#### Motion to UNderstand

You have confused me. You have my brain stuck on overload and I have six children. These damages to my eyes are bothering me from research. I can not think correctly because of the damage you've caused. My mind is telling me to complete the process, however, my body is telling me no. No one should have to fight this long and not receive representation from the state of south Carolina especially when the state has the authority to provide services to individuals like me. I understand the process of being seen by the judge. But i also understand the right to due process which has clearly been violated and has left me ptsd, mdd, and with a retinal detachment. I refuse to rely and depend on someone who's left me in this condition. If you can't comply, why should i. We're equally made and we breathe the same air. However, this stuff the state has put on my plate needs to be cleaned off and it needs to be cleaned off now. This is what i call inhumane. And if anybody disagrees, then the law is not where they need to be. Now this deeper than a section ann code. This is a child of god that has totally been disastered by the system. If you can't except this letter as a child of god yourself, then you can't except god and if you see a bible throw it down. Don't make me suffer because of the state constable's negligence. Don't make me suffer because of money that don't wanna be paid that's there, Don't make me suffer taking care of six kids. I'm an American and my flag is in my front porch. If the flag represents america than this court should too. Other than that, you've created what's been made. I fear no evil.
