RE: The 23 pictures change nothing. And I am even more upset and scared now.

To: Attorney Tristan Michael Shaffer <tristan.m.shaffer@gmail.com>, Marie Assa'ad-Faltas <marieassaadfaltas@gmail.com>

These pictures show the labia minora which she had claimed do not exist. They confirm, to the extent that the labia majora and the mons are visible in these pictures, that those (the mons and labia majora) are **NOT** REDENED OR EXCORIATED. In fact, they seem to be Tanner Stage III or IV because they are not smooth and hairless but appear with regular skin folds and (apparently) hair follicles. The labia minora are of average size and normal color. **This is conclusive that State Exhibits 3-6 are NOT of the labia majora but of the medical surfaces of the labia minora which are normally pink to red in color because their epithelium is NOT KERATINIZED.**

There is a reason the Attorney General does not want to face me as an expert witness: they know, with God's help, I am invincible. Do not let self-doubt squander your chance to exonerate your client and catapult your own reputation.

The next communication from you should be the order. I will say no more about the Elders case except in front of Judge Addy, God willing, on Thursday, and such other day in April or early May 2013 as Judge Addy wants to hear me further.

I need to be with my octogenarian mother in Ohio as soon as, God willing, I get myself exonerated from the remaining fabricated charges against me. **By having told the Attorney General about my intent to testify as your expert (which I understand you may have had to disclose) but then agreeing to a continuance, you are putting MY PERSONAL SAFETY at risk.** They previously falsely arrested me when I was winning my civil lawsuit. There is no telling what they would do to me now to prevent the coming into light of my expert opinion.

Please let me testify on Thursday and agree with them about the rest.

Thanks and God bless./Marie

 Subject: Re: Where is the order? And my blood ran figuratively cold.

Mr. Shaffer: we must have complete mutual trust for this to work. I can, with God's help, handle anything so long as I know about it. What I cannot handle is not knowing.

I thought I was going to get Judge Barber's order an hour or two after you talked to Anna. Did they backdate another one? Just tell me. Or did you get cold feet about helping me, even with such small matter?

Next, my blood ran figuratively cold because, after I saw the pictures and you confirmed to me that the originals did not have a ruler (or a flexible measuring tape) I went back and read Nurse Robin's entire testimony.

I would not have believed that people can, in cold blood, tell lies about others knowing that the innocent others can go to prison for long times, I would not have believed it had it not been done to me. And I would not have believed that judge and defense lawyers can be so indifferent about innocents going to prison, had I not seen it being done to me and had Mark Sawyer and Fielding Pringle not told me to plead to "second degree" because "it's only a month each" and had Ted Lupton not responded to my finding "reckless" a defense strategy he described to me "it's only thirty days."

Well, if Ted Lupton is indifferent about "only thirty days" for me, Bill Rast is indifferent about "only thirty years" for Michael Elders. **Anyone who puts the word "only" before the sentence of a person actually innocent has absolutely no sense of justice.**

But my blood ran figuratively cold because, after we talked about "job security" for "sexual assault nurses," I read that nurse Robin is going to start a "sexual assault" program in Newberry. So, it is not just job security, it is job creation by the creation of imaginary crimes. It's "only" thirty years.

TBC, God willing.
