Respondent

RECEIVED

Petition for Medical Compassion Bond
Pending Appeal (Amendment)

APR 14 2020

S.C. Court of Appeals

Petitioner, in this motion for Petition for Medical Compassion Bond Pending Appeal. Respectfully submits the following opposition to this petition:

Plaintiff is petitioning this court Pro Se. Cause Plaintiff believes that the South Carolina Department of corrections (SCDC) has intentionally placed plaintiff's life, health and well being at risk and in danger.

on the daily basis plaintiff is being subjected to Hold, secondhand smoke (I am a non smoker) and the threat of contacting, and becoming infected with the covid-19 virus.

cause the South Carolina Department of corrections has failed to establish and provide, a healthy and safe environment for me on my well being. Instead inmates are free to socialize in the common areas, can reside in close cramped living conditions, with others whom may have been infected with covid-19 virus.

Plaintiff respectfully requests from this court that Plaintiff be released on a Medical Compassion Bond pending appeal. Plaintiff suffers from a serious underlying pre-existing Respiratory health condition diagnosed as COPD, Chronic obstructive Pulmonary Disease, which is documented in Plaintiff's medical file here at Lieber.

on March 26th 2020 two (2) reported incidents were confirmed, reported and documented. When two (2) correctional officers were attempting to enter their work place a correctional facility. The media and Department of Health (DHEC) both stated that, "the correction officers, tested positive for (with) the covid-19 virus."

Plaintiff believes that he is in a high risk environment with becoming infected due to Plaintiff's serious

3)

pre-existing health condition.

Plaintiff hopes and pray that this court will grant Plaintiff's motion for bond.

Respectfully submitted

Michael Frasier
