To: South Carolina Court of Appeals S.C. SUPREME COURT

- Here say is not evidense and the Metoo movement is not justice. Trichomonas, is a flagellated protozoan parasite that my then wife ~~and~~ I were tested and treated for in 1990 or 1991. My council failed to see the need or doubted its prudence yet it was he that first asked of the nature of the question. I gave the details with-out any questions of doubt. My child Talisa Bennon Kelly, has never had or been treated for this parasite. Her (Talisa B. Kelly) team had no evidense of this either. No antibiotics kills Trichomonias! No child of mine was capped, yet all these angry ^(METOO!) women and a Judge that denied bond two months prior at my bond hearing, that I was on bond for ^{with} same victim, Neighbor county, have found me guilty beyond doubt. The evidense says this is wrong. Justice dose not look fair and balanced to me. Let's check this evidense!

Thank you!

I Love my girls, but there mother always hated it.
