NOTICE OF COMPLETION OF DEPOSITION – SOUTH CAROLINA
NOTICE OF FAILURE TO APPEAR BY JAMES. R. STRITZINGER, VERIZON, BANK OF AMERICA
NOTICE OF COMPLETION OF DEPOSITION – FLORIDA – DAS v STRITZINGER
NOTICE OF FAILURE TO APPEAR BY DAVID. A. STRITZINGER

MOTION FOR THE COURT TO TRANSPOSE AUDIO RECORDINGS ATTACHED

Enclosed are the Audio Recordings from two depositions taken in this case and all related cases where none of the parties duly served appeared. This is the second non-appearance by Verizon, and both Bank of America and Verizon are in default in the related cases.

Since Petitioner/Appellant has been found indigent by this court, Petitioner/Appellant requests this court transcribe this audio recordings attached in Exhibit A(CDROM OF DEPOSITION AND DEPOSITION EXHIBITS) at the States Expense, and file the transcripts on the public docket.

Signed this 10th day of February, 2020

S.C. SUPREME COURT

AFFADAVIT OF JOHN S. STRITZINGER

“ On Friday March 16th, I left the Villages Florida by Amtrak Train at approximately 2pm after my offer to buy the home I was living for two years part time while various US District Court, and Appellate court proceedings were underway here in South Carolina. My offer for the full listing price was denied by the Florida Circuit Court for the only reason that my brother did not want to sell it to a family member which is not allowed under the law. As included in my deposition.

I arrived in Columbia SC at approximately 1am in the morning, and stayed for two nights in local hotels (Saturday night, and Sunday night. On Monday I completed some filings in the US District Court, and had a train ticket to leave the same day. I was in West Columbia, not even in Richland County, and made no comments to any Richland County resident except to request my brother provide me a copy of my birth certificate which I had ordered previously, and all old mail at my home. Instead I was served with a civil mental health complaint and an officers statement that my brother said I was ranting about the central Intelligence agency. I told the officer that was not correct, I simply had breakfast with my brother, expected to stay for a few days at his house while I completed my filings, and intended to return home to my house in Texas. He said no I could not stay with him, and I then decided to go to local hotel rooms until Monday night at great expense. Cabs to west Columbia are 25.00 each way and thus the average night was more than 150.00 per day including food. I could not sustain that without having an

additional part time job or spending a few days in his house as he had offered before. I was handed a 160K dollar bill, and three lawsuits unrelated to my Verizon issues while in South Carolina to a non-resident who had been in Columbia exactly three days, after two years apart. Furthermore, Appellant had tried to schedule an appearance with the Dutch Fork Magistrate three months prior to arriving, but when arriving in court on Monday morning the 19th, Judge Maurer told me he believed the case needed to be tried in the US District Court (As I had expected). Furthermore, an amended pleading which modified the relief requested was also denied without cause. When I presented Judge Maurer the Florida Circuit Court's order of dismissal with Verizon he was relieved as he believed that I would have had to have an MC style civil/criminal combined trial to return to Verizon otherwise but at the time he said he was serving the last week of his term and could not here my case. My hotel and train receipts are attached. I committed no crime in South Carolina, nor did I do anything which would have required hospitalization which is what I told Ms. Finks when arriving at Palmetto Health. She said that Jim Jr had called her again, and had provided a second affidavit which was more extensive, and she was effectively trying to interrogate me without counsel, and in the middle of the night (like 4am) about issues which had occurred in Virginia. I was not provided counsel, and Dr. Finks is a colleague of Dr. Raynor, and part of the same Psychology teams rotation. In other words as I understand it the residents of Palmetto Health work for Dr. Raynor either in the ER room, or at the Hospital. It is illegal for a doctor to both provide diagnostic services, and therapy in the same case in Texas as several physicians have testified in my special education case for my minor children. Its called a dual role, and I understand it covers every medical profession. Essentially a doctor who evaluates a patient cannot treat that patient as well, unless the patient consents and waives his rights. I never did so. Furthermore in Virginia an ad-litem or an order for Non-Voluntary Medical Treatment cannot be appointed for a patient until the evaluating doctor establishes that emergency medical treatment is needed and denied by the patient and a hearing has been had. I had no issues, I made no illogical statements and my work at Verizon five years earlier was not relevant to Palmetto Health or the State of South Carolina. I am a telecom engineer by trade, and I work on Circuit Design, and Toll Free Engineering predominantly. I also did some security engineering for Verizon for the Department of Homeland Security on a bid for Mr. Obama and the FBI which I won for my team. Mr. Obama notified me personally, as the system was designed for internal affairs work for the Bureau. As employees of the President field FBI agents are effectively underneath the Department of Justice which works for the President. Ms. Loretta Lynch the Director of DOJ was appointed the project owner, along with Mr. Joseph Clancy, the head of the US Secret Service. Mr. Obama made an offer to Verizon for the system as designed for 200M USD, and Mr. Obama, and his chief counsel Ms. Kathryn Ruemeller are the only witnesses, other than Ms. Lauren Caperton from the FBI. All three are privileges, and protected employees of the Office of the President, and all three under US Code have to be served in the Supreme Court on Original Jurisdiction 1 USC 73 Section 13 as the staff of the Whitehouse are considered Domestic Servants of the President under the law. Ms. Caperton and the FBI however I admit can be served in the US District Court, however since this involves the counter-intelligence team of the Bureau would have required a Top Secret Clearance to hear the case on the merits. This requires the US District Court in the District of Columbia or a FISA order. I requested a hearing in both courts, and was denied, and then asked Judge Wooten in SC, and Judge Yeakel in Texas to resolve the matter and was informed by their staff that neither Judge had a Top Secret Clearance, and I had to proceed at the risk of treason. I asked for electronic filing rights in both courts so that I could seal documents, as the US District Court in the Western District of Texas actually had a Chinese National non American on a VISA working in the Clerks office of all places. I therefore had to send secret documents to a US District Judge who was not granted such privilege or to order his clearance myself which I thought absurd. Furthermore, the US Secret Service told me President Obama would not appear on this issue in any court, nor any aid provided while he was in office. This left only the option to return to Verizon in my former position, but Verizon had in fact entered a criminal complaint or aided in a criminal finding in Florida, and sent their information following this finding to the Virginia Employment committee which then denied me unemployment and even Federal Benefits like SNAP. Even though I know many Federal Executives working for other companies, they told me they could not hire me until the litigation was resolved by a hard court order which now it has. But the State of Pennsylvania ignored the Maryland Supreme Courts order, and the Florida Supreme Court's order of dismissal because a local police officer who is a non-attorney, simply saw a Nolle Prosequi filed in the lower court in Maryland, and thus he believed he

could retry the case on background. This is a violation of the 5th amendment, and prevented me from getting a job in my field. Thus I have had more than 85% reduction in pay as a result. This became material in Texas as I had to modify child support for the same reason, and Judge Livingston denied me a trial. Dr. Raynors staff said that the inability to make a living is a personality disorder if its outside the social norm. What I am telling the court, is that Mr. Asiedu's action and supplemental statements by my own family are actually Felonies in the State of Virginia under Virginia wage code 40.1.29 for good reason. Pennsylvania, and Ohio treat the same subjects as emergency civil matters, however I was denied a trial in both states when I absolutely had emergency issues pending. Furthermore, my own family denied me any resources to get back to my four bedroom home which I owned outright which is worth 600K dollars, and was denied an IFP in Texas because I did. But imagine living in a four bedroom house with no benefits or savings which is 25 miles west of Austin, without a car. My family would not lease or provide transportation. I believe that Judge Wooten committed treason in this case, and on emergency had 72 hours to provide a hearing on the merits. He has denied every variant of the case I have filed for almost 3 years, and I cannot provide classified documents in 50 page complaints as is the norm in the court. He simply had to take my word that this was something that required his attention. In this case, Judge Kelly, actually told me I better hurry back to Pennsylvania so they could try to RETRY THE CASE WHICH HAS ALREADY BEEN TRIED TWICE AGAIN, and then denied allowing my calling any witnesses. I have consulted with as many as 10 different law firms here in South Carolina, and three in Virginia, and the Virginia lawyers all believe I have a good case, but they want \$500.00 for an intake meeting, and instructed me that they usually invited the local police to attend. In other words the Virginia lawyers were seeking to force a criminal trial against Mr. Asiedu as they believed they had to under Virginia law. But In Virginia all Felonies are investigated and the court provided an evidentiary report by the State Police or the local police departments detective bureau. That's what Virginia was trying to force in this case.

In Pennsylvania, they simply denied my emergency civil proceeding, meaning I was going to have to work odd jobs until the case could be resolved, but they were not inclined to help me against literally the largest employer in Pennsylvania. They told me to go see Mr. Biden instead, as that was the best I was going to do, and my answer was that Mr. Obama did not clear Mr. Biden for the project either for reason I can explain to the court but it would need to be in a private forum. Like Nixon who recorded his own Whitehouse, Mr. Obama in fact recorded the locations of all of his own employees even FBI staff from my understanding, along with potential enemies of the United States (FBI watch-list). That's what we are talking about in this case.

Since I didn't believe I could resolve this issue without my boss Ms. Susan Zeleniak or John Stratton, and since Mr. Stratton, and Ms. Zeleniak will not meet with me without court ordered ADR, I don't believe I can resolve the issue. Furthermore, the Delaware court of common pleas entered a no-contact order to both Verizon and I which they have violated by hiring third party counsel.

I was traveling on business, sold the project I was provided by my manager, and rather than getting paid, I got arrested, then released, with the charges dropped. I was suspended however until the investigation concluded. I believe that Judge Greene's order from the Maryland Court of Appeals/Supreme Court effectively ended the case, and he's three levels higher than any District Judge in any other state. Furthermore, Judge Greene does have a Security Clearance, and the Maryland Constitution requires him to consider Federal Law first.

I thus believe that since a Federal and Two State trials have commenced and concluded I should be ordered to go back to work, but Florida believed that it was an At-Will state and Mr. Lowell McAdam did not want me to return anyway. That may be the case, but Verizon has to pay me for my sale, and damages anyway. They have defaulted in the lower court, and owe me back pay for five years, and court ordered Arbitration on my commissions for my 200M+ sale. I believe that that should be with a default Judgment with ADR to be ordered within 72 hours at Verizon's expense with Judge Kaplan – See Attached Related order.

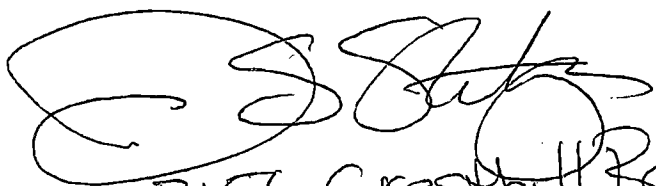

Furthermore, I advise the court that after Mr. Obama's team left office, Mr. Trump's new cabinet including Mr. Ross had effectively impaired the design of the system we developed which I believe was a felony and he should be charged. Mr. Ross to my knowledge does not have a security clearance, and he issued a non-classified bid which

was related to the Federal System. In other words, Mr. Trump sold my design to ATT for a Local Police only version of the same system Verizon built for the Federal Government. If the US Government did not pay, then this THEFT was in fact grand-larceny by the FBI and the Commerce Department which is why I think Judge Kaplan should take this case. My problem is that in the Federal Domain usually the Architects, and Designers of ANY system usually don't operate it, and the Operations Teams usually have the right to move the proposed system or augment it to perform other functions. In other words within 24 months all operational details are likely a moot point in any Federal classified system. Under Mr. Obama the systems designed were NSA systems, and I was effectively drafted like Mr. Stratton to assist the NSA with various US National security tasks. To my knowledge neither Mr. Stratton, Myself, or Mr. Stockley were paid for these functions, nor were we offered retirement benefits, I think that Mr. Obama's orders, and of previous presidents Clinton, Bush Sr, and George W. Bush are all generally in the category of Intellectual Property theft at massive scale. One could argue its systematic and pre-planned theft by the US Government, where common citizens, or drafted citizens harmed. Furthermore, like the US Government's Supreme Court in Marbury v Madison Mr. Stratton and I were denied NSA badges which would have allowed us on base and a US Government equivalent grade. We were told instead the US Government would honor Verizon, Bank of America, and ATT badges as equivalents IFF we were on the access list at the site in question. In other words we had to have a local sponsor for any visit to any Federal facility which is far different than an employee. Furthermore none of us had full time desk space. Mr. Stockley was asked to meet at the Whitehouse either monthly or bi-monthly in 2008-2009 by his admission and he was the senior Intelligence officer for our firm then. Similarly Mr. Stratton from Verizon was for Verizon Federal, and John Spears from ATT. Previously the Verizon CEO was the NSTAC program officer but Mr. McAdam deferred this task to Mr. Stratton. As such Mr. Stratton is likely FULLY responsible for this action which has now extended almost seven years. In this time not only did we make the sale but DHS actually took nearly 1/2 of the Ashburn Engineering facility, meaning it was a massive sale where they owe me well in excess of 20M USD as I was the only engineer and architect on our team except for my boss who did not change any of my technical specifications not a word in his review. In other words I effectively built all of the counter-terror and protective systems in production today and have not been paid, nor given retirement benefits when Mr. Obama left office, while Bank of America sued me for 10 years in a row in Texas. Both Verizon and Bank of America have to provide me counsel in as many as 6 individual contracts this court needs to review.

I am recommending an hour show-cause order where I think the court in ANGER will enter sanctions against Bank of America, and Verizon in very quick succession, but the issue is the facts are so fantastical to court clerks, and even the judges assigned so far that it will take someone with a bit of patience to get through the noise. Judges who do criminal law cases are used to 10-30 minute settings in pre-trial, and are not doing the subject justice. Judge Kelly was calm, but couldn't get over the criminal claim in Florida and Pennsylvania where I need counsel to appear for me. Thus in this case, the civil case needs to proceed first, and not second as law enforcement officers like as criminal sanctions can include 100% property loss. Since my parents participated in the Florida complaint, they could even ask for damages even though they literally have no idea what this is about as they do not have National Security clearances and their affidavits are inadmissible. Effectively three inadmissible statements were provided to a Florida Circuit Judge Ex-Parte and without counsel present, and all three were effectively admitted without a trial and without the opportunity for objection. Then I was denied a Civil trial by the 5th Circuit Judge Michelle Morley who did not have the power to overturn another equal judge in Orlando, but did have the power to set a civil trial (See *Olmstead v United States*). Judge Greene however had already ruled by the Time Ms. Morley had the case, but she refused to serve it. Thus I have never had a trial with Verizon on damages, although the Florida 5th Circuit offered to take the case on oral argument. I told the State of Florida I would rather proceed in South Carolina and my case had already been set. They thus took down my setting. I believe I can reinstate this appeal now, for cause but not until this attached motion is decided."

CERTIFICATE OF SERVICE

The following Motion was served to Greg Parker, Verizon, And Bank of America on Feb 10th, 2020. by Facsimile, And Email.
