To: Attorney Tristan Michael Shaffer &lt;tristan.m.shaffer@gmail.com&gt;, Marie Assa'ad-Faltas &lt;marieassaadfaltas@gmail.com&gt;

**I am in the computer room.** This first e-mail had NOTHING attached to it.

The other three scans are poor quality. Specifically, there are some white spots which I cannot tell are artefacts (meaning dirt) from your scanning it or from the State's printer, or from the nurse's camera.

**They do NOT look like abscesses, even at this poor quality. Further, there is a VERY SERIOUS FLAW in these pictures:** There is NO RULER, which is the ABCs of forensic photography: **You always, always, always, must have a ruler in the photograph to determine the size of what you are photographing.** This is ONE of the differences between Dr. Faltas and anyone else. And I am NOT tooting my own horn. There more I see others' "work," whether in Law, Medicine, Engineering, or even writing in one of the four languages I know, I realize how, than God, vastly talented I am, **and what RESPONSIBILITY my awesome talents place on me** BECAUSE "from her to whom much is given, much is expected."

Going back to the "redness" that terrified you and cost an innocent man four years so far and may cost him another twenty: **This is the NORMAL color of the labia *minora* which the nurse *incorrectly* testified do not exist in the pre-menarcho female.**

Please find if there are the actual digital or negative original.

The absence of a ruler frightens me because it suggests to me more than mere incompetence. It suggests an intentional effort to pass the pictures off as something they are not.

Please summon all your courage and prepare to pursue this vigorously within the bounds of the law and **within such extensions of the law as can be argued in good faith.**

Godspeed and God bless./Marie
