To Whom ever concern: I have an case that has ⁷⁻¹⁷⁻¹⁹ been under review, by your courts. And, upon fighting my case, the lab technician at York County, confessed wrong doing with tampering with evidence, and not preserving evidence properly in order to railroad accused drug dealers. She is the one who processed my alleged evidence, and I believe that another hearing will help me bring closure to my alleged claims of tampering with evidence, and wrongfully prosecution without probable cause, since her admitting of corruption, and her involvement that may soon lead to criminal charges against her. Further more, the clerk of court failing to process, my appeal, when it was submitted within the proper time frame, which was an issue raised at the hearing and still denied, me my right to appeal when I followed the proper steps, which violated my due process rights. The charge that probable cause was based on, was dismissed due to no crime, ever being committed. Within the audio and video (no activity) but, they still went forward with charges that probable cause wasn't established, or provided on, in which caused an illegal search and procedure, that also violated my due process rights. And if the solicitor would've provided this information sooner, in the preliminary hearing, instead of withholding evidence, I would've never been prosecuted with no probable cause and all of my rights violated. Thanks please help, on account of the new evidence and other issues, that severely violated all of my rights and amendments.

Thanks
