I _____, acknowledge that I will have an operation, diagnostic/treatment procedure or planned vaginal delivery. I understand that anesthesia services may be needed/requested.

It has been explained to me that there are **risks** for any anesthesia planned and that no promises or guarantees can be made. Although rare, unexpected severe complications with anesthesia can occur including a remote possibility of *infection, bleeding, drug reaction, blood clots, loss of sensation, loss of limb function, paralysis, stroke, brain damage, or death.* With present anesthesia practices these complications are extremely rare and risk may vary with my general medical health. I understand these risks apply to all forms of anesthesia and that additional or specific risks have been identified below.

I understand that the type(s) of anesthesia checked below will be used for my procedure and that the planned anesthesia is determined by many factors including my physical condition, the type of procedure and the physician's preference as well as my own desire. I understand that the planned anesthesia may not succeed completely and another technique may have to be used.

☑ General Anesthesia ☐ TIVA	Expected Result	Total unconscious state, possible placement of a tube into the windpipe
	Technique	Drug injected into the bloodstream, breathed into the lungs, or administered by other routes
	Risks	Mouth or throat pain, hoarseness, injury to mouth or teeth, awareness under anesthesia, injury to blood vessels, aspiration, pneumonia
☐ Spinal or Epidural Analgesia/ Anesthesia ☐ With sedation ☐ Without sedation	Expected result	Temporary decrease or loss of feeling and/or movement to lower part of body
	Technique	Drug injected through a needle/catheter placed either directly into the spinal canal or immediately outside the spinal canal
	Risks	Headache, backache, buzzing in the ears, convulsions, infection, persistent weakness, numbness, residual pain, injury to blood vessels, "total spinal"
☐ Major/Minor Nerve Block ☐ With sedation	Expected result	Temporary loss of feeling and /or movement of a specific limb or area of the body
	Technique	Drug injected near nerves providing loss of sensation to the area of the operation
	Risks	Infection, convulsions, weakness, persistent numbness, residual pain, injury to blood vessels.
☐ Intravenous Regional Anesthesia ☐ With sedation	Expected result	Temporary loss of feeling and/or movement of a limb
	Technique	Drug injected into veins of arm or leg while using a tourniquet
	Risks	Infection, convulsions, persistent numbness, residual pain, injury to blood vessels
☐ Monitored Anesthesia Care (with sedation)	Expected result	Reduced anxiety and pain, partial or total amnesia
	Technique	Drug injected into the bloodstream, breathed into the lungs, or administered by other routes producing a semi-conscious state
	Risks	An unconscious state, depressed breathing, injury to blood vessels
☐ Monitored Anesthesia Care (without sedation)	Expected result	Measurement of vital signs, availability of anesthesia provider for further intervention
	Technique	None
	Risks	Increased awareness, anxiety and/or discomfort

Adult Healthcare Consent Act
Emergency Department

The "Adult Healthcare Consent Act" takes effect on January 1, 2014. S.117 amends the Adult Healthcare Consent Act to require a provider to include on the patient information form an opportunity for the patient to designate an individual with whom the provider may discuss the patient's medical condition and treatment.

DO YOU WANT TO DESIGNATE A FAMILY MEMBER OR OTHER INDIVIDUAL WITH WHOM THE PROVIDER MAY DISCUSS YOUR MEDICAL CONDITION?

IF YES, WHOM?

(Description of operation/procedure in laymen's language)
of the abdomen, possible umbilical
hernia of the intestine, possible ostomy (bag)

The doctor has explained the benefits of the procedure(s) to me. However, I understand there is no certainty that I will achieve these benefits and no guarantee has been made to me regarding the outcome of the procedure(s).

The doctor has explained to me that there are risks and possible undesirable consequences associated with any procedure including, but not limited to, blood loss, transfusion reactions, infections, heart complications, blood clots, loss of or loss of use of body part, damage to teeth, other neurological injury or death.

I understand that during the course of the operation/procedure, unforeseen conditions may occur or be revealed that may necessitate change or extension of the original procedure(s) or a different procedure(s) than those already explained to me. I hereby authorize and request that the above-named physician and/or his associates, partners, assistants or designees perform such procedures as are necessary and desirable in the exercise of his/her professional judgment.

The doctor has explained to me the reasonable alternative(s) to the procedure(s).

I hereby authorize the doctor or hospital personnel to utilize, dispose of, or store for future testing (as ordered by your physician) removed tissues, parts or organs resulting from the procedure(s) authorized above.

I consent to any photographing or video recording of the procedure(s) that may be performed as may be necessary and appropriate for the procedure(s) and do permit such photographs/video.

I consent to the admittance of students or authorized equipment representatives to the procedure room for purposes of advancing medical education or obtaining/providing important product information.

APPLIES TO DNR PATIENTS ONLY

I have an Advance Directive, Living Will, and/or Do Not Resuscitate Order.

I choose to suspend my Advance Directive, Living Will, and/or Do Not Resuscitate Order during my procedure or recovery from anesthesia/sedation ☐ Yes ☐ No

If No, contact physician performing the procedure prior to completing the consent

By signing below, I certify that I have had an opportunity to ask the doctor all my questions concerning anticipated benefits, material risks, alternative therapies, and risks of those alternatives, and all of my questions have been answered to my satisfaction.

X _____ 5/15/16 0820 Self
(Patient or authorized person) (Date) (Time) (Relationship if authorized person)

_____ / / _____
(Witness) (Date) (Time) Reason for signature (if other than patient)

No witness required if patient signature obtained by provider

An interpreter or other special assistance was used to assist patient in completing this form as follows:

☐ Foreign Language (specify) _____ ☐ Sign Language ☐ Patient is blind, form read to patient

☐ Other: (specify) _____ _____
(name of interpreter or service)

CERTIFICATION OF PHYSICIAN:

I hereby certify that I have discussed with the individual granting consent, the nature of the procedure(s), anticipated benefits, material risks, alternative therapies and the risks associated with the alternative of the procedure(s).

CONSENT AND CONDITIONS OF ADMISSION AND GUARANTY

In consideration for the medical care to be provided to the patient by Conway Hospital, Inc. d/b/a Conway Medical Center ("The Hospital"), the undersigned patient, guarantor, and/or responsible party (individually and collectively hereinafter referred to as the "undersigned") hereby consent to the following conditions of treatment and admissions:

1) CONSENT FOR TREATMENT: The undersigned authorizes and consents to the admission of the patient and all medical care, treatment, services, examinations, tests and procedures, which may be performed during this hospitalization or outpatient treatment including but not limited to surgery, x-ray examination, laboratory tests, diagnostic procedures, and anesthesia, which a Physician, the Hospital, their employees, nurses, associates, assistants or assignee deem advisable to the patient. The undersigned further agrees that no guaranty has been made to the undersigned about the outcome of the care and treatment during this admission/service.

2) HOSPITAL AND PHYSICIAN: The undersigned agrees that some Physicians and the like which are providing medical care or services to the patient are not employees or agents of the Hospital or its subsidiaries, and the undersigned agrees that the Hospital is not responsible or liable for the acts or omissions of non-Hospital employees. Further, the undersigned agrees there will be a separate charge for professional services including the professional component of clinical laboratory tests, but understands that the Hospital may bill for some professional fees.

3) PAYMENT GUARANTEE: The undersigned agrees and guarantees to pay all Hospital charges to the Hospital in accordance with the regular rates and terms of the Hospital, and agrees to pay for any balance and all charges not covered by a third party payer. The Hospital files insurance as a courtesy and the undersigned is ultimately responsible for payment of the total incurred charges. The undersigned agrees that if this account is not paid timely, it may be turned over to a collection agency or attorney, and in such circumstances, the undersigned, shall be obligated to pay the amount due plus all costs of collection including reasonable attorneys fees. The undersigned agrees that overpayment collected on this account may be applied directly to any past delinquent account(s) of the patient. The undersigned patient, responsible party and guarantor, if any, hereby agrees that they are jointly and severally liable to pay the Hospital for any and all charges, any balance due and costs associated with this treatment and/or admission.

4) ASSIGNMENT OF INSURANCE BENEFITS AND THIRD PARTY CLAIMS: The undersigned hereby assigns unto the Hospital any and all rights and benefits the undersigned patient or responsible party may have under any policy of insurance (hospitalization, major medical, automobile, workers compensation, or third party liability insurance), and further directs any such insurance company to make payment of benefits directly to the Hospital or its attorney. In the event that the undersigned is entitled to any insurance or benefits covering physician services, the undersigned hereby assigns said benefits to the physicians rendering care, treatment, or service to be applied to patient's and/or the undersigned's bill. If the patient's treatment is as a result of any accident and the patient has a claim against a third party, the Hospital has the option to pursue the automobile coverage or third party liability proceeds as a primary source of payment. If the Hospital exercises this option, the patient and/or responsible party agree to assign the proceeds of any settlement or recovery in the accident claim toward the payment of any outstanding Hospital charges. This authorization is irrevocable by the undersigned.

5) AUTHORIZATION FOR RELEASE OF INFORMATION AND INSURANCE BENEFITS: The undersigned patient and or responsible party authorizes the Hospital to contact the undersigned's insurance company and its agents, the undersigned's employer or other third party payer including the patient's spouse, if applicable, to verify insurance or hospital coverage, to discuss all medical and financial information pertaining to the admission/service that may be required in processing or collecting on this claim. The undersigned authorizes and acknowledges that all medical and financial records will be accessible to all health care providers participating in the patient's care or treatment and acknowledges that patient medical records at the Hospital are stored electronically and are made available through computer networks to Hospital personnel, physicians and those health care providers involved in the patient's care. The undersigned further authorizes the Hospital, its collection agency, or attorney to obtain and review, at any time, the credit report of the patient, guarantor, and/or responsible party.

6) CHAMPUS/CHAMPVA CERTIFICATION: The undersigned requests payment of authorized benefits to the patient or on patient's behalf for medical treatment and services from the Hospital including physician services, and authorizes any holder of medical information regarding the patient to release to CHAMPUS and its agents any information needed to determine these benefits or benefits for related services.

7) MEDICARE PATIENT CERTIFICATION: The undersigned certifies that information given by the undersigned in applying for payment under the Medicare Program is correct. The undersigned hereby authorizes any holder of medical or other information about the patient to release to the Social Security Administration, its intermediaries, or carriers any information needed for this or a related Medicare claim. The undersigned authorizes the payment of the patient's benefits to the Hospital.

8) AUTHORIZATION TO CONTACT
I agree by providing you my contact information, I authorize you and your associates to contact me at those numbers. This applies to any landline or cell phone number(s) I have provided you. I understand you may contact me by sending text messages or emails, using any email address I provided. I may be contacted by a prerecorded/artificial voice message or an automatic dialing device. I understand providing my phone number(s) is not a condition of receiving services.

CONWAY MEDICAL CENTER
P.O. BOX 829
300 SINGLETON RIDGE ROAD
CONWAY, SC 29526

Patient Name:	KNIGHT, DANIEL ERIC
Visit Number:	V00006912886
Unit Number:	M000175313
Admit Date:	05/15/2016
Room #/Location:	CC26/CCE CC26 1
Dictating Physician:	Ali Mansour, MD

CONSULTATION

DATE OF CONSULTATION:
05/15/2016

REFERRING PHYSICIAN:
Dr. Rimkus

REASON FOR EVALUATION:
Respiratory failure.

HISTORY:
This is a 41-year-old gentleman presenting for evaluation of abdominal pain worsening. Patient was evaluated and was found to have thickening wall, peritoneal fluid, and peritoneal gas. Patient was concerned for bowel obstruction. The patient was taken to the OR where resection of bowel and colostomy diversion was done. Currently, the patient, during his hospital stay, starting requiring more oxygen requirements. No cough. No fever. No chills. No other complaints.

PAST MEDICAL HISTORY:
Anxiety.
Recent bowel surgery for trauma.

PAST SURGICAL HISTORY:
Recent bowel surgery for trauma.

ALLERGIES:
SULFA.
PENICILLIN.

MEDICATION:
Prozac.

SOCIAL HISTORY:
Nonsmoker, no alcohol or drug abuse.

REVIEW OF SYSTEMS:
Negative 10-point review of systems.

PHYSICAL EXAMINATION:
VITAL SIGNS: Blood pressure is 120/70, pulse is 110 sinus tach, respirations 22, T-max is 98, sats are 96% on 50% FIO2.

HEENT: Moist mucous membranes. Normal and round pupils.

NECK: No JVD. Normal cervical motion.

LUNGS: Clear to auscultation.

CARDIOVASCULAR: Regular rate and rhythm.

GASTROINTESTINAL: Soft.

LYMPHATIC SYSTEM: No edema.

CONSULTATION

NEUROLOGIC: Grossly intact.

INVESTIGATION:
ABG done this morning showed pH 7.4, pCO2 of 51, pO2 of 60. Sodium is 142, potassium 3.6, chloride 102, CO2 of 30, BUN 12, creatinine 1.1. LFTs are within normal limits. ALT slightly elevated at 72. INR is 1.4. Lactic acid 0.9. White count is 5, hemoglobin 11, hematocrit 32, platelets 230.

IMAGING:
Bilateral fluffy infiltrates involving both lungs, concerning for acute lung injury.

ASSESSMENT AND PLAN:
1. Respiratory failure, on mechanical ventilation and high-flow mask. We will switch to high-flow nasal cannula and follow clinically.
2. Acute lung injury, most likely caused post trauma. Patient will be started on low-dose steroids and follow clinically. I recommend incentive spiro. We will hold off antibiotics since all blood cultures and culturing have been negative.
3. Bowel perforation, status post surgery, improving.
4. Gastrointestinal/deep venous thrombosis prophylaxis.
5. Anxiety. Held on Prozac.

Thank you for the consult. We will follow closely.

CONSULTATION

DATE OF CONSULTATION:
05/15/2016

REFERRING PHYSICIAN:
Dr. Rimkus from Surgery.

REASON FOR CONSULTATION:
Hypertension after surgical procedure.

HISTORY OF PRESENT ILLNESS:
This is a 41-year-old male who has a history of a motor vehicle accident 2 weeks ago. Patient went to the emergency room under trauma for evaluation where he had a CAT scan of the head, chest, and abdomen without any problems. Patient was discharged home. During the last 3 weeks the patient had been having some discomfort on the abdominal area and not eating much and not drinking much fluid. Patient went back to the emergency room secondary to severe abdominal pain. He had a CT of the abdomen that showed apparent perforated viscus with ischemic bowel. Patient was brought into the operating room where he had a resection of small bowel and ileostomy secondary to perforated terminal ileum and peritonitis. Patient was placed on aggressive IV antibiotics and transferred to the ICU for close monitoring. The patient's blood pressure during the surgery was low and he required some albumin, and also lots of fluids. Patient was admitted to the ICU.

At this time the patient is having abdominal pain. Blood pressure in the 70s systolic but his MAP had been 68. He is lethargic but oriented x3.

PAST MEDICAL HISTORY:
Anxiety.

PAST SURGICAL HISTORY:
Unremarkable.

ALLERGIES:
To SULFA and PENICILLIN.

MEDICATION:
Medication at this time includes ertapenem 1 g IV daily.
Fluconazole daily.
Hydromorphone 0.5 mg IV every 2 hours p.r.n. severe pain.
Morphine every 4 hours p.r.n. moderate pain.
Zofran p.r.n. nausea.
Pantoprazole 40 mg IV at bedtime.
Promethazine p.r.n. nausea.
Simethicone p.r.n. gas.

SOCIAL HISTORY:
No smoking or alcohol abuse. Patient lives at home.

FAMILY HISTORY:
Nobody else with abdominal pain or significant abdominal issues.

REVIEW OF SYSTEMS:

CONSULTATION

Difficult to obtain as the patient is lethargic post-surgery and uncomfortable. Patient has an ileostomy now. Positive for nausea. No vomiting. Positive for abdominal pain diffuse and not radiating anywhere. Pain started like cramping; episodes are severe; come and go. He denies any fevers or chills. No generalized weakness. No numbness or tingling. Patient is not hungry at this time. He has been having a poor p.o. intake in the last 2 weeks.

PHYSICAL EXAMINATION:
VITAL SIGNS: Blood pressure 72/51. Heart rate 130. Temperature 97.2. Respiration 18. O2 saturation 97% on 2 liters.

GENERAL: Patient is lethargic. No respiratory distress. Oriented x3.

HEENT: Moist oral mucosa. No oral thrush. White sclera bilaterally.

NECK: No masses. No JVD.

HEART: Regular rate. Tachycardic. No murmurs or gallops or rub.

LUNGS: Clear to auscultation bilaterally from the front. No wheezes.

ABDOMEN: Bowel sounds diminished. Diffuse mild tenderness. Ileostomy not draining anything at this time. Ileostomy bag in place.

EXTREMITIES: No cyanosis. No edema.

SKIN: Dry. No rash. No jaundice.

NEUROLOGIC EXAM: Cranial nerves II-XII grossly intact bilaterally. No focal sensory or motor deficits noticed. Head normocephalic. No signs of trauma or laceration.

LABORATORY DATA:
White blood cells 9.8. Hemoglobin 16.9. Hematocrit 50.4. Platelets 632. Lipase 224. Bands are 10%. Glucose 224. BUN 25. Creatinine 1.74. Sodium 140. Potassium 3.9. Chloride 106. Bicarb 22. Calcium 0.8. Albumin 2.9. T bili 1.3. Alk phos 100. AST 21. ALT 72.

IMPRESSION AND RECOMMENDATION:
1. Hypotension probably secondary to side effects from anesthetics and pain medication in combination with dehydration with hypovolemia. Patient has been having a poor p.o. intake lately. His urine is concentrated. He has a Foley catheter. His creatinine has bumped from his baseline 1.2 to 1.74.
    a. We will give 2 liters of Ringer's lactate boluses.
    b. Follow blood pressure closely in the ICU level.
    c. Adjust as needed.
    d. Patient will follow up blood pressure every 15 minutes.
    e. We consider if the patient would benefit from some Levophed if needed for his low blood pressure.
2. Abdominal pain.
    a. We will use some low-dose morphine at this time. Once the blood pressure is better we will restart maybe using the Dilaudid as ordered before.
3. Acute kidney injury, probably secondary to dehydration with hypoalbuminemia and the presence of abdominal peritonitis from perforated viscus. We will follow BUN and creatinine in the morning.

His GFR at this time is 46. We will adjust medication to that GFR. We will hold the BUN and creatinine by the morning with aggressive hydration. Follow ins and outs, too.

4. Patient is a FULL CODE.

Thank you for allowing me to participate in the care of this patient. We will follow the patient closely on a daily basis.

Admit Date:	05/15/2016
Discharge Date:	05/29/2016
Dictating Physician:	Gilbertas Rimkus, MD

DISCHARGE SUMMARY

DISCHARGE DIAGNOSES:
1. Perforation of small intestine.
2. Anxiety.

HISTORY AND HOSPITAL COURSE:
Mr. Knight is a 41-year-old patient admitted with peritonitis, free intraperitoneal area on CT. He was involved in a MVA approximately 2 weeks ago. Developed abdominal pain and the last several days progressively getting worse. He underwent urgent exploratory laparotomy and was found to have perforation of the distal small bowel with major peritoneal contamination. This was washed out. He underwent resection of small intestine and double barrel ileostomy. His wound was healing in secondary fashion with wound VAC. He had some pulmonary issues during hospital stay. Medical service was consulted, though ultimately he recovered nicely and was discharged home with Vicodin for pain as needed. He will resume his Prozac. He had home health set up for wound VAC dressing changes as well as ileostomy care.

FOLLOWUP:

CONWAY MEDICAL CENTER
P.O. BOX 829
300 SINGLETON RIDGE ROAD
CONWAY, SC 29526

Patient Name:	KNIGHT, DANIEL ERIC
Visit Number:	V00006912886
Unit Number:	M000175313
Admit Date:	05/15/2016
Room #/Location:	CC26/CCE CC26 1
Dictating Physician:	Gilbertas Rimkus, MD

PREOPERATIVE HISTORY & PHYSICAL

REASON FOR ADMISSION:
Abdominal pain, abnormal CT abdomen.

HISTORY OF PRESENT ILLNESS:
Mr. Knight is a 41-year-old patient who was involved in a collision motor vehicle accident approximately 3 weeks ago. At that time he was seen in the ER and underwent extensive workup which included CT scan of the chest and abdomen and only trace pelvic fluid was found at that time which could clearly have been physiologic. The patient presented now with increasing abdominal pain over the last several days. Work up in the emergency room again included CT scan of the abdomen and pelvis which showed tremendously distended and thickened small bowel and intraperitoneal fluid, moderate amount, and small amount of peritoneal gas suggestive of bowel obstruction with possible perforation. The patient never had any previous abdominal surgeries. I was called and asked to see the patient urgently.

PAST MEDICAL HISTORY:
Anxiety.

PAST SURGICAL HISTORY:
Unremarkable.

ALLERGIES:
SULFA, PENICILLIN.

MEDICATIONS:
Prozac.

SOCIAL HISTORY:
He does not smoke cigarettes and does not drink alcohol.

REVIEW OF SYSTEMS:
As per the ER physician's notes, reviewed with pertinent positives significant for abdominal pain getting worse the last couple of days.

PHYSICAL EXAMINATION:
VITAL SIGNS: Afebrile with heart rate of 110, blood pressure 95/60 after 2L of crystalloid.

GENERAL: A middle aged male in no distress.

HEENT: Unremarkable exam.

LUNGS: Decreased breath sounds at the bases bilaterally.

HEART: Tachycardic.

ABDOMEN: Distended. Tender diffusely with diffuse rebound tenderness.

EXTREMITIES: Atraumatic.

IMPRESSION:
A 41-year-old patient with peritonitis likely perforated viscus, possible ischemic intestine. He has been resuscitated with crystalloid and given broad spectrum IV antibiotics. We will take him to the operating

room this morning for exploratory laparotomy and possible bowel resection and possible ostomy. I discussed this with the patient and told him of the potential risks of bleeding, infection and remote possibility of having a temporary ostomy. He understood the procedure and risks and expressed written consent.

6409 FALLS SCREEN - FOLLOW-UP A 02,14 CP
- Document 05/15/16 1400 ST 05/15/16 1406 ST

FALL SCREEN FOLLOW-UP

Recent Fall: N (Falls since last FALL ASSESSMENT)

Condition Changed: Y

Change in Meds: Y

FALL SCREEN N NOTE: F12 if no Fall Screen necessary!!!

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose 0
Disoriented x3 at all times

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking

Problem/Outcome/Intervention Description

Activity Date: 05/15/16 Time: 1400 (continued)

6409 FALLS SCREEN - FOLLOW-UP (continued)
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (3pt)
RN Judgement (4pt)

Total Score: 0

*****Interventions*****

Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door

Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB
In Rm when pt OOB to BSC, BR, Shower,etc.

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart

Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation
Bed/Chair Alarm in Use
Friction Footwear when OOB
In Room when Pt OOB to BSC, BR, Shower, etc.

PATIENT HAS FALLEN: Assess q15min until neuro checks are stable & pt not at immediate risk
Patient remains at HIGH RISK STATUS

MNT ASSESSMENT;
ASSESSMENT;
-41 Y/O MALE ADMITTED WITH PERFORATED VISCOUS. S/P RESECTION OF SMALL BOWEL WITH ILEOSTOMY OF RLQ (5/15/16). POD #2. NGT TO SUCTION DISCONTINUED (5/16/16)
NOTED WITH ABSENT BOWEL SOUNDS. PER MD NOTATION TODAY, PT EXHIBITS WITH SOB; MILD PULMONARY EDEMA AND PLEURAL EFFUSION. IV LASIX INITIATED; PT ON OXYGEN VIA N/C.
-PT REMAINS NPO.
-PERTINENT MEDS: IV LASIX, INVANZ, DIFLUCAN, PROTONIX
-PERTINENT LAB: (5/15/16) ALBUMIN 2.9
NO RECENT ALBUMIN/PREALBUMIN LEVEL AVAILABLE
BEDSIDE GLUCOSE: (5/16/16) 100, 86, 81, 85
(5/17/16) 95
-BMI: 31.8

NUTRITION DX: RD TRIGGER
INTERVENTIONS:
NUTRITION RX:
-RECOMMENDED REQUIREMENTS:
-1950-2100 KCAL, 80-95 G PROTEIN, 1.9-2.0 L FLUID
-CONSIDER INITIATING 1 LITER PPN FOR NUTRITIONAL SUPPORT; TO PROVIDE 42.5 G PROTEIN, 510 KCAL. INITIATE CLEAR LIQUIDS WHEN BOWEL SOUNDS PRESENT WITH SUPPLEMENTATION OF RESOURCE BREEZE AT ALL MEALS FOR PO SUPPLEMENTATION.
-IF PO PROGRESSION NOT FEASIBLE, CENTRAL STANDARD TPN-2 LITERS SHOULD BE CONSIDERED TO PROVIDE 85.0 G PROTEIN, 1700 KCAL. ADD FAT EMULSION 3X WEEKLY FOR ADDITIONAL 500 KCAL.
GOALS:
-NPO < 3 DAYS
-LABS TREND WNL

MONITORING AND EVALUATION:
-MONITOR FOR PROSTAT MODULAR ON FU
-REQUEST PREALBUMIN LEVEL

COORDINATION OF CARE:
-NO D/C PLANS AT THIS TIME

CONSULTED ON PT FOR NEW ILEOSTOMY. LOOP ILESOTOMY S/P PERFORATION AFTER CAR ACCIDENT. SURGERY WAS THIS WEEKEND. R UPPER QUADRANT STOMA PINK, SLIGHTLY EDEMATOUS, MEASURES ABOUT 32 MM IN DIAMETER. 45 MM POUCHING SYSTEM IN PLACE, NO LEAKS NOTED. HAS BEEN ON SINCE SURGERY. DRAINING LARGE AMOUNTS GRAY/GREEN LIQUID EFFLUENT. PT ON ONLY CLEAR LIQUIDS AT THIS TIME. PT DROWSY FROM PAIN MEDS BUT INTERESTED IN LEARNING, LOOKING AT STOMA. SPOUSE, ELIZABETH, IN ROOM AND VERY INVOLVED IN CARE. REVIEWED GENERAL INFORMATION, CARE. DEMONSTRATED HOW TO USE MOLDABLE WAFER, HOW TO OPERATE CLAMP AND EMPTY POUCHING SYSTEM. BOTH ABLE TO RETURN DEMO. SETTING UP PT WITH CONVATEC CONCIERGE SERVICE AND WILL SET UP SUPPLIES WITH BYRUM HEALTHCARE. PT WILL PROBABLY NOT NEED HOME HEALTH SERVICES BUT DID DISCUSS THE POSSIBILITY. PLAN TO MEET ELIZABETH IN THE ROOM 0745 TOMORROW TO DO A POUCHING SYSTEM CHANGE. WILL REQUEST DIETICIAN TO TEACH ABOUT ILEOSTOMY DIET.

DUE TO PT'S FREQUENT LIQUID EFFLUENT AND NEEDING FREQUENT NEARLY Q 1 HOUR EMPTYING OF POUCHING SYSTEM, PT'S NURSE KATIE AND I DECIDED TO SWITCH HIM TO A SYSTEM WITH A UROSTOMY POUCH TO ATTACH TO BEDSIDE DRAINAGE TO ALLOW HIM SOME TIME TO REST BETWEEN EMPTYING. REMOVED ENTIRE SYSTEM, PERISTOMAL SKIN INTACT, NO S/S IRRITATION. STOMA BRIGHT PINK, MOIST, PROTRUDING ABOUT 1 CM WITH EFFLUENT COMING FROM CENTER. SOME STAPLES/SUTURES VISIBLE. PT'S ABDOMEN TENDER. HE DID VISUALIZE THE STOMA AND ASK IF IT WAS NORMAL LOOKING. REASSURANCE PROVIDED. REAPPLIED 45 MM MOLDABLE DURAHESIVE WAFER WITH UROSTOMY POUCHING SYSTEM TO BEDSIDE DRAINAGE. TOLERATED WELL.

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****
Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door
Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart
Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use

Problem/Outcome/Intervention Description

FALL SCREEN FOLLOW-UP

Recent Fall: N (Falls since last FALL ASSESSMENT]

Condition Changed: N

Change in Meds: N

FALL SCREEN N NOTE: F12 if no Fall Screen necessary!!!

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning

Problem/Outcome/Intervention Description

Activity Type	Occurred Date	Occurred Time	by	Recorded Date	Recorded Time	by	Sts	Frequency / Documented Comment	Documented Units	From Change
Activity Date: 05/18/16		**Time: 1400 (continued)**								
6409	FALLS SCREEN - FOLLOW-UP (continued)									

No falls in past 12 months
1-2 falls in past 12 months
Requires assistive device

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)
Total Score:

*****Interventions*****

Bed Wheels Locked
Bed in Low Position
Call Light within reach

Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

or dosage within the last 24 hrs
MODERATE Risk (9-14) YELLOW sign on door
HIGH RISK (>14) RED Sign on door/chart

Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB
In Rm when pt OOB to BSC, BR, Shower,etc.

Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation
Bed/Chair Alarm in Use
Friction Footwear when OOB
In Room when Pt OOB to BSC, BR, Shower, etc.

PATIENT HAS FALLEN: Assess q15min until neuro checks are stable & pt not at immediate risk
Patient remains at HIGH RISK STATUS

- Document 05/19/16 0200 RM 05/19/16 0200 RM

FALL SCREEN FOLLOW-UP

Recent Fall: N (Falls since last FALL ASSESSMENT)

Condition Changed: N

Change in Meds: N

FALL SCREEN N NOTE: F12 if no Fall Screen necessary!!!

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

Problem/Outcome/Intervention Description

Activity Type	Occurred Date	Time	by	Recorded Date	Time	by	Comment	Sts	Frequency Documented Units	From Change

Activity Date: 05/19/16 Time: 0200 (continued)

6409 FALLS SCREEN - FOLLOW-UP (continued)
Drop >20mmHG lying->standing
*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****
Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door
Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB
In Rm when pt OOB to BSC, BR, Shower,etc.

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart
Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation
Bed/Chair Alarm in Use
Friction Footwear when OOB
In Room when Pt OOB to BSC, BR, Shower, etc.

PATIENT HAS FALLEN: Assess q15min until neuro checks are stable & pt not at immediate risk
Patient remains at HIGH RISK STATUS

Activity Date: 05/19/16 Time: 1400 (continued)

6409 FALLS SCREEN - FOLLOW-UP (continued)
*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****

Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door

Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB
In Rm when pt OOB to BSC, BR, Shower,etc.

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart

Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation
Bed/Chair Alarm in Use
Friction Footwear when OOB
In Room when Pt OOB to BSC, BR, Shower, etc.

PATIENT HAS FALLEN: Assess q15min until neuro checks are stable & pt not at immediate risk
Patient remains at HIGH RISK STATUS

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****

Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door
Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart
Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation

MET PT AND SPOUSE AT 3P IN HIS ROOM. PT UP IN CHAIR, VERY ALERT. INTERESTED IN LEARNING MORE ABOUT SELF CARE. HAS BEEN EATING MORE SOLID FOODS SO WILL SWITCH BACK TO DRAINABLE BAG AND STOP USING UROSTOMY BAG AS IT HAS GOTTEN CLOGGED. SPOUSE AND PT VERY ATTENTIVE AND ASKING QUESTIONS. WE PREPARED NEW POUCHING SYSTEM. PT SUCCESSFULLY APPLIED NEW CLAMP TO BAG. MOLDED WAFER WITH MY ASSISTANCE. WE REMOVED OLD SYSTEM - AREA VERY TENDER TO PATIENT. CLEANSED WITH WATER AND PATTED DRY. NOTED THERE HAD BEEN LEAKING UNDER WAFER FROM 6-8 O'CLOCK WITH SOME STINGING TO AREA. NO VISIBLE OPEN OR IRRITATED AREA. DEMONSTRATED USING SLIGHT DUSTING OF STOMA POWDER OVER THIS AREA, DUSTING OFF EXTRA AND USING STOMA PASTE ON WAFER TO MEET UP WITH THIS AREA. CONNECTED BAG TO WAFER AND APPLIED TO PT'S ABDOMEN. PT HAS MULTIPLE SKIN TEARS FROM TAPE. WE PLACED A DRY 2X2 TO DENUDED AREA BELOW STOMA UNDER THE WAFER TAPE. I APPLIED DUODERM ON ABDOMEN WHERE TAPE HAD CAUSED SKIN TRAUMA AND ELIZABETH AND I CHANGED HIS MIDLINE ABD WOUND DRESSING. STAPLE LINE WITH SOME AREAS GAPPED OPEN AND OTHERS MORE APPROXIMATED. MINIMAL RED DRAINAGE. NO ERYTHEMA, INDURATION, OR ODOR. DRY GAUZE OVER STAPLE LINE COVERED WITH ABD AND SECURED WITH TAPE TO DUODERM, NOT SKIN. DRAIN SPONGE AROUND JP DRAIN. EDUCATED PT ON REASON FOR DUODERM, THAT IT SHOULD NOT BE REMOVED BUT LEFT IN PLACE UNTIL IT COMES OFF ON IT'S OWN - IT IS TO PROTECT SKIN FROM ADHESIVES AND TAPE SHOULD BE PUT ON TOP OF IT. STATES UNDERSTANDING. I REPORTED ALL OF THIS OFF TO S. TALBOT, LPN.

FALL SCREEN FOLLOW-UP

Recent Fall: N (Falls since last FALL ASSESSMENT)

Condition Changed: N

Change in Meds: N

FALL SCREEN N NOTE: F12 if no Fall Screen necessary!!!

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****
Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door

FALL SCREEN FOLLOW-UP

Recent Fall: N (Falls since last FALL ASSESSMENT)

Condition Changed: N

Change in Meds: N

FALL SCREEN N NOTE: F12 if no Fall Screen necessary!!!

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within the last 24 hrs
Additional point for change in medications

Problem/Outcome/Intervention Description

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)
Total Score:

*****Interventions*****
Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door
Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB
In Rm when pt OOB to BSC, BR, Shower,etc.

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart
Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation
Bed/Chair Alarm in Use
Friction Footwear when OOB
In Room when Pt OOB to BSC, BR, Shower, etc.

PATIENT HAS FALLEN: Assess q15min until neuro checks are stable & pt not at immediate risk
Patient remains at HIGH RISK STATUS

FALL SCREEN FOLLOW-UP

Recent Fall: N (Falls since last FALL ASSESSMENT)

Condition Changed: N

Change in Meds: N

FALL SCREEN N NOTE: F12 if no Fall Screen necessary!!!

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

5A4D43B46E10429588C8, KNIGHT, 351

Problem/Outcome/Intervention Description

Activity Type	Occurred Date	Time	by	Recorded Date	Time	by	Comment	Sts	Frequency / Documented Units	From / Change

Activity Date: 05/23/16 Time: 0210 (continued)

6409 FALLS SCREEN - FOLLOW-UP (continued)
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****

Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door

Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB
In Rm when pt OOB to BSC, BR, Shower,etc.

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart

Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation
Bed/Chair Alarm in Use
Friction Footwear when OOB
In Room when Pt OOB to BSC, BR, Shower, etc.

PATIENT HAS FALLEN: Assess q15min until neuro checks are stable & pt not at immediate risk
Patient remains at HIGH RISK STATUS

PT'S SPOUSE REMOVED OLD OSTOMY POUCHING SYSTEM. SKIN A BIT RED AND TENDER - APPEARS TO BE RELATED TO ADHESIVES. MINIMAL LEAKING NOTED ON SKIN BARRIER AT AREA FROM 7-8 O'CLOCK. CLEANSED WITH WATER. CAVILON SKIN BARRIER APPLIED TO HELP WITH IRRITATION FROM ADHESIVE. NOTED AREA WHERE LEAKING OCCURED TO HAVE SMALL AMT MUCOCUTANEOUS SEPARATION WITH MUCOUS COMING OUT OF IT. DR. RIMKUS AWARE AND STATES THIS IS OK DUE TO THE DISTAL END OF THE LOOP ILEOSTOMY BEING PRESENT THERE. REASSURED PT AND SPOUSE THIS WAS OK. WE USED STOMAHESIVE PASTE OVER THIS AREA FOR ADDED PROTECTION AND ABSORPTION. SPOUSE SUCCESSFULLY MOLDED AND PLACED NEW POUCHING SYSTEM TO SKIN. THEY HAVE BEEN EMPTYING THE POUCHING SYSTEM THEMSELVES INDEPENDENTLY. WILL CHECK ON PT TOMORROW.

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose 0
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score: 0

*****Interventions*****
Bed Wheels Locked
Bed in Low Position
Call Light within reach
Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door
or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart

ASSESSMENT
-LABS: GLU 124, NA 135, CA 8, ALB 2, PHOS 2.1
-PT DOING FAIR. APPETITE REMAINS POOR. PT IS ON A FLUID RESTRICTION AND STAYS VERY THIRSTY INSTEAD OF HUNGRY. IS TOLERATING THE PROSTAT AND ENSURE DESPITE NOT LIKING THEM VERY MUCH.
-PT ASKING FOR A HAMBURGER BUT WAS SCARED ABOUT THE FAT CONTENT. ENCOURAGED PT TO MAY BE EAT ONLY HALF AND SEE HOW HE FEELS.

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist
Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics, Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

PT'S SPOUSE PERFORMED POUCHING SYSTEM CHANGE TODAY, WAS ABLE TO TALK THROUGH STEPS. PT VERY ATTENTIVE DURING THIS AND WILL BE ABLE TO DO THIS INDEPENDENTLY - HAS IV IN R ARM IMPINGING HIS ABILITY TO ASSIST MUCH. SKIN INTACT, WNL AROUND STOMA. STOMA PINK, MOIST. PROTRUDES ABOUT 1/2". AREA BETWEEN 6-7 SEPARATED FROM SKIN AND WE EXPRESSED MUCOUS (THIS IS WHERE DR. RIMKUS SAID THE DISTAL END OF THE ILEUM IS AND SHOULD EXPECT THIS). INSTRUCTED PT AND SPOUSE TO BE SURE TO GENTLY RUB THIS AREA TO EXPEL MUCOUS DURING EACH BAG CHANGE. SHE APPLIED A SMALL AMT OF POWDER THERE AND USED CAVILON SPRAY. SMALL AMT OF STOMAHESIVE PAST TO WAFER THAT WILL LAY OVER THAT. PLACED NEW POUCHING SYSTEM ON INDEPENDENTLY. THEY HAVE MY CONTACT INFORMATION IF THEY HAVE ANY CONCERNS OR QUESTIONS.

Written Education Materials Provided.

CHF EDUCATION: N
Patient provided with written discharge instruction booklet/ pamphlet: HEART FAILURE CONTROL PLAN; includes activity, diet, physician follow-up, medications, what to do if symptoms worsen and weight monitoring instructions. Instructional video shown? Comment

STROKE/TIA EDUCATION N Education Material Provided: Educ Material Date:
Activation of Emerg Med System: Need for F/U after discharge:
Medication prescribed at discharge: Risk factors for stroke:
Warning signs & symptoms for stroke:

Venous Thromboembolism (VTE) Warfarin EDUCATION N DVT PE
Diet Education: Consistent amt foods w/Vit K rather than avoidance advised
Avoid major diet chges or notify Health Prof before changing
Compliance Education: Importance of taking warfarin as instructed
Important to monitor warfarin w/scheduled PT/INR blood draws
Potential for Adverse Drug Reactions & Interactions:
Don't take/DC any meds or OTC meds except thru Phys or Pharm
Warfarin increases risk of bleeding Diet & Meds can affect the PT/INR level

FALL SCREEN N NOTE: F12 if no Fall Screen necessary!!!

FALL RISK ASSESSMENT AND INTERVENTIONS

*****Patient LOC/Mental Status*****
A&O x3 or comatose
Disoriented x3 at all times
Interm confusion or change in LOC

*****History of Falls*****
No falls in past 12 months
1-2 falls in past 12 months

*****Ambulation/Elimination*****
Ambulatory & Continent
Chair/Bed bound-requires assist

*****Gait/Balance*****
Normal or N/A secondary neuro deficit
Balance problem standing &/or walking
Deconditioning
Change in gait pattern
Jerking or unstable while turning
Requires assistive device

*****Medications*****
Patient profile reflects use of: Sedatives/Hypnotics, Antihistimines, Antihypertensives, Anesthetics, Cathartics, Diuretics, Hypoglycemics, Narcotics,

Ambulatory and/or incontinent

****Systolic B/P (If indicated)****
No noted drop lying->standing
Drop <20mmHG lying->standing
Drop >20mmHG lying->standing

*****Predisposing Diseased/History*****
HISTORY OF: Hypotension, Vertigo, CVA, Parkinson's, Amputation, Osteoporosis, Fractures, Seizures, Arthritis, Dementia
None present
1-2 present
3 or more present

Psychotropics, Benzodiazepines.
None of the above within last 24 hrs
1-2 within the last 24 hrs
3-4 within last 24 hrs
Additional point for change in medications

****Demonstrates Unsafe Behavior*****
None demonstrated
Occasionally demonstrated
Consistantly demonstrated
RN Judgement (9pt)
RN Judgement (4pt)

Total Score:

*****Interventions*****

Bed Wheels Locked
Bed in Low Position
Call Light within reach

Fall assessment completed
Patient needs Assessed q2hr
Environment Assessed Fall Risk
Personal Items within reach

LOW RISK (0-8) GREEN sign on door
Assess q2hr 7A-7P as needed
Assess q1hr 7P-7A as needed
Assist/stand by Ambulation

MODERATE Risk (9-14) YELLOW sign on door

Assess q2hr 7A-7P
Assess q1hr 7P-7A
Frequent Re-orientation
Reinforce Call Light use
Bed/Chair Alarm in use
Friction Footwear when OOB
In Rm when pt OOB to BSC, BR, Shower,etc.

or dosage within the last 24 hrs
HIGH RISK (>14) RED Sign on door/chart

Remain W/patient whenever OOB
If OOB to chair, q30min monitoring
Assess q1hr 7A-7P
Assess q1hr 7P-7A
Reinforce Call Light Use
Frequent Re-orientation
Bed/Chair Alarm in Use
Friction Footwear when OOB
In Room when Pt OOB to BSC, BR, Shower, etc.

PATIENT HAS FALLEN: Assess q15min until neuro checks are stable & pt not at immediate risk
Patient remains at HIGH RISK STATUS
