

Injunction to Stop Wrongful Eviction

Comments:

There was a lawsuit of which every State Attorney General signed off on it for the negligence of the banks involved. GMAC was one of them. Evicting me brings shame to our state, why? How do we accept funds to protect the constituents of South Carolina, and not help the tenants who need the help from eviction, why take the money? What kind of message would we be sending?

His or Her Honor, Please make this stop and go away. That \$25,000,000,000 lawsuit was about more than me and my family. To allow any constituent in this state to suffer by the hands of the offenders is WRONG!

Currently there is a Claim and Delivery pending in the Magistrate Court on Rhett St. Columbia, SC. The former owner contends that items from 2011 in the home belong to him. I answered that complaint; however to further prove that there is a lack of respect to the Constitution:

If I am removed from the home, how will either of us be afforded due diligence? The RCSD told me no actions will commence to evict me until such time, and they have tried twice to evict me before I can appeal.
