SC Court of Appeals

I wrote this on March 21st asking to relieve Ms. Hackett as my counsel why haven't I heard anything back from the court ?? I have been serving time for 6 yrs for a crime that I did not comitt. And in these 6 yrs I am the only person it seems that I have no idea just how long am I supposed to continue to do this time. I'm in here for no fault of mine as you all know so why do you people who know the law continue to break it by illegally holding me here? There is no legal purpose for me to be here. If there is take me back to another trial. I'm ready. Nothing was proven at the trial except that how easy it was for aiken court, to convict an innocent black man for the crime of burglary in the first degree, with no physical or circumstencial evidence "witnesses no statements and besides that nobody dwelled or lived inside this

building. This is a no brainer just racial hatred. All of the official officers, judges, everyone involved in this are all white people including the jury. 8 "women 2 white men and 4 black women (majority white) I didn't matter because even though the state presented nothing close to anything connecting me to any crime the jury only paid attention to the ineffectiveness of the asst. public defender who was so called defending me, and to the solicitor's office railroad me into prison. For a crime that all of the officers knew that I could not have done. After review the PCR transcripts in which it clearly shows that the entire 1 day trial was completely based on hearsay from the very beginning in which every judge in the Supreme Court as well as the Court of Appeals know that it is completely not admissible in a court of law!!! there are plenty more questions I'd like to ask about such as

probzble cause, reasonable doubt???

Just how much longer does this ~~plan~~ ^{court} plan to keep avoiding this simple case of the "good ole boy" Justice??

There is nothing left to be done about this case except to let me go home. This is wrong for people such as yourselves to continue holding me when I've done nothing to be here now would any of you feel if this was your son, father, nephew or anybody you care about sit in prison for crime that you and that person know shouldn't be in this dangerous "Hell hole" daily watching over his shoulders. If you people had anything to connect me to this crime or any crime I wouldn't have said a word or asked for my freedom back. (not once). I wouldn't have written the thousands of letters over these 6 yrs. I'm innocent and its been proven over and over. Its supposed to be innocent until proven guilty.... Its the opposite for me.

I have been in contact with LEGAL
the United States District Court MCCLADDIE-364614

a Ms. Robin L. Blume and I explained my situation well my case to her and she sent me some forms to fill out and send them back to her along with the forms. I'm sending copies of all my transcripts and both of my writ of Certiorari's. Seeing as how this is to difficult a case for the Court to rule on. I'll take this thing to Federal Court. I'm pretty sure I'll be going home much sooner than waiting around on you people. I have not mailed back the application as of yet. I will give you time to respond back to me before I do anything. I've also written a couple News Media stations in which I'll be mailing those out as well. I'm ready to go home with my family and I'll do ^{be} anything to get there. 6 yrs is to long to be in prison for anybody especially when you're innocent. Was there another extension after March 5 2021?? If so. when? for the state (what is the good cause shown??) Can I get a copy of the request? Why do you people need me in prison to figure out why your ^{will} servants comitted this crime against me?
