

18 Q Okay. Do you understand that it's been stipulated, it

19 was stipulated at the deposition that this is indeed a, an

20 M.R.I. performed on Mr. Casey that was negative?

21 A I understand that.

22 Q All right, sir. That's all.

23 Thank you, Your Honor.

24 THE COURT: Mr. Mann.

25 MR. MANN: I have no questions.

(THIS TRANSCRIPT MAY CONTAIN QUOTED MATERIAL. SUCH
MATERIAL IS REPRODUCED AS READ OR QUOTED BY THE SPEAKER.)

1 STIPULATIONS:

2 It is agreed by and between the counsel for the parties as
3 follows:

- 4 1. That this deposition is being taken pursuant to Rule 30
5 of the South Carolina Rules of Civil Procedure;
6 2. That this deposition is being videotaped;
7 3. That the deponent reserves the right to read and sign
8 the deposition transcript.

9 VIDEOGRAPHER:

10 We are now on the record. Today's date is May 5,
11 2017. The time is 9:55. This is the video deposition
12 of Dr. Wilson P. Smith, Jr. in the matter of Gregory J.
13 Feldman, M.D., et al., versus William Mark Casey, et
14 al. Will counsel now please introduce yourselves for
15 the record?

16 MR. MANN:

17 My name Milton Mann. I'm here on behalf of Dr.
18 Feldman, Dr. Boscia, and Upstate Lung and Critical Care
19 Specialists. I am joined by Katelyn Owens who is a
20 member of my staff. Thank you.

21 MS. CHEEK:

22 This is Ellen Cheek on behalf of Dr. Charles
23 Fogarty. I'll also state for the record that Matt
24 Henrikson who represents Chuck Thompson is not
25 attending today because of a conflict. He has verbally

1 indicated that the deposition should proceed in his
2 absence.

3 VIDEOGRAPHER:

4 And will the court reporter now please swear in
5 the witness?

6 *****

7 WILSON P. SMITH, JR., M.D. being duly sworn to tell the
8 truth, the whole truth, and nothing but the truth of his own
9 knowledge concerning the matter herein, testified as
10 follows:

11 *****

12 EXAMINATION BY MR. MANN:

13 Q. would you please state your name for the record?

14 A. Wilson Pedrick Smith, Jr.

15 Q. Thank you, Dr. Smith. What is your vocation?

16 A. I'm a physician.

17 Q. How long have you been a physician?

18 A. Since graduating from medical school in 1976.

19 Q. Have you given a deposition before?

20 A. I have.

21 Q. Are you pretty comfortable with the normal procedures
22 of giving or taking a deposition?

23 A. I am.

24 Q. If I can do anything to facilitate the process, please
25 let me know.

1 A. Okay.

2 Q. Given that you're a physician, also, if you need to
3 step out for any reason whatsoever, we will accommodate
4 you however you need us to.

5 A. Okay.

6 Q. Thank you, Dr. Smith. Are you familiar as to the
7 litigation as to why I've requested you to come today
8 and give a deposition?

9 A. To be honest, not -- I'm not sure.

10 Q. Do you understand that previously there was a medical
11 malpractice case that involved a patient of yours,
12 William Mark Casey, that brought claims against Dr.
13 Feldman, Dr. Boscia, Upstate Lung and Critical Care,
14 and Dr. Shantha?

15 A. Yes, I am aware.

16 Q. And that litigation ended sometime, if I recall
17 correctly, May of 2010.

18 A. Yes, sir.

19 Q. Is that your understanding?

20 A. Yes, sir.

21 Q. During that litigation you gave a deposition. Is that
22 correct?

23 A. I did.

24 Q. Also in conjunction with that litigation, I believe you
25 came to trial and testified, as well?

1 A. I did.

2 Q. I will represent to you your trial testimony was not
3 typed up. So, to the best of my knowledge, that
4 testimony has been lost. Is that your understanding?

5 A. I have no knowledge.

6 Q. You have no knowledge, which is fine. Let me do some
7 housekeeping things first. You received a subpoena to
8 be here, if I'm not mistaken?

9 A. That is correct.

10 Q. Okay. Let me -- I'm going to show and mark this just
11 for, like I said, housekeeping purposes. Let me start
12 with the subpoena. Would you please take a look at
13 this for me, Dr. Smith, and we're going to mark this as
14 Exhibit 118, please.

15 A. Okay.

16 Q. Would you let her put a sticker on it, Dr. Smith? That
17 will help the court reporter.

18 A. Okay.

19 (Plaintiff's Exhibit Number 118 marked)

20 EXAMINATION RESUMED BY MR. MANN:

21 Q. And Dr. Smith, does this appear to be a copy of the
22 subpoena that you had previously received, sir?

23 A. Yes, sir.

24 Q. And in an effort to comply with this request, that's
25 why you're here today, sir?

1 A. Yes, sir.

2 Q. I appreciate it, so thank you. This also asked for
3 you, for lack of a better term, to use a catch-all
4 term, it asked you to bring a copy of Mr. Casey's
5 chart?

6 A. Yes, sir.

7 Q. Counsel has agreed that given the fact that Mr. Casey
8 is still a patient with Lung and Chest that the
9 information that you brought today in compliance with
10 the subpoena would be limited through the last day of
11 the trial. Is that your understanding?

12 A. Yes, sir, it is.

13 Q. And in an effort to help us with this request, you have
14 brought a chart with you today, sir?

15 A. Yes, sir.

16 Q. I'm going to get to that in a minute, and we're going
17 to mark that as an exhibit, also.

18 A. Okay.

19 Q. Thank you. You also, I believe, received -- and Madame
20 Court Reporter, could we mark this is as 119, please?

21 (Plaintiff's Exhibit Number 119 marked)

22 EXAMINATION RESUMED BY MR. MANN:

23 Q. Thank you. And Dr. Smith, let me ask you to please
24 look at that, if you would be so kind.

25 A. Okay.

1 Q. And have you seen that document before, sir?

2 A. I have.

3 Q. Okay. And is that your understanding that that is the
4 notice for us to be here today, as well?

5 A. It is.

6 Q. And, again, I thank you for your appearance. As we
7 previously talked for just one second before we started
8 the deposition, I have brought a copy of your previous
9 deposition in the underlying medical malpractice case,
10 and at this time I'm going to ask that it be marked as
11 Exhibit 120, please.

12 (Plaintiff's Exhibit Number 120 marked)

13 EXAMINATION RESUMED BY MR. MANN:

14 Q. And let you take a look at it and see if you recognize
15 it as to being your deposition in the underlying case,
16 please.

17 A. Yes, this looks like my deposition.

18 Q. And Dr. Smith, have you ever read your deposition?

19 A. I may have read it. I usually read the depositions
20 before approving them. So I probably did read that.

21 Q. Is it fair to say that that reading of the deposition
22 would have occurred before 2010, either 2010 --

23 A. Yes, sir.

24 Q. -- or before?

25 A. Yes, sir, it would have.

1 Q. So in preparing to be here today, you have not reviewed
2 your deposition?

3 A. I have not.

4 Q. Okay. Do you recall from your prior readings if there
5 were any inaccuracies in your deposition?

6 A. I do not.

7 Q. Has anyone indicated to you that there is anything
8 inaccurate in your deposition?

9 A. No, they have not.

10 Q. If that thought process changes that you feel that
11 there may be an inaccuracy in that deposition, would
12 you please alert Ms. Cheek so that she can alert me so
13 that I would be aware of that?

14 A. Be glad to.

15 Q. Otherwise, if it is fair, if you think this is fair, I
16 am going to assume that whatever you testified to
17 previously in your deposition is accurate as to the
18 best of your knowledge?

19 A. It is.

20 Q. Thank you, sir. Let's look at what you brought today.
21 Can you please identify what this is that you brought
22 with you?

23 A. This is the chart of Mark Casey.

24 Q. With your permission, I'm going to return these to the
25 court reporter because I don't think we need those, but

1 Dr. Smith, I am going to give you your own copy of your
2 deposition for whatever use you may see for it.

3 A. Okay.

4 Q. So you can take that copy with you.

5 A. All righty.

6 Q. But you were telling us what you brought with you
7 today, sir?

8 A. It's Mr. William Casey's chart.

9 Q. Have you had an opportunity to look through it?

10 A. I have not.

11 Q. But, to the best of your knowledge, that is a complete
12 copy of the chart?

13 A. It is.

14 Q. During your deposition before, you were requested to
15 produce a copy of your chart. Is that your
16 recollection?

17 A. I have to say I have no specific knowledge of that, but
18 looking at the deposition, it looks like there's a copy
19 of the chart. So I must have.

20 Q. Do you recall that the day of your deposition
21 previously you did not bring the chart with you? Do
22 you recall that?

23 A. I think they had a copy there for us, so I did not -- I
24 did not have to produce our record.

25 Q. Do you -- do you remember at all if the copy of the

1 chart was produced through Mr. Casey's attorney, Mr.
2 Chuck Thompson?

3 A. I have to say I just -- that's too far.

4 Q. Okay. Whatever your deposition says regarding that
5 topic would be accurate because you have --

6 A. It would be more accurate --

7 Q. -- no knowledge?

8 A. -- than my memory at this point.

9 Q. And so we can just refer to the deposition, okay. Is
10 that fair?

11 A. Mm-hmm.

12 Q. Thank you, sir. And you have to---

13 A. Yes.

14 Q. We have to do those yes and no, please.

15 A. I understand.

16 Q. Okay. And I get in the habit, too, because I'll nod
17 and, you know, and give every other affirmation sign,
18 but unfortunately for the court reporter she needs
19 verbalization.

20 A. Okay.

21 Q. So at this point in time we did have a brief discussion
22 before respecting the chart, before the deposition
23 started. Do you recall that conversation?

24 A. Yes, sir.

25 Q. We're going to mark this now as Exhibit I believe it's

1 120. Is that correct?

2 A. 121.

3 Q. 121. Thank you.

4 (Plaintiff's Exhibit Number 121 marked)

5 EXAMINATION RESUMED BY MR. MANN:

6 Q. And we're going to request that the court reporter make
7 a copy of this for us. Is that your understanding?

8 A. Yes, it is.

9 Q. And do you mind if I surrender it into her care and
10 custody so that she can have that done for us?

11 A. Yes, sir, you can.

12 Q. Dr. Smith, let me call your attention to one thing in
13 your deposition. There is a letter. Can you please
14 tell me what this appears to be?

15 A. It is a letter from George H. Thompson stating that
16 they represented Mr. Casey on a social security
17 disability claim and that they had no information on
18 him after a certain March 15, 2005 and thanked us for
19 providing copies of any records after that date.

20 Q. And I think what I'm really -- the reason I'm asking
21 you to look at this, I have some general questions, not
22 necessarily specific as to this letter, but for the
23 benefit of the record, the letter is dated September 6,
24 2005?

25 A. That is correct.

1 Q. Would you agree with that? And it appears that it was
2 received or there appears to be a received stamp of
3 September 8, 2005?

4 A. That is correct.

5 Q. Were you aware that Mr. Casey was attempting to qualify
6 for social security disability?

7 A. I would be after that letter.

8 Q. And if information was provided to the Social Security
9 office or things of that nature in conjunction with
10 this, would you have had knowledge of that
11 contemporaneously back in that time?

12 A. Yes, I would have -- we would have -- there's my
13 initials here at the bottom of the page saying that I
14 okayed the release of the chart.

15 Q. Okay. And was that customary that you would initial
16 things for them to be released to various agencies?

17 A. That is correct.

18 Q. And if there are records that have that initialing and
19 information upon it, may we assume that they are
20 accurate?

21 A. Yes, to the best of my knowledge.

22 Q. And let me ask that question in a different way. Have
23 you ever been alerted that there are records that exist
24 that purport to have your initial on it that are
25 inaccurate?

1 A. No.

2 Q. Okay. And I know that's kind of a catch-all question,
3 but, again, I'm trying to streamline our time together,
4 and instead of showing you --

5 A. Sure.

6 Q. -- a bunch of unnecessary -- not necessarily
7 unnecessary, but instead of showing you a bunch of
8 documents and having you confirm every single signature
9 or notification, what I would like to do is just find
10 out if you believe it's fair that if there are initials
11 on medical documents respecting this particular case,
12 then, to the best of your knowledge, you have never
13 been alerted that anything is fraudulent or anything
14 was done without your permission or express consent if
15 you initialed them?

16 MS. CHEEK:

17 Object to the form.

18 EXAMINATION RESUMED BY MR. MANN:

19 A. Well, generally this would say that -- that the record
20 was brought to me and seemed to be complete and I
21 okayed that it be released.

22 Q. Okay. We're going to get back to this in just a
23 minute, but -- and I think you have answered my
24 question, and I think Ms. Cheek had a very good
25 objection because that was a rambling question, but --

1 but to -- but for -- for my deference, you did
2 understand what I was asking?

3 A. Yes, sir.

4 Q. And, again, to try to state that question a little bit
5 differently is, to the best of your knowledge, you have
6 never been told that there are records respecting this
7 case that have your initials on them that were
8 fraudulently sent or submitted to any agency or
9 individual?

10 A. No.

11 Q. That's right. That's what I would assume, because I've
12 never heard that.

13 A. Yeah.

14 Q. And, again, I'm trying to streamline our time together.
15 So, in other words, I want to know if you know of any
16 problems respecting the records and if we need to delve
17 into those and have additional questions with them or
18 can I just simply assume that the records speak for
19 themselves.

20 A. Yes.

21 Q. Does that make sense as to my question?

22 A. Now, I have to say, to clarify that --

23 Q. Yes.

24 A. -- that Ms. Cheek did show me that there were multiple
25 copies of one note from Dr. Fogarty. So I -- I was

1 aware of those as of last week. I was not aware of
2 those prior to that date.

3 Q. That would have been my assumption, also, Dr. Smith,
4 and I promise you I'm going to ask about those next.
5 okay?

6 A. Okay.

7 Q. And that's one of the reasons why -- and since you
8 brought it up, I will represent to you in documents
9 that were initialed by you to the Social Security there
10 was one version of the note. Attached to your
11 deposition and, to the best of everyone's recollection,
12 your testimony at trial involved another version of
13 that note that you're referencing.

14 A. Okay.

15 Q. And that was one of my questions, did you know that
16 that had occurred, and it sounds like you did not.

17 A. (Witness shakes head).

18 Q. Okay. So let's -- we're about done here. So let's --
19 let's get specific as to those particular notes.

20 A. Okay.

21 Q. These notes have previously been marked in this
22 litigation. That's why -- I don't know if you thought
23 anything of it, but the exhibits that I've attached
24 here, I think we started with 118. The reason is that
25 from all the people that have given depositions, we're

1 not doing one through X number for one particular
2 deponent. We're just keeping them all in order to make
3 it easier for everyone to understand what note is what.

4 A. Okay.

5 Q. Also, in an effort to hopefully save a tree or two,
6 we're not re-creating multiple copies of notes and
7 things of that nature that have already been attached
8 to a deposition. So with that said, I'm going to show
9 you three notes that I believe you have indicated that
10 you have seen. Oops, I'm looking at the wrong stuff
11 here. And Dr. Smith, I will represent to you during
12 the course of this litigation I'm going to show you
13 these together, and these are previously marked
14 exhibits to the depositions --

15 A. Okay.

16 Q. -- that have been numbered 5, 6, and 7.

17 A. Okay.

18 Q. And let me get them all out here so that we can have a
19 brief set of questions respecting these. Okay?

20 A. Okay.

21 Q. I think you indicated to me that you've had the benefit
22 of being alerted that there are multiple copies of what
23 purports to be a 7/21/05 office visit note of Dr.
24 Fogarty's respecting William Mark Casey. Correct?

25 A. Yes.

1 Q. And have you had an ample opportunity to look and
2 compare them?

3 A. I have.

4 Q. All right. What is your understanding as to why these
5 three different versions of this office visit note
6 exists?

7 A. Well, let me just say that, again, I had no prior
8 knowledge of these prior to Ms. Cheek bringing those to
9 my attention. I can speculate for you what there is,
10 but I have had no conversation with anybody about how
11 they came about. It -- it looks to me like the note,
12 the Exhibit 5, which I think is -- is the one that is
13 unsigned by Dr. Fogarty --

14 Q. Okay.

15 A. -- is a draft that he would have perhaps reviewed, and
16 we at that time, looking at the initials here, there is
17 a transcriptionist, Nan Strickland, who did our
18 transcription off of little cassette tapes, and they --
19 she would have returned those to us to review and
20 correct if we felt there was something that came out
21 wrong. And so it looks to me like that was the draft
22 copy since it was never signed.

23 Q. Okay.

24 A. The second one is signed with some change in the three
25 comment paragraphs, though not big changes, in my

1 opinion, and that copy is signed and a copy is to be
2 sent to Dr. Gonda.

3 Q. Okay.

4 A. And then the third copy now---

5 Q. And which number is that, if you could help us?

6 A. I'm sorry. This is 7.

7 Q. Okay.

8 A. Exhibit 7.

9 Q. And you were previously talking about 6?

10 A. About 6, that is correct.

11 Q. Thank you, Dr. Smith.

12 A. So the order of the paragraphs is changed in the
13 comments section, again, not a big difference in the
14 content. And now there is two physicians that it's
15 sent to, which would be to Dr. Gonda and to Dr. Grace,
16 who was a psychologist that Mr. Casey was seeing, and
17 Dr. Gonda was his primary care physician.

18 Q. Yes, sir. That's my understanding, also. Let's look
19 back to Number 5, Dr. Smith.

20 A. Okay.

21 Q. And we're welcome to look if we need to. I've -- we've
22 got a copy of your deposition here. But I will
23 represent to you that when your chart was produced in
24 conjunction with your deposition, this is the only note
25 that was provided which is marked Exhibit 5. would you

1 have any reason to doubt that, or do you need to look
2 at the chart?

3 A. In -- in looking at the chart, that -- that's the note
4 that's in there now.

5 Q. Yes. And so that note has remained consistent. In
6 other words, it was the one produced with your
7 deposition.

8 A. Right.

9 Q. That's your understanding. And it's also the one
10 that's in the chart now. These other two notes are not
11 -- not readily apparent, which you referred to as the
12 two notes that appear to be signed.

13 A. Now, I have to say I don't specifically recall. would
14 we want to look in our deposition --

15 Q. Sure.

16 A. -- and see which -- which of these three notes ended up
17 there?

18 Q. Let's take a brief off the record, please.

19 VIDEOGRAPHER:

20 off the record at 10:16.

21 (Off the Record)

22 VIDEOGRAPHER:

23 Back on the record at 10:27.

24 EXAMINATION RESUMED BY MR. MANN:

25 A. NOW---

1 Q. Dr. Smith, let me put a question before -- before you
2 before you---

3 A. I mean, I -- just -- just before we -- this is the
4 same, same one that I found, which was the one that's
5 referenced to Dr. Gonda, but I swear that I saw that
6 earlier, didn't we?

7 MS. CHEEK:

8 I think so. Shall I give it a go?

9 MR. MANN:

10 Please. Let's go back off, Alan.

11 VIDEOGRAPHER:

12 off the record at 10:27.

13 (Off the Record)

14 VIDEOGRAPHER:

15 Back on the record at 10:30.

16 EXAMINATION RESUMED BY MR. MANN:

17 Q. Now, Dr. Smith, again, I want to make sure that we're
18 accurate, and we've taken a few minutes to look through
19 both your prior deposition and the chart attached to it
20 as well as the chart that you've brought from us -- for
21 us today. Can you please identify which versions of
22 the notes that we were able to locate in the chart
23 you've brought today as well as to your deposition?

24 A. Right. So there is a copy of Exhibit 6 --

25 Q. Okay.

- 1 A. -- which was sent to Dr. Gonda.
2 Q. Okay.
3 A. And then there is the unsigned copy which is Exhibit 5
4 --
5 Q. Okay.
6 A. -- in a different part of the chart.
7 Q. And, to the best of our efforts, we do not see a copy
8 of---
9 A. Well, no, I'm sorry. Let me correct that. I see copy
10 -- I see 7 here, Exhibit 7.
11 Q. Is it the one with the lines?
12 A. Yes, sir. Yes, sir.
13 Q. So you do not see 6?
14 A. Well, I see 6.
15 Q. Okay.
16 A. So I got 6 here. I got 7 back here.
17 Q. Okay. And do we have 5?
18 A. We're still looking for 5 then.
19 Q. Okay. While we -- while we look at what's here in your
20 deposition, let me ask if Ms. Cheek can look in there
21 for us and see if we can find a copy of Exhibit 5.
22 A. Okay.
23 Q. And Dr. Smith, now you've got a copy of the deposition
24 that was marked --
25 A. Of the deposition.

1 Q. -- marked earlier, and, to the best of your searching
2 ability---

3 MS. CHEEK:

4 Milton?

5 MR. MANN:

6 Yeah.

7 MS. CHEEK:

8 I'm sorry. I'm not -- I don't mean to --

9 MR. MANN:

10 Yeah. No, no, no.

11 MS. CHEEK:

12 -- interrupt your question, but---

13 MR. MANN:

14 Please, by all means.

15 MS. CHEEK:

16 I think between counsel we've got unsigned---

17 MR. MANN:

18 Unsigned is right there.

19 MS. CHEEK:

20 Unsigned.

21 WITNESS:

22 Okay. Where---

23 MS. CHEEK:

24 So we've got marked the unsigned, which I believe
25 if you'll look, it's Exhibit---

1 MR. MANN:

2 It's Number 5.

3 WITNESS:

4 Five?

5 MR. MANN:

6 It is, mm-hmm.

7 MS. CHEEK:

8 And then we have back here, looking at the
9 operative language and the signatures, I believe this
10 is --

11 MR. MANN:

12 This is "complication."

13 MS. CHEEK:

14 -- 7.

15 MR. MANN:

16 Yeah, and that's going to be "complication," mm-
17 hmm. Yeah, mm-hmm. So we've got 7. So we are missing
18 6 in the chart.

19 MS. CHEEK:

20 I am -- I have not found 6. I'm going to hand
21 that back to you.

22 MR. MANN:

23 All right. Thank you.

24 WITNESS:

25 So here's 6.

1 MS. CHEEK:

2 The one you're referencing as 6 has---

3 WITNESS:

4 Is Gonda.

5 MS. CHEEK:

6 Is that signed or unsigned?

7 EXAMINATION RESUMED BY MR. MANN:

8 A. I'm so sorry. I am so sorry. It is the unsigned copy.

9 I am so sorry.

10 Q. Not a problem.

11 A. I just saw the Gonda.

12 Q. Yes, sir.

13 A. And I didn't realize he had that on the unsigned copy.

14 I apologize.

15 Q. Not a problem. And I think that, to the best of our
16 best efforts, version or, excuse me, Exhibit 6 is not
17 contained in that particular chart.

18 A. That's correct. We have version 7 and version 5.

19 Q. Thank you, Dr. Smith.

20 A. I am so sorry.

21 Q. And thank you, Ms. Cheek. Now, what versions do we
22 have previously that were attached to your deposition
23 back in 2009, I believe --

24 A. Okay. So---

25 Q. -- is when your deposition was taken?

1 A. So there we have Exhibit 5, the unsigned copy, and
2 Exhibit 7, the signed copy to Dr. Grace and Dr. Gonda.

3 Q. Okay. So we don't have a copy of 6.

4 A. We do not have a copy of 6.

5 Q. And Dr. Smith, I think you've previously stated that
6 you were not aware that there were multiple copies?

7 A. No.

8 Q. Okay. Looking at the front page -- now, I understand
9 we've got deposition stickers. We've got streaks from
10 what appears to be a printer or a fax machine. But if
11 you were just looking at the front page, taking off the
12 Bates stamp numbers, would you agree that they look
13 pretty similar, just looking --

14 A. Yes, they---

15 Q. -- at the front page?

16 A. They look the -- the same.

17 Q. And would you also agree that you really have to do a
18 pretty careful review to -- to tell that there are
19 actually differences in these, between 5, 6, and 7?

20 A. Yes.

21 Q. Okay. I believe you stated earlier that respecting the
22 medical diagnosis and/or treatment plans, all three
23 notes are pretty doggone similar?

24 A. Yes.

25 Q. It appears that the bulk of the differences would

1 relate to the causation of an injury to Mr. Casey?

2 MS. CHEEK:

3 Object to form.

4 EXAMINATION RESUMED BY MR. MANN:

5 A. Okay. And if I could review those then, that would be
6 okay with you?

7 Q. And -- and we can even -- we can even streamline it to
8 a particular part of the notes.

9 A. Okay.

10 Q. And earlier you had mentioned the third paragraph of
11 the comments section?

12 A. Right.

13 Q. And let me ask you to compare those three and see if
14 you would agree with me that it appears that causation
15 opinions within those three notes differ.

16 A. Okay. What would you like me to---

17 Q. Well, let me -- let me ask you as to note Number 6.

18 A. Okay.

19 Q. And that is Number 6. As to note Number 6, do you see
20 where it states that air emboli have been reported as a
21 common complication?

22 A. Yes.

23 Q. Let's take a look at what is marked as Exhibit Number
24 7.

25 A. Right.

1 Q. Do you see where air emboli have been reported as a
2 complication?

3 A. Right.

4 Q. Versus common.

5 A. Common has been removed.

6 Q. Which would you agree, if you were describing a medical
7 event of a patient, there is a difference between
8 something being a common occurrence and simply an
9 occurrence?

10 A. Yes.

11 Q. Okay. And then if we look at what was marked as
12 Exhibit 5, I believe it has the term undoubtedly had an
13 air embolism?

14 A. Correct.

15 Q. Okay. Correct me if I'm wrong, but those three
16 statements in the three different notes appear to be
17 talking as to the causation of an insult to Mr. Casey?

18 A. Correct.

19 Q. And would you agree that they are different?

20 A. Yes, in -- in their degree of certainty.

21 Q. Thank you. Let me think for a minute. We're going to
22 go back off the record, but Dr. Smith, I believe I'm
23 probably done.

24 A. Okay.

25 Q. Is that fair? And Ms. Cheek, of course, may have some

1 questions, but we can go back off the record, please
2 Alan.

3 VIDEOGRAPHER:

4 off the record at 10:38.

5 (Off the Record)

6 VIDEOGRAPHER:

7 Back on the record at 10:44.

8 EXAMINATION RESUMED BY MR. MANN:

9 Q. Dr. Smith, thank you so much. I have no further
10 questions. I believe Ms. Cheek has some questions for
11 you, and I appreciate your giving us your time today.
12 So thank you.

13 A. Mm-hmm.

14 EXAMINATION BY MS. CHEEK:

15 Q. Dr. Smith, you had testified earlier that there are
16 differences among the notes before you, notes 5, 6, and
17 7 as we've characterized them. Correct?

18 A. Yes, ma'am.

19 Q. And you had stated that the -- a difference that you've
20 noted is the degree of certainty with which the
21 causation opinion is rendered. Correct?

22 A. That is correct.

23 Q. Is there any difference among those notes with respect
24 to the causation opinion itself?

25 A. No.

1 Q. That's all I have. Thank you.

2 MR. MANN:

3 Oh, before we leave, and I think we can be off the
4 record for this one.

5 VIDEOGRAPHER:

6 This concludes the video deposition of Dr. William
7 P. Smith, Jr.

8 WITNESS:

9 Wilson.

10 VIDEOGRAPHER:

11 The time is 10:45.

12 MR. MANN:

13 Wilson.

14 VIDEOGRAPHER:

15 We are now off the record.

16 (There being no further questions, this deposition
17 concluded.)

CERTIFICATE OF REPORTER

I, ROSALIND POOLE WALTERS, a Notary Public in and for the State of South Carolina, do hereby certify that the foregoing 31 pages represents a true and accurate transcript of the videotape deposition of WILSON P. SMITH, JR., M.D., which was taken by me on the 5th day of May, 2017.

That the witness was first duly sworn to tell the truth, the whole truth and nothing but the truth of his own knowledge concerning this matter.

That I am not related to nor the employee of any of the parties hereto, nor related to or employed by any attorney or counsel employed by the parties hereto, nor interested in the outcome of this action.

Rosalind Poole Walters, CVR-M
Notary Public for South Carolina
Commission Expires: 4/29/26

) C.A. NO.: 2010-CP-42-05743

)
)
)
)
) PLAINTIFFS' NOTICE OF *DE BENE ESSE*
) VIDEOTAPED DEPOSITION OF
) WILSON SMITH, M.D.

TO: WILSON SMITH, M.D.:

YOU WILL PLEASE TAKE NOTICE that the undersigned attorney for the Plaintiffs, will take the *de bene esse* videotaped deposition of the person at the time and place set forth hereinafter upon oral examination, pursuant to South Carolina Rules of Civil Procedure, Rule 30, before a Notary Public, or some other officer authorized by law to take depositions. Said deposition is to continue from day to day until completed. The deposition will be taken for the purpose of discovery, for use at trial, and for all other purposes permitted under the rules of this Court and all applicable statutes and laws.

Name of Deponent

Wilson Smith, M.D.

Place of Deposition

Wilkes Law Firm, PA
127 Dunbar Street
Spartanburg, SC 29306

Date and Time

Friday, May 5, 2017
at 9:30 a.m.

The deposition will be taken before a notary public or some other person authorized by law to take depositions. The deposition will continue from day to day until concluded.

PLEASE TAKE FURTHER NOTICE that, pursuant to Rule 30(j)(8) of the South Carolina Rules of Civil Procedure, counsel for Plaintiffs hereby identifies and reserves the right to use any and all documents produced or made available in discovery by any party during this deposition, and hereby gives notice of the Plaintiffs' intent to question the witness regarding any and all documents produced or made available by any party during the course of discovery, as well as those obtained pursuant to records requests. The subject matter of inquiry will include all matters reasonably calculated to lead to the discovery of evidence admissible in the above-entitled and numbered matter.

23 A. That is correct.

24 Q. And what is your medical specialty?

25 A. I am in pulmonary disease, critical care and sleep

DEPOSITIONS AND..., INC.
(864) 585-0642

GUNN 004047

1 medicine.

2 Q. Doctor, I have met you previously on other
3 occasions, I believe?

4 A. Yes, sir.

5 Q. My name is Spencer King. I'm an attorney here in
6 Spartanburg, and I am defending Dr. Greg Feldman,
7 Dr. Joseph Boscia and their practice group, Upstate
8 Lung and Critical Care Specialists in a lawsuit
9 that's been brought by William Mark Casey claiming
10 medical negligence. Milton Mann, who's seated next
11 to me, also a lawyer, also is my co-counsel in this
12 case. Billy Gunn, who is seated at the end of the
13 table represents Dr. Shantha, who is an
14 anesthesiologist. He's also a defendant. Mr.
15 Thompson and Mr. Turner who are seated next to you
16 represent Mr. Casey.

17 A. Okay.

18 Q. And in this deposition -- you have previously been
19 deposed before? Let me ask that first. You've
20 given previous depositions?

21 A. Yes, sir.

22 Q. So you know basically the rules?

23 A. Yes, sir.

24 Q. The purpose of this deposition is an information
25 gathering session. It is my understanding that you

1 have seen and treated Mr. Casey at times?

2 A. Yes.

3 Q. And thus I'd like to discuss with you your care and
4 treatment of Mr. Casey, discuss with you your
5 knowledge about this case and whether or not you
6 intend to render any opinions regarding standard of
7 care by Dr. Feldman and Dr. Boscia in this case.
8 If anytime I ask you a question that you do not
9 understand my question, tell me you don't
10 understand it and I will rephrase it. It is not a
11 closed book test. That's why we ask you to bring
12 your chart. You are certainly free to refer to
13 your records. Memories sometimes fade, and I think
14 we're talking about four or five years ago. And so
15 certainly if you wish to look back in your chart,
16 you are certainly free to do that.

17 A. Okay.

18 Q. Doctor, tell me about your practice?

19 A. Well, I'm in private practice. I have -- in a
20 group called Lung and Chest Medical and we have
21 four other pulmonary, critical care physicians in
22 that group, and we share call and share expenses
23 and share responsibilities.

24 Q. And in 2004 were the same physicians in that group?

25 A. No, at that time there were other -- a different

- 1 mix of physicians at that time.
- 2 Q. Who were the physicians in 2004?
- 3 A. It would have been -- that are not there now?
- 4 Q. Well, just name who's there ---
- 5 A. Oh, okay.
- 6 Q. --- and then we can change them?
- 7 A. All right. Well, in 2004 there would have been Dr.
- 8 Bert Knight, Dr. Mary Lou Applebaum, Dr. Charles
- 9 Fogarty, and Dr. Doug Clark and myself.
- 10 Q. And Dr. Knight is no longer there?
- 11 A. That is correct. Nor is Dr. Applebaum.
- 12 Q. And has anyone else joined you?
- 13 A. Dr. Rico Mendoza and Dr. Raul Cruez.
- 14 Q. And do you have physician assistants?
- 15 A. We do.
- 16 Q. Do you know a Beth Edwards?
- 17 A. I do.
- 18 Q. What was Ms. Edwards?
- 19 A. She was a nurse practitioner that worked with us
- 20 during that time.
- 21 Q. Is she still employed?
- 22 A. She is not.
- 23 Q. When did she leave, if you know?
- 24 A. I want to think she would have left in 2005.
- 25 Q. And do you know where she is now?

1 A. I do not.

2 Q. Doctor, would you give us kind of a capsule of your
3 educational and medical training?

4 A. I went to college at Villanova University in
5 Philadelphia. I went to medical school at West
6 Virginia University in Morgantown. I went -- I did
7 an internal medicine internship and residency at
8 the University of Alabama in Birmingham, and I did
9 a pulmonary fellowship at Duke University.

10 Q. And when did you complete your pulmonary
11 fellowship?

12 A. I completed that in 1981.

13 Q. Now, you told me that you also, if I understood
14 for -- had a designation in critical care?

15 A. Yes, sir.

16 Q. Okay, and sleep medicine?

17 A. That is correct.

18 Q. Did that require additional training and education?

19 A. It does, but those boards were not available at the
20 time that I completed my training, so I did that
21 additional training and examinations after my
22 formal training was completed.

23 Q. When did you do your critical care training?

24 A. Well, critical care is a part of pulmonary, so I
25 qualified to be able to take those boards based on

1 my pulmonary specialty and passing the board.

2 Q. Okay, without having any additional training?

3 A. Without having any additional training.

4 Q. And is pulmonology not also a subspecialty of
5 internal medicine?

6 A. That is correct. You have to do your internal
7 medicine to be able to qualify to do that
8 additional training.

9 Q. Help me with this, is sleep medicine a sub
10 specialty, or are they both sub specialties of
11 internal medicine?

12 A. Well, no. Sleep -- sleep medicine actually has --
13 at least at that point had several different roads
14 in; neurologists, psychiatrists, internists,
15 pulmonary physicians, all had the opportunity to do
16 additional training and take the board examination
17 in that.

18 Q. But you have since -- when did you become board
19 certified in internal medicine?

20 A. Golly, probably '80 or '81.

21 Q. And when did you become board certified in critical
22 care?

23 A. The first time would have been 1989.

24 Q. In pulmonology?

25 A. In critical care, you asked.

1 Q. I did. And in pulmonology?

2 A. In pulmonology would have been, I believe, in '81.

3 Q. And is the organization that you are boarded in The
4 American Board of Internal Medicine?

5 A. That is correct in everything but sleep. Sleep had
6 its own board up until this time, at which time
7 they've come under The American Board of Internal
8 Medicine.

9 Q. Doctor, I looked you up on their website. Does
10 that appear to be accurate?

11 A. Oh, okay, well you -- yes. So I was mistaken about
12 the date for -- for my internal medicine and
13 pulmonary, if you'll correct those to '79 for
14 internal medicine, and '82 for pulmonary disease.

15 Q. This is accurate?

16 A. Yes, sir.

17 Q. Now, ---

18 A. I don't -- just a second. And -- and understand
19 the sleep doesn't fall under this board. It's a
20 separate board.

21 Q. You told me that, okay. And your critical care
22 medicine board is valid through December 31st,
23 2009?

24 A. That's correct. I'm in the process of redoing all
25 that.

1 Q. So you will have to take that board again?

2 A. I have to take that board again.

3 Q. Now, the other two boards covered by The American
4 Board of Internal Medicine, i.e. the Pulmonary
5 Disease Board and the Internal Medicine Board,
6 you're quote "grandfathered in." You're certified
7 in those fields indefinitely?

8 A. Well, not grandfathered in. I'm -- I'm free from
9 having to recertify in those.

10 Q. Because you did take a test?

11 A. Well, the contract with you at that time was the
12 board was yours for life. They subsequently
13 changed that. And you can see when they started
14 the Critical Care Boards, they didn't allow that
15 possibility. You had to recertify every ten years.

16 Q. And board certification, Doctor, is something over
17 and above attendance at medical school, internship,
18 residency and fellowship; is it not?

19 A. Well, there's -- yes, there's usually additional
20 testing that's undertaken to be able to have those
21 qualifications.

22 Q. Is there both an oral and a written test?

23 A. No, there's only a written exam.

24 Q. And so you would have taken a written exam for
25 pulmonary disease sometime prior to November 9 of

- 1 1982.
- 2 A. Yes.
- 3 Q. And the critical care you would have taken it
- 4 sometime prior to ---
- 5 A. I assume they probably date you to when you took --
- 6 the date of the exam. Having passed the exam
- 7 qualifies you for the board.
- 8 Q. And in critical care you've had to have been
- 9 certified ---
- 10 A. I'm now going ---
- 11 Q. --- by the board ---
- 12 A. --- for my second ---
- 13 Q. Second time?
- 14 A. --- second recertification. I certified,
- 15 recertified, and now this is my second
- 16 recertification.
- 17 Q. Okay, but to be boarded requires an extra effort by
- 18 the physician?
- 19 A. It does.
- 20 Q. And why do you need to be boarded?
- 21 A. Well, it just -- it is a reflection of you having
- 22 completed that specialty area of training that you
- 23 are particularly interested in -- in setting
- 24 yourself forth as an expert in that area.
- 25 Q. To maintain your boards do you have to complete any

1 continuing education?

2 A. Yes, you do.

3 Q. In that field?

4 A. Right, and to maintain your license in South
5 Carolina you have to have a certain amount of ---

6 Q. And do you actually have to practice in that area?
7 Do you have to have patient encounters or case
8 loads within that field of medicine?

9 A. To maintain your hospital privileges you do. Now,
10 I'm not sure that you do to maintain your board
11 eligibility, but your board eligibility now
12 requires some clinical evidence of proficiency, so
13 to some extent you do have to have some practice to
14 be able to continue to take your boards.

15 Q. You're on staff at the Spartanburg Regional Medical
16 Care Center?

17 A. That's correct.

18 Q. Any other hospitals?

19 A. Yes, at Spartanburg Hospital for Restorative Care,
20 the Village Hospital in Greer, and Mary Black
21 Hospital.

22 Q. And are you actually the medical director at
23 Restorative Care?

24 A. I am.

25 Q. Is there any requirement to be on staff at

1 Spartanburg Regional Medical Center that you be
2 boarded?

3 A. Yes, if you are going to be in a specialty then you
4 have to have board certification in that specialty.

5 Q. Now, doctor, do you have any neurological training
6 past basic training in med school?

7 A. Well, again, just those areas that would pertain to
8 my board certification. Sleep involves some
9 neurologic training. For instance, I can read
10 EEGs, which is not something that a pulmonary
11 physician would be able to do. There is, of
12 course, certain parts of critical care that tend to
13 neurologic problems. So I have some additional
14 training though I certainly wouldn't put myself
15 forth as a neurologist or neurosurgeon.

16 Q. Or a neurosurgeon, okay. But you do not treat
17 diseases or disorders of the nervous system?

18 A. For the most part, no.

19 Q. Now, you ---

20 A. By myself, no.

21 Q. But I do understand that your work in sleep
22 disturbances may play into it?

23 A. Right, and again, in critical care we may
24 participate in the care of someone with neurologic
25 problems, but we would always, for the most part,

1 do that with the assistance of a specialist in that
2 area.

3 Q. Such as either a neurologist or a neurosurgeon?

4 A. Neurosurgeon; right.

5 Q. And I asked you -- I knew, and you confirmed that
6 you are the medical director at Restorative Care?

7 A. Right.

8 Q. How does Restorative Care differ from an acute care
9 hospital such as Spartanburg Regional, and differ
10 from a skill care nursing home? How do those three
11 facilities -- what's the difference between them?

12 A. Okay, well, a long-term acute care hospital was
13 established by the government to take care of those
14 patients who were going to require at least 25 days
15 of hospitalization, on average, and who have an
16 acute condition that still requires
17 hospitalization. Therefore that's where they
18 differ from a nursing home where the patients in a
19 nursing home do not require acute hospitalization.
20 It differs from the acute care hospital in that the
21 patients, on average, who are Medicare patients
22 have to maintain an average length of stay, you
23 know, of greater than three weeks. So we generally
24 take patients who have chronic conditions on
25 transfer from acute care hospitals who are

1 anticipated to need prolonged hospital care.

2 Q. And how long may a patient stay at Restorative
3 Care?

4 A. As long as they need. I mean, we've had patients
5 for two years, three years.

6 Q. You would have patients at Restorative Care that
7 have neurological issues ---

8 A. We do.

9 Q. --- and need neurological treatment; correct?

10 A. Yes, sir. Yes.

11 Q. And you would involve in their care if they did not
12 already have a physician, a neurologist or a
13 neurosurgeon?

14 A. Yes, we would -- we would get a, for the most part
15 a neurologist and psychiatrist to help us with
16 managing those issues.

17 Q. Doctor, according to our records you have seen and
18 treated Mark Casey?

19 A. That's correct.

20 Q. And we asked you to bring your chart with you
21 today. Did you do that?

22 A. I did.

23 Q. Would you let me look at that, please, sir?

24 A. Yes, sir.

25 Q. And this is the chart maintained by Lung and Chest

1 Medical Associates on Mr. Casey?

2 A. Yes, sir.

3 Q. Do you know of any other records that Lung and
4 Chest Medical Associates has on Mr. Casey?

5 A. We had gone to an electronic medical record, and I
6 glanced in there last night and I didn't see any
7 office visits there, but it is possible there's
8 something in that electronic record, but I do not
9 think there is.

10 Q. When did you go to electronic records?

11 A. Well, I looked at that yesterday.

12 Q. But, are there any ---

13 A. I can make a phone call and just answer that
14 question if you'd like?

15 Q. That's fine. While he's doing this I'm going to
16 mark this as Defendant's Exhibit number 1.

17 A. But I have myself not seen him since we've gone to
18 the electronic record.

19 Q. Okay.

20 (COURT REPORTER MARKS ENTIRE FILE OF DR. SMITH AS
21 DEFENDANTS' EXHIBIT NO. 1; ATTACHED TO DEPOSITION).

22 BY MR. KING:

23 And what we're going to do, we agreed we will copy
24 this, substitute the copy ---

25 BY MR. THOMPSON:

1 Yes.

2 BY MR. KING:

3 --- for the exhibit and give ---

4 BY MR. THOMPSON:

5 Dr. Smith back his records.

6 BY THE WITNESS:

7 Hey, Crystal, this is Dr. Smith. Can you do me a
8 favor? Would you look up and see if we have any
9 electronic medical record on William Mark Casey.
10 He's about 50 years old.

11 BY MR. GUNN:

12 11/03/58.

13 BY THE WITNESS:

14 Birth date's [REDACTED]/58. We do. How many visits?
15 All right, do you want me to have them make a
16 physical copy of those?

17 BY MR. KING:

18 First question, what are the dates -- the span of
19 those visits?

20 BY THE WITNESS:

21 What's the span of the dates of those visits, the
22 first to the last? July 7th 2006. December the
23 8th of '08. And can you see if any -- were any of
24 those mine, or are they all somebody else's? None
25 of them were mine.

1 BY MR. KING:

2 If she could reproduce those.

3 BY THE WITNESS:

4 Would you make a physical copy of all those for me?

5 We'll deliver those to you tomorrow?

6 BY MR. KING:

7 That's fine.

8 BY THE WITNESS:

9 Thanks. Appreciate it, Crystal. Bye.

10 BY MR. KING:

11 Was that on the record?

12 BY COURT REPORTER:

13 Yes.

14 BY MR. KING:

15 So on the record we have that there are some
16 electronic records from the span of July 7, 2006 to
17 December 8, 2008. Dr. Smith's going to get us
18 copies of those, but none of those were visits
19 where Dr. Smith was involved in the care; is that a
20 fair statement?

21 BY THE WITNESS:

22 That's correct.

23 DIRECT EXAMINATION RESUMED BY MR. KING:

24 Q. Doctor, the first visit that I have that I believe
25 that you recorded when you saw Mr. Casey first

1 time, July 14, 2004?

2 A. Yes.

3 Q. And was he referred to you by anyone at that time?

4 A. No, he was a self-referral.

5 Q. And you take self-referrals?

6 A. Yes.

7 Q. In the chart there is a medical history. It says,
8 "Medical History Information Sheet." Do you see
9 that?

10 A. Yes, sir.

11 Q. And in 2004 was that a form that your practice used
12 for new patients?

13 A. Yes, it was.

14 Q. And the information, is that recorded in the
15 patient's handwriting? Do you ask the patient to
16 complete that?

17 A. Yes, though I had made notes as well in the -- to
18 the side.

19 Q. Doctor, would you talk me through your notes?

20 A. Okay. "Sleep well, fatigue, Michelin, swing shift,
21 very physical job for several years, 2000 had a
22 stress test and a cath which was normal." And
23 follows over there in the ---

24 Q. And are these notes that you made during your first
25 visit with him?

1 A. Right, during -- during my discussion with him.

2 Q. Okay, and what were his complaints when he first
3 saw you?

4 A. In his writing, "Not happy with current care
5 provider, post operation for chest pain." And I
6 should amend that there is additional writing from
7 me. There was "anxious, haven't slept well,"
8 instead of "slept well."

9 Q. Okay, so interpret that for me? So he is anxious
10 and hasn't slept well; is that what you recorded?

11 A. Right, yes.

12 Q. All right, go ahead. And you said he "wasn't happy
13 with his current position"?

14 A. Right.

15 Q. Continue on with his reason for seeing you.

16 A. That he had "had this problem for a month." And
17 those were the main things that he had given as his
18 reason for being there.

19 Q. And your first visit is a -- I believe a two-page
20 typed report?

21 A. Yes, sir.

22 Q. Okay, do you have that in front of you?

23 A. I do.

24 Q. And if you would, kind of summarize for us the
25 history that you were given on that visit?

1 A. Okay, well, at that time he was 45 years of age.
2 He complained of some chest difficulties that had
3 begun in May "when he presented to the emergency
4 room at Spartanburg Regional with a complaint of
5 chest pain. A PA chest x-ray at that time
6 suggested the possibility of a foreign body. He
7 underwent a bronchoscopy which was felt to be
8 abnormal, but no foreign body was identified. A
9 subsequent CT scan done the same day did not
10 confirm any abnormality. However it does mention
11 there is a left anterior descending coronary artery
12 calcifications. In 2000 he had a stress test and
13 catheterization was normal. He underwent a rigid
14 bronchoscopy in attempt to identify foreign body
15 and remove it during that procedure. He had a
16 perforation of the bronchial wall by a laser, which
17 resulted in a pneumomediastinum and respiratory
18 distress. He required intubation and heavy
19 sedation and was able to be extubated the following
20 day. Since that time, he notes fatigue during the
21 day. He continues to have dyspnea and chest pain
22 with exertion. He has become very anxious. His
23 sister accompanying him for the interview notes
24 that he seemed to experience a change in his
25 ability to tolerate stress and appears much more

1 ~~anxious and restless than she has known him to be~~
2 ~~in the past.~~ He is a previous smoker for about 12
3 years, but has not smoked in the past three weeks.
4 He does snore, but feels he sleeps well. He denies
5 any hemoptysis, chronic cough or weight loss. He
6 still has the chest pain."

7 Q. Okay, and there's a list of medications that you
8 asked him to give; is that correct?

9 A. That's correct.

10 Q. Are there any opiates listed there?

11 A. No.

12 Q. Doctor, we have in discovery procured drug records
13 on Mr. Casey for some time before and after the
14 2004 events. Let me ask you to take a look at
15 this, Doctor.

16 A. (Witness review document). Okay.

17 Q. And looking back prior to late June of 2004, do you
18 see where he was taking opiates?

19 A. Yes, it looks like at one point he was taking
20 Hydrocodone.

21 Q. Which is Loratab?

22 A. Yes.

23 Q. And that's Dr. Gonda that prescribed that?

24 A. That is correct.

25 Q. Did you know that Dr. Gonda was his primary care

1 physician?

2 A. I don't know whether I knew that or not. I don't
3 think we had a place to list that on our sheet, so
4 I -- oh, no. Yes, "Who's your family doctor?
5 Frank Gonda."

6 Q. And so, if you look at the records, Dr. Gonda was
7 prior to May/June of 2004 giving him Loratab;
8 correct?

9 A. That is correct.

10 Q. Did you ever learn that, during the time that you
11 were treating Mr. Casey, that he took opiates?

12 A. I don't believe so.

13 Q. And you assume the accuracy of the information that
14 Mr. Casey gave you so far as his history?

15 A. Pardon?

16 Q. You depend upon the accuracy and the honesty ---

17 A. Sure.

18 Q. --- that your patient had given you an accurate
19 history?

20 A. Sure.

21 Q. And you conducted an examination?

22 A. I did.

23 Q. And what did you find in your physical examination?

24 A. His physical examination was basically normal.

25 Q. And you also did some diagnostic studies?

1 A. I did.

2 Q. What diagnostic studies did you do?

3 A. I did pulmonary function tests and those -- those
4 were normal.

5 Q. And what would a normal pulmonary function test
6 tell you, a pulmonologist?

7 A. What would a normal -- well, just that the resting
8 parameters of pulmonary function appeared to be
9 normal.

10 Q. And you've told me that in the history that you
11 were given ---

12 A. Uh-huh (affirmative response).

13 Q. --- Mr. Casey underwent, and I believe that Dr.
14 Feldman performed a rigid bronchoscopy which
15 resulted in a pneumothorax; did I understand you to
16 say there was a perforation of the bronchial wall
17 at that point?

18 A. Yes.

19 Q. Now, finding that his pulmonary function studies
20 are normal, and no evidence of airway obstruction,
21 do you conclude that he has no permanent injury to
22 his lung?

23 A. I did.

24 Q. So there was no injury as a result of the procedure
25 or the complication?

- 1 A. No injury to the lung.
- 2 Q. To the lung?
- 3 A. Right.
- 4 Q. As a result of that procedure?
- 5 A. Yes, sir.
- 6 Q. You told us that his sister, Carol, accompanied him
- 7 to the visit?
- 8 A. She did.
- 9 Q. Is Carol a patient of yours?
- 10 A. No.
- 11 Q. Do you know her?
- 12 A. Yes, I do. She worked in the cafeteria for a long
- 13 time at Spartanburg Regional.
- 14 Q. And is that a bit unusual for a 45-year-old man to
- 15 have his sister accompany him to a visit with his
- 16 physician?
- 17 A. No, I mean, we allow the patient to bring family
- 18 members as he would like into the exam room with
- 19 him. So it's not uncommon for me to see a patient
- 20 with other family members.
- 21 Q. And he gave you a history that he was having
- 22 difficulty sleeping?
- 23 A. Right.
- 24 Q. ~~Did he complain about being moody, frustrated?~~
- 25 A. ~~I don't have a specific mention of that. Like I~~

1 said, what I wrote down was that he was anxious, he
2 wasn't sleeping well, and that she said, you know,
3 he -- he seemed to have changed somewhat in terms
4 of being more anxious and restless since -- since
5 he'd been hospitalized.

6 Q. Let me ask you to look at a note. And these come
7 from Dr. Gonda's records, June 23rd, 2003. Let me
8 ask you to read that, please, sir. You don't have
9 to read it aloud, but just review that.

10 A. And the note I want to read is the 6/23/03?

11 Q. That's correct.

12 A. (Witness reviews document). Okay.

13 Q. Are those similar complaints with complaints that
14 were being expressed to you on your initial visit?

15 A. They are.

16 Q. Now, both on your physical examination and your
17 diagnostic examination, you did not find any
18 pulmonary function injury?

19 A. Any what?

20 Q. Any limitation in pulmonary function, and you did
21 not find any pulmonary injury to the lung; is that
22 correct?

23 A. Correct.

24 Q. He gave you a history that he was a smoker, I
25 believe, for like 12 years, but had quit in recent

1 weeks?

2 A. Yes.

3 Q. From a pulmonary standpoint smoking is of
4 significant concern; is it not?

5 A. It is.

6 Q. And what was your conclusion of the basis of Mr.
7 Casey's complaint?

8 A. Well, it was not that --- I didn't feel that his
9 chest pain at that point had been explained since
10 he still had that complaint, and there was not any
11 pulmonary abnormality to explain that. And the CT
12 scan which had been done, they incidentally noted
13 that he had calcification in his left interior
14 descending artery, which is an important coronary
15 artery. And so I felt that further evaluation to
16 exclude a possible cardiac condition was warranted.

17 Q. And did you do that?

18 A. We did.

19 Q. And what were the -- with -- through diagnostic
20 studies?

21 A. Yes, he had a -- another stress test, which did not
22 show any changes suggestive of cardiac ischemia.

23 Q. And did he have an EKG?

24 A. Yes, he did.

25 Q. And was that also normal?

1 A. Yes, it was normal.

2 Q. Did he have a chest x-ray?

3 A. I'm not sure he had had -- that he had another
4 chest x-ray, but I had the recent CT scan which was
5 completely norm.

6 Q. So, did you conclude the likely cause of the chest
7 pain?

8 A. Well, again, as I said, I was concerned -- are you
9 speaking of at my initial visit or after
10 further ---

11 Q. No, after you did these diagnostic studies, did you
12 conclude what the cause of the chest pain likely
13 was?

14 A. Well, I thought it most likely is chest wall pain.

15 Q. Muscular?

16 A. Muscular, skeletal pain.

17 Q. Okay. And that would be treated by -- how?

18 A. Pain medications or, you know, trying to identify a
19 specific area that was abnormal.

20 Q. Did Mr. Casey give you any history or complaints of
21 back pain?

22 A. Well, he had mentioned that he had some arthritis
23 and that he used -- sometimes used Bextra, an anti-
24 inflammatory drug for that. And he mentioned some
25 disc problems and arthritis in his lower back.

1 Q. Now, what other conclusions did you reach with
2 regard to Mr. Casey at that initial visit?

3 A. Well, that he had some psychiatric issues at that
4 point that I felt needed further investigation
5 beyond my abilities.

6 Q. You're not a psychiatrist and don't treat
7 psychiatric issues?

8 A. That is correct.

9 Q. What psychiatric issues did you think that he might
10 be suffering?

11 A. Well, again, they talked about his anxiety, his
12 difficulty sleeping, his restlessness, so I thought
13 that a referral to a psychologist or psychiatrist
14 would be appropriate, and so I referred him to Dr.
15 Jay Grace.

16 Q. He is a psychologist?

17 A. He's a clinical psychologist that works over at the
18 Regional.

19 Q. And in your impression -- I'm going to read this,
20 "But I wonder if he suffers from post traumatic
21 stress disorder related to his injury in intensive
22 care unit experience." Did I read that correctly?

23 A. Yes.

24 Q. And what is the basis for you to put in there, "I
25 wonder if he suffers from post traumatic stress

1 disorder related to his injury in intensive care
2 unit experience?" What was ---

3 A. Well, just, again his complaint that those -- from
4 his sister and he that he felt that he was worse
5 since he had been in the hospital.

6 Q. Are you making that as a definitive diagnosis?

7 A. No, sir.

8 Q. Okay.

9 A. No, sir. Again, like I said, I identified that
10 that was something that I was not qualified to help
11 him with and that I tried then to send him on to
12 somebody that I felt that was; that could do a
13 proper evaluation of that and treatment.

14 Q. And so you would be deferring to someone other than
15 a pulmonologist or critical specialist for that
16 diagnosis?

17 A. That's correct.

18 Q. When did you next see Mr. Casey?

19 A. I guess he came back for a follow-up visit on the
20 29th.

21 Q. And at that visit did you discuss -- July 29th?

22 A. Yes.

23 Q. And at that visit did you discuss with him the
24 result of the diagnostic studies, the stress and
25 the ---

1 A. I think that it was at that point we sent him up to
2 go have the Cardiolite stress. And I did some
3 additional things. I think I did do a chest x-ray
4 that day, again just wanting to be sure because he
5 still was having the chest tightness that he
6 described.

7 Q. ~~And on that visit, Dr. Smith, you gave him a leave-~~
8 ~~of absence from work through August 16th of 2004?~~

9 A. ~~Yes, I did.~~

10 Q. Doctor, looking through your chart I cannot find
11 any other leaves of absence that you authored, nor
12 can I find any statements of disability to any
13 third party that you authored? Would you like to
14 look through your chart and see if that is a true
15 statement?

16 A. Right here -- well, he had two subsequent visits
17 with me. He had one in August, and that was where
18 we actually talked about the results of the stress
19 test being negative. But at that time he said the
20 chest pain had resolved. And then I saw him once
21 more in November of 2004. November 10th of 2004.
22 And at that time he had been to see Dr. Grace, who
23 at that point did not feel he was ready to return
24 to work. And so I assume at that point, any
25 further work-related releases would have come from

1 him.

2 Q. So my statement was correct, other than the
3 statement we referred to of July 29th. That is the
4 only statement where you took him out of work?

5 A. Yes.

6 Q. And I do not see any statements there where you
7 authored that he was disabled.

8 A. Again, from a pulmonary standpoint, you know, there
9 was no evidence of pulmonary disability.

10 Q. But from any other standpoint, you would not have
11 authored a disability statement.

12 A. Correct.

13 Q. On the visit of July 29, 2004, ---

14 A. Uh-huh (affirmative response).

15 Q. --- in the upper left corner there are a series of
16 conditions that are marked or checked. Can you
17 look at those, please?

18 A. Yes, sir.

19 Q. And I take it that if there's a marking there,
20 which looks to be like a circle with a stripe
21 through it?

22 A. That means that that question was negative.

23 Q. That he did not have that?

24 A. Did not have that complaint.

25 Q. And on this one he was not coughing; correct?

- 1 A. Correct.
- 2 Q. Can you help me with the next one? What's it -- is
- 3 that ---
- 4 A. He was having some shortness of breath on exertion,
- 5 just, you know, on exertion.
- 6 Q. Okay. No wheezing? Is that edema?
- 7 A. No wheezing, no edema, no new allergies, no fever
- 8 or chills, no nausea, vomiting or diarrhea.
- 9 Q. Okay.
- 10 A. He was smoking four to five cigarettes a day. And
- 11 said that he did consume some alcohol.
- 12 Q. And he was oriented?
- 13 A. And he was oriented.
- 14 Q. And down at the bottom, Doctor, could you help me
- 15 with what's recorded there?
- 16 A. Well, I just said that he had post traumatic
- 17 stress, and that there was costochondritis, was
- 18 what I concluded was ---
- 19 Q Chest -- was chest wall?
- 20 A. Right.
- 21 Q. And the statement post traumatic stress; is that a
- 22 diagnosis that you were making or is someone else
- 23 making that diagnosis?
- 24 A. At -- like I said, at that point he's seeing Dr.
- 25 Grace. I have written him at that point for some

1 Zoloft, and I can't remember whether that was at
2 the request of Dr. Grace or not. Do you happen to
3 have records from him?

4 Q. I have no records in your chart. We have records
5 from Dr. Grace, but we do not have any records in
6 your chart from Dr. Grace. We do not see any
7 communication other than the -- and I was going to
8 ask you what the nature of that communication --
9 you told me ---

10 A. I may have spoken with him, but I have to say I
11 didn't record that.

12 Q. You told me a minute or two ago that there was a
13 communication of some type from Dr. Grace to
14 someone that he did not feel that he was ready to
15 return to work; that being on November 10th, 2004?

16 A. Right.

17 Q. And your memory is that you may have spoken ---

18 A. I may have spoken to Dr. Grace about that, because
19 it's also possible that he, as a psychologist can't
20 write prescriptions. So I think that I would have
21 written that at his request, perhaps.

22 Q. And so Zoloft is a prescription that you perhaps
23 wrote?

24 A. Well, I know I wrote it.

25 Q. Okay. But you may have ---

1 A. The question would be whether it might have been at
2 the request of Dr. Grace, who wouldn't be able to
3 write for medications as a psychologist, but
4 usually would work with a physician to write those
5 medications.

6 Q. And what is Zoloft?

7 A. It's an antidepressant.

8 Q. And the dosage?

9 A. Is 150 milligram.

10 Q. And that would have been how many per day?

11 A. One a day.

12 Q. That is not a pulmonology medicine?

13 A. No.

14 Q. And the next visit; when is that, Doctor?

15 A. The visit that I'm telling you about? That's

16 11/10/04.

17 Q. And that's the last visit that you had with him?

18 A. I believe that is the last time that I saw him in
19 the office.

20 Q. Doctor, there's a period that looks like about
21 eight or nine months from August 12th of 2000 --
22 I'm sorry, excuse me. I'm showing a visit of July
23 19th, 2005; is that yours?

24 A. What's that?

25 Q. Visit of July 19th, 2005. That is not yours?

1 A. No, that's -- it looks like that's Dr. Mendoza's
2 signature and writing.

3 Q. Let's see, your last visit again? I'm sorry I
4 confused that, because I thought that was ---

5 A. Was 11/10/04.

6 Q. And that is your handwriting?

7 A. 11/10/04; yes, sir. All except the handwriting up
8 in the corner that the nurses do that little
9 checklist and anything there up in that left-hand
10 corner.

11 Q. And do you know who that nurse would be?

12 A. Joan Floyd.

13 Q. Joan Floyd?

14 A. Joan Floyd.

15 Q. Is she still with you?

16 A. She is.

17 Q. Could you read for me the verbiage that is kind of
18 on the right side?

19 A. Okay. "No dyspnea in the -- in the yard working or
20 walking. Walking stops and pain is relieved." I
21 think that refers to the chest -- the chest pain is
22 only with exertion, so I've added to there,
23 "There's no shortness, dyspnea when in yard working
24 or walking. He stops and the pain is relieved.
25 Dr. Grace does not feel ready to return to work.

- 1 Not ready to return to work. Does not want to go.
2 Pain begins after working two to two and a half
3 hours. He's tender along the sternum margin."
4 Q. And would these notes have been made
5 contemporaneous with the visit?
6 A. Yes.
7 Q. And do you know what time the visit was?
8 A. What time of day?
9 Q. Yes, what time of day?
10 A. No, sir.
11 Q. How would we find out what time of day it was?
12 A. Well, I guess we could go back to our log for
13 patient visits.
14 Q. Would that be a patient log, or would it be your
15 log?
16 A. Well, I mean at our -- at our office if we still
17 have them back that far to know what time.
18 Q. And it would be called the patient's log?
19 A. Well, I mean, we keep a record of the patients'
20 scheduled appointments, so we would know what time
21 he was scheduled to be seen that day.
22 Q. But what would that document be called?
23 A. I have to say I don't know that we have a specific
24 name for it. I mean, just our patient appointment
25 record.

1 Q. Okay, and who maintains that? Who oversees the
2 keeping of those records? Do you have a practice
3 manager?

4 A. Yes, but she would not have been the practice
5 manager at that time.

6 Q. But the position would be practice manager?

7 A. Yes.

8 Q. And then the next visit to your group is the one of
9 July 19, 2005?

10 A. That is correct.

11 Q. So there's a period of about eight or nine months
12 that he did not see you and your group; is that
13 your understanding?

14 A. Yes, sir.

15 Q. And do you know why?

16 A. Well, again, we hadn't identified any pulmonary
17 issue for him to continue to need me.

18 Q. Okay.

19 A. And Dr. Grace was seeing him in terms of the issues
20 that I had referred him for, so I didn't probably
21 feel that I needed any -- you know, that he needed
22 me any further.

23 Q. Doctor, some of your physicians, I believe, are
24 involved in a research center?

25 A. That's correct.

- 1 Q. Are you?
- 2 A. Yes.
- 3 Q. In Dr. Mendoza's visit of 7/19/2005; can you switch
- 4 to that, please, sir?
- 5 A. Yes.
- 6 Q. There's a notation, again at the top, "Saw Dr.
- 7 Forgarty at research several years ago." Did I
- 8 read that correctly or can you better interpret
- 9 that for me than I did?
- 10 A. Yeah, "I saw Dr. Forgarty at" -- I think that's
- 11 research several years ago. "Sister still patient
- 12 there."
- 13 Q. And do you know whose handwriting that is?
- 14 A. It probably would have been whichever nurse or
- 15 assistant was working with Dr. Mendoza ---
- 16 Q. Mendoza?
- 17 A. --- that day, because it's clearly not Dr.
- 18 Mendoza's handwriting which is pretty recognizable.
- 19 Q. And where is the research facility located?
- 20 A. It is located just off of I-85 on -- oh, I'm sorry,
- 21 it -- I'd have to look up the address, but ---
- 22 Q. Does it a separate name other than Lung and Chest
- 23 Medical Associates?
- 24 A. Yes.
- 25 Q. What is the name?

1 A. I believe it's Spartanburg Pharmaceutical Research.

2 Q. If a patient is seen at the research center are
3 there records maintained on that patient at that
4 facility, not maintained at Lung and Chest?

5 A. Yes, that's correct.

6 Q. Have you discussed this litigation with anyone?
7 Litigation against Dr. Feldman and Dr. Boscia?

8 A. Yes.

9 Q. And with whom have you discussed it?

10 A. Well, Dr. Fogarty has told me that he was involved
11 in the deposition with this regard. And Mr.
12 Thompson's wife used to work for us, and she had
13 mentioned that she knew Mr. Casey and that he was
14 involved in a suit against Dr. Feldman and Dr.
15 Boscia.

16 Q. If you are called as a witness in this case, Dr.
17 Smith, what would be your testimony as you
18 understand it? You would testify as to the visits
19 and your treatment of him, correct?

20 A. I'm -- I will testify to whatever ---

21 Q. Whatever questions are asked ---

22 A. Are asked.

23 Q. --- but, I mean, would you -- you would answer
24 questions as to your treatment?

25 A. Sure.

1 Q. And what other areas would you feel that you are
2 knowledgeable to give information and evidence of?

3 A. Well, I am a pulmonary board certified, and so I
4 would think I would be able to answer questions in
5 that area.

6 Q. Would those areas include comments regarding care
7 and treatment rendered by Drs. Boscia and Feldman?

8 A. Yes.

9 Q. Any other areas that you think that you would be
10 qualified to render evidence -- into evidence?

11 A. Not that I can think of in this particular case.

12 Q. The procedures that were -- the operative
13 procedures that were done in this case was a
14 flexible bronchoscopy by Dr. Boscia; do you do
15 that? Do you flexibles?

16 A. Yes, I do.

17 Q. ~~And the procedure done by Dr. Feldman was a rigid~~
18 ~~bronchoscopy. Do you do that procedure?~~

19 A. ~~I have done those.~~

20 Q. When did you last do those?

21 A. It'd be years and years and years ago.

22 Q. ~~Do you consider yourself qualified to render~~
23 ~~opinions about a rigid bronchoscopy?~~

24 A. ~~I do.~~

25 Q. ~~Okay, and do you do lasering?~~

1 A. I have.

2 Q. When did you last do lasering?

3 A. Probably several years ago..

4 Q. And what type laser did you use?

5 A. I used the YAG laser.

6 Q. Was it gas operated or water?

7 A. I have -- I'm not sure.

8 Q. Do you know whether you've ever used a water cooled
9 YAG laser?

10 A. Again, I used whatever YAG laser we have at
11 Spartanburg Regional. I was the one that started
12 the laser program there.

13 Q. When did you last use a YAG laser?

14 A. I would guess four or five years ago.

15 Q. Do you have any criticisms of Dr. Boscia and his
16 treatment of Mr. Casey?

17 A. Yes, I think that -- that it could have been
18 handled differently.

19 Q. And tell me how you feel it could have handled
20 differently?

21 A. Well, the chest x-ray that was taken shows an
22 object. Because that chest x-ray is one view, you
23 cannot tell the location of that object in
24 relationship to being inside or outside the body,
25 or if it is an artifact.

1 Q. Okay.

2 A. I believe that that would have been prudent to have
3 established by x-ray whether that object was in or
4 outside the body or an artifact.

5 Q. So additional diagnostic x-rays should be taken; is
6 that your testimony?

7 A. That's correct.

8 Q. Plain film x-ray?

9 A. A plain film would have been helpful or a CAT scan.
10 would have been done in place of that.

11 Q. Okay, do you think that reaches the level of a
12 breach in standard of care?

13 A. I think it would be -- have been prudent to have
14 done in this case.

15 Q. I heard that ---

16 A. Right.

17 Q. --- but my question is, in your opinion, does that
18 reach the level of a breach in standard of care?

19 A. Yes.

20 Q. Other criticisms of Dr. Boscia?

21 A. He ordered a test which it's not apparent that he
22 followed up the result of.

23 Q. And that is?

24 A. The CT scan.

25 Q. Okay, and that CT did not show a metallic body?

1 A. That is correct.

2 Q. What is your criticism of Dr. Boscia in respect to
3 the CT?

4 A. Well, having ordered the test, he was responsible
5 to know the result of that and to communicate that
6 then, since that would have likely changed the care
7 of this patient. The working diagnosis was a
8 foreign body, and the CT failed to confirm that.
9 Therefore, he had a responsibility to communicate
10 that if he was not going to continue to be the
11 physician in charge.

12 Q. But Dr. Boscia did a flexible bronchoscopy and was
13 not able to find a metallic body; correct?

14 A. That's correct.

15 Q. So the CT confirmed what Dr. Boscia had found by
16 his procedure; correct?

17 A. That is correct.

18 Q. And did Dr. Boscia -- do you know, did he not
19 communicate to Mr. Casey his negative finding of a
20 metallic body?

21 A. Again, I do not find evidence that that was
22 communicated prior to the laser bronchoscopy.

23 Q. That Dr. Boscia's not finding a metallic body was
24 not communicated; is that your testimony?

25 A. Again, that the finding on the CT scan was not

1 communicated.

2 Q. But if the flexible bronchoscopy finding was the
3 same as the CT reading, i.e. no metallic body, that
4 was known to Dr. Boscia when he did his procedure;
5 correct?

6 A. Yes.

7 Q. Okay, and is it your testimony that Dr. Boscia did
8 not communicate that he did not find a metallic
9 body to Mr. Casey?

10 A. No, it is that as far as I can tell, the results of
11 the CT scan were not made aware to either Dr.
12 Feldman or Dr. -- or to Mr. Casey prior to the
13 laser bronchoscopy.

14 Q. But if the same fact is obtained in another method,
15 further than diagnostic study, it's determined in a
16 procedure ---

17 A. No, you're -- you're incorrect. The negative
18 finding on bronchoscopy would make me more want to
19 see what the CT showed, because now I have not
20 confirmed my initial impression. I didn't find any
21 foreign body. I thought I saw one on the x-ray.
22 What -- what's going on? Did I miss it at the
23 bronchoscopy or was it never there in the first
24 place?

25 Q. And does that reach the level of breach of standard

1 of care, in your opinion?

2 A. I do think, again, this is -- as we can see the
3 results of not communicating that have important
4 consequences. I do think that that was a mistake
5 on his part, yes.

6 Q. And you think it reaches the level of breach in
7 standard of care?

8 A. I think if he had knowledge that they were
9 proceeding to the laser bronchoscopy, and I don't
10 know that, but I -- but if he knew that they were
11 proceeding on to this other step, then yes, that
12 was a breach. If -- if ---

13 Q. All right, other criticism -- go ahead. I'm sorry.
14 I didn't mean to cut you off there.

15 A. Well, I was just going to say, if at that point it
16 had ended, if he said, I didn't find a foreign
17 body. There's not a foreign body. Then that
18 wouldn't have been -- it wouldn't have resulted in
19 any harm not to have seen the CT.

20 Q. Okay.

21 A. But since he did not find a foreign body, and he
22 didn't communicate that the CT had been done, nor
23 that it did not show anything, then that is a
24 breach. If -- if ---

25 Q. Any other criticism -- I'm sorry. Cut you off

1 twice. Excuse me.

2 A. Like I said, if he knew that there was going to be
3 a subsequent procedure that involved the risk that
4 a laser bronchoscopy does.

5 Q. Other criticisms?

6 A. Again, just that there wasn't a clear handoff of
7 this patient to Dr. Feldman, that would have given
8 Dr. Feldman all the information he needed to make
9 decisions about his subsequent procedure.

10 Q. Okay, that's not a separate criticism?

11 A. No.

12 Q. Other criticisms of Dr. Boscia?

13 A. None.

14 Q. Criticisms of Dr. Fogarty? Excuse me, Dr. Feldman?
15 Excuse me. I'm sorry.

16 A. Well, it's not apparent that he examined all the
17 clinical material available to him before
18 proceeding with this procedure.

19 Q. And what material would that be?

20 A. Well, again, the presence of the CT scan, which
21 would perhaps have changed his thinking about the
22 need for that procedure.

23 Q. Is that a breach of standard of care, in your
24 opinion?

25 A. Again, to -- it certainly would be for this

1 procedure to not have again, done those things
2 which would have confirmed that this was an object
3 in the lung.

4 Q. Okay, and again ---

5 A. So -- so if -- if he knows Dr. Boscia hasn't seen
6 an object, and if he knows the x-ray is only a PA
7 film, even if he doesn't know that the CT exists,
8 he should have wanted to get another chest x-ray to
9 confirm the presence of this object or to have
10 ordered a CT scan himself to know, was this object
11 where I think it is?

12 Q. Okay, now you're assuming that Dr. Feldman knew
13 that the plain AV film showed a metallic body;
14 correct?

15 A. Right. My understanding is that he had looked at
16 that in the emergency room when Mr. Casey first
17 appeared.

18 Q. And he had information from Dr. Boscia that Dr.
19 Boscia had done a flexible bronchoscopy and had not
20 found a metallic body?

21 A. That is correct.

22 Q. That Dr. Boscia had found abnormal tissue?

23 A. He had seen something on the bronchial wall;
24 correct.

25 Q. And based upon knowing that -- those facts and

1 proceeding with the rigid bronchoscopy, your
2 opinion is that Dr. Feldman breeched the standard
3 of care?

4 A. Well, again, there was -- without the object,
5 there's no need for rigid bronchoscopy. The -- you
6 may want to again repeat the bronchoscopy to
7 confirm the abnormality and perhaps obtain biopsies
8 of what Dr. Boscia saw. That would be reasonable.
9 But there was no need to do a rigid bronchoscopy
10 and no need to have done a laser.

11 Q. And so the bronchoscopy -- the second bronchoscopy
12 would have been a flexible?

13 A. Again, if we say there -- and Dr. Boscia says, I
14 saw something abnormal but I didn't biopsy it so I
15 don't know what it is. Then the prudent course
16 would have been to say, well, let's repeat your
17 bronchoscopy and go back and biopsy that place.

18 Q. And that would be a flexible?

19 A. That would be a flexible.

20 Q. Other criticisms of Dr. Feldman?

21 A. That would be my main criticism. It just didn't
22 seem that he had reviewed the clinical material
23 available to him, and went in not assured that
24 there was a foreign body to be found and removed.

25 Q. No other criticisms you have of Dr. Feldman that

1 reach the level of breach of the standard care?

2 A. Again, at this point I haven't reviewed the whole
3 clinical record, but of those are the things that I
4 know that I -- I felt were wrong.

5 Q. And, Dr. Smith, I'm going to ask you if you -- if
6 you form any additional opinions with respect to
7 Dr. Feldman and Dr. Boscia, if you would tell Mr.
8 Thompson or contact us and let us know that you
9 have additional opinions, we'd like to talk to you
10 about that.

11 A. Okay.

12 Q. Have you reviewed any information materials other
13 than the records created by your group?

14 A. I looked at the x-rays that were available on --
15 through the PACS system at Spartanburg Regional.

16 Q. Would that include the AP taken on May 28th, 2004?

17 A. The -- no, I have -- I had looked at that chest
18 x-ray, because at that time the emergency room was
19 not on our digital system, and of course, Dr. -- or
20 Mr. Casey had brought that with him the first time
21 he came to see me.

22 Q. Because that's the AP plain film, May 28th that
23 shows the object you have seen?

24 A. Yes, sir.

25 Q. And then you've looked at the films that were

1 available on the PACS system?

2 A. That is correct.

3 Q. Would that include the CT?

4 A. The -- yes.

5 Q. Would that include post-operative ---

6 A. I just briefly looked at the initial films in the
7 recovery room and with the insertion of the chest
8 tube.

9 Q. Anything else you've reviewed?

10 A. No, just our record here.

11 Q. Have you reviewed Dr. Fogarty's chart?

12 A. I did not.

13 Q. And Dr. Fogarty took over his care? He saw Dr.
14 Mendoza one time and then Dr. Fogarty has seen him
15 since then; is that a fair statement?

16 A. Correct.

17 Q. There have been allegations raised by the plaintiff
18 that Mr. Casey suffered an air embolism to the
19 brain and suffers cognitive dysfunction. Are you
20 qualified to render opinions regarding the nature
21 of the mechanism that would result in that injury?

22 A. Yes.

23 Q. And how so?

24 A. Well, because I have done training for laser
25 bronchoscopy, and because I began the Hyperbaric

1 Chamber Program which is a treatment for air
2 embolism.

3 Q. Do you have an opinion as to whether or not Mr.
4 Casey suffered an air embolism to the brain?

5 A. Well, now, that's a different question than you
6 just asked. What -- if you're asking, is it
7 possible to -- for the injury he sustained to
8 produce such a problem, then I can talk to that.
9 As far as for Mr. Casey individually, I have not
10 reviewed his subsequent evaluation in regards to
11 that question.

12 Q. Okay, and what evaluation would that be?

13 A. Well, you said that he had had further neuro-
14 cognitive testing. There's -- there is the first
15 page in our chart on this side shows that he's had
16 a neuro-psychological evaluation.

17 BY MR. THOMPSON:

18 Spencer, if I could just add one thing I had
19 delivered to Dr. Smith yesterday morning. It's
20 very similar to the same notebook that I provided
21 to you and Mr. Gunn at the beginning of the
22 litigation. This had some additional updates as to
23 physician records. Then it had certified hospital
24 records that were separated into the two
25 hospitalizations. And it did have Dr. Wade's

1 report. You know, all the physician reports ---

2 BY THE WITNESS:

3 Yeah, I'm sorry if I left that out that I did
4 review the depositions -- some of the depositions
5 in relationship to this.

6 BY MR. THOMPSON:

7 I don't know that he's had time to work his way
8 through that.

9 DIRECT EXAMINATION RESUMED BY MR. KING:

10 Q. Let's go back. You've told me that you're not a
11 neurologist and you're not a neurosurgeon?

12 A. Right.

13 Q. And if I understand, the brain is normally treated
14 by a neurologists and neurosurgeons?

15 A. Correct.

16 Q. Tell me your qualifications to render an opinion as
17 to an air embolism to the brain from a bronchial
18 injury?

19 A. Well, as I said, because I have had training and
20 have done laser procedures and because as a
21 physician who started the Hyperbaric Chamber
22 Program at Spartanburg Regional, that is the
23 treatment that one renders potentially for those
24 problems. And so I am aware of that through my
25 training for that.

1 Q. And what would be the mechanism as to how a rigid
2 bronchoscopy and laser would result in an air
3 embolism to the brain?

4 A. Well, you just have to create a communication
5 between an air-containing space and a vein, that
6 would result -- or artery that would result in the
7 carriage of that air to the brain.

8 Q. And would that be either the pulmonary vein or the
9 pulmonary artery?

10 A. Well, the -- the -- yes, either one would be likely
11 to be able to do that.

12 Q. And you read the records from the procedure where
13 the rigid bronchoscopy and lasering was done? Have
14 you read those records?

15 A. I have not in some time. I read those originally.

16 Q. Would it be an air bubble that would enter into the
17 pulmonary vein or the pulmonary artery?

18 A. Yes, it'd be more likely the pulmonary vein to
19 result in air that would go to the brain.

20 Q. And so there would have to be a perforation of the
21 pulmonary vein in addition to the bronchial wall?

22 A. Yes, there would need to be a communication created
23 between one of the pulmonary veins and the air
24 space. The -- in this case it'd be the bronchus.

25 Q. And what would be the condition of the patients as

1 far as signs and symptoms if a pulmonary vein was
2 invaded?

3 A. They might be restless; they might become
4 unconscious. It would depend upon the amount of
5 air that had entered. Here you have the difficulty
6 that immediately, or shortly after the event,
7 you -- the patient is intubated and sedated so the
8 evaluation of that person is rendered more
9 difficult.

10 Q. ~~Would you not have bleeding?~~

11 A. ~~Not necessarily.~~

12 Q. ~~If you invaded a pulmonary vein you would not~~
13 ~~bleed? You would not have bleeding?~~

14 A. ~~Again, the veins are lower pressure than the~~
15 ~~arteries are. And this does not have to be a large~~
16 ~~vein for there to be air to enter it.~~

17 Q. Aren't there four pulmonary veins?

18 A. Well, again, you're talking about the largest
19 veins. But yes, there would be veins on both --
20 draining both lungs.

21 Q. And so there are four?

22 A. Right.

23 Q. And this is not the veins you're talking about?

24 A. Yes, again, but you could have smaller vessels that
25 would be present. Again, you don't -- you asked if

1 you have to have a lot of bleeding for this to
2 happen ---

3 Q. Would you not have ---

4 A. --- and I don't -- I don't think that you
5 necessarily do.

6 Q. Have you treated anyone with an air embolism?

7 A. I have.

8 Q. Air embolism to the brain?

9 A. Yes.

10 Q. When?

11 A. Gosh, it's probably been 15 years ago.

12 Q. And what was the mechanism that caused that air
13 embolism?

14 A. They were getting hyperbaric treatment and had
15 developed some hemoptysis inside the chamber.

16 Q. What was the initial injury that this person
17 suffered?

18 A. They were being treated for a foot problem.

19 Q. That was 15 years ago?

20 A. Probably so.

21 Q. What is the texture, tissue, or what -- help me
22 with the word of the bronchial wall?

23 A. The texture?

24 Q. Tissue or what's it composed of? What's the
25 bronchial wall made of?

1 A. Squamous cell in that -- in the larger bronchi.

2 Ciliated bronchial cells. I'm not sure what

3 I'm --

4 Q. Is it easily perforated? Is it easily punctured?

5 A. No, sir.

6 Q. Is it like cartilage?

7 A. Well, it's surrounded by cartilage through a lot of
8 its cores.

9 Q. And do you intend on rendering an opinion as to
10 whether or not Mr. Casey suffers from cognitive
11 dysfunction as a result of an air embolism?

12 A. I'm not an expert in that area.

13 Q. So the answer is no?

14 A. No.

15 Q. Okay.

16 A. Is the possibility that there would be
17 communication -- perforation of the bronchial wall
18 with a pulmonary vein that could result in an air
19 embolism to the brain, does this reach the level of
20 a probability of medical certainty?

21 A. I don't think you can say that it was with probable
22 certainty that this happened.

23 BY MR. KING:

24 Excuse me just a minute.

25 (OFF THE RECORD).

1 BY MR. KING:

2 No more questions. Mr. Gunn has some.

3 EXAMINATION BY MR. GUNN:

4 Q. Dr. Smith, I represent Dr. Shantha in the case.

5 A. Yes.

6 Q. And I believe that I can be somewhat brief with
7 you.

8 A. Yes, sir.

9 Q. Let me ask you this, I think from some of what
10 you've said earlier, that you have not reached any
11 opinions or drawn any conclusions about the
12 standard of care by Dr. Shantha?

13 A. No.

14 Q. And would not consider yourself in fairness
15 qualified to do so?

16 A. Correct.

17 Q. Board certification. You are board certified in
18 pulmonology; are you not, sir?

19 A. I am.

20 Q. And when were you first board certified?

21 A. '82.

22 Q. And that's the one that you're in the group that
23 you don't have to get board recertified?

24 A. That's correct.

25 Q. Do you consider board certification in a specialty,

1 well, particularly in your primary line of work,
2 pulmonology, to be an additional measure beyond
3 just a medical license of competence in your field?

4 A. Yes, I think it has grown to that that if you are
5 going to present yourself as an expert in that area
6 that board certification would be a requirement.

7 Q. It's a demonstration. It's a good objective, fair
8 demonstration of that professional competence?

9 A. And the hospitals are requiring it now for you to
10 be able to put yourself forward as an expert in
11 that area.

12 Q. Such as our hospital here, Spartanburg Regional
13 Medical Center?

14 A. That's correct.

15 Q. And how long has that been the case that
16 Spartanburg Regional requires that board
17 certification, if you know? Just approximate it
18 for me?

19 A. I would say we're talking within the last decade.

20 Q. I take it -- and Dr. Smith, for example, if you had
21 a close friend or a loved one in some locality of
22 the United States that needed the services of a
23 pulmonologist and it just so happened that you
24 didn't know anybody in that area, you'd get in a
25 directory of some type. And the first thing that

1 you would look for, or one of the first things that
2 you would look for is board certification, isn't
3 it?

4 A. Well, you'd look where they trained, and their --
5 and that they are boarded.

6 Q. All right, sir, let me ask you this. This is along
7 the lines of the last several question exchanges
8 that you and Mr. King had. You indicated that --
9 I'm trying to sort of speed it along by trying to
10 kind of summarize what you said, and if I misstate
11 it you jump right in there and correct me.

12 A. Okay.

13 Q. I thought I understood you to say that a patient
14 such as Mr. Casey, it is possible to suffer an air
15 embolism that travels to the brain; is that a
16 fair ---

17 A. Yes.

18 Q. --- summary of it?

19 A. Yes.

20 Q. And I think you further said that in order for that
21 to happen there has to be a communication from the
22 air source, in this instance, the bronchus to the
23 pulmonary artery or vein, and then, in this
24 instance, mostly likely the vein?

25 A. That's correct.

1 Q. When you use the term "communication," list for me,
2 if you can, the modes of communication that you're
3 talking about. I mean, would it ---

4 A. With all -- well, with the laser you have made a
5 hole.

6 Q. Okay.

7 A. Now that hole could be into a large vein; it could
8 be into the lung. We have a situation in which
9 there was a pneumothorax on that side. We can't --
10 the other possibility is that the lung has been
11 entered and that the lung then is distended as it
12 would be after intubation and mechanical
13 ventilation, it's possible for the air to be forced
14 into the vein.

15 Q. All right, sir. In that instance, sir, would you
16 not expect to see some manifestation of physical
17 injury in some fashion?

18 A. Physical injury where?

19 Q. To the patient? Well, anywhere? I think I'm
20 looking for answers.

21 A. Are you talking about the symptoms on the part of
22 the patient?

23 Q. Yes, sir.

24 A. Yes.

25 Q. What would you expect to see?

1 A. You could. You would see again, confusion if they
2 were awake. You might, if it was large, see some
3 focal neurologic deficit. You could have, ---

4 Q. By that --- by a focal neurologic ---

5 A. --- weak --- weakness of one extremity, loss of
6 vision, something that would be more specific for a
7 stroke in that area. But the symptoms also could
8 be subtle, and just --- it just could be agitation,
9 restlessness, or confusion.

10 Q. Indeed, would you not expect at some point to see
11 some manifestation of the injury on imaging?

12 A. No.

13 Q. MRI most probably?

14 A. No.

15 Q. Might or might not?

16 A. Not necessarily. And it would have to be some kind
17 of specific studies done to look for that
18 possibility.

19 Q. And if it was --- and if such a study was done and
20 was negative, would that --- I know it wouldn't be
21 conclusive, but would that guide you away from that
22 injury? There'd be some evidence of non-injury?

23 A. Again, it certainly is helpful if it's positive.
24 It's not a conclusive negative.

25 Q. Right. Okay.

1 A. Okay. And the time course is important as well,
2 since these, if they are small, may disappear.

3 Q. And if they're small and they would disappear,
4 would you not expect any sequelae to disappear, or
5 would you leave that up to a neurologist or ---

6 A. Well, again, this would depend on the amount and
7 the location of where the -- they had produced
8 occlusion of flow.

9 Q. Would you defer to a neurologist or, I guess,
10 whatever Dr. Grace is?

11 A. Well, not a psychologist, but certainly you --- a
12 neurologist would be the -- the one with the
13 expertise in this area to assess the damage.

14 BY MR. GUNN:

15 I think I'm about through. Let me check, because
16 this is kind of a speak now or forever hold your
17 peace. Okay, that's all, sir. Thank you very
18 much.

19 EXAMINATION RESUMED BY MR. GUNN:

20 Q. Let me ask you this. You still do procedures, do
21 you not, sir, where patients are put to sleep?

22 A. And when you -- define "put to sleep" for me.

23 Q. Well, that require the services of an
24 anesthesiologist?

25 A. That's pretty unusual for us to require an

1 anesthesia. More often we get called in to help
2 them with a difficult intubation, something like
3 that.

4 Q. Oh, okay. But I mean, what type of procedures do
5 you do presently in your practice that require a
6 patient in the surgical suite?

7 A. Probably the one where we might do that would be,
8 again, the removal of a foreign body. But I have a
9 partner who we usually defer those to.

10 Q. Do you do -- you indicated earlier that you do do
11 flexible bronchoscopy?

12 A. Yes, sir. But there we use what's called moderate
13 sedation where a nurse under our direction
14 administers a cocktail of drugs to produce
15 sedation.

16 Q. Sort of like a similar situation with a
17 colonoscopy?

18 A. Yes, exactly.

19 BY MR. GUNN:

20 All right, sir. Thank you.

21 BY THE WITNESS:

22 And the other thing I'd add, just to extend on
23 yours, because now I remember I did need the
24 services of an anesthetist when we do procedures
25 down at The Village, their bronchoscopies are

1 handled by the nurse anesthetist.

2 BY MR. GUNN:

3 Gotcha. Thank you, sir.

4 CROSS EXAMINATION BY MR. THOMPSON:

5 Q. Dr. Smith, I'm going to have just a few questions
6 for you in follow-up. Have you seen this consult
7 history and physical and summary. I believe it's
8 dated 5/28/04 of Dr. Joseph A. Boscia?

9 A. Yes.

10 Q. And I've highlighted several places in yellow which
11 can be copied after the deposition. But do you see
12 in the history of present illness, if you can read
13 where it starts, "Initial chest x-ray."

14 A. "An initial chest x-ray on admission showed what
15 appeared to be a foreign body in the left main stem
16 bronchus. I am being asked to comment on this."

17 Q. And under physical examination where it starts,
18 "Chest x-rays have been reviewed."

19 A. "Chest x-ray has been reviewed and it does show
20 what appears to be an irregular metallic foreign
21 body in the left main stem bronchus."

22 Q. And in the summary just below that, if you could
23 read the first sentence?

24 A. "46-year-old gentleman with what appears to be a
25 foreign body in the left main stem bronchus. Will

1 perform fiberoptic bronchoscopy to see if this
2 foreign body is removable."

3 Q. And the portable AP chest x-ray that Dr. Boscia is
4 referring to that was taken upon Ms. Casey's
5 arrival at Spartanburg Regional on 5/28/04, have
6 you had a chance to study that x-ray?

7 A. Yes, I have.

8 Q. And where it's stated there in the consult history
9 and physical and summary that the foreign metallic
10 body appeared to be in the left main stem bronchus,
11 is that consistent with your review and
12 interpretation of that x-ray?

13 A. Well, I have to say that the foreign body, which
14 looks like a small screw, looks to be actually
15 above the bronchus rather than inside the bronchus.

16 Q. And so when you compare your interpretation of the
17 x-ray to what Dr. Boscia has here, if the metallic
18 foreign object projecting on the portable AP x-ray
19 is not within the left bronchus, would it be
20 accessible either by flexible or a rigid
21 bronchoscopy procedure?

22 A. No.

23 Q. So if the x-ray was initially misinterpreted by Dr.
24 Boschia in that the metallic foreign body was
25 actually outside the bronchus, then the flexible

1 bronchoscopy procedure for removal of the foreign
2 body, would that be a necessary or an unnecessary
3 medical procedure?

4 A. It would be unnecessary.

5 Q. And whether or not the metallic foreign body
6 projecting on the single portable AP chest scan,
7 even if it shows it's outside the bronchus, would
8 the standard of care still require Dr. Boscia to
9 obtain a PA and lateral x-ray in order to determine
10 whether or not the object is actually within the
11 body and the approximate location within the body?

12 A. Yes, I think that would be prudent to do to
13 establish the exact location of the object.

14 Q. And in the summary there of that two-page
15 document ---

16 BY MR. THOMPSON:

17 I'd like to go ahead and get this marked, ma'am, if
18 I could, as Plaintiff's Number 1.

19 (COURT REPORTER MARKS TWO-PAGE DOCUMENT AS PLAINTIFF'S
20 EXHIBIT NO. 1; ATTACHED TO DEPOSITION).

21 CROSS EXAMINATION RESUMED BY MR. THOMPSON:

22 Q. In the summary, does Dr. Boscia indicate that he
23 plans to do the fiberoptic bronchoscopy on 5/28 in
24 an attempt to remove this foreign body which ---

25 A. He does.

- 1 Q. And then characterizes as metallic?
- 2 A. Yes.
- 3 Q. I'm going to show you the consent form of the
- 4 flexible bronch procedure 5/28. And it appears to
- 5 have the signature of William M. Casey and it looks
- 6 like possibly Christy Lockhart witnessed it?
- 7 A. Lockhart, uh-huh (affirmative response).
- 8 Q. It's hard for me to make out, but would you know
- 9 that to be possibly the signature of Dr. Boscia?
- 10 A. I believe that's ---
- 11 Q. And where you have number 1 on the consent form,
- 12 and it has -- I'll just read the first part of it,
- 13 "I authorize and direct Drs. Feldman, Boscia and
- 14 such assistants as may be selected by him/her to
- 15 perform the following procedures upon me: tube in
- 16 lungs to obtain specimen as needed." If the
- 17 procedure is to attempt to remove what is believed
- 18 to be a foreign metallic body from the left main
- 19 stem bronchus, is that an adequate description of
- 20 the procedure to inform the patient, in your
- 21 opinion, as a physician?
- 22 A. Well, I'll have to say, that's our standard consent
- 23 form that we use. So I don't have any problem with
- 24 the consent.
- 25 Q. And Dr. Feldman -- let me find his consent form.

1 There is a consent form that I've handed you dated
2 6/3/04 and it has the name of the patient, William
3 Casey. And number 1, where it has "to perform the
4 following operations upon me." It's blank after
5 that; correct?

6 A. Well, actually he gives a description down below,
7 still under number 1, of the procedure he was going
8 to do.

9 Q. Okay. And it doesn't identify the doctor who is
10 going to do the procedure, does it?

11 A. Well, it says that "Dr. Feldman has explained to me
12 my conditions."

13 Q. But as far as number 1 where it has a slot to
14 identify ---

15 BY MR. KING:

16 Object to the -- objection to the form of the
17 question.

18 WITNESS ANSWERS:

19 A. Again, I'd have to say, this is our standard
20 consent form that we use. And I think the
21 assumption would be that if Dr. Feldman had
22 explained the procedure and signed the consent that
23 he would be the physician doing the procedure. I
24 have to say, I don't see any problem with this.

25 Q. Okay. And the "time" there is left blank. In this

1 situation where there's been testimony that this
2 was completed by Dr. Feldman in his handwriting and
3 executed in the holding room next to the main OR
4 just prior to the procedure, do you attach any
5 significance that it doesn't have time as to when
6 this was obtained?

7 A. I mean, I don't -- I don't find that a problem.

8 Q. Okay.

9 A. I mean, certainly they're on us all the time to
10 time and date. And I guess we see to some extent
11 why that's helpful. But again, I'd have to say the
12 majority of the time, on my own consents, we just
13 get the date and so I don't see that that's a
14 problem. They require us to have this within 48
15 hours of the procedure. So if the date was
16 appreciably different from the date of the
17 procedure, that might be a problem. But the fact
18 he didn't put the time there, I don't -- I don't
19 have a problem with.

20 Q. And where it has "Description of Operation in
21 Language of Laymen," could you read that for me?

22 A. Yes, it shows "rigid bronchoscopy and laser and
23 removal of foreign body."

24 Q. And language of laymen, would your typical layman
25 understand what a rigid bronchoscopy with a YAG

1 laser and -- plus removal of foreign body, would a
2 typical layman understand what that is, from that
3 language?

4 A. Well, I'd have to say, with that patient having had
5 a previous flexible bronchoscopy and having the
6 impression that there was a foreign body there,
7 yes, I think that would be enough for him to
8 understand what was about to take place.

9 Q. Is it clear to you that the purpose is for the
10 removal of the foreign body?

11 A. Yes, sir.

12 Q. And in that, Dr. Feldman has testified in his
13 deposition, and also responded to interrogatory
14 requests that he never read the radiology report of
15 his CT scan which was negative for metallic foreign
16 body or any other radiopaque chest foreign body,
17 and in fact was not even aware that such a CT scan
18 had been scheduled at the request of Dr. Boscia.
19 And also he never communicated the negative results
20 of the CT scan to Mr. Casey. Do you think that Mr.
21 Casey was given adequate information to be able to
22 grant an informed consent for this particular
23 procedure to remove what has been characterized as
24 a metallic foreign body from his left main stream
25 bronchus, not knowing that?

1 BY MR. KING:

2 Objection.

3 CROSS EXAMINATION RESUMED BY MR. THOMPSON:

4 Q. Not having been told that?

5 BY MR. KING:

6 Objection to the form of the question.

7 WITNESS ANSWERS:

8 A. Well, I would surmise, had he been told that no
9 foreign body had been identified, that that would
10 have changed his willingness to consent to that
11 procedure, yeah.

12 Q. And I'm going to ask you to assume that Dr. Feldman
13 has testified, and I could bring out the
14 Interrogatory Responses, but it's clearly indicated
15 that he did not communicate that to Mr. Casey and
16 Dr. Boscia did not communicate that to Mr. Casey.
17 And assuming that Mr. Casey did not have that
18 knowledge, then the lack of his being told of those
19 results would you consider this a informed consent
20 or a defective consent?

21 BY MR. KING:

22 Objection to the form of the question.

23 WITNESS ANSWERS:

24 A. Well, I guess I'm ---

25 Q. And I'm not asking just about the form, because --

1 I'm asking about the information provided to the
2 execution of the form, which I've asked you to
3 assume that it -- the negative CT results were not
4 ever communicated to Mr. Casey by Dr. Feldman or
5 Dr. Boscia and it appears by no one else.

6 BY MR. KING:

7 Are you finished? Mr. Thompson, are you finished
8 with the question?

9 BY MR. THOMPSON:

10 Yes.

11 BY MR. KING:

12 Objection to the form of the question.

13 BY MR. THOMPSON:

14 You can go ahead and answer.

15 WITNESS ANSWERS:

16 A. Well, I -- again, this is asking me to make a lot
17 of assumptions here. But again, I just say, if he
18 had known there wasn't a foreign body, he probably
19 would have made a different approach to the
20 consent.

21 Q. And having said that, is that something that should
22 have been communicated to him by Dr. Feldman?

23 A. Again, had he known that, yes, he should have
24 communicated that. But I don't have any
25 information that says that Dr. Feldman knew that

1 prior to beginning the procedure.

2 Q. Is it a responsibility of a surgeon, such as Dr.
3 Feldman, to review the patient's chart prior to the
4 procedure?

5 A. Well, it is his responsibility to review the
6 pertinent medical record.

7 Q. And I want you to assume that Dr. Peter Ryan's
8 radiology report on the 5/28 CT scan was in the
9 chart as testified by Mr. Gunn's client, Dr.
10 Shantha at ---

11 BY MR. GUNN:

12 Dr. Shantha.

13 BY MR. THOMPSON:

14 Excuse me, Dr. Shantha.

15 CROSS EXAMINATION RESUMED BY MR. THOMPSON:

16 Q. At 11:00 p.m., less than an hour before the
17 procedure?

18 A. Well, I -- again, as I said earlier, I think it
19 would have been imperative of him to have obtained
20 that or some other study to confirm that this
21 object was where it was thought to be. But I don't
22 know that I can say that he's required to know
23 about an x-ray that he didn't know was taken.

24 Q. Dr. Smith, you had mentioned an x-ray, I think when
25 I believe I was referring to the CT scan?

1 A. Yes, sir.

2 Q. And I've got his deposition and I can pull out and
3 go to the specific entries if anyone would care for
4 me to, but he testified in his deposition that he
5 had not read the radiology report, Dr. Peter Ryan,
6 as to the portable AP x-ray. He also testified
7 that he had not read Dr. Ryan's radiology report as
8 to the CT scan which was negative. He further
9 testified that he had not read the history and
10 physical of the ER physician, Dr. Leshman. He
11 further testified that he had not read the
12 monitoring notes from the ER from approximately
13 9:37 to 2:15 on 5/28/04 and he did not see Mr.
14 Casey after his discharge on the 29th until the
15 morning of the surgery in the holding room. If he
16 had not previously read those things and there was
17 a chart -- would the standard of care not require
18 him to read those before he goes in and does his
19 procedure?

20 BY MR. KING:

21 Objection to the form of the question.

22 WITNESS ANSWERS:

23 A. Well, here's what I would say, is that in the
24 absence of an emergency situation, it is prudent to
25 separate your assessment of the patient from the

1 procedure so that you do have an opportunity not
2 under time pressure to review those things that are
3 pertinent to going ahead with the procedure. And I
4 think that was one of the things that did end up
5 resulting in what happened, was that a visit to his
6 office before hand where he could have seen the
7 patient and established what had been done and
8 hadn't been done in assessment, might have
9 prevented this from happening.

10 Q. For that relevant medical information to be
11 immediately accessible to him and his having failed
12 to review it, would you consider that a breach of
13 the standard of care in going forward with the
14 procedure?

15 BY MR. KING:

16 Objection to the form of the question.

17 WITNESS ANSWERS:

18 A. I don't think it's a breach of the standard of care
19 so much as it allows for mistakes to occur to have
20 yourself under time pressure, which we always are
21 if you do a case in the OR, you're dependent on the
22 case in front of you finishing. The guy behind you
23 is waiting for you to get done on time. You can't
24 make the same level of assessment that you can
25 prior to going ahead with what is a fairly invasive

1 procedure. Again, under certain circumstances you
2 end up doing this, but this is not what you would
3 consider ideal way to handle this procedure.

4 Q. Just a couple more questions. As noted on the
5 consent form dated 6/3/04, rigid bronchoscopy with
6 laser, plus removal of foreign body. And the
7 foreign body having been consistently referred to
8 as a "metallic foreign body." This being done in
9 the main OR under general anesthesia, what is your
10 consideration of using that laser as indicated in
11 his operative note?

12 BY MR. KING:

13 Objection to the form of the question.

14 WITNESS ANSWERS:

15 A. Well, the problem as I see it is there is clearly
16 no foreign body identified on the CT scan. So that
17 throws the whole need to do this in question. Like
18 I say, I don't have a problem with saying, I need
19 to repeat the bronchoscopy because Dr. Boscia has
20 found something abnormal, but I don't see where a
21 rigid bronchoscopy or a laser comes into play in
22 doing that. And certainly in using the laser, one
23 wants to be very sure about what you're doing
24 because this is many steps above in terms of risk
25 from a routine bronchoscopy. And I think unless

1 you clearly have seen what you're going to do, that
2 you're taking a lot of risk, unless you're very
3 sure that there is an object there that you're
4 going to find and remove.

5 BY MR. THOMPSON:

6 If you'll mark that. I've referred to it. And if
7 you can mark this for me. I believe this is Dr.
8 Feldman's operative note.

9 (COURT REPORTER MARKS DOCUMENTS AS PLAINTIFF'S EXHIBIT
10 NO. 2 and 3; ATTACHED TO DEPOSITION).

11 CROSS EXAMINATION RESUMED BY MR. THOMPSON:

12 Q. And Dr. Smith, are you familiar with Dr. Feldman's
13 operative note?

14 A. Yes, I've read it.

15 Q. Do you see in there where he makes mention to
16 centering the laser on what appeared to him to be a
17 crown and applying pulses and believing that it had
18 been vaporized?

19 A. Yes.

20 Q. And with the history of the object having
21 consistently been identified as metallic in nature,
22 do you consider that acceptable treatment or is
23 that a deviation from the standard of care?

24 BY MR. KING:

25 Objection to the form of the question.

1 WITNESS ANSWERS:

2 A. Well, it just -- again, I'm concerned that we have
3 proceeded with the laser without clearly
4 identifying that we've got what we thought we had.
5 And that the object that was -- that appeared on
6 the chest x-ray, which all this came about, was
7 clearly a metallic object that resembled a screw.
8 It did not resemble a crown or anything that would
9 have come from somebody's tooth. So now we've
10 found something for which we don't know for sure
11 what we're dealing with and yet instead of
12 establishing that diagnosis, we proceeded with the
13 laser. And I think that's where we've gotten into
14 trouble is having not found what we expected, we
15 proceeded with the laser.

16 Q. So having not been aware of the negative chest CT
17 scan and proceeding with a laser for removal of
18 what has been consistently referred to as a
19 metallic foreign body, would it be a deviation from
20 the standard of care, not -- for Dr. Feldman not to
21 have taken additional diagnostic procedures to get
22 a definite confirmation of the presence of that
23 foreign body in the bronchus of Mr. Casey?

24 BY MR. KING:

25 Objection to the form of the question, if that's a

1 question.

2 WITNESS ANSWERS:

3 A. Well, I certainly think it would have been a
4 more -- a more acceptable and prudent course to
5 have tried to establish what I was dealing with
6 when it was not what I thought I was going to go
7 and find. And it doesn't -- I think it somewhat
8 sounds like this area was different than the area
9 that Dr. Boscia had identified. So again, I would
10 be concerned about what I was -- what I was dealing
11 with and therefore it would have been prudent to
12 have been -- to establish the diagnosis before
13 proceeding with the removal.

14 Q. And when you say "prudent," in responding to my
15 question, I think it was going forward without
16 having taken additional diagnostic tests --
17 ordering additional diagnostic tests to get a
18 clear, definite confirmation of the presence of
19 this metallic foreign body in Mr. Casey's bronchus.
20 Do you or do you not agree ---

21 A. Well, see what I go back to is not having
22 established that object was not there, you approach
23 it with a different mindset than if you are going
24 in and you know that -- not for sure there's
25 anything there. Now, I assume that what they

1 thought they saw here was something related to this
2 original presumed object and that he was going to
3 therefore remove it. So the error is made earlier
4 in the line that leads to proceeding with something
5 that wasn't necessary.

6 Q. So is it your testimony that this second procedure
7 carried out by Dr. Feldman on 6/3/04 was medically
8 unnecessary?

9 BY MR. KING:

10 Object to the form of the question.

11 WITNESS ANSWERS:

12 A. This particular procedure, no, was not indicated,
13 had he known what was to be known prior to this
14 procedure.

15 Q. And is that the same as saying medically
16 unnecessary?

17 A. It was medically unnecessary. As I said, though, a
18 repeat flexible bronchoscopy would have been
19 reasonable based on Dr. Boscia's finding.

20 BY MR. THOMPSON:

21 Thank you, Dr. Smith, I have nothing further.

22 BY MR. KING:

23 Thank you, Doctor.

24 (There being no further questions, this deposition was
25 concluded at approximately 5:24 p.m.)

HISTORY OF PRESENT ILLNESS: This 46-year-old smoking male presented to the hospital for chest pain. An initial chest x-ray on admission showed what appears to be a foreign body in the left mainstem bronchus. I am being asked to comment on this. This patient complains of pain in his chest that is sharp that goes directly straight to his back. There is a history of cough. No history of hemoptysis.

PAST MEDICAL HISTORY: includes hypercholesterolemia. No history of hypertension or diabetes.

SOCIAL HISTORY: He has a 25 pack year smoking history. He works at Michelin.

FAMILY HISTORY: Is noncontributory.

REVIEW OF SYSTEMS: Includes all mentioned in history of present illness. Also, he has chronic back pain, occasional headaches, occasional constipation. All other review of systems are negative.

PHYSICAL EXAMINATION: He appears well in no acute respiratory distress. Blood pressure is 150/90, pulse is 84. Pupils react to light. The oral mucosa is moist without thrush. Neck is supple. Heart is regular. Lungs are clear bilaterally. Abdominal exam reveal no hepatosplenomegaly. Extremities are without clubbing, cyanosis or edema. Skin is intact with no rashes. Joints are not inflamed. Neurologically, cranial nerves II through XII are intact without focality.

Chest x-rays been reviewed in it does show what appears to be an irregular metallic foreign body in the left mainstem bronchus.

IN SUMMARY: 46-year-old gentleman with what appears to be a foreign body in the left mainstem bronchus. He has consented to fiber-optic bronchoscopy which would be the most reasonable next step. Will perform fiber-optic bronchoscopy to see if this foreign body is

CONSENT FOR
OPERATIONS AND ANESTHETICS / DIAGNOSTIC AND TREATMENT PROCEDURES

Date: 6-3-04 Time: _____ M

Name of Patient: William Casey

1. I authorize and direct Doctor(s) _____
and/or such assistants as may be selected by him/her to perform the following operation(s) upon me: _____

☐ MODERATE SEDATION ADMINISTRATION: I have been informed of the risks, benefits, potential complications and options for moderate sedation and I agree to proceed.

Description of operation in language of laymen: RIGID BROW LIFT

2. Dr. Gregory has explained to me my condition and the procedures which will be used in the operation(s). No guarantee or assurance has been made as to the results that may be obtained; and he/she has advised me of the risks and consequences, including possible complications of doing this procedure as well as not doing this procedure. He/she has advised me of the other methods and procedures of treating my condition and has answered all my questions concerning those methods.

3. I recognize that during the course of the operation(s) unforeseen conditions may necessitate additional or different operations and procedures than described above. I authorize and request that the above named physician and/or his assistants perform such operations and procedures as are, in his/her professional judgment, necessary and desirable.

4. I consent to the administration of such anesthetics as may be considered advisable by the physician responsible for this service with the exception of: _____
State exception if desired: _____
The physician responsible will discuss all risks, benefits, complications and alternatives prior to the above procedure.

5. I consent to the disposition by hospital authorities of any tissues which may be removed during the course of the operations and procedures.

6. I DO, DO NOT consent to the taking of photographs of myself by hospital authorities for the purpose of medical study or research only, before, during or after the operations and procedures. (Please circle one)

7. I DO, DO NOT consent to the presence of medical observers before, during or after the operations and procedures. (Please circle one)

8. I, THE UNDERSIGNED, HAVE READ AND FULLY UNDERSTAND THIS CONSENT FORM AND IT HAS BEEN EXPLAINED TO ME, TO MY SATISFACTION.

OF REPORTS
 PATIENT NAME: CASEY, WILLIAM
 DOB: [REDACTED]/1958
 MEDICAL RECORD #: 146220
 PROCEDURE DATE: 6/3/04
 ACCOUNT NUMBER: 415400048
 ROOM:

ICU

PROCEDURE PERFORMED: Rigid bronchoscopy with laser bronch.

ENDOSCOPIST: Dr. Feldman.

INDICATIONS FOR PROCEDURE: 45 year old had been worked up by Dr. Paladugu and my partner, Dr. Boscia, with the finding of abnormal granulation tissue and abnormal subsegment in the left upper lobe corresponding to what appeared to be a crown foreign body on chest x-ray. The patient is now undergoing procedure in attempt to remove of chest x-ray abnormality suggestive of a crown; the patient does have a history of a missing crown.

After general anesthesia was induced, the patient was intubated with a rigid bronchoscope, size 16, without any difficulty. Careful inspection of the tracheobronchial tree was undertaken. The entire tracheobronchial tree was examined, there was no finding of a foreign body, however, a quite abnormal subsegment in the left upper lobe which appeared to be a pouch/granulation tissue has been identified. Laser of the area has been done with 45 watts over a 2-second period. Granulation tissue has been vaporized with the appearance of what appeared to be crown lying on the surface. With using 35 watts energy of the laser, there was no possibility of removal of the crown because it was deeply imbedded, and laser energy was applied to the center of the crown and it has been vaporized. However, below the surface there has been no further foreign body seen. The assumption was made that the entire crown other than on the surface had been vaporized, and attempt to pull it with a biopsy forceps and passage of the basket was unsuccessful. The washings were done of the area, and the procedure was terminated. The patient was extubated in recovery.

Although the patient did quite well during the procedure, he suddenly developed considerable pneumomediastinum and having immediately arrived to the bedside, Dr. Nguyenduy's consultation has been obtained. The decision was done by Dr. Nguyenduy and myself to place a chest tube, because of the impossibility to rule out pneumothorax, however, chest x-ray does not show pneumothorax, there is no foreign body seen, and also endotracheal tube is in good position. The patient was intubated by Anesthesia prior to that.

IMPRESSION: It is unclear to me at this point whether the laser went through the cartilage, and since I have not identified or pulled the crown itself, if in fact there was a crown it has been vaporized and is no longer seen on x-ray. At this point the patient will transfer to the ICU,

antibiotics will be administered for disruption of the bronchus and pneumomediastinum. This will be followed by CT surgery and certainly if air leak into the pneumomediastinum would not stop, surgical intervention will be required. Hopefully this can be avoided by conservative management, but it is uncertain to me at this time whether the crown was vaporized or essentially the laser went through the highly abnormal area of the lung suggestive of closed congenital pouch rather than a foreign body, and significant irritation from previous bronchoscopy.

REPORT OF NEUROPSYCHOLOGICAL EVALUATION
Confidential-For Professional Use Only

Name: William Mark Casey

Age: 46 (DOB: [REDACTED] /58)

Sex: Male

Handedness: Right

Dates of Evaluation: August 30th and September 10th, 2005

Reason for Referral: William Mark Casey is a 46-year-old Caucasian male referred for neuropsychological evaluation through the offices of Ken Anthony, Esquire, and Ray E. Thompson, Jr., Esquire. The evaluation was conducted to assess Mr. Casey's brain behavior functions and emotional status. Mr. Casey's difficulties stem from medical procedures that were conducted due to recurrent chest pain in May of 2004. An emergent bronchoscopy was conducted following x-rays reportedly revealing a metallic fragment in the chest area. Reportedly, the bronchoscopy did not show a foreign body, but an area of erythema. The following week, Mr. Casey underwent a laser bronchoscopy that resulted in a perforation of the bronchial wall by the laser with resulting pneumomediastinum and respiratory distress necessitating intubation and heavy sedation. Subsequent to this, Mr. Casey has experienced disruptive symptomatology that has rendered him unable to return to employment capacities at the Michelin Company.

Relevant History: Mr. Casey was on time for his scheduled appointments. I reviewed with him the occurrence of chest pain for several weeks in May of 2004 while he was employed at resulting in him reporting it to the company nurse. Subsequently, he was transported to Spartanburg Regional Medical Center and underwent emergent evaluation. Medical records reveal that during the evaluation, Mr. Casey was found to have a left main bronchus containing some foreign body that was metallic in nature. Mr. Casey was seen in consultation by Dr. Feldman who asked Dr. Boscia to do a fiberoptic bronchoscopy. Reportedly, this procedure was undertaken but no piece of metal was found. Mr. Casey was discharged on 5/29/04.

Medical records reveal that Mr. Casey was re-admitted on June 3rd, 2004 and underwent an additional procedure conducted by Gregory Feldman, M.D. This involved bronchoscopy with laser. Acutely following the procedure, he developed considerable pneumomediastinum with reported pneumothorax on the left side. His condition necessitated placement of chest tubes, intubation and mechanical ventilation.

My understanding of Mr. Casey's case was assisted by review of the following medical records:

1. Extended medical records for treatment provided upon admission on 5/28/04 and 6/03/04.
2. Records from Spartanburg Regional Medical Center for procedures conducted in July of 2000.
3. Treatment records from Upstate Lung and Critical Care Specialists.
4. Treatment records from Lung and Chest Medical Associates.
5. Treatment records from Jeffrey Smith, M.D., Piedmont Psychiatric Services.
6. Treatment records from Joseph Grace, III, Ph.D.
7. Treatment records from Y. Eugene Mironer, M.D.
8. Mr. William Mark Casey's educational records from Spartanburg County School District #6.

GUNN 004140

Review of records revealed that Mr. Casey experienced disruptive symptoms following the procedure conducted on June 3rd of 2004. Initial follow-up treatment was provided at Upstate Lung and Critical Care Specialists with Mr. Casey complaining of fatigue, sleep disturbance, chest tightness, as well as being agitated and "unable to sit down." There was also report of longstanding chronic back pain. There was conservative intervention including use of Ambien. Difficulties persisted, and there was referral to Carolina Center for Advanced Management of Pain. Mr. Casey underwent evaluation by Eugene Mironer, M.D. He was assessed with mechanical low back pain, depression, and chest wall pain of no muscular origin. There was discussion regarding his treatment options.

Medical records reveal that Mr. Casey sought further evaluation for his difficulties at the Lung and Chest Medical Associates. Evaluation by Wilton P. Smith, Jr., M.D. reviewed the recent surgical procedures, noting that Mr. Casey remained with dyspnea and chest pain with exertion. Dr. Smith assessed Mr. Casey as being very anxious with report from family members noting a change in his ability to tolerate stress. It was noted that Mr. Casey was unable to participate in golf and other recreational activities. Dr. Smith's impression was that pulmonary functioning was normal and chest x-rays failed to show any evidence of sequelae of his bronchial perforation. Dr. Smith expressed concern that Mr. Casey may be experiencing a Posttraumatic Stress Disorder related to his injury and intensive care unit experience. There was recommendation of referral for a psychologist for further evaluation.

Records reveal that Mr. Casey subsequently came under the care of Joseph G. Grace, III, Ph.D. Care appeared to commence on August 4th, 2004. Initial medication intervention was coordinated with Frank Gonda, M.D., Mr. Casey's family physician. Subsequently, there was referral for psychiatric care with Jeffrey Smith, M.D. Treatment has been directed toward Mr. Casey's depression, sleep disturbance, anxiety, restlessness, irritability with low frustration tolerance, and poor stress tolerance. There has been use of antidepressants and other medications. Psychiatric evaluation with Jeffrey Smith, M.D., was conducted in early November. Dr. Smith modified the medication regimen including stopping use of Zoloft and adding Cymbalta 60 mg. Dr. Smith's assessment was one of major depression, single episode, moderate.

In interview, Mr. Casey reported that he has continued under the care of Joseph Grace, III, Ph.D. as well as Jeffrey Smith, M.D. Medical records reveal that Mr. Casey underwent further evaluation at the Lung and Chest Medical Associates in July of 2005. On initial evaluation, he was experiencing dry heaves and nausea as well as chest pain and a squeezing sensation present without exertion. A cardiogram was normal and Dr. Fogarty's impression was chest pain, probably chest wall; nausea and vomiting improved; persistent difficulty concentrating and staying focused; status post laser bronchoscopy complicated by pneumomediastinum and pneumothorax. Dr. Fogarty further stated that Mr. Casey's nausea/vomiting symptoms have appeared to improve since discontinuing Strattera. Dr. Fogarty stated that with regard to Mr. Casey's difficulty concentrating, "air emboli have been reported as a complication of laser bronchoscopy, even without perforation of the endotracheal tube with resulting leakage of air into extrapleural, vascular, and mediastinal spaces. Although, he is fortunate not to have any gross motor deficit, he (Mr. Casey) may well have a permanent neurological deficit in which case the indication for taking medication such as Strattera may be mute."

Mr. Casey also underwent intellectual assessment by Joseph G. Grace, III, Ph.D., in June of 2005. Dr. Grace reviewed Mr. Casey's academic records, stating that Mr. Casey had undergone intelligence testing in the 3rd, 4th, and 6th grades with intellectual quotients in the high average range. Reportedly, academic achievement test scores were generally above the 65th percentile. Dr. Grace conducted intellectual testing with Mr. Casey earning a Full Scale I.Q. of 97, a Verbal I.Q. of 100, and a Performance I.Q. of 91. The test administered was the Wechsler Adult Intelligence Scale-III (WAIS-III). Dr. Grace opined that there was a significant discrepancy between Mr. Casey's early intellectual ability measures and the current I.Q. test results. Dr. Grace stated that the "only reasonable conclusion is that Mr. Casey has experienced a neurological event which has diminished his ability to process information and perform in a number of areas as effectively as he once did."

GUNN 004141

In interview, Mr. Casey reported that he continues with fatigue and "lack of motivation." He reported that he lost his job at Michelin approximately one year ago. This has resulted in financial stressors. He reported that he was an active employee at Michelin, performing 12-hour shifts. Mr. Casey also complained of a decreased capacity for attention and memory. As Mr. Casey stated, "I can't remember things." He provided examples of absentmindedness as well as making misjudgments that have resulted in accidents. There was also report of being socially withdrawn and isolated. Mr. Casey reported being avoidant of crowds, offering that he'd rather "stay at home and not be bothered." He acknowledged continuing back pain that pre-existed the medical incidents of May/June, 2004.

A structured symptom review failed to reveal any complaint by Mr. Casey with regard to sensory perceptual functions. Vision is corrected. There was no report of auditory acuity difficulties or tinnitus.

With regard to motor functioning, there was no report of paralysis or lateralized weakness. Mr. Casey reported continuing muscle spasms affecting the lower back. He denied coordination/balance problems. He reported occasional numbness affecting the hands and feet. There was report of paresthesias in the back region.

Mr. Casey reported that back pain is aggravated by physically exerting activities. He continues with episodic chest pain that is aggravated by exertional activities. Mr. Casey was not complaining of headache difficulties. There was report of occasional dizziness, but no report of vertigo, blackout spells, or seizures.

With regard to cognitive processes, Mr. Casey reported a decreased capacity for attention/concentration with an easy distractibility. He reported an inability to think as quickly as before (bradyphrenia). He also stated, "I know I am more forgetful."

With regard to psychological functioning, Mr. Casey acknowledged problems with sadness/depression, stating, "I don't have that much that is making me happy these days." There are episodic difficulties with sleep, though he did state that use of Ambien "definitely helps." He reported experiencing weird dreams, but denied disruptive nightmare activity. There is longstanding anxiety and fearfulness about heights. He reported being impatient and irritable with a lower ability to tolerate stress. Energy level was characterized as diminished. Clinical evaluation failed to reveal paranoid ideation or delusional thinking. Mr. Casey acknowledged considerable worry, particularly with regard to the future. There was no report of hallucinatory processes or evidence of psychotic symptomatology. Appetite was characterized as "variable." Libido was characterized as reduced with a lack of desire.

Mr. Casey reported a significant decline in his pursuit of social and recreational activities. This was particularly relevant to golf which he used to avidly pursue prior to his medical difficulties.

Mr. Casey reported current medications consist of Lipitor, Tricon, Mobic, Hydrocodone 10/500, Tramador 50 mg 2 tabs q.i.d., Cymbalta, and Ambien 10 mg as needed for sleep. There has also been use of Adderall XR 20 mg b.i.d. to assist with attention/focus. As of 9/10/05, Adderall had been discontinued.

Medical History: Mr. Casey denied previous head or neck injury. There is a history of back pain associated with two bulging discs and arthritis. He has undergone previous hemorrhoidectomy as well as hospitalization for evaluation of chest pain in 2000, undergoing cardiac catheterization.

Mr. Casey denied history of serious infections, allergies, diabetes, or hypertension.

Mr. Casey denied history of psychiatric illness or need for formal treatment. He denied having lifelong problems with his nerves, depression, or mood swings. He is a rare, occasional consumer of alcohol. He denied history of excessive alcohol usage. He does not utilize illicit drugs. There has been no history of formal substance abuse treatment.

GUNN 004142

Family History: Noncontributory for psychiatric illness and/or substance abuse problems. Family history is significant for diabetes in a mother and a heart attack in a father.

Psychosocial Review: Mr. Casey is a high school graduate. Reportedly, he was an active athlete while attending Dorman Senior High School in Spartanburg. He denied any repetition of grades or history of learning disabilities or Attention Deficit Disorder. Review of educational records confirmed him to be a high school graduate with a reported intellectual quotient of 113 attained in the 6th grade.

Mr. Casey reported that he was employed at the Michelin Company for over 20 years. His job title was manufacturing professional. He denied ever being in the military service. Mr. Casey attained a formal divorce from his wife after being married for 23 years. The couple were separated for several years before the divorce decree was attained in March of 2005. There are two biological children, a son, age 22, and a daughter, age 19.

Procedures: Wechsler Adult Intelligence Scale-III, Wechsler Memory Scale-III, California Verbal Learning Test-II, Stroop Test, Conner's Continuous Performance Test-II, Judgment of Line Orientation Test, Wisconsin Card Sorting Test, Trail Making Test, Controlled Oral Word Association Test, Paced Auditory Serial Addition Test, Seashore Rhythm Test, Speech Sounds Perception Test, Aphasia Screening Exam, Tactual Performance Test, Sensory Perceptual Examination, Finger Tapping Test, Grip Strength Test, Grooved Pegboard Test, Behavioral Dyscontrol Scale, Test of Memory Malingering, Word Memory Test, Personality Assessment Inventory, Ruff Neurobehavioral Inventory.

Examination Results

Neurobehavioral Status: Mr. Casey was on time for his scheduled appointments. He was appropriately attired with good personal hygiene. There was maintenance of appropriate eye contact. There was no evidence of psychomotor retardation or excitement. Mr. Casey was friendly and cooperative in his interactions with the examiner. There was no difficulty understanding instructional sets. He participated well in the evaluative process. He was observed to be somewhat fatigued following a lunch break. A second session was utilized to complete the evaluative process. Affect was mildly depressed, though psychological difficulties did not appear to interfere with his test performance. Specific assessment of effort was undertaken via administration of two symptom validity tests, the Test of Memory Malingering (TOMM) and Word Memory Test. Mr. Casey's performance on both of these tests was within stringent criteria consistent with our observation of providing good effort.

Language Functions: There was no aphasic or agnostic symptomatology. Mr. Casey's conversational speech was prosodic, fluent, of normal rate and tone with occasional shurring. There were no word finding difficulties in conversational speech. Mr. Casey's performance on a letter fluency test (T=45) was in the average range for an individual of his age and educational level. There was no evidence of receptive language dysfunction.

Sensory Perceptual/Motor Functions: Evaluation failed to reveal any evidence of imperceptions or suppressions affecting tactile or visual modalities during unilateral or bilateral stimulation paradigms. Mr. Casey demonstrated imperceptions and suppressions to left sided auditory stimulation. He performed efficiently on a tactile finger recognition test and made a few unsystematic errors on a Test of Graphesthesia. Mr. Casey had no difficulty recognizing gross tactile forms in each of his extremities.

Mr. Casey reports being right hand dominant. He ambulated without difficulty or need for assistance. He reported some residual low back pain that is aggravated by physically exerting activities. On a test demanding fine motor speed (Finger Tapping Test), he demonstrated bilateral slowness suggestive of moderate impairment. Assessment of grip strength revealed mild deviation from expected performance bilaterally. Mr. Casey's performance on a test demanding fine motor speed and dexterity (Grooved Pegboard Test) revealed deviation from expected performance bilaterally suggestive of mild impairment.

GUNN 004143

Attention/Memory Functioning: Mr. Casey was errorless in his performance on an extended test of information and orientation. On the Stroop Test, he demonstrated slowed and impaired processing speed for word (T=29) and color (T=35) stimuli. He remained mildly slow, but without added decrement in his performance on a divided attentional task (T=40). Mr. Casey's performance on an attentional task demanding discrimination of rhythmic sounds was below average (T=41) for an individual of his age and educational level. On an attentional task demanding discrimination of speech sounds and matching them to their phonemes (T=36), his performance was suggestive of mild impairment. Mr. Casey's performance on WAIS-III tasks assessing working memory placed him at the 25th percentile. Mr. Casey was also administered the Paced Auditory Serial Addition Test (PASAT), a measure of information processing speed and attentional regulation. Mr. Casey was able to meet the demands of this test. Observation of test performance revealed an average initial trial performance with mild decrements in his performance as the trials became more rapid and demanding. Mr. Casey's total recall score on the PASAT was within the average range (T=57) for an individual of his age and educational level.

Mr. Casey was also administered the Conner's Continuous Performance Test-II to further assess his attentional capacities. Observation of test performance revealed slow responding coupled with lots of errors which is a distinctively problematic pattern that cannot easily be explained by response style. Generally, this pattern is a strong indicator of an attention related deficit. Mr. Casey was generally erratic in his responding, indicative of poor attention capacity. He was also substantially affected by the interstimulus interval. Specifically, responses became slower and a lot more erratic when the interstimulus interval was slowed from one second to two and four seconds. The finding may reflect limitations in his ability to adjust to change in task demands.

Mr. Casey was administered the Wechsler Memory Scale-III (WMS-III) to assess different components of anterograde memory. Mr. Casey was variable in his performance across WMS-III tasks. Mr. Casey's performance on tasks assessing immediate auditory memory placed him at the 34th percentile. Mr. Casey was less efficient in his performance on WMS-III tasks assessing immediate visual memory (10th percentile). He demonstrated an adequate ability to retain auditory (30th percentile) and visual (50th percentile) information after a period of delay. Mr. Casey's performance on WMS-III tasks assessing working memory was in the low average range (21st percentile).

Analysis of separate WMS-III scale performance revealed Mr. Casey to have an average ability to immediately learn and recall orally presented narrative passages. Mr. Casey was below average in his performance on a visual memory task demanding free recall of family pictorial stimuli. He demonstrated a low average ability to retain and recall previously learned narrative passages after a period of delay (percent retention ~81). Mr. Casey was deficient in his performance on a visual memory task involving the immediate learning and reproduction of visual designs (2nd percentile). He demonstrated an adequate ability to retain and reconstruct previously learned visual designs after a period of delay (percent retention ~77).

Mr. Casey was also administered the California Verbal Learning Test-II (CVLT-II), a repetitive word list learning task. Mr. Casey's total recall score after five administrations of the word list placed him at the 50th percentile compared to age related peers. Observation of test performance revealed significant deficit in his initial trial performance consistent with difficulties with attentional capacities and immediate learning. Yet, Mr. Casey showed a good ability to profit from repetitive administrations, demonstrating a good learning curve. He demonstrated difficulties in his ability to retain and recall word list information in a short and long delay, free and cued recall process. Assessment of learning characteristics revealed heavy reliance on recall from the recency region of the word list. There were no excessive intrusive errors. Mr. Casey was generally efficient in his performance on a recognition task demanding that he discriminate target from non-target words, though he made six false positive errors. Mr. Casey performed efficiently on a long delay, forced choice recognition test consistent with our observation of providing good effort.

GUNN 004144

Visual Spatial/Visual Constructional Functions: There was no evidence of visual inattention or neglect processes. Nor was there evidence of constructional difficulties. Mr. Casey's performance on WAIS-III tasks assessing perceptual organizational skills placed him at the 63rd percentile. His performance was improved from that obtained in previous I.Q. testing conducted by Dr. Grace (47th percentile). On a test demanding fine discriminations of lines in space, Mr. Casey's performance was in the low average range (22nd percentile). On a visuographic sequencing test involving the serial processing of numbers, he was slow in the completion of the task (T=42) but without confusional error. When the task became more demanding, involving alternation between numbers and letters in sequential fashion, Mr. Casey's performance was within average limits (T=53).

Higher Reasoning/Problem Solving Abilities: Mr. Casey was able to inhibit and sequence fine motor movements on go-no go types of tasks. Mr. Casey performed efficiently on an executive functioning task involving letter fluency as well as being able to meet the set shifting skills associated with Trail Making Test-Part B.

Mr. Casey was re-administered the Wechsler Adult Intelligence Scale-III (WAIS-III) classifying his intellectual functioning to be in the average range with a Full Scale I.Q. of 96, a Verbal I.Q. of 91, and a Performance I.Q. of 104. Mr. Casey's Full Scale I.Q. places him at the 39th percentile. His performance was generally consistent with that obtained in previous evaluation conducted by Dr. Grace (FS I.Q.=97, V I.Q.=100, P I.Q.=104).

WAIS-III analysis revealed Mr. Casey to perform in the average range on tasks assessing perceptual organizational skills (63rd percentile). Mr. Casey was less efficient in his performance on WAIS-III tasks assessing verbal comprehension skills (32nd percentile). Mr. Casey's performance on tasks assessing working memory (25th percentile) was less efficient than that obtained in previous evaluation by Dr. Grace. Yet, Mr. Casey was more efficient with regard to his performance on processing speed tests (21st percentile) compared to that obtained by Dr. Grace (4th percentile).

Analysis of separate WAIS-III scale performance revealed significant strength on a task demanding attention to visual detail in the tangible environment (91st percentile).

Mr. Casey was administered the Wisconsin Card Sorting Test, which demands the ability to generate and discover the correct solution set as well as to shift the basis of one's responding when the externally imposed demands of the task necessitated this. Observation of test performance revealed Mr. Casey to readily identify the 1st correct hypothesis. Observation of test performance revealed that concentration difficulties interfered considerably with his effective problem solving abilities. Mr. Casey attained only four of the expected six categories but with an acceptable rate of perseverative errors (10%) and six failures to maintain set. The latter finding is consistent with disruption due to attention/concentration difficulties.

Mr. Casey was also administered the Tactual Performance Test (TPT) which demands keen kinesthetic/proprioceptive abilities as well as organizational/planning skills. Mr. Casey's initial dominant hand performance was above average (T=56). Yet, he demonstrated considerable difficulty profiting from this initial learning trial during his 2nd trial, non-dominant hand performance (T=36). Mr. Casey was improved in his 3rd trial, both hands performance (T=43). His incidental memory score (T=33) was suggestive of mild to moderate impairment. Yet, his location score (T=50) was in the average range.

Emotional/Mood State Functioning: Review of medical records revealed considerable concerns regarding Mr. Casey experiencing disruptive psychological difficulties as the result of his involvement in the medical incidents. There has been persistence of fatigue, agitation, and somatic symptomatology as well as concern regarding depression, anxiety, and posttraumatic stress.

GUNN 004145

In the current evaluation, Mr. Casey reported continuing difficulties with sadness/depression, sleep disturbance which is assisted by use of Ambien, irritability/impatience, and low energy level. He appears to be quite withdrawn and not engaging in social and recreational pursuits. There are additional environmental stressors including financial stress.

Mr. Casey was administered the Personality Assessment Inventory (PAI) to further assess his psychological functioning. Mr. Casey's response set (validity scales) to the PAI indicated that he presented himself in an honest, straight forward fashion.

The obtained PAI clinical profile reveals an individual who is reporting significant unhappiness, moodiness, and tension. Mr. Casey's self esteem is quite low at this time, and he views himself as ineffectual and powerless to change the direction of his life. The disruptions in his life have left him uncertain about his goals and priorities, and tense and pessimistic about what the future may hold. Mr. Casey reports difficulties in concentrating and making decisions.

Separate scale elevations reveal report of highly disruptive depression. Mr. Casey reports being severely depressed, discouraged, and withdrawn. He appears to be plagued by fears of worthlessness, hopelessness, and personal failure. There is also report of experiencing a discomforting level of anxiety and tension. He is socially isolated at this time and identifies few interpersonal relationships that he describes as being close and warm.

Consistent with ongoing disruptive somatic symptomatology, Mr. Casey reports concern about physical functioning and health matters. He sees his life as being highly compromised by his ongoing numerous and varied physical/health problems.

Mr. Casey reports experiencing recurrent episodes of anxiety associated with a traumatic experience in his life. He identifies the traumatic experience as being the medical incident.

Self concept appears to be quite harsh and negative at this time. Mr. Casey's interpersonal style is best characterized as being withdrawn and isolated at this time. He appears to be very uncomfortable in social situations at this time.

Mr. Casey also reported experiencing periodic and transient thoughts of self harm. He denied any specific suicidal plan. He does endorse being pessimistic and unhappy about his prospects for the future.

Overall, the PAI profile is consistent with an individual who is experiencing disruptive depression and anxiety in the context of ongoing somatic difficulties. There is report of associated neurocognitive difficulties as well as being quite socially withdrawn and isolated.

Mr. Casey also responded to the Ruff Neurobehavioral Inventory. The Ruff allows for an assessment of individuals in the domains of cognitive emotional and physical functioning as well as quality of life pre and post their involvement in a traumatic incident.

Mr. Casey's responses indicated that he did not believe he had any ongoing disruptions in the realms of cognitive, emotional, or physical functioning prior to his involvement in the medical incident.

Mr. Casey reported that post accident, he has experienced significant disruption in cognitive emotional, and physical realms of functioning as well as quality of life. In the cognitive domain, he identified significant disruption with regard to attention/concentration, executive functioning, and learning and memory.

In the emotional domain, Mr. Casey reported significant disruption with regard to anxiety, depression, posttraumatic stress, as well as anger and irritability.

GUNN 004146

In the physical realm, he reported significant disruption with regard to somatic symptomatology and pain. Mr. Casey also reported significant disruption of his ability to pursue vocational activities.

Summary/Integration: Mr. Casey is a 46-year-old Caucasian male referred for neuropsychological evaluation. Intellectual evaluation revealed Mr. Casey to be functioning in the average range of abilities. Neurocognitive evaluation revealed slowed mental/information processing speed with variability in Mr. Casey's attentional capacities. Assessment of memory functioning revealed difficulties with immediate learning/memory capacities but no compelling evidence of rapid forgetting (amnesic syndrome). Neuropsychological evaluation revealed Mr. Casey's primary impairments to be deficits in his speed of processing with difficulties sustaining attention/concentration, and reduced immediate learning capacities. There was no compelling evidence for impairment specifically affecting visual spatial skills, receptive or expressive language functions, or higher reasoning capacities. Assessment of sensory perceptual functioning revealed imperceptions and suppressions affecting left sided auditory processes. Motor functioning was characterized by slowness and weakness.

Assessment of emotional functioning revealed continuing difficulties with depression, fatigue/low energy level, anxiety/stress, social withdrawal/isolation, and disruptive pain and somatic symptomatology. Mr. Casey has not efficaciously responded to psychological/psychiatric treatment. This suggests the potential that difficulties/impairments are at least partially attributable to organic injury.

Overall, Mr. Casey's presentation is one of neurocognitive deficits that would be consistent with a subcortical injury. Dr. Fogerty provided rationale for the potential that Mr. Casey may well have a permanent neurological deficit. Pain symptomatology, depression, sleep disturbance, and fatigue could also be contributing to his experience of neurocognitive impairments. Mr. Casey's current neurocognitive and emotional/behavioral deficits are likely due to a multifactorial etiology. What is evident is that Mr. Casey has remained highly compromised with regard to cognitive, emotional, and physical functioning, rendering him unable to return to employment pursuits.

Based on The Diagnostic and Statistical Manual of Mental Disorders-4th Edition-TR (DSM-IV-TR), the following multiaxial assessment is provided:

Axis I	Mood Disorder with depressed mood (293.83) secondary to persistent somatic symptomatology and potential permanent neurological deficit due to complication of laser bronchoscopy. Cognitive Disorder, NOS (294.90) due to the interfering effects of somatic symptomatology, mood disturbance, sleep disturbance/fatigue, and potential permanent neurological deficit due to complications of laser bronchoscopy.
Axis II	No diagnosis (V71.09).
Axis III	Pain/somatic symptomatology; motor weakness; residual back pain; episodic chest pain; status post laser bronchoscopy complicated by pneumomediastinum and pneumothorax.
Axis IV	Marital separation/divorce; disability/unemployment; Workers' Compensation litigation.
Axis V	GAF=50 (Current).

Thank you for allowing me to participate in the evaluative care of Mr. William Mark Casey. If you have any questions regarding the evaluation or report, please do not hesitate to call me.

INTELLECTUAL ASSESSMENT

NAME: William Mark Casey
AGE: 45
DATE OF BIRTH: [REDACTED]/58
SS #: [REDACTED]
EDUCATION: Completed a year of college
OCCUPATION: Disabled (Formerly a production worker with Michelin Tire Co.)
MARITAL STATUS: Separated

COMPONENTS OF THE ASSESSMENT:

Spartanburg County School District #6 cumulative academic records of Mark Casey
(10/17/66 – 06/08/77)
Wechsler Adult Intelligence Scale – 3rd Edition (WAIS-III) (06/02/05)

REVIEW OF MARK CASEY'S ACADEMIC RECORDS:

Mark Casey was administered three intelligence tests (readiness level ability testing) in the 2nd, 4th, and 6th grades. In the 2nd grade Mr. Casey earned an IQ score of 107 (67th percentile), in the 4th grade he earned an IQ score 115 (84th percentile), and in the 6th grade he earned an IQ score of 113 (81st percentile). Further, his achievement test scores from 2nd grade (1966) through 10th grade (1975) range from highs of 99th percentile to a low of 17th percentile with the vast majority of scores being above the 65th percentile. Also, Mr. Casey's Dorman Senior High School transcript reflects a well-rounded student who was a versatile athlete.

GUNN 004148

BEHAVIORAL OBSERVATIONS OF MARK CASEY FROM RECENT IQ TESTING:

Mr. Casey was administered the WAIS-III on 06/02/05. He appeared to make a conscientious effort throughout the thirteen test sections, but became frustrated and even dejected on Subtests in which he performed below his own expectations. Also, Mr. Casey exhibited lapses in concentration and memory, particularly on Subtests requiring abstract reasoning.

ANALYSIS OF TEST DATA:

Mark Casey earned a Full Scale IQ score of 97 (42nd percentile) on the Wechsler Adult Intelligence Scale – 3rd Edition. He earned a Verbal IQ score of 100 (50th percentile) and a Performance IQ score of 91 (27th percentile). These scores fall within the lower half of the “average” range of intellectual functioning (90 – 109). His Working Memory Index score of 106 (66th percentile) is his highest, while his Processing Speed Index score of 73 (4th percentile) is his lowest. Mr. Casey earned a Verbal Comprehension Index score of 100 (50th percentile) and a Perceptual Organization Index score of 99 (47th percentile). His Subtest scaled scores are as follows:

<u>Verbal Subtests</u>		<u>Performance Subtests</u>	
Vocabulary	11	Picture Completion	10
Similarities	10	Digital Symbol – Coding	4
Arithmetic	10	Block Design	9
Digit Span	11	Matrix Reasoning	11
Information	9	Picture Arrangement	10
Comprehension	10	Symbol Search	6
Letter–Number Sequencing	12		

The mean score for all Wechsler Subtests is 10 with a normal range of 8-12. Thus, Mr. Casey’s scores on the two Processing Speed Index Subtests of Digit Symbol – Coding (4) and Symbol Search (6) are far below the normal range. These two Subtests are measures of visual perception analysis (ability to ascribe meaning to symbols, identify and discriminate between symbols); short-term visual memory; and visual-motor dexterity, speed and accuracy.

SUMMARY:

A review of Mr. Mark Casey’s school records reveal that he was administered three IQ tests between the ages of about 7 and 12 years old. The average of these three ability measures is about 112 which placed him at the 79th percentile intellectually. Also, the vast majority of his achievement test scores between the 2nd and 11th grades are at or above the 65th percentile. However, Mr. Casey obtained a Full Scale IQ score of 97 (42nd percentile) on intellectual testing administered in June 2005. Further, he earned very deficient scores on Subtests involving processing speed (visual perception analysis; short-term visual memory; and visual-motor dexterity, speed and accuracy). IQ/intellectual

GUNN 004149

ability scores by test design remain unchanged over the course of one's lifetime except in the event of neurological disease or brain injury. Since there is a significant discrepancy between Mr. Casey's early intellectual ability measures and current IQ test results, the only reasonable conclusion is that he has experienced a neurological event which has diminished his ability to process information and perform in a number of areas as effectively as he once did.

50041 XR G I SERIES
74246

Date: 07/28/05 0836
Ord Diag: 787.03-VOMITING ALONE

Double-contrast upper GI, 7/28/2005

Indication: Several week history of nausea and vomiting

Findings: Under fluoroscopy the patient shows normal swallowing and esophageal motility. The esophagus distends normally. Note is made only of a single small distal esophageal mucosal cleft or diverticulum, this is only a few millimeters in size. With Valsalva no hiatal hernia is seen. During assessment of the stomach several episodes of mild reflux into the distal esophagus were seen.

The stomach distends normally with no abnormal mass or impression and no mucosal irregularity. The duodenal bulb is somewhat irregular, I do not see a discrete ulcer but this could be deformed from peptic ulcer disease. Contrast does freely progress through this into the duodenum. In the third portion of the duodenum there are 2 diverticula adjacent to one another. One is relatively prominent in size, equal to that of the duodenal bulb. No retained material is seen within these and contrast freely progresses through this to the proximal small bowel.

Impression: Small mucosal cleft or diverticulum noted in the distal esophagus. This is probably a normal variant although could represent focal change of mild esophagitis. A few episodes a very mild GE reflux were seen during this study.

2. Duodenal bulb somewhat deformed although no discrete ulcers seen. This could be change from peptic ulcer disease but there is no evidence of stricturing, contrast freely progresses into the proximal small bowel on this study.

2. 2 duodenal diverticula in the third portion of the duodenum, one of these is a giant diverticulum equal in size the duodenal bulb. They

DISCHARGE SUMMARY

PATIENT NAME: CASEY, WILLIAM

DOB: [REDACTED]/1958

MEDICAL RECORD #: 146220

ACCOUNT NUMBER: 414900306

ADMISSION DATE: 05/28/2004 DISCHARGE DATE: 05/29/2004

ATTENDING PHYSICIAN: KOSER, ANDRAS

PRESENTATION AND HOSPITAL COURSE: This 45-year-old Caucasian male with a history of elevated cholesterol, history of herniated disc, history of arthritis, who apparently has been having vague chest discomfort every time when he goes to work. The patient came in because of tightness that went straight to the back according to the emergency room physician; however, upon the workup the patient was found to have a left main bronchus containing some foreign body that was metallic in nature. It looks like a screw. It could have been dental filling. The patient was seen in consultation with Dr. Feldman who asked Dr. Boscia to do fiberoptic bronchoscopy and take a look inside and see if he can get it out. Apparently the area was quite difficult to get to. Some bleeding was visualized on the left main bronchus and then tried to dig it out but couldn't find any piece of metal and, hence, he did not do it. The patient was to undergo rigid bronchoscopy a week or two weeks later in Dr. Feldman's office. We feel at this time that the patient does not need any further inpatient stay.

DISCHARGE DIAGNOSES:

1. Noncardiac chest pain.
2. Metallic foreign body in the left main bronchus.
3. Elevated cholesterol.
4. White coat hypertension.

DISCHARGE MEDICATIONS:

1. Lipitor 10 mg p.o. q.d.

DISCHARGE DISPOSITION: The patient is going home.

FOLLOW UP: The patient will follow up with Dr. Gonda in one week.

ATTENDING PHYSICIAN: KOSER, ANDRAS
ROOM:

HISTORY OF PRESENT ILLNESS: This 46-year-old smoking male presented to the hospital for chest pain. An initial chest x-ray on admission showed what appears to be a foreign body in the left mainstem bronchus. I am being asked to comment on this. This patient complains of pain in his chest that is sharp that goes directly straight to his back. There is a history of cough. No history of hemoptysis.

PAST MEDICAL HISTORY: includes hypercholesterolemia. No history of hypertension or diabetes.

SOCIAL HISTORY: He has a 25 pack year smoking history. He works at Michelin.

FAMILY HISTORY: Is noncontributory.

REVIEW OF SYSTEMS: Includes all mentioned in history of present illness. Also, he has chronic back pain, occasional headaches, occasional constipation. All other review of systems are negative.

PHYSICAL EXAMINATION: He appears well in no acute respiratory distress. Blood pressure is 150/90, pulse is 84. Pupils react to light. The oral mucosa is moist without thrush. Neck is supple. Heart is regular. Lungs are clear bilaterally. Abdominal exam reveal no hepatosplenomegaly. Extremities are without clubbing, cyanosis or edema. Skin is intact with no rashes. Joints are not inflamed. Neurologically, cranial nerves II through XII are intact without focality.

Chest x-rays been reviewed in it does show what appears to be an irregular metallic foreign body in the left mainstem bronchus.

IN SUMMARY: 46-year-old gentleman with what appears to be a foreign body in the left mainstem bronchus. He has consented to fiber-optic bronchoscopy which would be the

most reasonable next step. Will perform fiber-optic bronchoscopy to see if this foreign body is removable. If it is not removable or granulated in, than rigid bronchoscopy in the operating room will be performed. Risks, benefits, and alternatives were discussed with Mr. Casey and he agrees to proceed with bronchoscopy.

60220 CT LUNG WITHOUT CONTRAST
71250

Date: 05/28/04 1805

Ord Diag: Chest Pain NOS 786.50

Chest CT scan 5/28/2004.

Indication: Evaluate for possible foreign body. Patient works in construction and apparently on a chest x-ray had a metallic foreign body.

The chest x-ray cannot be located for comparison. Spiral images were obtained through the chest without contrast. There are no metallic foreign bodies evident other than snaps and monitoring leads on the patient's skin. The lungs are free of nodules and infiltrates. There is left anterior descending coronary artery calcification. No other abnormalities are evident of the noncontrasted mediastinum.

Impression:

1. Negative for opaque foreign body.
2. Left anterior descending coronary artery calcification.

DISCHARGE SUMMARY

PATIENT NAME: CASEY, WILLIAM

DOB: [REDACTED]/1958

MEDICAL RECORD #: 146220

ACCOUNT NUMBER: 415400048

ADMISSION DATE: 06/03/2004 DISCHARGE DATE: 06/06/2004

ATTENDING PHYSICIAN: FELDMAN, GREGORY

FINAL DIAGNOSES:

1. Status post recent bronchoscopy with laser for abnormal appearing airway, on flexible bronchoscopy suspected foreign body.
2. Complication of the procedure was pneumomediastinum and pneumothorax requiring chest tube insertion by Dr. Nguyenduy.
3. Asthma and heavy smoking.
4. Disabling back pain with a bulging disk and arthritis, long.

PLAN: The patient is discharged home on prednisone 20 mg q.d., Percocet 1-2 pills t.i.d. p.r.n. The patient will be seen in my office within a week. Diet and activity as tolerated.

HOSPITAL COURSE: This is a patient who underwent initial bronchoscopy by Dr. Boscia with finding of a quite irritated, blistered airway. Corresponding chest x-ray appeared to be missing dental material. The patient underwent bronchoscopy for assumption of airway caused by retained foreign body. It appeared to be that there was granulation tissue; however, after laser was applied it became apparent that instead of a normal airway, it is a pouch and procedure terminated with no foreign body recovered. The patient tolerated the procedure well; however, in recovery the patient suddenly developed subacute emphysema and x-ray revealed pneumomediastinum with pneumothorax on the left side. A small chest tube was inserted. The patient was kept on the respiratory overnight. His subcu air has subsided remarkably. The patient felt much, much improved. He was extubated and transferred to the floor. Repeat chest x-ray showed pneumothoraces on both right and left but unchanged in size and small at the time of discharge. The patient felt good with no complaints and was discharged home. We will assess in my office within the next two days. The patient has been instructed if he develops fever or increased subcu air or shortness of breath immediately to come back to see me.

OP REPORTS

PATIENT NAME: CASEY, WILLIAM

DOB: [REDACTED]/1958

MEDICAL RECORD #: 146220

PROCEDURE DATE: 6/3/04

ACCOUNT NUMBER: 415400048

ROOM:

ICU

PROCEDURE PERFORMED: Rigid bronchoscopy with laser bronch.

ENDOSCOPIST: Dr. Feldman.

INDICATIONS FOR PROCEDURE: 45 year old had been worked up by Dr. Paladugu and my partner, Dr. Boscia, with the finding of abnormal granulation tissue and abnormal subsegment in the left upper lobe corresponding to what appeared to be a crown foreign body on chest x-ray. The patient is now undergoing procedure in attempt to removal of chest x-ray abnormality suggestive of a crown; the patient does have a history of a missing crown.

After general anesthesia was induced, the patient was intubated with a rigid bronchoscope, size 16, without any difficulty. Careful inspection of the tracheobronchial tree was undertaken. The entire tracheobronchial tree was examined, there was no finding of a foreign body, however, a quite abnormal subsegment in the left upper lobe which appeared to be a pouch/granulation tissue has been identified. Laser of the area has been done with 45 watts over a 2-second period. Granulation tissue has been vaporized with the appearance of what appeared to be crown lying on the surface. With using 35 watts energy of the laser, there was no possibility of removal of the crown because it was deeply imbedded, and laser energy was applied to the center of the crown and it has been vaporized. However, below the surface there has been no further foreign body seen. The assumption was made that the entire crown other than on the surface had been vaporized, and attempt to pull it with a biopsy forceps and passage of the basket was unsuccessful. The washings were done of the area, and the procedure was terminated. The patient was extubated in recovery.

Although the patient did quite well during the procedure, he suddenly developed considerable pneumomediastinum and having immediately arrived to the bedside, Dr. Nguyenduy's consultation has been obtained. The decision was done by Dr. Nguyenduy and myself to place a chest tube, because of the impossibility to rule out pneumothorax, however, chest x-ray does not show pneumothorax, there is no foreign body seen, and also endotracheal tube is in good position. The patient was intubated by Anesthesia prior to that.

IMPRESSION: It is unclear to me at this point whether the laser went through the cartilage, and since I have not identified or pulled the crown itself, if in fact there was a crown it has been vaporized and is no longer seen on x-ray. At this point the patient will transfer to the ICU,

GUNN 004163

antibiotics will be administered for disruption of the bronchus and pneumomediastinum. This will be followed by CT surgery and certainly if air leak into the pneumomediastinum would not stop, surgical intervention will be required. Hopefully this can be avoided by conservative management, but it is uncertain to me at this time whether the crown was vaporized or essentially the laser went through the highly abnormal area of the lung suggestive of closed congenital pouch rather than a foreign body, and significant irritation from previous bronchoscopy.

Re: William Mark Casey
D.O.B. [REDACTED] /58
SS# [REDACTED]

Dear Frank,

I have been following Mark Casey on a weekly basis and saw him most recently on September 16, 2004. He reportedly has been taking Zoloft, 100 mg per day for about eight weeks now as you prescribed. He estimated that he has gained about 50% benefit from Zoloft, but for about the past four weeks he seems to have plateaued and there appears to be no subjective or objective improvements. Thus, the following depressive symptoms persist: initial and terminal sleep disturbances, depressive affect most days with atypical cynicism, irritability with low frustration tolerance, anxiety and restlessness, atypical somatic symptoms, excessive worry, easily fatigued, and an inability to deal with normal life stresses.

On August 9, 2004, I administered to Mark the MMPI-II. The validity scales indicate that his test results are valid and the clinical picture is probably unchanged since that test administration. The clinical scales of his MMPI-II indicate that he is moderately depressed, moderately anxiety, but in good reality contact. He is prone to develop ulcers and other GI disturbances under stress. Also, he is prone to sudden anxiety and panic episodes. Test results confirm that he is overwhelmed with problems, is guilt-ridden, and has feeling of inadequacy and unworthiness. He tends to be quite despondent and is slowed in thought and action. Mark is also inclined to experience obsessional thoughts which trigger compulsive behaviors. His personality profile also indicates that he is angry and resentful, rigid and stubborn. He tends to be suspicious and inclined to question the motives of others. However, when not overwhelmed and depressed, he is likely to be much more adaptable, dependable and responsible. In addition, when not in an emotional crisis, he is probably realistic and practical, and is viewed by others as sociable, friendly and enthusiastic.

RE: Wm. Mark Casey
September 16, 2004

Mark has a twenty-plus year history with Michelin and reportedly has been a very productive employee. He indicated, however, that he has been out of work since May 28th and several very recent phone calls from Michelin supervisors indicate that his job may be in jeopardy. Thus, it seems only reasonable that we accelerate his treatment in an effort to expedite his return to work. The simplest solution seems to be to increase his Zoloft to 150 mg per day. Another possibility would be to augment the therapeutic benefit of Zoloft with a second anti-depressant such as Cymbalta. Cymbalta would probably be a good choice since it would be combining the serotonergic benefits of Zoloft with the norenergic benefits of Cymbalta. Also, the addition of BuSpar could be helpful in the treatment of Mark's numerous anxiety symptoms.

If you are not comfortable, Frank, with a more complex psychotropic regimen, then either you or I can refer him to one of the Greenville psychiatrists with the recommendation that he be seen at their earliest opening. Michelin is not really satisfied with Mark being out on a three and one-half month leave under the care of a family physician and psychologist for a psychiatric disorder. However, since it could take two to three weeks for Mark to be seen by a psychiatrist, please consider a medication increase/change in the meantime.

Please advise (560-1512).

Sincerely yours,

Jay Grace, Ph.D.
Licensed Counseling Psychologist

Attending Physician Behavioral Health Statement

Complete and sign the form using BLUE or BLACK ink.

1. Patient Instructions - The Physician will complete Sections 2 through 9.
The Patient will complete Section 1. The Patient should also fill in their name at the top of Page 2.

The Patient is responsible for completing this section, and for ensuring that their Attending Physician completes the remainder of this statement. The Patient is responsible for paying any fees that may be charged for completion of this form by their physician. If you have any questions, please call (877) 465-0424.

(a) Control Number 607472

(b) CASSEY, WILLIAM MARK 1-888-888-8888 -58 15'8" 170
Patient Name (Last, First, Middle Initial) Social Security Number Birth Date (MM/DD/YYYY) Height Weight (lb)

(c) Patient Gender ☒ Male ☐ Female

(d) 240 LIGHTWOOD FARM ROAD, WOODBRIDGE, S.C. 29388
Patient Home Address - Required (Current No., St., Town, State, Zip - no PO boxes) ☐ Check if New

(e) Mailing Address, if different from Home address (SAME)

(f) Patient Employer Name/City/State MICHELIN TIRE, SPARTANBURG, S.C.

(g) Patient Telephone Number (864) 486-9131 ☐ Check if New

(h) Job Title/Occupation PRODUCTION (ASSEMBLY LINE WORKER)

(i) Type of Claim: ☒ Short Term Disability ☐ Long Term Disability ☐ Waiver of Premium
☐ Long Term / Permanent Total Disability

2. Physician Instructions

The Attending Physician should complete the items below, based upon a recent examination. Attach additional documentation as needed. If you have any questions, please call (877) 465-0424.

Please complete form in its entirety and fax to (866) 888-2308. Page 2 MUST be completed before faxing.

3. Impairing Diagnosis & Treatment

DSM IV-TR MULTIAXIAL DIAGNOSIS: (Please indicate the primary impairing diagnosis at this time with an *)

SEE "SYMPTOM ASSESSMENT" SECTION

(d) What psychological/medical restrictions/limitations are you placing on this patient? (Activities of Daily Living, Driving, etc.)

LIMITED RESTRICTION ACTIVITIES AND VERY LIMITED VOCATIONAL ACTIVITIES

- Number of Hours patient is capable of working in a day: ☐ 12 ☐ 10 ☐ 8 ☐ 6 ☐ 4 ☐ 2 ☐ 1 Hour/Day NONE
- Number of Days per week patient is able to work: ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 Days/Week NONE
- Date you prescribed restriction on work activities: Month 8 Day 4 Year 04
- How long are these restrictions/limitations in effect? UNTIL ANXIETY AND DEPRESSION ☐ No Longer
- Estimated return to work date? ROUGH ESTIMATE Days 1/2 TIME full duty INITIALLY

(e) Other/ Comments

6. Current Status

(a) Patient is/has ☒ Improved ☐ Unchanged ☐ Regressed

(b) Is there a medical contra-indication for patient to participate in Vocational Rehabilitation (job retraining) programs?

☐ No ☒ Yes, please explain WOULD BE OF NO BENEFIT TO THIS PATIENT(c) In your opinion, is your patient motivated to return to work? YES BUT RESTRICTED BY PSYCHIATRIC DISORDERS.

7. Regulation Notice

It is a crime to provide false or misleading information to an insurer for the purpose of defrauding the insurer or any other person. Penalties include imprisonment and/or fines. In addition, an insurer may deny insurance benefits if false information materially related to claim was provided by the applicant.

California Residents: For your protection, California law requires notice of the following: Any person who knowingly and with intent to defraud or deceive any insurance company files a statement of claim containing any materially false, incomplete or misleading information is guilty of a crime and may be subject to fines, confinement in a state prison and substantial civil penalties.

Colorado Residents: An insurer or agent who knowingly provides false or misleading information to defraud a claimant regarding insurance proceeds must be reported to the Insurance Division.

Pennsylvania Residents: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information or conceals for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime and subjects such person to criminal and civil penalties.

DISCHARGE SUMMARY

PATIENT NAME: CASEY, WILLIAM

DOB: [REDACTED] 1958

MEDICAL RECORD #: 146220

ACCOUNT NUMBER: 414900306

ADMISSION DATE: 05/28/2004 DISCHARGE DATE: 05/29/2004

ATTENDING PHYSICIAN: KOSER, ANDRAS

PRESENTATION AND HOSPITAL COURSE: This 45-year-old Caucasian male with a history of elevated cholesterol, history of herniated disc, history of arthritis, who apparently has been having vague chest discomfort every time when he goes to work. The patient came in because of tightness that went straight to the back according to the emergency room physician; however, upon the workup the patient was found to have a left main bronchus containing some foreign body that was metallic in nature. It looks like a screw. It could have been dental filling. The patient was seen in consultation with Dr. Feldman who asked Dr. Boscia to do fiberoptic bronchoscopy and take a look inside and see if he can get it out. Apparently the area was quite difficult to get to. Some bleeding was visualized on the left main bronchus and then tried to dig it out but couldn't find any piece of metal and, hence, he did not do it. The patient was to undergo rigid bronchoscopy a week or two weeks later in Dr. Feldman's office. We feel at this time that the patient does not need any further inpatient stay.

DISCHARGE DIAGNOSES:

1. Noncardiac chest pain.
2. Metallic foreign body in the left main bronchus.
3. Elevated cholesterol.
4. White coat hypertension.

DISCHARGE MEDICATIONS:

1. Lipitor 10 mg p.o. q.d.

DISCHARGE DISPOSITION: The patient is going home.

FOLLOW UP: The patient will follow up with Dr. Gonda in one week.

GENERAL CONSENT TO TREAT

PATIENT AUTHORIZATION/ACKNOWLEDGEMENT OF BENEFITS RELEASE

The following are the conditions for services provided by the Spartanburg Regional Health Services District, Inc. (District) for the patient whose name appears at the bottom of this page

CONSENT FOR MEDICAL TREATMENT

I/we voluntarily consent to medical treatment and diagnostic procedures provided by Spartanburg Regional Health Services District, Inc. and its associated hospitals, physicians, clinicians and other personnel. I/we consent to the testing for infectious diseases, such as, but not limited to syphilis, AIDS, hepatitis and testing for drugs if deemed advisable by my physician. I/we am/are aware that the practice of medicine and surgery is not an exact science and I/we acknowledge that no guarantees have been made as to the result of treatments or examinations. I/we understand that certain healthcare professionals furnishing services including but not limited to, radiologist, pathologist, anesthesiologist and emergency room physicians are independent contractors with the patient and are not employees or agents of the District.

AUTHORIZATION FOR RELEASE OF INFORMATION

The hospital and attending physician are authorized to release any medical information required in the processing of applications or submission of information for financial coverage, discharge planning and further medical treatment. To include information referring to psychiatric care, sexual assault or tests for infectious diseases including AIDS/HIV for services provided during this admission. I/we also agree to the release of medical or other information about me to government federal or state regulatory agencies as required by law.

ASSIGNMENT OF INSURANCE BENEFITS

I/we guarantee payment of all charges made for or on account of the patient and I/we assign our rights in any insurance benefits or other funding to the physician and the District. I/we understand that I/we am/are responsible for any charges not covered by insurance or other forms of benefits. I/we understand the District can obtain my/our credit report for review in collection of this debt. In the event that this account is placed with a collection agency or attorney for collection or collected following the SC Setoff Debt Collection Act, I/we shall pay all collection fees and costs, including reasonable attorney's fees. For Medicare beneficiaries: I/we have provided all necessary information for proper assignment of Medicare benefits.

VALUABLES RELEASE FORM

I/we have been requested to check valuables with the hospital and release the District of any liability and assume responsibility for any items not deposited to the hospital's care. Any valuables not claimed within thirty (30) days of discharge will become the property of the hospital.

ACKNOWLEDGEMENT OF RECEIPT OF NOTICE OF PRIVACY PRACTICES

I/we have received a copy of the Notice of Privacy Practices. The notice describes how my health information may be used or disclosed. I understand that I should read it carefully. I am aware that the Notice may be changed at any time. The Notice of Privacy Practices may be accessed at www.srhc.com.

DATE OF BIRTH: [REDACTED]/1958
ACCOUNT NUMBER: 414900306
DATE OF ADMISSION: 05/28/2004
ROOM:

434

CHIEF COMPLAINT: Chest pain.

HISTORY OF PRESENT ILLNESS: This is a 45-year-old Caucasian male with a history of elevated cholesterol, history of herniated disk, and a history of arthritis apparently been having vague chest discomfort every time he goes to work. The patient comes in because of substernal chest tightness that radiates to the back. The patient had extensive cardiac workup done on the last admission which was in the year 2000, July. At that time the patient underwent cardiac catheterization, which showed normal coronaries. The patient comes in, does not give this chest pain history, doesn't have any associated symptoms whatsoever. No diaphoresis, no shortness of breath. Radiating to the back is the only one. No nausea. Currently feels fine. He says the patient was given some aspirin, nitroglycerin.

PHYSICAL EXAMINATION:

CNS: The patient is alert and oriented times three.
HEENT: Normocephalic, atraumatic. Pupils are equal, round, and reactive to light and accommodation.
CHEST: Clear to auscultation bilaterally.
CARDIOVASCULAR: Regular rate and rhythm.
ABDOMEN: Soft, nontender.
EXTREMITIES: No cyanosis, clubbing, or edema.
NEUROLOGICAL: Cranial nerves II through XII grossly intact. Motor 5/5 bilaterally. Sensory intact bilaterally.

REVIEW OF SYSTEMS: no fever or chills. No headache or dizziness. No cough or phlegm. Chest pain as described above. The rest of the review of systems essentially negative.

PAST MEDICAL HISTORY: Reveals a herniated disk and arthritis.

MEDICATIONS: Lipitor, Bextra, Ultram, Lortab.

ALLERGIES: No known drug allergies.

PAST SURGICAL HISTORY: Negative.

SOCIAL HISTORY: Positive smoker. Occasional ETOH.

ALLERGIES: No known drug allergies.

LABORATORY DATA: : CPK 103, MB 1.4, index 1.1 troponin less than 0.07, myoglobin 28.9, PT 12.3, INR 1.1, PTT 29.8.

GUNN 004188

IMPRESSION/PLAN:

1. Noncardiac chest pain most likely secondary to _____ in the left main bronchus. We will get pulmonary to see this patient for possible bronchoscopy and removal if possible.
2. Hypertension. The patient's blood pressure is elevated. Never told that he has been hypertensive before, although the patient has been noncompliant with medications and follow up and, hence, we will keep an eye on the blood pressure. We will place the patient on Lopressor 50 mg q.d. for now. Has multiple blood pressure readings in the emergency room. Continues to stay high diastolic of 109.
3. Elevated cholesterol. We will check a lipid profile in the morning.

OP REPORTS

PATIENT NAME: CASEY, WILLIAM

DOB: [REDACTED]/1958

MEDICAL RECORD #: 146220

PROCEDURE DATE: 5/28/2004

ACCOUNT NUMBER: 414900306

ROOM:

PROCEDURE(S) PERFORMED: Bronchoscopy.

REASON FOR PROCEDURE: 45 year-old male with what appears to be a foreign body.

MEDICATIONS: Versed 10 mg IV (intravenous), Fentanyl 100 mcg IV (intravenous), topical lidocaine.

DESCRIPTION OF PROCEDURE: After informed consent was obtained, the right nostril was anesthetized with topical lidocaine. The bronchoscope was advanced to the trachea without difficulty. Trachea as well as right segmental and subsegmental bronchi were normal, patent, without bronchial pathology. However, upon entering the left main stem bronchus, the distal end where the take off of the left upper lobe starts on the medial wall, there is a very erythematous area that was easily friable. No observable foreign body was noted. The airway post the erythematous take off of the left upper lobe was normal. The bronchoscope was withdrawn. The patient tolerated the procedure well.

60220 CT LUNG WITHOUT CONTRAST
71250

Date: 05/28/04 1805

Ord Diag: Chest Pain NOS 786.50

Chest CT scan 5/28/2004.

Indication: Evaluate for possible foreign body. Patient works in construction and apparently on a chest x-ray had a metallic foreign body.

The chest x-ray cannot be located for comparison. Spiral images were obtained through the chest without contrast. There are no metallic foreign bodies evident other than snaps and monitoring leads on the patient's skin. The lungs are free of nodules and infiltrates. There is left anterior descending coronary artery calcification. No other abnormalities are evident of the noncontrasted mediastinum.

Impression:

1. Negative for opaque foreign body.
2. Left anterior descending coronary artery calcification.

JUN 22 2004

PREOPERATIVE DIAGNOSES:

1. Possible left tension
2. Bronchial trauma status post rigid bronchoscopy and laser therapy.
3. Cigarette smoking.
4. Dyslipidemia.

POSTOPERATIVE DIAGNOSES:

1. Possible left tension
2. Bronchial trauma status post rigid bronchoscopy and laser therapy.
3. Cigarette smoking.
4. Dyslipidemia.

PROCEDURE: Emergency placement of a left thoracostomy tube.

SURGEON: Dr. Nguyenduy.

ANESTHESIA: IV narcotics.

INDICATIONS: The patient is a 45-year-old white male who is status post a rigid bronchoscopy for possible foreign body aspiration and postoperatively in the recovery room he developed subcutaneous emphysema and respiratory distress requiring insertion of endotracheal tube. He then became stable and concern of a left pneumothorax because of his subacute emphysema. Was asked to put in an emergency left thoracostomy tube.

PROCEDURE IN DETAIL: This is happening in the recovery room.

The patient was in the supine position, intubated and ventilated on the respirator. The left chest was scrubbed and painted with Betadine solution. A 3 cm incision was made at the x-ray line that is just above the 2nd intercostal space. A quick dissection was carried through with subcutaneous tissue to the muscle using the Metzenbaum scissors down to the intercostal space. Then using a Kelly clamp, the left pleural space was entered without any problems. Digital examination was

GUNN 004202

performed and the lung was mobile and free from any adhesions at the site of entry. A 32 French trocar was inserted in the left pleural space without any problems with good air return which fogged the chest tube. The chest tube was anchored and stayed with 2-0 Prolene mattress sutures. The chest tube was then connected to collecting unit and placed on -20 cm water continuous wall suction.

Postprocedure chest x-ray was obtained and showed that the tube is in good vision in left pleural space with extensive subacute and some continuous emphysema.

MEDICAL RECORD #: 146220

PROCEDURE DATE: 6/3/04

ACCOUNT NUMBER: 415400048

ROOM:

ICU

M.D. Signed
On-Line 6/11/04

PROCEDURE PERFORMED: Rigid bronchoscopy with laser bronch.

ENDOSCOPIST: Dr. Feldman.

INDICATIONS FOR PROCEDURE: 45 year old had been worked up by Dr. Paladugu and my partner, Dr. Boscia, with the finding of abnormal granulation tissue and abnormal subsegment in the left upper lobe corresponding to what appeared to be a crown foreign body on chest x-ray. The patient is now undergoing procedure in attempt to removal of chest x-ray abnormality suggestive of a crown; the patient does have a history of a missing crown.

After general anesthesia was induced, the patient was intubated with a rigid bronchoscope, size 16, without any difficulty. Careful inspection of the tracheobronchial tree was undertaken. The entire tracheobronchial tree was examined, there was no finding of a foreign body, however, a quite abnormal subsegment in the left upper lobe which appeared to be a pouch/granulation tissue has been identified. Laser of the area has been done with 45 watts over a 2-second period. Granulation tissue has been vaporized with the appearance of what appeared to be crown lying on the surface. With using 35 watts energy of the laser, there was no possibility of removal of the crown because it was deeply imbedded, and laser energy was applied to the center of the crown and it has been vaporized. However, below the surface there has been no further foreign body seen. The assumption was made that the entire crown other than on the surface had been vaporized, and attempt to pull it with a biopsy forceps and passage of the basket was unsuccessful. The washings were done of the area, and the procedure was terminated. The patient was extubated in recovery.

Although the patient did quite well during the procedure, he suddenly developed considerable pneumomediastinum and having immediately arrived to the bedside, Dr. Nguyenduy's consultation has been obtained. The decision was done by Dr. Nguyenduy and myself to place a chest tube, because of the impossibility to rule out pneumothorax, however, chest x-ray does not show pneumothorax, there is no foreign body seen, and also endotracheal tube is in good position. The patient was intubated by Anesthesia prior to that.

IMPRESSION: It is unclear to me at this point whether the laser went through the cartilage, and since I have not identified or pulled the crown itself, if in fact there was a crown it has been vaporized and is no longer seen on x-ray. At this point the patient will transfer to the ICU,

JK

GUNN 004204

antibiotics will be administered for disruption of the bronchus and pneumomediastinum. This will be followed by CT surgery and certainly if air leak into the pneumomediastinum would not stop, surgical intervention will be required. Hopefully this can be avoided by conservative management, but it is uncertain to me at this time whether the crown was vaporized or essentially the laser went through the highly abnormal area of the lung suggestive of closed congenital pouch rather than a foreign body, and significant irritation from previous bronchoscopy.

DISCHARGE SUMMARY

PATIENT NAME: CASEY, WILLIAM
DOB: [REDACTED]/1958
MEDICAL RECORD #: 146220
ACCOUNT NUMBER: 415400048
ADMISSION DATE: 06/03/2004
ATTENDING PHYSICIAN: FELDMAN, GREGORY

DISCHARGE DATE: 06/06/2004

M.D. Signed
On-Line

FINAL DIAGNOSES:

1. Status post recent bronchoscopy with laser for abnormal appearing airway, on flexible bronchoscopy suspected foreign body.
2. Complication of the procedure was pneumomediastinum and pneumothorax requiring chest tube insertion by Dr. Nguyenduy.
3. Asthma and heavy smoking.
4. Disabling back pain with a bulging disk and arthritis, long.

PLAN: The patient is discharged home on prednisone 20 mg q.d., Percocet 1-2 pills t.i.d. p.r.n. The patient will be seen in my office within a week. Diet and activity as tolerated.

HOSPITAL COURSE: This is a patient who underwent initial bronchoscopy by Dr. Boscia with finding of a quite irritated, blistered airway. Corresponding chest x-ray appeared to be missing dental material. The patient underwent bronchoscopy for assumption of airway caused by retained foreign body. It appeared to be that there was granulation tissue; however, after laser was applied it became apparent that instead of a normal airway, it is a pouch and procedure terminated with no foreign body recovered. The patient tolerated the procedure well; however, in recovery the patient suddenly developed subacute emphysema and x-ray revealed pneumomediastinum with pneumothorax on the left side. A small chest tube was inserted. The patient was kept on the respiratory overnight. His subcut air has subsided remarkably. The patient felt much, much improved. He was extubated and transferred to the floor. Repeat chest x-ray showed pneumothoraces on both right and left but unchanged in size and small at the time of discharge. The patient felt good with no complaints and was discharged home. We will assess in my office within the next two days. The patient has been instructed if he develops fever or increased subcut air or shortness of breath immediately to come back to see me.

MEDICAL RECORD #: 146220
PROCEDURE DATE: 5/28/2004
ACCOUNT NUMBER: 414900306
ROOM:

PROCEDURE(S) PERFORMED: Bronchoscopy.

REASON FOR PROCEDURE: 45 year-old male with what appears to be a foreign body.

MEDICATIONS: Versed 10 mg IV (intravenous), Fentanyl 100 mcg IV (intravenous), topical lidocaine.

DESCRIPTION OF PROCEDURE: After informed consent was obtained, the right nostril was anesthetized with topical lidocaine. The bronchoscope was advanced to the trachea without difficulty. Trachea as well as right segmental and subsegmental bronchi were normal, patent, without bronchial pathology. However, upon entering the left main stem bronchus, the distal end where the take off of the left upper lobe starts on the medial wall, there is a very erythematous area that was easily friable. No observable foreign body was noted. The airway post the erythematous take off of the left upper lobe was normal. The bronchoscope was withdrawn. The patient tolerated the procedure well.

After general anesthesia was induced, the patient was intubated with a rigid bronchoscope, size 16, without any difficulty. Careful inspection of the tracheobronchial tree was undertaken. The entire tracheobronchial tree was examined, there was no finding of a foreign body, however, a quite abnormal subsegment in the left upper lobe which appeared to be a pouch/granulation tissue has been identified. Laser of the area has been done with 45 watts over a 2-second period. Granulation tissue has been vaporized with the appearance of what appeared to be crown lying on the surface. With using 35 watts energy of the laser, there was no possibility of removal of the crown because it was deeply imbedded, and laser energy was applied to the center of the crown and it has been vaporized. However, below the surface there has been no further foreign body seen. The assumption was made that the entire crown other than on the surface had been vaporized, and attempt to pull it with a biopsy forceps and passage of the basket was unsuccessful. The washings were done of the area, and the procedure was terminated. The patient was extubated in recovery.

Although the patient did quite well during the procedure, he suddenly developed considerable pneumomediastinum and having immediately arrived to the bedside, Dr. Nguyenduy's consultation has been obtained. The decision was done by Dr. Nguyenduy and myself to place a chest tube, because of the impossibility to rule out pneumothorax, however, chest x-ray does not show pneumothorax, there is no foreign body seen, and also endotracheal tube is in good position. The patient was intubated by Anesthesia prior to that.

HISTORY OF PRESENT ILLNESS: This 46-year-old smoking male presented to the hospital for chest pain. An initial chest x-ray on admission showed what appears to be a foreign body in the left mainstem bronchus. I am being asked to comment on this. This patient complains of pain in his chest that is sharp that goes directly straight to his back. There is a history of cough. No history of hemoptysis.

PAST MEDICAL HISTORY: includes hypercholesterolemia. No history of hypertension or diabetes.

SOCIAL HISTORY: He has a 25 pack year smoking history. He works at Michelin.

FAMILY HISTORY: Is noncontributory.

REVIEW OF SYSTEMS: Includes all mentioned in history of present illness. Also, he has chronic back pain, occasional headaches, occasional constipation. All other review of systems are negative.

PHYSICAL EXAMINATION: He appears well in no acute respiratory distress. Blood pressure is 150/90, pulse is 84. Pupils react to light. The oral mucosa is moist without thrush. Neck is supple. Heart is regular. Lungs are clear bilaterally. Abdominal exam reveal no hepatosplenomegaly. Extremities are without clubbing, cyanosis or edema. Skin is intact with no rashes. Joints are not inflamed. Neurologically, cranial nerves II through XII are intact without focality.

Chest x-rays been reviewed in it does show what appears to be an irregular metallic foreign body in the left mainstem bronchus.

IN SUMMARY: 46-year-old gentleman with what appears to be a foreign body in the left mainstem bronchus. He has consented to fiber-optic bronchoscopy which would be the most reasonable next step. Will perform fiber-optic bronchoscopy to see if this foreign body is

DISCHARGE SUMMARY

PATIENT NAME: CASEY, WILLIAM

DOB: [REDACTED]/1958

MEDICAL RECORD #: 146220

ACCOUNT NUMBER: 414900306

ADMISSION DATE: 05/28/2004 **DISCHARGE DATE:** 05/29/2004

ATTENDING PHYSICIAN: KOSER, ANDRAS

PRESENTATION AND HOSPITAL COURSE: This 45-year-old Caucasian male with a history of elevated cholesterol, history of herniated disc, history of arthritis, who apparently has been having vague chest discomfort every time when he goes to work. The patient came in because of tightness that went straight to the back according to the emergency room physician; however, upon the workup the patient was found to have a left main bronchus containing some foreign body that was metallic in nature. It looks like a screw. It could have been dental filling. The patient was seen in consultation with Dr. Feldman who asked Dr. Boscia to do fiberoptic bronchoscopy and take a look inside and see if he can get it out. Apparently the area was quite difficult to get to. Some bleeding was visualized on the left main bronchus and then tried to dig it out but couldn't find any piece of metal and, hence, he did not do it. The patient was to undergo rigid bronchoscopy a week or two weeks later in Dr. Feldman's office. We feel at this time that the patient does not need any further inpatient stay.

DISCHARGE DIAGNOSES:

1. Noncardiac chest pain.
2. Metallic foreign body in the left main bronchus.
3. Elevated cholesterol.
4. White coat hypertension.

DISCHARGE MEDICATIONS:

1. Lipitor 10 mg p.o. q.d.

DISCHARGE DISPOSITION: The patient is going home.

FOLLOW UP: The patient will follow up with Dr. Gonda in one week.

Dictated by: RAJA PALADUGU, M.D.

CHIEF COMPLAINT: Chest pain.

HISTORY OF PRESENT ILLNESS: This is a 45-year-old Caucasian male with a history of elevated cholesterol, history of herniated disk, and a history of arthritis apparently been having vague chest discomfort every time he goes to work. The patient comes in because of substernal chest tightness that radiates to the back. The patient had extensive cardiac workup done on the last admission which was in the year 2000, July. At that time the patient underwent cardiac catheterization, which showed normal coronaries. The patient comes in, does not give this chest pain history, doesn't have any associated symptoms whatsoever. No diaphoresis, no shortness of breath. Radiating to the back is the only one. No nausea. Currently feels fine. He says the patient was given some aspirin, nitroglycerin.

PHYSICAL EXAMINATION:

CNS: The patient is alert and oriented times three.
HEENT: Normocephalic, atraumatic. Pupils are equal, round, and reactive to light and accommodation.
CHEST: Clear to auscultation bilaterally.
CARDIOVASCULAR: Regular rate and rhythm.
ABDOMEN: Soft, nontender.
EXTREMITIES: No cyanosis, clubbing, or edema.
NEUROLOGICAL: Cranial nerves II through XII grossly intact. Motor 5/5 bilaterally. Sensory intact bilaterally.

REVIEW OF SYSTEMS: no fever or chills. No headache or dizziness. No cough or phlegm. Chest pain as described above. The rest of the review of systems essentially negative.

PAST MEDICAL HISTORY: Reveals a herniated disk and arthritis.

MEDICATIONS: Lipitor, Bextra, Ultram, Lortab.

ALLERGIES: No known drug allergies.

PAST SURGICAL HISTORY: Negative.

SOCIAL HISTORY: Positive smoker. Occasional ETOH.

ALLERGIES: No known drug allergies.

LABORATORY DATA: : CPK 103, MB 1.4, index 1.1 troponin less than 0.07, myoglobin 28.9, PT 12.3, INR 1.1, PTT 29.8. Sodium 137, potassium 3.9, chloride [REDACTED] EUN 12, creatinine 0.8, glucose 106, WBC 9.1, hemoglobin 12, hematocrit 36, platelets 539.

GUNN 004213

IMPRESSION/PLAN:

1. Noncardiac chest pain most likely secondary to
in the left main bronchus. We will get pulmonary
to see this patient for possible bronchoscopy and removal
if possible.
2. Hypertension. The patient's blood pressure is elevated.
Never told that he has been hypertensive before, although
the patient has been noncompliant with medications and
follow up and, hence, we will keep an eye on the blood
pressure. We will place the patient on Lopressor 50 mg q.d.
for now. Has multiple blood pressure readings in the
emergency room. Continues to stay high diastolic of 109.
3. Elevated cholesterol. We will check a lipid profile in
the morning.

#2: PATIENT COMPLAINT

Pt and sister here this visit. Pt came back for a return follow-up visit. Patient's sister started asking questions to Dr. Boscia re: the rigid Bronch. Sister (Carol Casey) wanted to know "Why the urgency of doing a bronch". Explained to patient that something was seen on the x-ray but he was unable to see it on the fibroptic-bronch but something was there.

Nursing Interventions/Advice Pt stated he did not have a psm with what Dr. Boscia had done. He reports he came to the hospital with pain in his chest reports pain continues. Pt reported that all he wanted was something that

Gregory J. Feldman, M.D.
1091 Boiling Springs Road
Spartanburg, SC 29303

RE: CASEY, William

Dear Dr. Feldman:

Thank you referring Mr. Casey to our pain clinic. He was seen about three and one-half years ago, after being referred by his family physician, Dr. Gonda. He was diagnosed with mechanical low back pain. I ordered an MRI scan of his lower back, but the patient never returned.

Today, the patient's clinical features have not really changed except for Mr. Casey appearing to be more depressed. He is also having some epigastric pain but on examination, this looks as if it is coming from his chest wall. I think he may benefit from being seen by a gastroenterologist. As far as his low back pain is concerned, it is purely mechanical, and his MRI is practically normal with two slightly bulging disks that are obviously not his source of pain. He received an epidural steroid injection by a radiologist at Mary Black, which did not help. Firstly, according to the picture that I have seen, they never got the needle into the epidural space and, secondly, the patient did not have pain that can be alleviated with an epidural steroid injection. I discussed treatment options with Mr. Casey, and, again, I think he would benefit from diagnostic and, hopefully, therapeutic lumbosacral joint injections. If this would provide relief for only a short period of time, then we would set him up for specific therapy for his pain.

Also, I believe Mr. Casey would benefit from seeing a psychologist or psychiatrist to treat his anxiety and depression. At this point, however, we will not address this issue.

Again, thank you again for allowing me to participate in the consultation and treatment of this patient.

Sincerely,

Y. Eugene Mironer, M.D.

YEM/ss/mds

JUN 08 2004

CONSULT
PATIENT NAME: CASEY, WILLIAM
DOB: [REDACTED]/1958
MEDICAL RECORD #: 146220
ACCOUNT NUMBER: 414900306
DATE OF SERVICE:
ATTENDING PHYSICIAN: KOSER, ANDRAS
ROOM:

HISTORY OF PRESENT ILLNESS: This 46-year-old smoking male presented to the hospital for chest pain. An initial chest x-ray on admission showed what appears to be a foreign body in the left mainstem bronchus. I am being asked to comment on this. This patient complains of pain in his chest that is sharp that goes directly straight to his back. There is a history of cough. No history of hemoptysis.

FAST MEDICAL HISTORY: includes hypercholesterolemia. No history of hypertension or diabetes.

SOCIAL HISTORY: He has a 25 pack year smoking history. He works at Michelin.

FAMILY HISTORY: Is noncontributory.

REVIEW OF SYSTEMS: Includes all mentioned in history of present illness. Also, he has chronic back pain, occasional headaches, occasional constipation. All other review of systems are negative.

PHYSICAL EXAMINATION: He appears well in no acute respiratory distress. Blood pressure is 150/90, pulse is 84. Pupils react to light. The oral mucosa is moist without thrush. Neck is supple. Heart is regular. Lungs are clear bilaterally. Abdominal exam reveal no hepatosplenomegaly. Extremities are without clubbing, cyanosis or edema. Skin is intact with no rashes. Joints are not inflamed. Neurologically, cranial nerves II through XII are intact without focality.

Chest x-rays been reviewed in it does show what appears to be an irregular metallic foreign body in the left mainstem bronchus.

IN SUMMARY: 46-year-old gentleman with what appears to be a foreign body in the left mainstem bronchus. He has consented to fiber-optic bronchoscopy which would be the

GUNN 004241

most reasonable next step. Will perform fiber-optic bronchoscopy to see if this foreign body is removable. If it is not removable or granulated in, than rigid bronchoscopy in the operating room will be performed. Risks, benefits, and alternatives were discussed with Mr. Casey and he agrees to proceed with bronchoscopy.

PROCEDURE DATE: 6/3/04
ACCOUNT NUMBER: 415400048
ROOM: ICU

M.D. Signed
On-Line

PROCEDURE PERFORMED: Rigid bronchoscopy with laser bronch.

ENDOSCOPIST: Dr. Feldman.

INDICATIONS FOR PROCEDURE: 45 year old had been worked up by Dr. Paladugu and my partner, Dr. Boscia, with the finding of abnormal granulation tissue and abnormal subsegment in the left upper lobe corresponding to what appeared to be a crown foreign body on chest x-ray. The patient is now undergoing procedure in attempt to removal of chest x-ray abnormality suggestive of a crown; the patient does have a history of a missing crown.

After general anesthesia was induced, the patient was intubated with a rigid bronchoscope, size 16, without any difficulty. Careful inspection of the tracheobronchial tree was undertaken. The entire tracheobronchial tree was examined, there was no finding of a foreign body, however, a quite abnormal subsegment in the left upper lobe which appeared to be a pouch/granulation tissue has been identified. Laser of the area has been done with 45 watts over a 2-second period. Granulation tissue has been vaporized with the appearance of what appeared to be crown lying on the surface. With using 35 watts energy of the laser, there was no possibility of removal of the crown because it was deeply imbedded, and laser energy was applied to the center of the crown. Below the surface there has been no further foreign body.

PATIENT NAME: CASEY, WILLIAM
DOB: [REDACTED]/1958
MEDICAL RECORD #: 146220
PROCEDURE DATE: 5/28/2004
ACCOUNT NUMBER: 414900306
ROOM:

PROCEDURE(S) PERFORMED: Bronchoscopy.

REASON FOR PROCEDURE: 45 year-old male with what appears to be a foreign body.

MEDICATIONS: Versed 10 mg IV (intravenous), Fentanyl 100 mcg IV (intravenous), topical lidocaine.

DESCRIPTION OF PROCEDURE: After informed consent was obtained, the right nostril was anesthetized with topical lidocaine. The bronchoscope was advanced to the trachea without difficulty. Trachea as well as right segmental and subsegmental bronchi were normal, patent, without bronchial pathology. However, upon entering the left main stem bronchus, the distal end where the take off of the left upper lobe starts on the medial wall, there is a very erythematous area that was easily friable. No observable foreign body was noted. The airway post the erythematous take off of the left upper lobe was normal. The bronchoscope was withdrawn. The patient tolerated the procedure well.

NUCLEAR STRESS STUDY

NAME: CASEY, WILLIAM M.

DOB: [REDACTED]/58

DATE: AUGUST 2, 2004

CLINICAL HISTORY:

Mr. Casey is a 45-year-old patient of Dr. Gonda. The patient has also seen Dr. Srivastava. This study is ordered by Dr. Wilson Smith for evaluation of chest pain. The patient had an abnormal calcium score by CT. The patient also had a normal catheterization in the year 2000.

DESCRIPTION OF STUDY:

Resting images were obtained after the administration of 10 mCi of Cardiolite. The patient then underwent Bruce protocol stress testing completing 9 minutes of exercise achieving 10.1 mets and 87 percent of the predicted maximum heart rate. At peak exercise, 25 mCi of Cardiolite were administered.

FINDINGS:

The raw images revealed no significant lung uptake.

The SPECT images revealed normal perfusion on stress and rest images. There was no evidence for ischemia.

The gated images revealed normal systolic function with a calculated ejection fraction of 58 percent. There were no regional wall motion abnormalities present.

IMPRESSION:

Normal study.

COMMENT:

Previous Cardiolite in July of 2000 revealed inferior ischemia. This was subsequently found to be a false-positive study. This study is normal.

Exam

60220 CT LUNG WITHOUT CONTRAST
71250

Date: 05/28/04 1805

Ord Diag: Chest Pain NOS 786.50

Chest CT scan 5/28/2004.

Indication: Evaluate for possible foreign body. Patient works in construction and apparently on a chest x-ray had a metallic foreign body.

The chest x-ray cannot be located for comparison. Spiral images were obtained through the chest without contrast. There are no metallic foreign bodies evident other than snaps and monitoring leads on the patient's skin. The lungs are free of nodules and infiltrates. There is left anterior descending coronary artery calcification. No other abnormalities are evident of the noncontrasted mediastinum.

Impression:

1. Negative for opaque foreign body.
2. Left anterior descending coronary artery calcification.

1. States still feeling the same, chest wall pain with exertion and back pain

HPI

Interim History:

Mr. Casey he reports no significant change in his chest wall pain or back pain. This is mainly related to movement or exertion. It is relieved by Lortab.

He continues to have difficulty in concentrating. He has to take notes to remember what is going to do later in the day. He is followed by a psychiatrist in Greenville and is on Adderall but still has difficulties with staying focused. He continues his regular followup with Dr. Gonda who is his primary care doctor.

Vital Signs

Wt: 182.6, BP: 124/80, HR: 99, O2 sat: 96%, FIO2: .21, FVC: 3.97, FEV1: 3.23, FEV1/FVC%: 81%, Ht: 68, BMI: 27.76.

Physical Examination

on exam the patient is no acute distress. The patient has not been paying as much attention by his own admission to oral hygiene and he has teeth are in only fair repair On exam today. The pupils are symmetric. Next her wrist pain. Trachea midline. No wheezes rales or rhonchi. The patient's chest wall pain increases with anterior-posterior compression suggesting a mass a skilled etiology. Fremitus is symmetric. Heart tones regular. No murmur or gallop. No abdominal organomegaly. No cyanosis edema or clubbing. Coordination normal range..

Assessments

the patient appears stable in terms of his lung function. He needs to followup with a dentist; The deterioration in his oral hygiene and condition of his teeth over the last year is rather striking but consistent with his lack of attention.. His overall functional status does not appear any worse or any better than on his last visit and we deferred his continued treatment to his primary care doctors..

Treatment

1. Others

Continue Lortab 10 tablet, 500 mg-10 mg, orally, 120, 1 tab(s), Q6H, 30 days, Refills 5
he continues with chronic chest wall and back pain. He does not appear to

Follow Up

The patient was given a prescription for Lortab. Dr. Gonda is prescribing his other medications. He will check back with us in 6 months urine meanwhile he was encouraged to have an outline for how he is going to plan the day in a week and take additional notes. He was advised is unlikely his chest wall pain is related to his heart although he remains concerned about heart disease. He is not smoking at present. He remains unable to return to work.

1. Xrays

HPI

Interim History:

Mr. Casey is here to obtain some x-rays with a piece of metal in front of or in back of his chest per the letter from Mr. Thompson. He is still puzzled as to why the doctors felt there was a metal object in his chest when he does not have any recollection of ever having had anything go down into his windpipe.

Assessments

1. Back pain - 724.5 (Primary)

Treatment

1. Back pain

We showed Mr. Casey the frontal view of the x-ray taken today which shows a metallic object which appears to be overlying the left upper chest. We then showed Mr. Casey the side view which makes it clear that in fact the front to is potentially misleading in so far as a metallic object is actually outside the chest as evident on the lateral view.

Diagnostic Imaging

X ray : Chest PAL Front and side views of the chest were taken with a small metallic object takes to the back of his chest to simulate what might have happened if he had been lying on top of a small metallic object with his portable chest film was taken in May 2004.

RE: William Mark Casey
DOB: [REDACTED]/58

Dear Dr. Fogarty:

My client, William Mark Casey, is still trying to understand why Dr. Joseph Boscia and Dr. Gregory Feldman felt there was a metal object in his chest that needed bronchoscopies to get it out. I think it would be helpful to Mr. Casey to understand if you showed him how a piece of metal laying underneath him or on top of him appeared on his plain chest film.

Would you consider taking a front to back x-ray with a piece of metal underneath his body or on top of his body that would give the impression that the piece of metal is actually inside his chest? Also, would you consider taking a side view chest film that shows the metal object is really outside of his body? Although we will probably never know the proper identification of the piece of metal that appears in the May 28, 2004 portable chest x-ray, please presume it is a small screw or the back of an earring. I am enclosing along with this letter the back of an earring that appears to be of similar size to the metal object in the x-ray taken of Mr. Casey on May 28, 2004. Obviously, I do not want to request anything that would create a further health risk to Mr. Casey and I would defer that judgment to you. I think this would help Mr. Casey to understand and visualize what I have been unsuccessful in trying to explain to him.

With warm regards,

I remain,
BURTS, TURNER, RHODES & THOMPSON

Current Medications

Tricor 145 mg 1 tab(s) once a day
Lortab 10 500 mg-10 mg 1 tab(s) Q6H
Vytorin 10 mg-40 mg 1 tab(s) once a day

Past Medical History

Chest wall pain
Hyperlipidemia
Difficulty with multitasking, concentrating,
s/post pneumomediastinum/pneumothorax;
neurocognitive impairment
Back pain

Social History

Marital status: Divorced.
Education level: College one year.
Alcohol: reports, socially.
Other MDs: Primary care Dr. Ganda.

Allergies

NKMA

Review of Systems

CONSTITUTIONAL:

no Fever/Chills. no Night sweats.

ENT:

no Sore throat. no Sinus pain.

RESPIRATORY:

no Shortness of breath. no Cough, Dry.

Wheezing c/o, Occasional. Chest Tightness

c/o, Occasional, With activity.

CARDIOLOGY:

no Heart Trouble. no Leg edema.

no Dizziness.

GASTROENTEROLOGY:

c/o Nausea, SOME. no Vomiting.

ALLERGY:

no Runny nose. no Sinus congestion.

CC

1. Some chest tightness with exertion
2. Back pain

HPI

Interim History:

Mr. Casey reports continued troubles with the organizing his stay and remembering what he is supposed to do unless he takes notes or special effort to concentrate. He finds that his mood fluctuates. He is discouraged in that he does he should be capable of doing more.

Vital Signs

Wt: 184, BP: 120/86, HR: 115, O2 sat: 94%, FIO2: .21, FVC: 3.95, FEV1: 3.20, FEV1/FVC%: 81%, Ht: 68, BMI: 27.97.

Physical Examination

no acute distress at rest. Pupils symmetric. Oropharynx clear. Teeth good repair. Trachea midline. No jugular venous distention. No carotid bruit. Chest expands symmetrically. Heart tones regular no murmur gallop no edema or clubbing coordination normal range.

Assessments

1. Hyperlipidemia - 272.4 (Primary)
2. Back pain - 724.5

Treatment

1. Back pain

Continue Lortab 10 tablet, 500 mg-10 mg, orally, 40, 1 tab(s), Q6H, 10 day(s)

2. Others

With reference to the patient's difficulty concentrating and staying focused he was encouraged too take simple measures such as using a daytime her and less to keep on task. Review this at the start and end of the day. he is followed by Dr. Frank Gonda and we will defer any additional medicine/pharmacologic therapy to Dr. Gonda. He remains worried about his heart although his current chest pain is more consistent with chest wall pain he was encouraged take fish oil capsules on general principles since he does have a hyperlipidemia

WILLIAM CASEY
77168
02-16-06

OFFICE NOTE

Chief Complaint

William Casey continues to have difficulty concentrating/multitasking. He has not had any further problems with nausea and vomiting since cutting back on his medication. He is followed by Dr. Gonda who increased the Lipitor to 20 mg daily and added Tricor. He continues to need two to three Lortab 5 a day for his pain which at this point appears to be chest wall in etiology.

Current Conditions

1. Difficulty with multitasking, concentrating, status post pneumomediastinum/pneumothorax.
2. Chest wall pain.
3. Hyperlipidemia.

Current Medicines

1. Combivent 1 puff four times daily as needed. (Rarely used since last visit.)
2. Lipitor 20 mg each evening.
3. Tricor each morning.
4. Ultram 50 mg four times daily as needed.
5. Lortab four times daily as needed.

Social History

The patient has been unable to work since his laser surgery and is applying for disability. No tobacco or alcohol.

Review of Systems

No additional findings on cardiorespiratory, GI or GU review.

Physical Examination

Vital Signs: Wt. 189.5, BP 136/72, HR 96, RR 20 and SaO₂ is 95% on room air.

General: No acute distress.

Skin: Normal turgor.

HEENT: Pupils symmetric.

Neck: No jugular venous distention.

Physical Examination (Continued)

Chest: No wheezes, rales or rhonchi.

Cardiac: No murmur or gallop.

Abdomen: Not done.

Extremities: No edema or clubbing.

Neurological: Difficult staying focused and concentrating during our conversation evident.

Laboratory Data

The vital capacity is 4.17, 88% of predicted. FEV₁ 3.46, 90% of predicted.

Impression/Discussion/Plan

The patient's lung function remains stable. His dilemma is that mentally he is not up to snuff as far as returning to his old job or returning the skills for a new equivalent job. He is now approaching two years out and it appears likely he has achieved his maximum improvement, i.e. it is unlikely as time goes forward that he will have improvement in his ability to concentrate and recall/perform make "executive type decisions"/thinking.

The patient's lung function is in a range where he probably does not need to use the Combivent although he still has it on hand. He was encouraged to continue to try to exercise to maintain muscle mass, balance and coordination. He was instructed in diet with attention to his cholesterol and salt intake. He will check back the end of this summer/fall as needed.

08-04-05

OFFICE NOTE

Chief Complaint

William Casey returns for follow up on his previous visit. Since we saw him he has had coronary calcium score and upper abdominal ultrasound.

Current Conditions

1. Chest pain.
2. Nausea and vomiting.
3. Persistent difficulty concentrating staying focused status post pneumomediastinum/pneumothorax complicating laser therapy in attempt for laser therapy for metallic artifact, which ultimately proved to be outside of chest.

Current Medicines

1. Advair 250/50 twice daily.
2. Combivent 1 puff four times daily as needed.
3. Ultram 50 mg four times daily as needed chest pain.
4. Lipitor 10 mg daily.
5. Lortab four times daily as needed.

Social History

No tobacco or alcohol.

Review of Systems

No additional findings on cardiorespiratory, GI or GU review.

Physical Examination

Vital Signs: Wt. 178, BP 120/74, HR 75, RR 22 and SaO₂ is 98% on room air.

General: No acute distress.

Skin: Normal turgor.

HEENT: Pupils symmetric.

Neck: No jugular venous distention.

Physical Examination (Continued)

Chest: No wheezes, rales or rhonchi.

Cardiac: No murmur or gallop.

Abdomen: Bowel sounds present. The patient felt like he might have the heaves while in the office but no emesis. Bowel sounds present.

Extremities: No edema or clubbing.

Neurological: The patient had some readily apparent difficulty staying focused with answers to questions and had difficulties repeating numbers backward on a simple cognitive screen.

Laboratory Data

The ultrasound showed no pathological findings.

Impression/Discussion/Plan

The patient has been instructed in optimal use of aerosol therapy. The patient was instructed on diet with attention at maintaining muscle mass and achieving an ideal body weight. The patient is instructed in exercise to promote mucous clearance, maintain balance and muscle mass. The patient was given our cell phone number to call any time any interval problems develop before the next visit.

The patient is to continue his current regimen. He will check back with us this fall.

OFFICE NOTE

Chief Complaint

William Casey returns for follow up on his 7/19 visit. At that time he was having dry heaves and nausea and this was felt possibly to be an interaction between the Strattera and the Cymbalta and he was advised to discontinue these. Since then he is better. He continues to have chest pain, a squeezing sensation. This can be present without exercise although exacerbated by exercise.

We should note that it was this symptom that led him to go to the emergency room May 2004. Although the presenting complaint was chest pain, a chest film showed a metallic fragment overlying the chest. This was misinterpreted as being in the chest and the patient underwent bronchoscopy. And when the bronchoscopy did not show definite abnormality, but rather an area of erythema, he was scheduled for a laser bronchoscopy. He had the laser bronchoscopy complicated by pneumomediastinum with a lengthy two hour anesthesia. Since then, although the patient recovered from his pneumomediastinum and bilateral pneumothoraces with chest tubes, intubation and mechanical ventilation, since then he has had continued difficulties concentrating, staying focused and with his general energy.

He is not smoking.

Current Medicines

1. Advair 250/50 twice daily.
2. Combivent 1 puff four times daily as needed.
3. Ultram 50 mg four times daily as needed chest pain.
4. Lipitor 10 mg daily.
5. Lortab four times daily as needed.

Social History

He has been out of work now for a year and probably will be out of health insurance and probably lose his job since he has been unable to hold gainful employment in the interim in large part because of his difficulties with concentrating, staying focused. Although the issue of his chest pain still remains unresolved.

Page Two

Family History

Coronary artery disease and hyperlipidemia.

Review of Systems

He did have a cardiac catheterization several years back but his CT during the May 2004 admission prior to his laser bronchoscopy was normal range except for incidentally noted coronary calcification. No additional findings on cardiorespiratory, GI or GU review.

Physical Examination

Vital Signs: Wt. 176.6, BP 153/91, HR 78, RR 20 and SaO₂ is 98% on room air.

General: No acute distress.

Skin: Normal turgor.

HEENT: Pupils symmetric.

Neck: No jugular venous distention.

Chest: No wheezes, rales or rhonchi.

Cardiac: No murmur or gallop.

Abdomen: Bowel sounds present. The patient felt like he might have the heaves while in the office but no emesis. Bowel sounds present.

Extremities: No edema or clubbing.

Neurological: The patient had some readily apparent difficulty staying focused with answers to questions and had difficulties repeating numbers backward on a simple cognitive screen.

Laboratory Data

The vital capacity is 4.65 or 98% of predicted. The forced expiratory volume is 3.76 or 97% of predicted.

Today's cardiogram is normal range. Interestingly the cardiogram while he was in the hospital with his chest pain in May of last year showed nonspecific ST T-changes.

Impression

1. Chest pain.
2. Nausea and vomiting.
3. Persistent difficulty concentrating staying focused status post pneumomediastinum/pneumothorax complicating laser therapy in attempt for laser therapy for metallic artifact, which ultimately proved to be outside of chest.

Comment

With reference to the patient's GI symptoms they do seem improved since discontinuing the Strattera and this really did not help with his staying focused anyway. However he may still have some underlying pathology such as cholelithiasis or peptic ulcer disease and ultrasound of the gallbladder appears warranted. If symptoms persist we may consider an upper GI.

With reference to the patient's squeezing he does have risk factors for coronary artery disease in terms of his hyperlipidemia, family history and previous smoking and he did have coronary calcification incidentally noted on Spartanburg Regional Medical Center CT. A formal coronary calcium score may be indicated and if elevated may be an indication to proceed with more vigorous cardiac workup.

With reference to the patient's difficulty concentrating, he undoubtedly had air emboli given his lengthy duration of anesthesia and laser perforation of the endotracheal tree with resultant leakage of air into extra pleural and vascular extra pleural mediastinal and vascular spaces. Although he is fortunate not to have any gross motor deficit, he may well have a permanent neurologic deficit in which case the indication for taking medication may be moot and the patient may simply need to recognize that although he would like to go back to work, he may be chronically disabled by his neurologic impairment.

Plan

We will check back with the patient via phone with reference to his coronary calcium score and his gallbladder ultrasound. Further evaluation will proceed pending the results of above. Separately, we will review the patient's chart for him since he still has many questions about what happened during the hospital admission for his chest pain. We will review the patient's chart for him and try to put into lay language a summary of the chart with reference to what happened to him during the hospital admission for his chest pain last year.

CALCIUM SCORE GUIDELINES

Total Score	Plaque Burden	Risk Category	Probability of Significant CAD	Guidelines
<u>0-1</u>	No identifiable atherosclerotic plaque	Very Low	Very Unlikely	Reassurance while stressing adherence to general guidelines on diet and exercise.
<u>✓ 1-10</u>	Minimal identifiable plaque	Low	Unlikely	Follow the general guidelines on cardiovascular risk reduction.
<u>11-100</u>	Mild identifiable plaque	Moderate	Mild or minimal coronary stenosis likely	Risk factor medication is recommended, including daily aspirin and strict adherence to National Cholesterol Education Program or proposed modification.
<u>101-400</u>	Moderate identifiable plaque	Moderately High	Moderate likelihood of significant stenosis	Aggressive risk factor modification is recommended with stress testing preparatory to an exercise program. Daily aspirin is advised. Strict adherence to National Cholesterol Education Program or proposed modification.
<u>Over 400</u>	Extensive plaque burden	High	High likelihood of significant coronary stenosis	Very aggressive risk factor modification is recommended (including aspirin and a statin medication) with stress imaging and possibly angiography.

Coronary artery calcification is a specific marker for coronary atherosclerosis. The amount of calcification correlates with severity of coronary atherosclerosis and the probability of obstructive disease. A score of 0 indicates no coronary artery calcification and this implies the absence of significant angiographic coronary narrowing in 99% of cases. It does not absolutely rule out the presence of soft non-calcified plaque, especially in younger patients and those who smoke heavily. A high score indicates a significant plaque burden and the relative risk for future cardiovascular events. It should be understood that calcification is not site specific for stenosis but rather indicates the extent of atherosclerosis in the coronary arteries overall. The score may be used as a benchmark to measure subsequent disease development or assess preventative programs. Thank you for your confidence in our center.

Sincerely,

 Raul Ceballos, Jr. MD
 Radiologist

OFFICE NOTE

Mr. Casey returns for a follow up visit today. He is trying to resume activities. He has developed chest pain with exertion and so in view of the finding of coronary artery calcification on his CT scan and his exertional chest pain we will refer him for a Cardiolite stress test and consideration of pulmonary rehabilitation. EKG today is within normal limits and shows no acute changes.

**PULMONARY REHABILITATION PROGRAM
PHYSICIAN REFERRAL**

This patient is referred to the Spartanburg Regional Healthcare System Pulmonary Rehabilitation Program:

Name: William Mark Casey Referral Date: 7-23-04

Address: 240 Lightwood Farm Rd, Woodruff, SC 29388

Home phone: 486-9131 Work phone: 680-5929 Date of Birth: [REDACTED]-58

Diagnosis: Shortness of breath + chest pain MRN: _____

Cardiac Clearance: (To be completed by physician prior to beginning pulmonary rehab).

- ☐ Perform cardiopulmonary exercise stress test. Your patient will be scheduled to begin pulmonary rehab after receiving results of the exercise stress test.
- ☐ Do not perform cardiopulmonary exercise stress test. Attach documentation to support cardiac clearance.

Comments: _____

CONSULTS:

Physical Therapy

Reason for referral: Evaluation/Treatment of postural deficits, thoracic mobility deficits, musculoskeletal dysfunction and/or pain, gait deficits.

Evaluation/instruction in: proper body mechanics for ADL's and lifting, postural correction and strengthening techniques, therapeutic exercise, stretching, and osteoporosis education.

Occupational Therapy

Reason for referral: Evaluation of activities of daily living, functional training in self care and home management, training in energy conservation, work simplification, and adaptive techniques for daily living.

Respiratory Therapy

Reason for referral: Evaluation of Home and Exercise Oxygen System Requirements.

Evaluation/instruction in: Breathing retraining, Airway Clearance Techniques, Proper use inhaled medications.

Education/Classes:

Anatomy & Physiology of COPD; Pursed Lip/Diaphragmatic breathing techniques;
Respiratory medications; Infection control techniques; Effective coughing techniques;
Panic control/relaxation techniques; Nutrition assessment.

DURATION/FREQUENCY: 3 Days per week for 6 Weeks

PROGRESS DOCUMENTATION/OUTCOME MEASURES:

- Pre and post program sub-maximal treadmill test, 6 minute walk, Dyspnea Index, Pulmonary Functional Status Scale (PFSS), Tennetti Assessment Tool.
- Monitoring: Pulse oximetry, blood pressure, heart rate, respiratory rate, Borg RPE, Pain scale, weight.
- Discharge summary with report to referring physician

POTENTIAL FOR REHABILITATION? (Please circle): Excellent Good Fair

HISTORY AND PHYSICAL

REFERRING PHYSICIAN: Self-referred.

History Mr. Casey is a 45-year-old male who presents for evaluation of chest difficulties that began in May of this year when he presented to the emergency room at Spartanburg Regional Medical Center with a complaint of chest pain. A PA chest x-ray taken at that time suggested the possibility of a foreign body. He works for Michelin Tire Company. He underwent a bronchoscopy, which was felt to be abnormal but no foreign body was identified. A subsequent CT scan done the same day did not confirm any abnormality. However it does mention that there is left anterior descending coronary artery calcifications. In 2000 he had a stress test and catheterization which was normal. Following this underwent a rigid bronchoscopy in attempt to identify foreign body and remove it. During that procedure he had a perforation of the bronchial wall by a laser which resulted in pneumomediastinum and respiratory distress. He required intubation and heavy sedation and was able to be extubated the following day. Since that time he notes fatigue during the day. He continues to have dyspnea and chest pain with exertion. He has become very anxious. His sister accompanying him for the interview notes that he seems to have experienced a change in his ability to tolerate stress and appears much more anxious and restless than she has known him to be in the past. He is a previous smoker for about 12 years but has not smoked in the past three weeks. He does snore but feels he sleeps well. He denies any hemoptysis, chronic cough or weight loss. He still has the chest pain.

Past Medical History Previous hemorrhoid surgery in 1994 and a hospitalization for evaluation of chest pain in 2000 for which he underwent cardiac catheterization.

Current Medications

1. Lipitor 20 mgs a day.
2. Bextra 20 mgs daily.
3. Tramadol 50 mgs two tablets four times a day for pain.
4. Advair twice daily.
5. Combivent four times a day.

Allergies: No known drug allergies.

Family History His father died of a heart attack. He has a sibling who died of cancer.

Social History He is divorced. He completed one year of college. He drinks occasional alcohol. He likes to play golf. He has been unable to play since his injury.

Review of Systems Shows some arthritis which he manages with the Bextra. He has an elevated cholesterol for which he is on the Lipitor. He had an episode of rectal bleeding 10 years ago. He notes that he gets up three to four times during the night for micturition. He has disk problems and arthritis in his lower back.

Physical Examination

General: Middle-aged white male.

Vital Signs: BP 136/87, HR 100, Wt. 171, and SaO₂ is 95% on room air.

HEENT: Unremarkable. There is no jugular venous distention, cervical or supraclavicular adenopathy. The throat is clear.

Chest: Clear to auscultation.

Cardiac: Regular rate and rhythm without murmur or gallop.

Abdomen: Soft and nontender.

Extremities: No clubbing, cyanosis or edema.

Neurological: Motor strength appears 5/5 in all extremities. Cranial II through XII nerves are intact.

Laboratory Data

Pulmonary function studies show normal vital capacity and flow rates with a vital capacity of 4.7 liters, which is 99% of predicted and forced expiratory volume that is 98% of predicted. There was no change with bronchodilator. Flow volume loop showed no evidence of upper airway obstruction. Maximum voluntary ventilation was reduced at about 70 to 77% of predicted.

Impression

1. His pulmonary function is normal and chest x-ray does not show any evidence of sequelae of his bronchial perforation. The patient brought his outside films and he did not bring a recent follow up film. Pulmonary function studies are normal. I do not find any evidence for airway obstruction that would account for his problems. But I wonder if he suffers from a posttraumatic stress disorder related to his injury and intensive care unit experience. I would like to refer him to a psychologist for further evaluation. On his return we will get a follow up chest x-ray and a diffusion capacity and in view of his CT scan suggesting left anterior descending coronary artery calcification I believe a repeat stress test might be in order.

2. If you have quit smoking, how many years did you smoke? 12 How many packs per day? _____
How long ago did you quit? 2 weeks
3. Do you have a chronic cough? NO How long? _____ Do you cough anything up? _____
If so what color? _____
4. Have you ever coughed up blood? NO
5. Do you get short of breath if you walk or climb steps? no
6. Are you short of breath while you are resting? NO
7. Do you ever notice yourself wheezing? _____ What seems to make the wheezing worse? _____
8. Do you wake up tired? yes
9. Do you snore? yes
10. Do you have night sweats? SOME Fevers? _____
11. When was your last chest x-ray? June Where? Dr. Feldman
12. Potential Exposures:
 - a. Does anyone else in your home smoke? NO
 - b. Have you ever had a skin test for TB (tuberculosis)? No When? _____
 - c. What were the results of the skin test, if you know? _____
 - d. Have you ever been exposed to TB? _____ When? _____

LC111 - 12-23-03

GUNN 004332

- e. If you have been exposed to TB, have you had a skin test since then? _____
- f. Do you have indoor pets? _____ What kind? _____
- g. Have you been, or are you exposed to dust or fumes? _____ What kinds? _____
- h. Have you traveled out of the upstate area? _____

IV. Work History

1. What type of work do you do? production - 8 + 12 hr shifts (swing)
2. Have you done other types of work? yes Please list: paint shop - Restaurant
3. Have you ever served in the military? no Where? _____

V. Past Medical History (Hospitalizations)

Have you ever been admitted to a hospital for an operation or illness? (Use Back of Page if necessary)

<u>Name of Hospital</u>	<u>When</u>	<u>Reason</u>
<u>Mary Black</u>	<u>1994?</u>	<u>hemorrhoid surgery</u>
<u>Regional</u>	<u>2000</u>	<u>chest PAIN</u>

VI. Family History (Use back of page if necessary)

1. Mother's Age? _____ Living? _____ Or died of _____
2. Father's Age? _____ Living? _____ Or died of Heart attack
3. Brother or Sister's Age? 44 Living? _____ Or died of CANCER
4. Brother or Sister's Age? 47 Living? ☒ Or died of _____
5. Brother or Sister's Age? 42 Living? ☒ Or died of _____

VII. Social History

1. Are you married? NO Widowed? _____ Single? _____ Divorced? ☒
2. What was the highest grade you finished in school? 1 yr college
3. Do you drink alcoholic beverages (beer, wine, liquor)? yes How much? recreational
4. Have you ever used cocaine, marijuana or other street drugs? NO How long has it been since you last used? _____
5. Have you ever received a blood transfusion? _____ When? _____
6. Do you have any hobbies (raising pigeons, woodwork shop, etc)? golf

VIII. Review of Systems

1. Do you wear glasses? yes
2. Do you have trouble hearing? no
3. Do you wear dentures? no
4. Do you have chest pain if you are just resting? _____ walking? _____ climbing steps? _____
5. What area of your chest hurts? _____
6. Have you ever been treated for heart trouble? _____
7. Have you ever been treated for high blood pressure? NO
8. Do you have diabetes? no
9. Do you have a problem with nausea? _____ Vomiting? _____ Diarrhea? _____
Constipation? _____ Heartburn? _____
10. Have you ever vomited bright red blood? NO

11. Have you ever had rectal bleeding? yes When? 10 yrs ago
12. Have you ever has a "stomach x-ray"? When?
13. Have you ever had a change in your appetite? NO More? Less?
14. Have you ever had stomach ulcers? NO
15. Do you have any pain when you urinate? NO
16. Female patients: When was your last menstrual period? Pap smear?
Who is your gynecologist?
18. Male patients: When was your last prostate exam? Never
Do you have trouble starting your stream when you urinate? NO
How many times do you usually get up at night to urinate? 3 or 4
19. Do you have any numbness or tingling in your arms or legs? NO
20. Do you ever have swelling in your feet or legs? yes feet sometimes

PLEASE COMPLETE THE FOLLOWING INFORMATION REGARDING PAST OR PRESENT CONDITIONS: Have you ever had or presently have any of the following:

Exam
50041 XR G I SERIES
74246

Date: 07/28/05 0836
Ord Diag: 787.03-VOMITING ALONE

Double-contrast upper GI, 7/28/2005

Indication: Several week history of nausea and vomiting

Findings: Under fluoroscopy the patient shows normal swallowing and esophageal motility. The esophagus distends normally. Note is made only of a single small distal esophageal mucosal cleft or diverticulum, this is only a few millimeters in size. With Valsalva no hiatal hernia is seen. During assessment of the stomach several episodes of mild reflux into the distal esophagus were seen.

The stomach distends normally with no abnormal mass or impression and no mucosal irregularity. The duodenal bulb is somewhat irregular, I do not see a discrete ulcer but this could be deformed from peptic ulcer disease. Contrast does freely progress through this into the duodenum. In the third portion of the duodenum there are 2 diverticula adjacent to one another. One is relatively prominent in size, equal to that of the duodenal bulb. No retained material is seen within these and contrast freely progresses through this to the proximal small bowel.

Impression: Small mucosal cleft or diverticulum noted in the distal esophagus. This is probably a normal variant although could represent focal change of mild esophagitis. A few episodes a very mild GE reflux were seen during this study.

2. Duodenal bulb somewhat deformed although no discrete ulcers seen. This could be change from peptic ulcer disease but there is no evidence of stricturing, contrast freely progresses into the proximal small bowel on this study.

2. 2 duodenal diverticula in the third portion of the duodenum, one of these is a giant diverticulum equal in size the duodenal bulb. They

Shantha, MD
CA No.: 2006-CP42-1728
Our File No.: 26-0266

Dear Records Custodian:

These **medical records and billing records** are being sought based on a medical malpractice lawsuit filed by William Mark Casey. A copy of this letter and subpoena are being sent to her attorney. Accordingly, I am providing notice under state and federal law that I am seeking the production of the information contained in the subpoena. The subpoena contains instructions for responding to it. Unless Plaintiff or her attorneys raise an objection within ten (10) days of the receipt of this subpoena, you should produce the records as specified in the subpoena.

We will, of course, pay reasonable costs for production of these documents.

I am

Very truly yours,

Donna C. Hill, C.L.A.
Paralegal to H. Spencer King

- Date you prescribed restriction on work activities: 5-20-04 Month 5 Day 04 Year 04
- How long are these restrictions/limitations in effect? APPEAR TO BE PERMANENT ☐ No Longer
- Estimated return to work date? UNREALISTIC (modified duty) UNREALISTIC full duty
- (c) Objective findings that substantiate impairment (current laboratory, physical and/or mental status examination, and other testing)
VERY SIGNIFICANT COGNITIVE IMPAIRMENT AND SEVERE EMOTIONAL
- (d) Other Comments: PSYCHIATRIC DISORDERS

6. Current Status

HAS NEITHER IMPROVED SIG. NOR REGRESSED.

- (a) Patient has ☐ Improved ☐ Stabilized ☐ Regressed ☒ Not Applicable
- (b) Is there a medical contraindication for patient to participate in Vocational Rehabilitation (job training) programs?
☐ No ☒ Yes, please explain IN CAPABLE OF BENEFITING FROM VOC. REHAB. SERVICES.
- (c) In your opinion, is your patient motivated to return to work? SOMEWHAT BUT INCAPABLE

Patient Name (Last, First Middle Initial) Required

7. Regulation Notice

Any person who knowingly and with intent to injure, defraud or deceive any insurance company or other person files an application for insurance or statement of claim containing any materially false information or conceals, for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime and subjects such person to criminal and civil penalties.

Attention California Residents: For your protection, California law requires notice of the following to appear on this form. Any person who knowingly presents a false or fraudulent claim for the payment of a loss is guilty of a crime and may be subject to fines and confinement in state prison.

Attention Colorado Residents: It is unlawful to knowingly provide false, incomplete, or misleading facts or information to an insurance company for the purpose of defrauding or attempting to defraud the company. Penalties may include imprisonment, fines, denial of insurance, and civil damages. Any insurance company or agent of an insurance company who knowingly provides false, incomplete, or misleading facts or information to a policyholder or claimant for the purpose of defrauding or attempting to defraud the policyholder or claimant with regard to a settlement or award payable from insurance proceeds shall be reported to the Colorado division of insurance within the department of regulatory agencies.

Attention Florida and Virginia Residents: Any person who knowingly and with intent to defraud or deceive any insurer files a statement of claim or an application containing any false, incomplete or misleading information is guilty of a felony of the third degree.

Attention Kentucky, Ohio and Pennsylvania Residents: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information or conceals, for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime and may subject such person to criminal and civil penalties.

Attention Louisiana and West Virginia Residents: Any person who knowingly presents a false or fraudulent claim for payment of a loss or benefit or knowingly presents false information in an application for insurance is guilty of a crime and may be subject to fines and confinement in prison.

Attention Maine and Tennessee Residents: It is a crime to knowingly provide false, incomplete or misleading information to an insurance company for the purpose of defrauding the company. Penalties may include imprisonment, fines or denial of insurance benefits.

Attention New Jersey Residents: Any person who includes any false or misleading information on an application for an insurance policy is subject to criminal and civil penalties.

Attention New York Residents: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information, or conceals for the purpose of misleading, information concerning any fact material thereto, commits a fraudulent insurance act, which is a crime, and shall be subject to a civil penalty not to exceed five thousand dollars and the stated value of the claim for each violation.

INTELLECTUAL ASSESSMENT

NAME: William Mark Casey
AGE: 45
DATE OF BIRTH: [REDACTED] 58
SS #: [REDACTED]
EDUCATION: Completed a year of college
OCCUPATION: Disabled (Formerly a production worker with Michelin Tire Co.)
MARITAL STATUS: Separated

COMPONENTS OF THE ASSESSMENT:

Spartanburg County School District #6 cumulative academic records of Mark Casey
(10/17/66 - 06/08/77)
Wechsler Adult Intelligence Scale - 3rd Edition (WAIS-III) (06/02/05)

REVIEW OF MARK CASEY'S ACADEMIC RECORDS:

Mark Casey was administered three intelligence tests (readiness level ability testing) in the 2nd, 4th, and 6th grades. In the 2nd grade Mr. Casey earned an IQ score of 107 (67th percentile), in the 4th grade he earned an IQ score 115 (84th percentile), and in the 6th grade he earned an IQ score of 113 (81st percentile). Further, his achievement test scores from 2nd grade (1966) through 10th grade (1975) range from highs of 99th percentile to a low of 17th percentile with the vast majority of scores being above the 65th percentile. Also, Mr. Casey's Dorman Senior High School transcript reflects a well-rounded student who was a versatile athlete.

GUNN 004348

BEHAVIORAL OBSERVATIONS OF MARK CASEY FROM RECENT IQ TESTING:

Mr. Casey was administered the WAIS-III on 06/02/05. He appeared to make a conscientious effort throughout the thirteen test sections, but became frustrated and even dejected on Subtests in which he performed below his own expectations. Also, Mr. Casey exhibited lapses in concentration and memory, particularly on Subtests requiring abstract reasoning.

ANALYSIS OF TEST DATA:

Mark Casey earned a Full Scale IQ score of 97 (42nd percentile) on the Wechsler Adult Intelligence Scale - 3rd Edition. He earned a Verbal IQ score of 100 (50th percentile) and a Performance IQ score of 91 (27th percentile). These scores fall within the lower half of the "average" range of intellectual functioning (90 - 109). His Working Memory Index score of 106 (66th percentile) is his highest, while his Processing Speed Index score of 73 (4th percentile) is his lowest. Mr. Casey earned a Verbal Comprehension Index score of 100 (50th percentile) and a Perceptual Organization Index score of 99 (47th percentile). His Subtest scaled scores are as follows:

<u>Verbal Subtests</u>		<u>Performance Subtests</u>	
Vocabulary	11	Picture Completion	10
Similarities	10	Digital Symbol - Coding	4
Arithmetic	10	Block Design	9
Digit Span	11	Matrix Reasoning	11
Information	9	Picture Arrangement	10
Comprehension	10	Symbol Search	6
Letter-Number Sequencing	12		

The mean score for all Wechsler Subtests is 10 with a normal range of 8-12. Thus, Mr. Casey's scores on the two Processing Speed Index Subtests of Digit Symbol - Coding (4) and Symbol Search (6) are far below the normal range. These two Subtests are measures of visual perception analysis (ability to ascribe meaning to symbols, identify and discriminate between symbols); short-term visual memory; and visual-motor dexterity, speed and accuracy.

SUMMARY:

A review of Mr. Mark Casey's school records reveal that he was administered three IQ tests between the ages of about 7 and 12 years old. The average of these three ability measures is about 112 which placed him at the 79th percentile intellectually. Also, the vast majority of his achievement test scores between the 2nd and 11th grades are at or above the 65th percentile. However, Mr. Casey obtained a Full Scale IQ score of 97 (42nd percentile) on intellectual testing administered in June 2005. Further, he earned very deficient scores on Subtests involving processing speed (visual perception analysis; short-term visual memory; and visual-motor dexterity, speed and accuracy). IQ/intellectual

GUNN 004349

ability scores by test design remain unchanged over the course of one's lifetime except in the event of neurological disease or brain injury. Since there is a significant discrepancy between Mr. Casey's early intellectual ability measures and current IQ test results, the only reasonable conclusion is that he has experienced a neurological event which has diminished his ability to process information and perform in a number of areas as effectively as he once did.

Re: William Mark Casey
D.O.B. [REDACTED] /58
SS# [REDACTED]

Dear Frank,

I have been following Mark Casey on a weekly basis and saw him most recently on September 16, 2004. He reportedly has been taking Zoloft, 100 mg per day for about eight weeks now as you prescribed. He estimated that he has gained about 50% benefit from Zoloft, but for about the past four weeks he seems to have plateaued and there appears to be no subjective or objective improvements. Thus, the following depressive symptoms persist: initial and terminal sleep disturbances, depressive affect most days with atypical cynicism, irritability with low frustration tolerance, anxiety and restlessness, atypical somatic symptoms, excessive worry, easily fatigued, and an inability to deal with normal life stresses.

On August 9, 2004, I administered to Mark the MMPI-II. The validity scales indicate that his test results are valid and the clinical picture is probably unchanged since that test administration. The clinical scales of his MMPI-II indicate that he is moderately depressed, moderately anxiety, but in good reality contact. He is prone to develop ulcers and other GI disturbances under stress. Also, he is prone to sudden anxiety and panic episodes. Test results confirm that he is overwhelmed with problems, is guilt-ridden, and has feeling of inadequacy and unworthiness. He tends to be quite despondent and is slowed in thought and action. Mark is also inclined to experience obsessional thoughts which trigger compulsive behaviors. His personality profile also indicates that he is angry and resentful, rigid and stubborn. He tends to be suspicious and inclined to question the motives of others. However, when not overwhelmed and depressed, he is likely to be much more adaptable, dependable and responsible. In addition, when not in an emotional crisis, he is probably realistic and practical, and is viewed by others as sociable, friendly and enthusiastic.

RE: Wm. Mark Casey
September 16, 2004

Mark has a twenty-plus year history with Michelin and reportedly has been a very productive employee. He indicated, however, that he has been out of work since May 28th and several very recent phone calls from Michelin supervisors indicate that his job may be in jeopardy. Thus, it seems only reasonable that we accelerate his treatment in an effort to expedite his return to work. The simplest solution seems to be to increase his Zoloft to 150 mg per day. Another possibility would be to augment the therapeutic benefit of Zoloft with a second anti-depressant such as Cymbalta. Cymbalta would probably be a good choice since it would be combining the serotonergic benefits of Zoloft with the norenergic benefits of Cymbalta. Also, the addition of BuSpar could be helpful in the treatment of Mark's numerous anxiety symptoms.

If you are not comfortable, Frank, with a more complex psychotropic regimen, then either you or I can refer him to one of the Greenville psychiatrists with the recommendation that he be seen at their earliest opening. Michelin is not really satisfied with Mark being out on a three and one-half month leave under the care of a family physician and psychologist for a psychiatric disorder. However, since it could take two to three weeks for Mark to be seen by a psychiatrist, please consider a medication increase/change in the meantime.

Please advise (560-1512).

Sincerely yours,

Jay Grace, Ph.D.

7. Regulation Notice

It is a crime to provide false or misleading information to an insurer for the purpose of defrauding the insurer or any other person. Penalties include imprisonment and/or fines. In addition, an insurer may deny insurance benefits if false information materially related to claim was provided by the applicant.

California Residents: For your protection, California law requires notice of the following: Any person who knowingly and with intent to defraud or deceive any insurance company files a statement of claim containing any materially false, incomplete or misleading information is guilty of a crime and may be subject to fines, confinement in a state prison and substantial civil penalties.

Colorado Residents: An insurer or agent who knowingly provides false or misleading information to defraud a claimant regarding insurance proceeds must be reported to the Insurance Division.

Pennsylvania Residents: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information or conceals for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime and subjects such person to criminal and civil penalties.

7. Regulation Notice

Any person who knowingly and with intent to injure, defraud or deceive any insurance company or other person files an application for insurance or statement of claim containing any materially false information or conceals, for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime and subjects such person to criminal and civil penalties.

Attention California Residents: For your protection, California law requires notice of the following to appear on this form. Any person who knowingly presents a false or fraudulent claim for the payment of a loss is guilty of a crime and may be subject to fines and confinement in state prison.

Attention Colorado Residents: It is unlawful to knowingly provide false, incomplete, or misleading facts or information to an insurance company for the purpose of defrauding or attempting to defraud the company. Penalties may include imprisonment, fines, denial of insurance, and civil damages. Any insurance company or agent of an insurance company who knowingly provides false, incomplete, or misleading facts or information to a policyholder or claimant for the purpose of defrauding or attempting to defraud the policyholder or claimant with regard to a settlement or award payable from insurance proceeds shall be reported to the Colorado division of insurance within the department of regulatory agencies.

Attention Florida and Virginia Residents: Any person who knowingly and with intent to defraud or deceive any insurer files a statement of claim or an application containing any false, incomplete or misleading information is guilty of a felony of the third degree.

Attention Kentucky, Ohio and Pennsylvania Residents: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information or conceals, for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act, which is a crime and may subject such person to criminal and civil penalties.

Attention Louisiana and West Virginia Residents: Any person who knowingly presents a false or fraudulent claim for payment of a loss or benefit or knowingly presents false information in an application for insurance is guilty of a crime and may be subject to fines and confinement in prison.

Attention Maine and Tennessee Residents: It is a crime to knowingly provide false, incomplete or misleading information to an insurance company for the purpose of defrauding the company. Penalties may include imprisonment, fines or denial of insurance benefits.

Attention New Jersey Residents: Any person who includes any false or misleading information on an application for an insurance policy is subject to criminal and civil penalties.

Attention New York Residents: Any person who knowingly and with intent to defraud any insurance company or other person files an application for insurance or statement of claim containing any materially false information, or conceals for the purpose of misleading, information concerning any fact material thereto, commits a fraudulent insurance act, which is a crime, and shall be subject to a civil penalty not to exceed five thousand dollars and the stated value of the claim for each violation.
